"11. The co-ordination of all these activities through a central administrative officer or body of the province, state or city having primary jurisdiction, for the purpose of promoting uniformity of action and efficient co-operation.

"In the furtherance of these objects the association appeals for the co-operation of all citizens. It asks them to help in the dissemination of its valuable literature and in the use of the standards of fire protection so carefully worked out by its committees to the end that the lives and substance of our people shall not continue to be dissipated by a reckless and easily preventable waste."

Finances and Membership

Particulars of the increase in membership, and of the financial condition of the association were given in the report of the secretary, from which the following abstracts are taken:—

"Our experience in years past has been that while the rate of our increase is slow, dependent upon the awakening of North America to the significance of the fire waste, members once gained have usually been held. But last year, in spite of increased need of our counsel and literature, 412 names were struck from our rolls, representing a direct loss of nearly 14 per cent. To recover this loss and to save the association from any impairment of its activities, the members have been appealed to to supplement the efforts of the executive office and the membership committee by soliciting new members on their individual initiative. As the 'News Letter' from month to month has shown, a considerable number of our members have loyally made definite effort to secure new members, and the aggregate result of this generous aid has been a list of 527 new names, which, balanced against the losses due to the war, gives us an actual net gain of 115 for the year, or a total associate membership on May 1st of 3,129. Three organization memberships have been lost during the year, reducing this class from 130 to 127.

"Our principal output being in the form of publications, our operating expense has been greatly increased by the rapidly mounting cost of printing and paper, from the present high prices of which no relief seems yet in sight. We shall gain somewhat by the reduction in the first-class postage rate ordered by the United States government to take effect July 1st, but only a positive gain in our membership during the next year, coupled with the most rigid economy, can advance our association on the road to self-support.

"As to general conditions relating to the fire waste in the United States and Canada, they are undoubtedly still far from satisfactory. The abnormal waste still continues in both countries, and while the Canadian government seems to be awakening to the huge cost of fire carelessness to the people of the Dominion, and is taking steps to awaken Canada to this fact, the United States government, by the suspension of the admirably effective fire prevention section of the War Industrial Board, has, since the war, again lapsed into somnolence in this vital matter, with consequent evidences of relaxation of viligance in fire prevention matters officially and unofficially throughout the country.

Government Financial Assistance

A far-reaching resolution, aiming at prevention by educational means, was introduced by Geo. F. Lewis, deputy fire marshal of Ontario, as follows:—

"Whereas the fire waste of North America is upwards of $300,000,000 a year and statistics show that the greater portion of this annual loss is the result of carelessness, disorder and accumulations of combustible rubbish, and is therefore proventible, and

"Whereas it is incumbent on the peoples of the United States and Canada to conserve their wealth and resources during the period of 'reconstruction,' that they may be enabled to compete with the other nations of the world, to meet the demands of commerce, and supply the destitute with the necessaries of life, to the end that hunger, suffering and unrest may be appeased;

"Therefore, be it resolved that we, the members of the National Fire Protection Association, in convention assembled, believing that the time is opportune for launching a comprehensive and aggressive publicity campaign for the purpose of educating the people and bringing them to a realization of their rights, duties and responsibilities as citizens of these progressive and enlightened countries, and which will also tend to make them more careful and improve the sanitary conditions throughout the country;

"Do memorialize the federal government at Washington, the Dominion government at Ottawa, the state and provincial governments throughout the United States and Canada to assist financially and co-operate in the work of this publicity campaign as follows:—

"1. The federal and Dominion governments to grant or appropriate such sum or sums as shall be necessary to defray the expenses of lithographing, posting and maintaining on bill boards a suitable 'poster' throughout the cities and towns of the United States and Canada.

"2. That each state of the Union and each province of the Dominion be requested to assist in the campaign by making an appropriation to advertise the fire prevention and clean-up propaganda in the newspapers of their respective territories.

"3. That all municipalities be asked to co-operate in the work of this campaign during the week of October 9th, 1919, in such manner as is considered best suited to their local conditions.'

Committee Reports

The reports of the various committees on technical subjects occupied most of the time of the convention. Some of them were readily accepted, while others occasioned keen discussion and criticism, particularly the report of the committee on field practice. Mr. John B. Laidlaw, chairman of the Canadian committee, read the following report:—

"The Canadian committee of the National Fire Protection Association desires to express its appreciation on behalf of all the members in Canada, of the action of the association in acceding to the request to change the place of meeting this year to Ottawa, and the committee trust that the members from the United States, as well as from Canada, will enjoy the change.

"During the past twelve months the efforts of previous years along lines of arousing the sense of the people of Canada to the importance of stopping the fire waste, has had results in many sections of the country. This has been evidenced by the appointment of fire marshals, or the increased activity of the work they have been carrying on. In Ontario, which is a leading province of Canada in population and material prosperity, the fire waste has been very heavy of recent years. But the government of the province last year called a fire prevention convention, to which were invited representatives of commercial, manufacturing and financial bodies, also those engaged in welfare work. The convention was a decided success, and as a result the Ontario

OUR RELATIONS WITH GREAT BRITAIN

According to the budget speech of Mr. Austen Chamberlain, chancellor of the exchequer of the United Kingdom, additional taxes will be needed in Great Britain to meet two-thirds of the national expenditure for the current financial year; the remaining one-third must be raised by borrowing. This condition would indicate that not only will a still greater proportion of savings be required by the state in the form of taxation, but also that further funds will be borrowed on capital account to meet war expenditures. There will undoubtedly be a considerable demand for money in private industry, although the experience of the past few months has been that capital investments on account of "reconstruction" are smaller than was anticipated by those optimists who prophesied great activity and high interest rates upon the return of peace conditions.

This situation will mean that while some investment money may find its way to Canada during the calendar year 1919, it will be only at comparatively high rates. In fact, the tendency continues, encouraged by the exchange situation, for British holders of Canadian securities, to dispose of them and take a profit by selling the Canadian funds; the recent purchase by Winnipeg of £110,000 of consolidated stock in London, with funds raised here, is an instance of this. The treasury restriction upon the investment of capital abroad, are only partially removed; the attitude of the investor, however, and the advantages offered by the Canadian field, in comparison with other countries, are the things of real importance in our investment relations with the United Kingdom. It is desirable that our previous relations in some degree be restored, as a supply of funds for private industry would assist greatly in relieving the present industrial conditions in Canada and would forestall the demands being made for the institution of public works of a non-paying character.

An authoritative opinion on this subject was expressed to *The Monetary Times* a few days ago by one who has spent many years in close touch with financial affairs in London, England. "The trend of recent events," he said, "adds piquancy to the attempt to forecast in some general way just when the English market will again be thrown open to foreign and colonial borrowers. Late in March the chancellor of the exchequer announced that new capital issues by British companies for purposes that did not involve any part of the capital being sent out of the United Kingdom would be free from treasury control. At the same time it was decided to remove all artificial restrictions and to set free foreign exchange. Until the full effects of that decision have become apparent and so long as the domestic demands for new capital for trade and industry and national purposes are so pressing, the restrictions upon investments outside the United Kingdom, are not likely to be removed. However, the progress already made in that direction is most significant. As the Britisher is absolutely wedded to the idea of a free market, it is only a question of months before the treasury fully relaxes its grip and permits the large financial houses to play their part. The rapid revival of industry would undoubtedly hasten that event, as large foreign export trade has, in the past, been accompanied by corresponding loans abroad. It must not be forgotten, however, that the chancellor of the exchequer has still to fund into long-term obligations treasury bills amounting to $5,000,000,000, and during the ensuing financial year to raise by his system of continuous borrowing at least $3,500,000,000, to realize the budget estimates entirely, apart from receipts from taxation.

"The drop in the rate of exchange has meant an additional profit to the British holder, and many have taken advantage of higher prices to liquidate Canadian securities since late in March. In many instances, the sellers have expressed a determination to replace these Canadian investments later on when market conditions become more favorable. General confidence in Canada is stronger than ever and the British investor will be found ready and willing to assist most liberally Canadian development in the years to come. Many difficulties, at the moment apparent and hard to overcome, will disappear with the passage of time and the relationship of the pre-war period between Canada and Great Britain will be re-established."

GOVERNMENT FINANCING OF INDUSTRY

THE British Columbia government, in addition to establishing a provincial department of industry, plans also to furnish funds through that department. The "department of Industries Act," recently drawn up, provides that the minister may, upon the recommendation of an advisory council, give financial assistance to any person, partnership, association or company, by way of loan, guarantee, or guarantee of securities, for the purpose of aiding and developing industries and manufacturies, or to establish, maintain and operate such industries. Before granting any loan or guarantee, however, the minister of industries and the advisory council have to be satisfied as to the following points:—

1 The value of the security offered, estimated on the basis of productiveness.

2 The desirability of the proposed loan or guarantee for any of the purposes of the act.

3 The ability of the applicant to make a fair profit from his enterprise.

4 The solvency and the capacity and moral hazard of the applicant, and his earning powers.

5 That the granting of the proposed loan will be of economic benefit to the province.

Among the powers and functions of the department of industries the following may be mentioned:—

1 To Carry out an economic survey of the natural resources of the province, and to furnish advice in regard to the best methods of utilizing such resources.

2 To aid by loan, guarantee, or guarantee of securities on approved plans any enterprise calculated to encourage the economic and commercial manufacture of the natural resources or products of the province.

3 To consider and deal with plans submitted by representative bodies of returned soldiers of British Columbia for promoting and providing for employment through the establishment of new industries and the development of existing industries.

The maximum which the government will be empowered to borrow for this purpose, will be $2,000,000, according to the present draft. While this sum is not great in view of the already extensive debt of British Columbia, there is an important principle involved which should be carefully considered before action is taken. It is one thing to create a department to assist industry by education, publicity and other means to which public action is peculiarly adapted; but it is quite unnecessary and unwise for a Canadian province to risk money raised on the credit of the taxpayers as a whole, to such borrowers as the public officers see fit to favor, when adequate banking machinery exists for such purposes. It is distinctly an injustice to holders of the province's bonds that new securities, ranking equally with those already outstanding, should be issued except for necessary and useful works. We suspect that this measure is in some degree the result of agitation on the part of would-be industrial leaders whose credit is not sufficiently good to satisfy the careful examination of a bank; its adoption will appreciably affect the credit of the province. Investors and bond dealers in Canada, Great Britain, and the United States, will hesitate before loaning money to a province which has embarked on such an uncertain enterprise.

It may be said that this money will be used productively in private industry, whereas if expended on roads or other public works it would to some extent be wasted. The latter can, it has been found by experience, be provided only by public enterprise, and a certain amount of extravagance is inevitable; in the case of the former, however, it is not necessary for the government to intervene at all. The saving attained by pledging the credit of the province as a whole may, and probably will, be more than offset by actual losses, and by the degree to which the standing of British Columbia is affected in the investment world. Government loans on farm property, while not commendable, are at least secured by tangible assets. Loans on personal credit require a careful estimation and a personal relation which a government is peculiarly unfitted to give.

FIRE INSURANCE AND THE PUBLIC

INSURANCE men are still uncertain as to what will be the results of the report recently presented by Justice Masten after a prolonged investigation into insurance in Ontario, other than life and marine. One of the curious features of the report is the public apathy which was evidenced regarding the investigation, in the face of the alleged popular discontent with the condition of the fire insurance business which was the principal reason for instituting the inquiry.

We are of the opinion, however, that this discontent is only in a small degree due to the opinion that fire insurance companies are making large profits. There are certain technicalities to be considered before the rate on any property can be fixed, and the reasons for these are not always clear to the insurer; then there are the adjustments due to local variations in the risk and in the means to prevent fires, as a result of which differences of opinion are bound to occur occasionally between the companies, or the Canadian Fire Underwriters' Association, and the municipal authorities.

There is always a public element which is ready on principle to attack large corporations for the legitimate operation of whose business a considerable capital and the accumulation of certain reserves is necessary. Evidence of this is found in the repeated criticisms of our railways, public utility, industrial, and banking institutions as well as of the insurance companies; a considerable proportion of which criticisms are based, not on an accurate knowledge of the requirements of the business discussed, but on opposition to centralized control through capital of such large business ventures. It is overlooked that modern competition requires size and strength of organization, and "vast accumulations of money" as it was expressed by Wm. B. Ellison in *The Monetary Times* of April 18th, in an article discussing the Masten report. In the case of most of our large fire insurance companies, such accumulations represents little more than is adequate for the proper reserves and the equity which should offset the paid up capital which has been paid into the business; certainly fire insurance companies have not, in recent years, been paying undue dividends, and only too often the shareholders return has been little or nothing. Perhaps the public has been deceived by the amount of the turn-over, overlooking the fact that only a small percentage of premium income is left for the shareholder after all payments are met; in Ontario in 1917, this percentage was less than three per cent., a small item in the cost of insurance.

BRITISH INSURANCE MERGER

Announcement has been made to the effect that the Employers' Liability Assurance Corporation is absorbing the Merchants' Marine Insurance Co. at £15 cash per share. The transaction involves £750,000 cash. The Merchants' Marine will retain its separate identity.

The Employers' Liability Assurance Corporation has an able and vigorous organization in Canada and Newfoundland under the direction of Mr. C. W. I. Woodland, and has long held a commanding position in the insurance world. The company's report for 1918, which appeared in *The Monetary Times* on April 25th, 1919, revealed substantial increases in all departments as compared with 1917.

GOVERNMENT OWNERSHIP OF RAILWAYS

President Beatty Discusses Question at Annual Meeting of Canadian Pacific Railway

IN the course of his address at the annual meeting of the shareholders of the Canadian Pacific Railway at Montreal on May 7th, the president, Mr. E. W. Beatty, discussed government ownership of railways, and stated emphatically that he had no fear for government competition. In outlining the position of the company he said:—

"The gross receipts in the past year were larger than in 1917, but that the net earnings were $12,043,630 below those of the previous year. This was the outcome of increased salaries and other operating expenses, coupled with a decline in traffic following the signing of the armistice. The first three months of this year were disappointing. The results of the year were, however, satisfactory, despite this shrinkage, 70 per cent. of which was the outcome of increased wages.

"The volume both of freight and passenger traffic decreased in comparison with 1917, the increase in gross earnings of $5,148,363 being due to increases in rates granted in March and July of last year. The fact that, notwithstanding the heavy increases in the cost of operation, there was a surplus after payment of all charges and dividends, is a satisfactory evidence of the foresight and wisdom of the shareholders in having approved substantial expenditures in previous years, which undoubtedly permitted the operations of the company to be carried on with a cheapness which would not have been possible had such adequate facilities not been provided. A conspicuous example of the results of such foresight is found in the difference in the cost of rolling stock acquired during the years 1911 to 1914 and the approximate market value of an equivalent amount if required to be purchased in 1918. The rolling stock purchased during the former years, if required to be furnished at the 1918 prices, would have represented an increased cost of approximately $96,000,000.

Extend Lines

"Your directors are of the opinion that a reasonable amount of additional branch line construction should be gone on with as soon as conditions warrant, and the necessary statutory authority obtained. Resolutions will be submitted for your approval for the construction of the lines which are most urgently required. In this connection, I should point out that in the matter of railway construction the country is faced with a condition quite unprecedented in the recent history of Canada, in that the National Railways and your company are the only large companies with resources sufficient to enable them to provide additional railway facilities to any substantial extent.

"Serious and continuing blunders in our railway policy have resulted in the government being required to assume the ownership at present of 11,400 miles of railway, with the prospect of the acquisition of an additional 6,400 miles. When this acquisition has been accomplished the principal competing systems in Canada will be your company and the Canadian National Railways.

"I have no apprehension as to the ability of your company, with its splendid facilities and equipment, and loyal and efficient officers and men, to obtain a fair share of the traffic, and to handle it expeditiously and well. I have no fear of government ownership, but government ownership, apparently, has some fear of private competition under equal conditions.

Danger for Government Ownership

"The subject of government ownership has received much attention recently, but not nearly as much as the importance of the subject justifies. Notwithstanding our previous experience and that of the United States and Great Britain, government ownership and operation of railways is to be attempted on a large scale. The situation is full of danger, which cannot be avoided or even minimized, except by rigorously independent and non-political administration, which is at least difficult of establishment under our system of government. This fact must, however, be obvious—that in no other way can the people of Canada obtain a correct appreciation of the results of government operation of the systems which are or which may hereafter come into its possession, than by their being administered in strict accordance with the laws of the country under which other companies have to operate, by their financial and accounting methods being made as precise and as accurate as the law now requires of private corporations, and by the exact financial results being submitted to parliament each year.

"Different views may conceivably be held as to the wisdom of public ownership and operation of railways. My own views are sufficiently well known not to require repetition, but the fact is, public ownership is already here, and experience only will show whether the difficulties I have mentioned in securing efficient and non-political administration can be overcome, and the country receive an adequate service at a minimum of loss. I am satisfied the government recognizes these difficulties, and that a sincere and determined effort will be made to meet the situation."

SUPPLEMENTARY ESTIMATES $19,000,000

Net Debt of Canada Now $1,584,000,000—Increased $235,000,000 Since the Beginning of the War

SUPPLEMENTARY estimates for the fiscal year ended March 31, 1919, were tabled in the House at Ottawa on May 7th. They total $18,827,098.

The net debt of the country, Sir Thomas White stated, was now $1,584,000,000. Prior to the war it was $235,000,000, so that the increase in the national debt was $1,348,000,000. The war loans outstanding amounted to $1,506,276,922, and the account with the imperial government showed a difference of $200,000,000 to the credit of Canada. He gave the following statement of war costs in summarized form: 1914-15, $60,750,000; 1915-16, $166,000,000; 1916-17, $306,000,000; 1917-18, $343,000,000; 1918-19 (estimated maximum), $450,000,000.

$350,000,000 for Demobilization

The bill to provide $350,000,000 for demobilization and other purposes arising out of the war was considered by the committee. Mr. McKenzie suggested that it should not have been brought before the House until after the budget speech, and he therefore thought that before proceeding to examine in detail the provisions of the bill, the minister of finance should present a statement of war costs.

Sir Thomas White replied that he did not regard it as necessary that the consideration of this bill should await the bringing down of the budget. The budget showed the revenue received during the past year and indicated the amount expected during the coming year, together with proposals regarding taxation to meet the necessary expenditures. However, he said that when he presented the budget he would make as accurate a statement as possible as to the total cost of the war from the beginning, as well as an estimated cost of pensions and other matters which the war had entailed.

Dominion Commission on Industrial Relations

Summary of Evidence Before Early Meetings of Commission—Labor Unrest in British Columbia Revealed — Joint Control of Industry Favored by Many Witnesses

THE Dominion Commission on Industrial Relations commenced its hearings in Victoria, B.C., on Saturday, April 26th, when representatives of local labor were heard. Notices had been sent to all labor organizations, boards of trade and employers in the western provinces, telling of the appointment of the commission and asking for evidence. Similar notice will, of course, be given to organizations in the east.

Robert Donachie, representing carpenters and mill employees, referred to the question of oriental labor. There are, he said, nine mills employing two thousand orientals in the Victoria district. He is in favor of entirely eliminating them. Employers in the district, he said, had confidence in organized labor, and it was merely a question of fixing a wage scale. When the Whitley plan for joint co-operation between employers and employees was mentioned, the witness doubted if it would succeed. Mr. Donachie expressed the opinion that the lack of employment and the insecurity of the wage earner's condition were the chief causes of unrest and considered that it was the duty of the state to guarantee employment to the individual.

A. R. Berry urged the nationalization of all basic industries and the employment of all Canadian labor. He believes that employers in some cases are restricting production in order that greater profits later on would be obtained. In government operations of essential industries he maintained that this production for profit would be eliminated. He did not believe in joint control of industry by labor and capital, but that it should be entirely in the hands of labor.

Victoria Employers Heard

On Monday, April 28th, several employers gave evidence. P. B. Thompson, works manager for the Foundation Co., shipbuilders, suggested that employers did not pay sufficient attention to working conditions and the social welfare of their employees. The demand for labor is not distributed evenly over the twelve months. He does not consider that the wooden shipbuilding industry in British Columbia will be permanent. The principal difficulty just at present is unemployment, which is the result of the lack of public works. On the one hand and of the small amounts of capital being invested in industry. A good many changes are required in the taxation system, and he suggests that a state old-age pension should be provided for all classes, which should be financed by taking a percentage of the worker's income. Mr. J. O. Cameron, president of the Victoria Board of Trade, approved of the plan of selling shares to the workmen and suggested that this should be made compulsory if the latter wanted to buy. He doubted if the majority of workmen would be willing to meet a share of the possible loss. In his own company, the Cameron Lumber Co., the hours of work were fifty-five a week, and meals were provided at a loss to the company. While there was no committee of his own employees, he would have no objection to meeting such a committee, but he would not want to discuss the company's affairs with outsiders. He did not believe that an industrial council of lumber workers and employers would be successful. As regards oriental labor, as a general rule, they did a class of work that is not wanted by white labor. If it was necessary to pay for this labor at the rate paid to Canadian labor, the company, he said, would be forced to close down, as it has to compete in a world-wide lumber market, because the Canadian demand was not sufficient to take care of the output. British Columbia lumber men have organized a co-operative selling company, called the Associated Lumber Buyers, to handle foreign business. Mr. Cameron's suggestion of the best general remedy for the industrial situation is that instead of state ownership of industry, employees should be enabled to buy stock in the concerns in which they work.

Thomas Graham, general superintendent of the Dunsmuir Mines, described a general committee through which the company met once a month and took up any grievances. Conditions in the company's mines were, generally speaking, satisfactory.

Vancouver Situation

On April 29th, N. G. Neill, manager of the Employer's Association of British Columbia, strongly favored the creation of industrial councils for every trade group, a provincial executive of employers and employees, with a court of appeal, and a confederation council constructed on the same plan as a final court. Such a system would, in his opinion, eliminate arbitration and strikes. "Fifty per cent. of the cost of commodities to-day," said Mr. Neill, "is due to friction in our industrial relations." He did not consider employment insurance favorably.

Information was obtained regarding the administration of three Vancouver dairies by a joint industrial council representing employers and workmen. These three concerns have about one hundred employees or seventy-five per cent. of the dairy employees of Vancouver. Ten employees are entitled to one member in the council, the employers having equal representation. There is no profit sharing. The witnesses who described this method were optimistic as to its possibilities.

A deputation from New Westminster gave evidence to the effect that there was no serious discontent there.

The principle of industrial councils was again approved at the session on April 30th, by Mr. W. G. Murrin, assistant general manager of the British Columbia Electric Co., and by Mr. F. M. Sylvester, manager of the Granby Consolidated Mining Co. One council should be formed with each plant and when a thorough test had been made for each organization, and the form of council best suited to individual conditions had been obtained, the plan might be developed in a more general way. Mr. Murrin referred to the difficulties of public utility companies, which were faced with increasing demands, and had a comparatively fixed revenue. Mr. Sylvester described the Granby Company's operations in Anyox, B.C., where over twelve hundred men were employed; orientals were used only in domestic occupations. The men had worked on a sliding wage scale, based on a price of copper, and this had proved satisfactory up to the time when copper prices were fixed. He considered that this system was the most feasible automatic method of dividing profits. The company consulted with the men through the agency of a joint committee which met monthly. The men had no share in the operation of town enterprises except in the case of the hospital.

CREDIT BONDS COVERING SHIPPING CANCELLED

The Canadian Railway Board has announced that the requirement of a bond covering all credit accounts for shippers and consignees of freight had been done away with. The new credit rules call for the settlement of accounts as follows:—

Charges accumulated from the 1st to the 7th of the month must be paid by the 14th; from the 8th to the 14th must be paid by the 21st; from the 15th to the 21st must be paid by the 28th, and so on. Settlement within 48 hours after shipping or after delivery of the freight shall be considered cash in the case of shipper or consignee, respectively.

PERSONAL NOTES

Mr. A. E. Osler, senior member of the firm A. E. Osler and Company, has returned to Toronto after spending the winter in Florida.

Mr. G. H. Duggan, of Montreal, has been elected to the directorate of the Steel Company of Canada, taking the place of Col. Charles Alexander, who has resigned.

Mr. G. H. Turpin has been elected a member of the Montreal Stock Exchange. Mr. Turpin succeeds his late father, W. J. Turpin, who was one of the older members of the exchange.

Mr. Robert Girdlestone, who has been overseas for four and a half years, has returned to Winnipeg and taken up the position of insurance manager with C. S. Gunn an Company, Union Trust Building.

Mr. T. E. Keysell, manager of the fire department of the Employers' Liability Assurance Corporation, at head office, is now on this side of the Atlantic, and expects to visit Toronto and Montreal in due course.

Capt. Æmilius Jarvis, M.C., and bar, who has just returned from overseas, has been admitted into partnership in the firm of A. Jarvis and Company, headed by his father, and will represent them on the stock exchange floor. A Jarvis and Company have just installed private wires between Montreal, New York and Chicago.

Mr. Kenneth R. Schofield has been admitted to the partnership of the firm of F. B. McCurdy and Company, Montreal. The business will be continued under the present name and style of F. B. McCurdy and Company, the partners being: F. B. McCurdy, John R. Macleod, Rupert H. Metzler, Alfred Bowser and Kenneth R. Schofield.

Mr. T. P. Howard, of the Phoenix Bridge and Iron Works, of Montreal, is to be the next president of the Canadian Manufacturers' Association for Canada. Mr. Howard is now vice-president, and the association has an unwritten law that the vice-president shall become president. The annual meeting will be held in the course of a few weeks at which Mr. Howard will be appointed to this post.

Mr. F. S. Long has been appointed manager of the Winnipeg branch of the Royal Trust Co., in succession to F. W. Hartley, who resigned recently. Mr. Long has just returned from overseas, having served with the Thirty-first Calgary battalion, and having been awarded the Military Cross. Prior to the war he was manager of the Bank of British North America at Calgary for several years.

Mr. D. F. Coyle, of the Home Bank of Canada, Winnipeg, is leaving the banking business to enter the railway supply field, attracted by the large development plans for railway companies. Mr. Coyle was for many years associated with the Canadian Northern Railway, and with Mackenzie, Mann and Company, where he secured a most intimate knowledge of the needs of railway construction companies and the requirements of railways for maintenance. He has already opened his offices in Winnipeg and entered on his new occupation.

COMPARATIVE PRICE LEVELS

In a pamphlet recently published by the United States Department of Labor, Division of Public Works and Construction Developments, Mr. T. S. Holden gives a comparison of the maximum rise in the price level of different countries. The increases as compared with 1913 are as follows:—

Country.	Date of latest figures.	Increase shown.
United States	September, 1918	107%
Canada	November, 1918	115%
United Kingdom ...	August, 1918	133%
France	May, 1918	235%

RAILWAYS BILL PASSED IN COMMONS

In the House of Commons this week legislation incorporating the Canadian National Railways was passed. Third reading was given after several amendments had been voted down by the government majority.

ALBERTA TO UTILIZE OWN WOOL CLIP

A new project has been undertaken by the wool growers of Alberta. They are planning to erect a mill at some convenient point in their province which will manufacture their wool into cloth on a co-operative basis. Under the proposed arrangement the farmers will be paid the market price for their wool at the mill, and will also share the profits of manufacturing.

TAX COMPANIES NOT UNDER LEGISLATION

In the Nova Scotia legislature last week Mr. O. T. Daniels, of Halifax, moved the second reading of his revenue bill, entitled "An Act respecting the Taxation of Certain Companies." He said that there were a number of companies in Nova Scotia, with a capital of over $500,000 and doing enormous business, which did not come within the scope of existing revenue legislation. The bill proposed to tax these companies one-twentieth of one per cent. on their paid-up capital. The decision of the provincial secretary should be final. The payments were to be due on the first of January, but not payable until the first of August. The amount paid by the companies under the Supplementary Revenues Act would be deducted from the new tax. Mr. Daniels said that a revenue of $50,000 annually was expected from this source.

NEW BRUNSWICK POWER COMPANY

On April 15th the Corporations Committee of the New Brunswick Legislature heard C. W. Whiting, Boston, on behalf of the city, in regard to the New Brunswick Power Co. bill. He said he could find no reason for the common stock issued except an excuse to secure more money from the public. In reply to Mr. Baxter, he said he had no reason to change his rate base of $1,850,000. He thought that quite enough.

For the company, Mr. Taylor asked for some amendments. He urged that the city should not be given the right to take over the company by expropriation at a cost of $2,800,000, as provided for in the Currier bill. He said that expropriation should be permitted only on the basis of replacement value, and this value had been estimated by one expert to be $5,000,000 and by another $3,200,000. Mr. Taylor said that he accepted the Currier report as that of an independent commission, but he could not agree with their valuation. It was too low. Mr. Taylor asked that provision be made for five instead of four company directors. He also asked for definite provision for a sinking fund, and that the rate of return should be 8 instead of 7 per cent.

The committee met in private in the evening, and by a large majority agreed to accept the report of the Currier commission, thus fixing the amount on which the company is entitled to returns at $2,800,000. The city's contention has been that the rate base should be the amount arrived at by C. W. Whiting, the city's expert engineer and accountant, who reported that the actual investment value was $1,850,000.

The city wins in the matter of extra charges for street pavement and maintenance. The committee adopted the city amendment relating to this matter, providing that the company must pay $500 per mile per year for the upkeep of the streets through which their rails run, remove snow from the track sections and between the rails on double-tracked streets, and also pay for the foundations under their track sections in streets on which the city lays permanent pavements.

United States Investments in Canadian Manufacturing

Three Hundred and Eighty-eight Plants Here Connected With United States Manufacturing Concerns, Representing an Investment of $264,939,592—In Some Cases Control Has Been Transferred to Canada—Considerable Increase in Investment During Past Five Years

THERE are now three hundred and eighty-eight manufacturing plants in Canada which are connected with similar concerns in the United States, according to a list collected by *The Monetary Times*, and given below. The total investment is estimated at $264,939,592. In the case of 76 of the companies the actual paid-up capital has been obtained, being $51,895,350, an average of $682,834. The 76 for which the capitalization has been obtained are fairly representative of the whole list, and this average has been used in estimating the total investment in all the plants.

A similar list was compiled by *The Monetary Times* in January, 1914, the number of plants being then estimated at four hundred and fifty, and the total investment $135,000,000, an average of $300,000. A considerable number of branches included in that list, however, were mere distributing agencies; the intention has been to eliminate these entirely from the present list, and include only those involving the investment of capital in such fixed forms as manufacturing premises and machinery. This has eliminated a number of names from the list. Some of the concerns previously included have since 1914 passed entirely into the hands of Canadians and these have also been struck off; while they generally speaking, manufacture lines in Canada similar to those manufactured in the United States by the company or companies which originally established the branches here, yet they no longer represent the investment of any great amount of American capital on this side. On the other hand there have been a large number of plants established here during recent years with American capital, and the net decrease in the number of plants is small. The average investment has increased substantially, not merely as a result of the elimination from this list of the distributing agencies mentioned above, but also owing to the increase of business in Canada.

While the intention has been to limit the list to concerns representing the investment of American capital here there are a few given below which are not controlled either by a parent United States company or by shareholders in the United States. In the great majority of cases, however, the Canadian branches are either owned entirely by the American parent companies or are controlled by them through the ownership of a majority of common stock.

This list does not represent the investment of United States capital exclusively as the lists of shareholders of many of the Canadian concerns include a considerable proportion of Canadians. On the other hand there are a large number of companies not included in this list, the shareholders of which include many citizens of the United States. In the case of some enterprises, for instance, which have always been distinctly Canadian, a majority of the stock is now held in the United States. The total investment represented by the list given below may, therefore, safely be considered as the amount of United States investments in Canadian manufacturing.

In some cases the United States concerns have entered the Canadian field directly without securing a Dominion or Provincial charter. In these cases, therefore, there is no separate capitalization for the Canadian end of the business, and the capital investment here cannot be obtained. Where a separate charter has been taken it is not always possible to ascertain the amount of the actual investment; the paid-up capital has been obtained, however, in a sufficient number of cases to constitute a basis for determining the average investment.

Is It Fair to Make Your Friend Your Executor?

Perhaps you feel you honor him with your trust. You certainly burden him with a great responsibility. Few individuals can spare the time and few have the ability or experience to properly carry on the duties of Executor of an Estate. Our thirty-six years experience in the care and Management of Estates and Trusts is evidence of our worthiness to be appointed your Executor. Write for our Booklet "A Talk With a Business Man.

THE
TORONTO GENERAL TRUSTS CORPORATION

Hon. Featherston Osler, K.C., D.C.L., *President*. A. D. Langmuir, *General Manager*. W. G. Watson, *Asst. Gen. Manager*

HEAD OFFICE - 83 BAY STREET, TORONTO

Canadian Financiers Trust Company

Head Office - Vancouver, B.C.

TRUSTEE EXECUTOR ASSIGNEE

Agents for investment in all classes of Securities
Business Agent for the R. C. Archdiocese of Vancouver
Fiscal Agent for B. C. Municipalities.

Inquiries Invited

General Manager Lieut.-Col. G. H. Dorrell

The Old Way and the New

The Old Way was to appoint a friend Executor. The New Way is to appoint a Trust Company. Its financial responsibility, permanent organization and experienced officials make it a much preferable appointment. We suggest as your choice,

Chartered Trust and Executor Company
46 KING STREET WEST, TORONTO

Hon. W. A. CHARLTON, President
JOHN J. GIBSON, Managing Director

5% Absolute Security

OVER 200 Corporations, Societies, Trustees and Individuals have found our Debentures an attractive investment. Terms one to five years.

The Empire Loan Company
WINNIPEG, Man.

The Benefit of Experience

Because this trust company handles many estates, it is able to render special service by employing scientific accounting methods, the best legal talent and sound information about investments. This extra service is obtainable at no greater cost to the estate than that of an individual executor.

Union Trust Company
LIMITED
Head Office:
Cor. Bay and Richmond Streets, Toronto
Winnipeg London (Eng.) 151

Canadian Guaranty Trust Company
HEAD OFFICE, BRANDON, Man.

Board of Directors:
Alex. C. Fraser, President.
Lt.-Col. A. L. Young, Vice-President.
John R. Little, Managing Director.

William Ferguson, H. L. Adolph, John A. McDonald, Hon. W. M. Martin, M.P.P., Alex. A. Cameron, Alex. Rose, E. O. Chappell, J. S. Maxwell, G. S. Munro, F. N. Darke, D. A. Reesor.

Acts as Executor, Administrator, Trustee, Liquidator, Guardian, and in any other fiduciary capacity.

Branch Office - Swift Current, Saskatchewan

The impartiality of the acts of a TRUST COMPANY and its freedom from improper influences are some of the advantages offered in

The Management of Estates

We will gladly discuss this matter with you.

Much Depends upon your Choice

When you choose an executor you make a decision of far reaching importance.

Shall it be The Canada Trust Company—"a safe executor"—or an inexperienced individual?

"John Stone—Pioneer" decided unwisely. Our booklet, which is true to life, tells why. Ask for it.

GAS FRANCHISE GRANTED BY MOOSE JAW

The Moose Jaw city council has accepted the agreement offered by George A. MacKenzie, of Calgary, and his associates to supply the city with natural gas, and the agreement will be submitted to the burgesses for ratification on May 19. It provides that the company will supply the gas to the city limits at 20 cents per thousand cubic feet, and will sell to the consumers at that figure plus a reasonable profit. When the consumption of the city has reached fifteen million cubic feet per day the rate will be decreased to 18 cents per thousand, and when twenty million cubic feet is reached a further reduction to 15 cents will be made. The company is to be granted an exclusive franchise for twenty years, and agrees that it will not sell to any other city within sixty miles at a lower rate than to this city. Development work will be commenced within sixty days of the ratification of the agreement.

DEBT HAS NOT INCREASED DURING WAR

Premier of Prince Edward Island Describes Provincial Finances in Budget Speech

THE budget speech of the Prince Edward Island government was given on April 24th, by the premier, Mr. A. E. Arsenault. He stated that only as regards two items did the expenditure exceed the amounts voted and these were for the Department of Public Works and for the Board of Health. In the former case it was due to extensive costs.

Reviewing the period since December 2nd, 1911, during which his party has been in power, the premier stated that the debt had decreased by the slight amount of about $10,000. No other province has reduced its debt during this period, but practically all of them show a large increase. In 1891 the debt of the province was $171,000 according to a special audit made for the year, and in December, 1911, a second special audit ascertained the debt to be $1,072,000. An audit just completed estimates it at $1,062,000.

The statement of liabilities as at the end of 1918 prepared by the external auditor is as follows:—

Liabilities.

Balance, Current account, 31st December, 1917		$ 379,075
Expenditure, 1918	$506,047	
Receipts, 1918	501,847	
		4,200
		$ 383,275
Due loans	$ 91,340	
Due bank	366,935	
	$458,275	
Less, Victory bonds	75,000	
	$383,275	
Accrued interest bank		$ 3,404
Accrued interest loans		2,835
Accrued interest debentures		6,134
Accounts payable, public works		33,340
Incomplete contracts, public works		5,270
Acounts payable, treasury		2.026
Teachers salaries, grants and supplements accrued		24,163
Debentures and special short term loan		601,987
		679,162
		$1,062,438

BANK LOSES BY FRAUD OF CUSTOMER

The Banque d'Hochelaga recently lost $46,648 which it had advanced to the Lalonde Co., Ltd., on the strength of certificates accompanying promissory notes purporting to show that the company had executed certain work for the Imperial Munitions Board, and was, therefore, entitled to payment from the latter. The certificates were issued by an inspector of the Canadian Inspection and Testing Laboratories, Ltd., which did the inspecting for the Munitions Board. The inspector had left blank signed certificates with the Lalonde Co., which had filled them in, representing work which had not been done. When the Lalonde company became insolvent the bank then sued the Canadian Inspection and Testing Laboratories, Ltd., but the court held that the fraud was on the part of the customer, and the bank could not, therefore, secure judgment.

The Alberta-Saskatchewan Life Insurance Co. will, at the present session of the Dominion parliament, apply for an act changing the name of the company to Provident Life Assurance Co. of Canada.

NATIONAL FIRE PROTECTION CONVENTION

(Continued from page 8)

Fire Prevention League was formed. This league has since been incorporated by the government, and through it the fire marshal will carry on an active campaign to arouse the public to the need of fire prevention, and to stimulate the activities of local fire prevention leagues. It may be mentioned that two ladies who had been prominent in social welfare work are on the executive of the league. The fire marshal's department has been active in promoting the formation of local chapters of the league, and several public meetings have been held in connection with the organization of such, in the larger cities and towns of the province. The department has also issued a number of pamphlets and information to the daily press, as well as a booklet entitled "Fire Prevention on the Farm and Elsewhere," of which 190,000 copies have been issued.

"The Ontario Fire Marshal Act was amended at the last session so as to give greater powers to the fire marshal, and make his work more effective in correcting unsafe conditions when and where discovered. The Dominion government have also taken action, and under their auspices, the Dominion Fire Prevention Association has been formed, having representatives from all the important financial, commercial and manufacturing associations in Canada.

"At a convention of this committee, held last December, at Ottawa, several important recommendations were made, looking towards the lessening of the fire waste. These have been carefully considered by all parties interested, and are to be reconsidered at a meeting of the committee to be held at the close of this convention. The Dominion government will endeavour to make the recommendations of this fire prevention committee effective, and, as a preliminary, has had parliament pass an amendment to the Criminal Code, which has been already referred to and explained, which makes those who neglect to comply with an official order for the correction of unsafe conditions, criminally liable if loss by fire occurs because of such neglect. The Dominion government have also recently appointed Mr. J. Grove Smith, as Dominion fire commissioner to carry on an active propaganda for fire prevention.

"This is a democratic country, and our laws must have the support of public opinion, if they are to be properly enforced. It is hoped that permanent organizations may be formed everywhere to carry on the work of fire prevention, even if the public mind should for a time be diverted to other subjects.

"It is hoped that this meeting of the National Fire Protection Association in Ottawa, will strengthen and support the various efforts which are being put forth in Canada towards fire prevention and conservation of property."

Other features provided included a luncheon on Wednesday, arranged by the Canadian committee, and presided over by Mr. W. H. Shapley, chairman of the Dominion fire prevention committee. Hon. Arthur Meighen, Canadian minister of the interior, was the principal speaker, and he commended the spirit of co-operation shown by the organization. On Wednesday afternoon the new parliament buildings, now in course of completion, were inspected, a display was given by the Ottawa fire department, and a visit made to the Royal Mint and other attractions of the city. In the evening a public fire prevention meeting was held in the Ottawa collegiate, at which addresses were given by A. R. Small, of Chicago, on the "Underwriters' Laboratories," and by F. H. Wentworth, secretary of the association, on "the National Fire Protection Association,—International." On Thursday the delegates were the guests of the mayor and council of Ottawa. Towards the close of the convention, the committee on resolutions presented its report.

New Officers

The nominating committee submitted the following names for the year 1919-20, and these were elected to the offices named:—

For president, Mr. F. J. T. Stewart (New York), for first vice-president, Mr. H. O. Lacount (Boston, Mass.), for second vice-president, Mr. W. E. Mallalieu (New York), for secretary-treasurer, Mr. Franklin H. Wentworth (Boston, Mass.); for chairman of executive committee, Mr. Rudolph P. Miller (New York); for executive committee (for three years), Mr. D. Knickerbacker Boyd (Philadelphia), Mr. J. H. Brumbaugh (Chicago), Mr. John H. Kenney (Baltimore), Mr. John B. Laidlaw (Toronto), Mr. Willis O. Robb (New York); (for two years), Mr. Edmund L. Sanders (Worcester); for nominating committee (1920), three members, Mr. F. E. Cabot (Boston), chairman, Mr. W. H. Merrill (Chicago), Mr. T. B. Sellers (Columbus).

WANT PASSAGE OF BANKRUPTCY ACT DEFERRED

At a meeting of the Regina Board of Trade last week, while expressing accord with the principle of a Canadian Bankruptcy Act, the members went on record as favoring that any action on the present bill now before the House of Commons be deferred until further publicity could be given to it.

The Canadian act, it was explained, was drafted along the lines of the American act, which, in turn, was founded on the act of Great Britain.

L. V. Kerr expressed the opinion that the time for the passing of the act was very inopportune, following upon five or six years' depression. It would follow that there would be many bankrupts. The retail merchants, he stated, favored a bill of the sort, but there were some features of it they could not support.

An amendment was then offered stating that, while the board favored the principle of a Bankruptcy Act, it was of the opinion that definite action on the present bill should be deferred until wider publicity had been given to it.

BRITISH SHIPPING INSURANCE SCHEME PROFITABLE

The British government scheme of insurance (shipping losses, aircraft and bombardment) produced $988,989,000 in premiums, while the losses totalled $857,314,000, leaving a credit balance of $131,675. It is explained in a preliminary statement of results that amounts due to the Allies will reduce the credit balance to about $85,000,000.

No less than $53,200,000 of the latter sum is represented by profits on insurance of property against aircraft and bombardment risks, the figures being:—

Premiums	$68,050,000
Claims paid	14,850,000
	$53,200,000

This huge profit was made in spite of the fact that since February, 1917, a discount of 50 per cent. was allowed on the original premium rates.

One of the first insurances effected after the outbreak of war was in October, 1914. An arrangement was made for the shipment of gold belonging to the Russian government from Archangel to England by two of His Majesty's ships. The insurance was at the special rate of 1 per cent., to cover all risks, and the total premium received was $399,865, so that the two ships carried nearly $40,000,000 in gold.

Insurance of the hulls of British steamers produced in premiums over $400,000,000 and yielded a profit of nearly $80,000,000. On the other hand, there was a loss of $4,880,000 on the insurance of the hulls and gear of British fishing vessels.

Under the first of the two government insurance schemes there was a loss of $55,000,000 on the insurance of the cargoes of British ships, the premium amounting to $242,500,000, and the compensation paid to $297,500,000. Premiums to the amount of $57,500,000 were paid under the later scheme, which yielded a profit of $17,500,000.

ROYAL EXCHANGE ASSURANCE

Assets Increased by Nearly $5,000,000—Now Stand at the Magnificent Sum of $50,000,000

An analysis of the report of the above named corporation for the year ending December 31st, 1918, which has just been received, reveals some interesting figures, and proves conclusively the outstanding position this company occupies in the realm of insurance.

Incorporated in 1720 (almost two centuries ago), this old and tried company, with offices practically the world over, has gone on from year to year occupying a larger and more important place in the insurance world.

During the year just closed the assets of the company, (all of them most carefully selected from among the highest grade securities), have increased $5,000,000 over the previous year. The total assets of the corporation now stands at the very substantial figure of well over $50,000,000, while reserve funds during the year just closed have also been considerably strengthened.

While the statement under review reveals growth in all departments of the corporation's activities, the following excerpts, taken from the report covering the fire and accident departments, will be of special interest.

Fire Department

During 1918, the company took in this department in net premiums the sum of $6,279,620 as compared with $5,589,4[illegible]0 in 1917, an increase of almost one million of dollars. After providing for all losses on claims known to have occurred on or before December 31st last, the total losses for the year amounted to $2,978,580. This gives a loss ratio of 46.69 per cent., which compares with 51.1 per cent in 1917. The sum of $500,000 was added to the fire fund, this fund now having reached the substantial sum of $3,571,850. The profits in this department during the year were $655,167.

Accident Branch

In this department the net premium income amounted to $2,207,356 as compared with $1,822,237 in 1917. The losses paid during the year amounted to $814,924, while the profit for the year was $296,559.

Total Profits

The total profits from the fire, marine, accident and trustee and executor departments of the corporation amounted to $1,953,588. Of this amount $105,000 has been provided for losses due to the war; $50,000 was transferred to the staff pension fund; a sum of $750,000 has been set aside as a special reserve fund; the fire fund was strengthened to the extent of $500,000.

The splendid report for 1918, reflects in a most convincing manner the sound and reliable policy which the corporation has pursued during its long and honorable career.

It is now eight years since the Royal Exchange commenced business in Canada, under the able direction of Mr. Arthur Barry, a capable and cautious underwriter. During the year just closed the net fire premiums collected in Canada amounted to $614,421 as compared with $517,971 in 1917, or nearly $100,000 of an increase. During 1918, the company in Canada enjoyed the very favorable loss ratio of 43.67 per cent.

Mr. Barry has in Mr. J. A. Jessup, who is in charge of the casualty branch, an excellent lieutenant. Here, too, the results for the year just closed, have been very satisfactory.

The local directors of the Canadian branch of the Royal Exchange Assurance are; Sir H. Vincent Meredith, Bt. (Montreal), chairman; H. B. MacKenzie, Esq., Sir Lomer Gouin, K.C.M.G., J. S. Hough, Esq., K.C. (Winnipeg), and Col. B. A. Weston.

The annual meeting of the Imperial Bank of Canada will be held at the head office, Toronto, on May 28th, 1919.

FRATERNAL INSURANCE LEGISLATION

Dominion Bill to Bring Fraternal Societies Under Control Has Passed Second Reading

The bill of the Dominion government to amend the Insurance Act, 1917, in order to bring fraternal insurance societies under stricter control passed its second reading in the House of Commons on April 22nd. The object of the bill is explained in a memorandum prepared by the Superintendent of Insurance and read by Sir Thomas White when he moved the second reading, as follows:—

The object of this bill is to provide additional safeguards for the members of fraternal benefit societies operating in Canada, and to make it necessary for foreign fraternal societies to obtain licenses under the Insurance Act before transacting business in Canada.

The Insurance Act as passed in 1917, and as it has existed since 1885, exempts from its provisions fraternal benefit societies, and at the present time the only fraternal benefit societies licensed under the act are those societies which have been incorporated by the Dominion parliament and whose charters require them to obtain such licenses. Of these, there are at present seven. There is, in addition, one provincially incorporated society which has voluntarily submitted itself to the provisions of the act.

In addition to these societies there are operating in Canada sixteen foreign fraternal societies and a large number of fraternal societies incorporated by the legislatures of the various provinces.

The Dominion parliament has jurisdiction to require the foreign societies to obtain licenses before transacting business in Canada, and this requirement is imposed by the bill.

For foreign societies not now transacting business in Canada the bill provides that they must be actuarially solvent before obtaining licenses.

For the sixteen foreign societies now transacting business in Canada, many of which are actuarially insolvent, the bill provides that they may receive licenses up to 1925, provided they properly secure their new members by deposits in Canada, held for their protection exclusively. After 1925, however, the societies must be entirely solvent if their licenses are to be continued.

Foreign societies now transacting business in Canada which are unable to get a license may continue business in respect of existing policies without incurring penalty.

Parliament has not the same jurisdiction in respect of the provincial societies, and the provisions of the bill are that these societies may obtain licenses under the act if they are actuarially solvent, but they are not compelled to do so.

If such a society applies for a license and is not actuarially solvent, it may obtain a license until 1925 if it either deposits with the minister securities to fully protect new members, or creates a separate class, whose fund is actuarially solvent, into which new members will be admitted. After 1925 the license will be continued only if the society as a whole is actuarially solvent.

One of the most important provisions of the bill is that requiring annual valuations by an actuary, and an annual certificate by an actuary that the society is actuarially solvent.

The standing of the actuary is assured by requiring that he shall be a Fellow of the British Institute of Actuaries, or the Faculty of Actuaries of Scotland, or the Actuarial Society of America. It is believed to be essential that the many serious problems facing these societies should be dealt with by actuaries of the highest standing.

The bill repeals certain sections of the act respecting assessment companies under which the licensed societies have been operating, and which have been for some years more or less inapplicable to these societies, and substitutes a new Part IIA applicable solely to fraternal societies.

The bill also repeals the exemption granted to fraternal societies.

MORTGAGE AND TRUST COMPANIES' ASSOCIATION

Report of Executive Committee—Investments of Trust Companies—President's Address

At the annual meeting of the Mortgage and Trust Companies' Association of British Columbia, on April 15th, a brief account of which was given in *The Monetary Times* last week, the report of the executive committee was submitted.

Only two special meetings of the association were held during the year. At the second meeting resolutions were passed in favor of new legislation regarding the Supreme Court rules, foreclosure, water and light rates, tax certificates and receipts, and the Land Registry Act.

The opinion of the association's solicitor on these points was obtained and also as regards the appointment of trust companies as official administrators and as to the right of trust companies to invest in British Columbia municipal securities. The solicitor's report, submitted at the annual meeting, expressed the hope that the Supreme Court rules could be amended as desired. Regarding the new municipal act, which was given its first reading at the session of the provincial legislature which just closed, he states that he is satisfied he can have any reasonable provisions, which the session may decide upon, inserted. Light companies will come within the jurisdiction of the new "Public Utilities Act" which it is expected will relieve their present difficulty. Water rates are not embraced in the "Public Utilities Act" but the solicitor suggests that they might be brought under its provisions. The proposed new "Land Registry Act" was not introduced at the recent session, copies of which will be circulated among those interested.

The solicitor reports that after conference with the inspector of trust companies and the attorney-general it was decided that a legislative amendment would not be necessary to make a trust company eligible to act as official administrator; in fact a trust company was recently appointed official administrator by the courts.

The session has been urging that trust companies be permitted to invest in British Columbia municipal securities. No amendment was secured this session, however, but the government gave definite assurance that the subject would be dealt with before the next session. The minister of finance has stated that if he opened up the act at all he would amend it in other respects, one of which would be to alter the provision allowing trustees to invest in mortgages and real estate.

The president, Mr. G. L. Smellie, referred in his address to general conditions in the provinces and stated that payments upon obligations have shown a decided improvement; this is partly the result of the demand made upon British Columbia resources for war materials. · Referring to ininvestments in the province, he said: "Our particular work will be to advise the government as to changes in legislation that will establish greater confidence abroad in investments in this province. It is only by the proper application of capital and labor that we can hope to make the best use of our resources, and it is hardly necessary for me to remind you that you can only borrow when conditions are such as to make the lender feel confident, not only as to the substantial resources of the province, but in the wisdom and probity of its governing bodies."

REALIZE $6,865,047 UNDER WAR TAX ACT

In answer to a question by Sir Herbert Ames in the Commons this week, the government stated that 5,885 persons, giving their vocation as farmers or stock-raisers, had been assessed under the income war tax, 1917, for $417,349. The number that paid was 3,623, and the amount, $219,826. The government further informed him that the number of firms which had paid under the Income War Tax Act up to April 30th last was 32,715, and the amount paid was $6,865,047.

NEW FINANCIAL PARTNERSHIP IN MONTREAL

Mr. Wilfrid McCormack, who has been with the firm of Bryant, Dunn and Co., Montreal, for the past fourteen years, and Mr. Frank E. Ross, who was in the contracting business before leaving for the front, where he spent three years on active service, announce the formation of a new financial partnership. The new firm is located at 82 St. Francois Xavier Street, Montreal.

BANK MUST DELIVER ENEMY-OWNED MONEY

Justice Duclos, of Montreal, on May 3rd, dismissed the petition made on behalf of the Canadian Bank of Commerce for power to retain enemy money held by its liquidation for debts owed the bank by German and Austrian enterprises.

The judge directed the bank to file a claim on enemy-owned money in the bank, to be confiscated by the federal custodian of enemy property at Ottawa. The bank claimed $152,456, and held $91,000 of enemy funds.

NATIONAL BANK OF COMMERCE MONTHLY

A comprehensive publication is to be issued each month by the National Bank of Commerce, New York, with the title of "Commerce Monthly." The initial number is that of May, which has just appeared. The leading article is entitled "Apportioning American Capital," being a discussion of the best employment of American investments from the point of view of good business and good citizenship. Other articles are: "Legislation affecting Business Men"; "Tax Exemptions of U.S. War Obligations"; a table of wholesale prices showing the actual trade quotations of leading commodities from 1913 down to the present; "The Money Market"; a general "Market Letter"; "The Loan Act and Foreign Exchange"; and an exhaustive article on the "American Woolen Industry." The purpose of the magazine is described as being "to serve as a medium through which the experience and investigations that have proved useful to this bank in the fields of industry, commerce and finance may be shared with its friends."

LIFE UNDERWRITERS TO MEET IN CALGARY

The Dominion convention of the Life Underwriters' Association of Canada, which will be held at Calgary this year, August 19th to 22nd, promises to surpass, in attendance at any rate, any similar gathering of life men of the past. The association has a membership of over twenty-one hundred, an increase of some eight hundred over last year's high-water mark, and it is expected that at least one-half the total membership will make the trip. Every western member will be there, and the "wise" ones are expected from the east. The convention certainly affords a splendid opportunity for the eastern underwriter to see the prairies at their best—harvesting time; also to give the "once over" to Sunny Alberta and the Rocky Mountains. Several of the Canadian and American companies will hold their own conventions at Calgary immediately preceding or following the big convention. Preparations are being made to accommodate a crowd that will set a new mark for convention attendance.

The Great American Insurance Co. has subscribed for $1,000,000 of the Victory Liberty Loan notes. This subscription brings the company's total holdings of Liberty bonds to $6,375,000. In addition, the company holds $2,050,000 United States certificates of indebtedness and $240,000 Canadian Victory bonds.

IMPERIAL CANADIAN TRUST COMPANY

During the year 1918 the Imperial Canadian Trust Co., of Winnipeg, made a net profit, after deducting organization and management expenses, interest on deposits, etc., of $20,029, which was entirely carried forward to the credit of the profit and loss account. The balance sheet as at December 31st shows a reserve fund of $104,311 and a contingent reserve fund of $100,000. The paid-up capital stock is $912,500, guaranteed investments $235,000, and deposits $80,931. Assets on capital account total $1,461,919 and those on estate, trust and agency account amount to $5,571,4[illegible]4.

The principal officers of the company are W. T. Alexander, general manager; W. W. Evans, assistant general manager, and F. H. Alexander, secretary.

MUNICIPAL FINANCE

Port Arthur, Ont.—At a meeting of the council last week it was decided to hold another tax sale, probably in September.

St. Hyacinthe, Que.—La Compagnie de Phonographes Casavant, Ltd., $75,000; J. C. Casavant, S. Casavant, C. J. Laframboise.

Vernon, B.C.—The city council has definitely fixed the tax rate for the current year at thirty-four mills. This is a reduction of two mills from the previous estimate of the finance committee, and is the same rate that obtained last year.

Cobourg, Ont.—The finance committee has settled on a rate of 36 mills for public school supporters, and a little less for separate schools. The municipal rate, including county rate and local improvements, amounts to 21.10. The rate last year was 38 mills.

Belleville, Ont.—The assessor's report of the city for 1919 shows that the value of property in the city is $6,620,005, business assessment $519,375, and taxable income $352,760; total, $6,620,005, an increase of $198,345. The population is 12,345, an increase of 338 over last year.

Nanaimo, B.C.—The estimates for the year, presented to the council last week, anticipate receipts from all sources of $128,713. The estimated revenue of the current year is over $13,000 in excess of the estimated revenue for 1918, while the expenditure for the current year, it is anticipated, will, after looking after all ordinary expenditures, permit of $7,798 being available for street improvements.

South Vancouver, B.C.—South Vancouver properties in arrears for taxes up to and including 1917, will be sold on September 10th, according to a by-law passed by Commissioner Gillespie recently. Delinquent taxpayers will have the privilege of entering into an agreement to consolidate their arrears and to spread the payment over a period of ten years, providing that the 1919 taxes are paid in full.

The commissioner is fixing July 1st as the first penalty date, when 10 per cent. will be added to unpaid taxes. October 1st will be the date of the second penalty when an additional 5 per cent. will also be added. This is done in accordance with a recent amendment to the Municipal Act.

Haileybury, Ont.—The municipal budget was presented at a special meeting of the town council recently. The public school supporters in the town will be asked to pay a 42 mill rate, while the separate school supporters face a 48 mill rate. For all purposes, including education, the municipality must raise close to $60,000, of which the schools will take over $25,000.

Estimates presented by the chairman of the various committees were as follows:—Fire and light, $8,835; streets, $4,200; police, $2,100; finance, $7,600; waterworks, $9,650, a total of $32,385. The requisition from the public school board was for $14,000, the separate school estimated its financial needs as $6,500, and the high school board asked for approximately $5,308. The total amount to be raised by taxation in the town is $58,193.

Regina, Sask.—The wooden water mains in the business district are to be replaced by cast iron or steel pipes. This faces the city with an expenditure of over $60,000.

The general assessment of all lands in the rural municipality for 1919 will be made by taxing the assessed value of each parcel of land in the municipality according to the revised assessment roll for 1918 and increasing or lowering the value of each parcel according to the order issued by the Wild Lands Tax Commissioner. Where advice has been received from the said commissioner that the assessment will not be changed then the values of each parcel as assessed in 1918 will be the values for assessment purposes for 1919. Lands that may be included in the assessment roll for the first time will be assessed by the assessor at a valuation bearing a fair and just proportion to the values at which other lands in the municipality are assessed.

Edmonton, Alta.—A rate of 35 mills is estimated for this year according to a statement given out by Mayor Clarke, who says:—

"While it is yet impossible, owing to appeals pending against the 1919 assessment, to give definite figures, it is apparent that a substantial reduction in the assessment of real property has been given effect to. Last year the assessment for municipal purposes was about $91,900,000, made up of $76,500,000 on lands and $15,400,000 on improvements and buildings. Although the present year's figures are not available it is understood that the reduction on the assessable value of land will be about 20 per cent. Assuming that the net assessment on the lands, therefore, may be $61,000,000, and on improvements $16,000,000, the whole assessment for municipal purposes may be $77,000,000."

On this basis it is possible to make an approximate forecast of the probable mill rate for the present year. According to departmental estimates dealt with by the finance committee, the amount required for general municipal purposes will be about $850,000, after allowing for estimated business and income tax levy. This, however, does not include any estimate for reserve against uncollectable taxes for which reserve was made last year. General debenture debt interest and redemption charges, $876,899, are very slightly less than last year.

Windsor, Ont.—A writ has been issued by the county of Essex, against the city of Windsor, for payment of monies alleged owing, and falling due for maintenance and construction of good roads in the suburban area. The total amount claimed is $40,875.80.

The amount already alleged to be due by the city is $7,605.80, made up as follows:—For the year 1916, $1,388.58 and interest $138.64; for 1917, $2,013.42 and interest $125; for 1918, $3,891.51 and interest $48.64. The anticipated expenditures for 1919 are $33,270, which brings the grand total up to $40,875.80.

Under the Highways Improvement Act and the Ontario Highways Act a commission of three is appointed to determine the roads to be included in the suburban area. One commissioner each is named by the county and the city, and these two appoint the third.

The personnel of the commission is J. F. Millen, county registrar, for the county; Mr. Fritz Bridges for the city; while the third was the late Judge J. O. Dromgole.

"The city anticipated the suit," Mayor Winter said, when asked regarding the action started by Essex County against Windsor to recover the alleged share of the city in the cost of improving and maintaining good roads in the suburban area.

"The suit was expected because that is the only way the question in dispute of the extent of the suburban area can be solved. The county claims it is right and we think we are right, so the court will have to decide."

Greater Winnipeg Water District.—A financial statement for the year ended December 31st, 1918, has just been made public. The condensed statement of expenditures made up to the end of that period shows a total of $14,822,444 which is represented on the liability side by debentures and prescribed stock to the amount of $13,294,588, bank overdraft, accounts payable, etc.

That the Greater Winnipeg Water District Railway would show profits, or at least, a revenue far over the estimates which were already sufficient to cover expenses, if the gravel pits along the lines were operated on a business basis, was the contention made by R. D. Waugh, at the regular meeting of the water board on May 1st.

Mr. Waugh pointed out that the estimated revenue per year had been $35,000, and for the last six months it had totalled no less than $43,000. Excursions to the lake would also mean a very considerable source of revenue, and he had already more than a dozen applications for such excursions.

The figures he submitted to the board showed estimate cost of operating railway for one year, $81,350. The earnings for six months, from October, 1918, to March, 1919, amounted to $43,000. The estimated cost of operation of the aqueduct itself amounted to $35,500 for one year, and it was pointed out that in the original report Messrs. Herring,

Stearns and Fertes, experts who examined the first scheme, had estimated the cost of operation at $40,000 per year, not including the amounts to be paid for interests, sinking fund and taxes. The present estimate of $35,500 included all administrative expenses.

Montreal, Que.—It is expected that there will be keen opposition at the next meeting of the city council, to a report the Administrative Commission will make concerning the imposition of a local improvement law.

The concise meaning of the contemplated law was that proprietors must pay the cost of permanent pavements laid in front of their respective properties. "The custom in the past," said Ald. Dixon, "was for the city to 'borrow' for all permanent work, with the result that to-day there is a debt of over one hundred and twenty million dollars, and annual interest charges of over six and a quarter millions. Now, it stands to reason, that such a mode of running a city is unbusiness-like. It is because of the difficulties they are faced with that the Administrative Commission has decided to come before the city council with the question of adopting a local improvement law. I understand, however, that the commission intends to so frame this measure that, for the time being, permanent pavements will only be given certain proprietors if they 'ask' for them. On main thoroughfares through the public interest may be such that the law will 'order' permanent works—the riparian proprietors paying for same in ten yearly payments."

The view is advanced by Ald. Dixon that, if a general local improvement law is passed, it should be framed in a manner that all exempt properties would in future have to pay for new pavements laid in front of them. This had not been done in the past. He did not think it would be a hardship for properties belonging to the government, the legislature, etc., to contribute to the civic treasury for permanent sidewalks and permanent pavements. Surely it was enough that such properties were exempt from paying all real estate taxes. "When it is considered there is in the city to-day exempt reality to the amount of $256,000,000," he said, "it would mean a considerable item to the treasury if they paid for their permanent improvements. The plain truth is the realty tax is so heavy to-day that the question of lowering the huge exemption list is becoming more and more a matter of urgency."

Calgary, Alta.—The annual statement of the city auditor has just been completed. It shows that the city ends the year with a deficit of $96,061 on its general revenue and expenditure accounts. This deficit will have to be taken care of in the 1919 estimates. Features that have been taken care of, however, show that the special levy carried to reserve was $172,000; the amount written off the doubtful taxes account, $15,000, and the special levy to the sinking fund, $27,084. The utilities show results for the year's operations as follows, having felt keenly the increased cost of labor and material, electric light and power, a loss of $29,179, the street railway a loss of $7,118, the municipal paving plant a loss of $19,835, and the market and weigh scales a loss of $6,704. The only profit was that of $24,406 made by the waterworks, which had increased rates to profit by, and very favorable winter weather conditions.

An important factor, the auditor points out, that has to be taken into consideration of the over-expenditure was the influenza epidemics, which adversely affected the general account by $42,314. The earning power of the sinking fund is also impaired by the lack of contributions and the growing disparity between the fund and the present value is noticeable, the former being $4,385,406 and the latter $2,362,373, or a deficit of $2,023,032. Against that is to be placed the uncollectable taxes amounting to $4,539,718. The account of doubtful taxes has been reduced by $40,000, and the remainder will be taken care of this year. In the reserves the accrued debenture charges are $131,400, the debenture charges levied in advance, $295,000, and the general reserve is $172,000.

"The fact that the annual report of the city finances shows a deficit of $96,000 is sufficient reason for the adoption of the work order system," said City Comptroller W. C. Wood, discussing his report on his scheme for city management. There are only eight out of the 28 departments of the city which do not show a deficit for 1918. On this basis alone it is evident that some system by which expenditure under estimates may be sanctioned before and not after the expenditure is made, be evolved. The mill rate last year was 31 mills. With this deficit it would have been 32.25. It simply means that ratepayers of 1919 are carrying not only their own burdens but an additional levy for 1918 as well."

PERSONAL COVENANT HANDICAPS BORROWINGS

Alberta Loan Companies Pass Resolution—Want Uniform Assessment of Succession Duties

THE annual meeting of the Mortgage Loans Association of Alberta was held at the Macdonald Hotel, Edmonton, on April 25th. There were twenty members present, representing the same number of loan and trust companies, who carry on business in the province.

The association is formed for the purpose of considering any proposed or existing legislation affecting the taxation of lands, real estate mortgages, the taxation of companies, and in addition, such other objects of common interest to loan and trust companies that may arise from time to time; also for the creating and maintaining of mutual confidence between the loaning companies, the borrowing public, and to securing the united action by all loaning companies in connection with proposed or existing legislation so as to obtain the best possible legislation in the general interest of borrower and lender.

Discuss Personal Covenant

During the meeting, recent legislation passed by the Alberta government, was taken up and considered. The following resolution was unanimously passed:—

"That in the opinion of this association recent statutory enactments by the legislature of this province, especially amendments to the land titles act, and particularly in the retroactive aspects, constitute serious and unwarranted interference in the contract rights between borrowers and lenders, that, in particular, the restriction upon the enforcement of the personal covenant in mortgages has already had a prejudicial effect upon the attitude of loaning companies and investors towards this province in restraining outside capital available for investment in the province, and from time to time, this effect will become more pronounced. That the serious consequences of this should be clearly understood by the citizens generally. That the co-operation of farmers' organizations, boards of trade and other representative organizations, be sought, and that the Dominion Mortgage and Investment Association of Toronto be asked to place itself on record in support of the movement."

Duplicate Assessment

It was also resolved: "That, whereas, under the present procedure of the succession duties department of the various provinces, deceased estates in some cases may be assessed in more than one province for succession duties, in respect to current assets.

"This association recommends to the Dominion Mortgage and Investment Association (the parent association) that steps be taken to endeavor to have the various provinces agree on a uniform method of assessment of succession duties, so as to avoid any duplication of such assessments."

The officers elected for the current year are: William Toole, Calgary, honorary president; W. T. Creighton, Edmonton, president; H. A. Howard, Calgary, vice-president; E. C. Pardee, Edmonton, secretary.

A pamphlet describing all the war loan issues of the United States government has been issued by Spencer, Trask and Co., of New York.

LONG-DISTANCE RATES DISCUSSED

Connections With Bell Telephone Company—Local Companies Before Railway Committee

LONG-DISTANCE rates and long-distance connections with the Bell Telephone Co. were the subjects of discussion before the Special Railway Committee of the Commons in Ottawa on April 25th. Mr. F. D. MacKay, representing the Canadian Independent Telephone Co. of Ontario, said that the local companies were here simply asking to get long-distance connections at Bell long-distance rates. They were prepared to pay all costs of physical connection. They claimed that the charges made by the Bell company were long-distance, these charges being made on the bases of "compensation."

Hon. T. W. Crothers suggested that they should go before the Railway Board and ask it to rescind its order regarding compensation.

Mr. MacKay said that the Railway Commission had ruled against them, Sir Henry Drayton alone of the commissioners supporting the independent companies' position. The Supreme Court also decided against them by three to two, the two being Justices Davies and Idington. They, therefore, thought they should come to the parliament of the people to argue their case.

They wanted the same rights for the farmers as the man who dropped his coin in a slot machine at a railway station and got long-distance connections. The amount charged increased as the number of telephones went up.

Mr. C. F. Sise, vice-president and general manager of the Bell company, said that the majority of the companies in existence to-day were built up at the suggestion and with the help of the Bell. He thought the only difficulty was with the companies in active competition with the Bell.

Not Question of Expense

Asked if he could tell the committee any additional expenditure the Bell company was put to in order to give this long-distance connection, Mr. Sise replied that it was not a question of expenditure, but simply that the Bell company was losing subscribers in these territories. The company did not submit to the Railway Board any figures as to compensation. It submitted that long-distance connection might be refused to active competitors. Loss of local business was the only consideration. More local connections mean more business.

Col. T. R. Mayberry, of Ingersoll, said that the local company had 1,500 subscribers and the Bell 120. The local rate was $5 under the Bell. There should be no compensation paid to the Bell for loss of business.

Other statements made by representatives of independent companies was that at Ingersoll the Bell company made $6,000 out of long-distance calls before the local company was formed, yet last year the local company subscribers paid the Bell $7,000; that in Haldimand there was no Bell company; that in Waterloo a local farmers' line was not charged anything by the Bell for long-distance connection; that the latter's representative was here "to help the other fellow," and that a club was being held over the small companies.

VANCOUVER REAL ESTATE EXCHANGE FORMED

The Vancouver Real Estate Exchange, Ltd., has recently been incorporated under provincial charter with a view to facilitating the purchase and sale of real estate in Vancouver and to look after the interests of dealers and owners generally. The directorate consists of R. K. Houlgate, president; A. C. St rrett, vice-president; Geoffrey L. Edwards, secretary; J. P. Nicolls, J. J. Banfield, J. W. McFarland, S. Burke, H. V. Sharples, H. T. Devine and J. W. Allan.

Ferguson and Ormsby, investment dealers, have moved their offices from 120 Bay Street to Suite 4114 Continental Life Building, Toronto.

COBALT ORE SHIPMENTS

The following is a statement of the shipments of ore, in pounds, from Cobalt, for the week ended May 2nd, 1919:—

Buffalo Mine, 87,900; La Rose, 73,237; O'Brien Mine, 127,990; total, 289,127.

The total since January 1st is 6,847,754 pounds, or 3,423.8 tons.

CALGARY CONSIDERS MUNICIPAL INSURANCE

The city of Calgary is considering adopting a system of municipal insurance on city property. It is pointed out that during the past ten years the city has sustained a loss of $10,000 while it has paid out $120,000 in premiums. Information has been collected by the city clerk relative to this subject, and recommendations based on this information will probably be presented to the council by the city commissioners.

GREAT WEST PERMANENT LOAN COMPANY

Total assets of $7,086,695 were held by the Great West Permanent Loan Co. on December 31st, 1918, according to the annual report recently made public. Mortgages on real estate and properties acquired by foreclosure constituted $5,827,142, the balance being made up of stocks and bonds, head office building, cash, etc. Debentures, with accrued interest, amount to $1,425,301; deposits and accrued interest, $691,574, and loan repayments, $1,579,260. The net profits for the year, after paying all expenses and allowing for certain depreciation items, were $207,879, of which $150,000 was transferred to contingent reserve fund and $57,879 to reserve fund. The managing director is Mr. W. T. Alexander; the secretary, F. H. Alexander, and the treasurer, H. G. Musson.

RAILROAD EARNINGS

The following are the earnings of Canada's transcontinental railways for the month of April, 1919:—

Canadian Pacific Railway.

	1919.	1918.	Inc. or dec.
April 7	$2,921,000	$2,984,000	— $ 63,000
April 14	2,868,000	2,935,000	— 67,000
April 21	3,037,000	3,016,000	+ 21,000
April 30	3,954,000	4,072,000	— 118,000
Total	$12,780,000	$13,007,000	— $227,000

Grand Trunk Railway.

April 7	$1,274,553	$1,012,494	+ $262,059
April 14	1,263,483	1,058,517	+ 204,966
April 21	1,248,310	1,012,494	+ 235,816
April 30	1,571,191	1,518,742	+ 52,449
Total	$ 5,357,537	$ 4,602,247	+ $755,290

Canadian National Railway.

April 7	$1,450,444	$1,569,763	— $119,319
April 14	1,583,458	1,671,776	— 88,318
April 21	1,551,366	1,686,046	— 124,680
April 30	2,314,364	3,258,305	+ 56,059
Total	$ 6,899,632	$ 7,185,890	— $286,258

Messrs. Shaw and Begg, insurance brokers, who for many years have occupied offices at 2 Court Street, have moved to more commodious and suitable quarters at 84 King Street East, Toronto.

Notice is hereby given that a Dividend of Three per Cent. upon the paid-up Capital Stock of this Institution has been declared for the current quarter, payable on and after Monday, the Second Day of June next, to shareholders of record of 30th April, 1919.

By order of the Board.
FREDERICK WILLIAMS-TAYLOR,
General Manager.

Montreal, 25th April, 1919.

THE CANADIAN BANK OF COMMERCE

DIVIDEND No. 129

Notice is hereby given that a dividend of Three per cent. upon the capital stock of this Bank, being at the rate of twelve per cent. per annum, has been declared for the quarter ending 31st May next, and that the same will be payable at the Bank and its Branches on and after Monday, 2nd June, 1919. The Transfer Books of the Bank will be closed from the 16th to the 31st of May next, both days inclusive.

By Order of the Board.
JOHN AIRD,
General Manager.

Toronto, 17th April, 1919.

MORTGAGE SALE

EDMONTON CITY WAREHOUSE

Pursuant to the directions of the Registrar and by virtue of the Powers of Sale provided by "The Land Titles Act" under a certain mortgage, which will be produced at the time of the sale.

There will be offered for sale by public action at the Sale Rooms of Robert Smith, 10167 99th Street, in the City of Edmonton, in the Province of Alberta, on Friday, the 6th day of June, 1919, at the hour of 3 o'clock in the afternoon, the following property, namely:—

Lot 147 in Block 4 of the Hudson's Bay Company's Reserve in the City of Edmonton, Plan BI, subject to the reservations and conditions contained and referred to in the existing Certificate of Title.

Terms of sale to be ten per cent. cash at the time of the sale and the balance in sixty days.

The above property will be offered for sale subject to a sealed reserved bid and free from all encumbrances, save: subject to a certain Caveat as to costs of a Spur Railroad Track in rear of said premises and taxes for the current year.

The vendor is informed that the above property is situated centrally within the City of Edmonton, and that a spur track runs at the rear; that on the land is erected a warehouse 50' x 120', containing basement 9' 6" high. First Floor, 11'; Second Floor, 9' 6"; Third Floor, 9' 6", and Fourth Floor, 10' high. Outside walls of brick of average thickness of 1' 6", basement of concrete; that the whole is of modern first-class fireproof construction and steam-heated; that each floor contains office accommodation, enabling each to be let separately; that there are two freight elevators adjoining platform by Railway spur.

For further particulars and conditions of sale, apply to
EMERY, NEWELL, FORD & LINDSAY,
Vendor's Solicitors.

Approved.
H. J. DAWSON,
Registrar.

UNION BANK OF CANADA

DIVIDEND No. 129

Notice is hereby given, that a dividend at the rate of 12 per cent per annum upon the Paid-up Capital Stock of the Union Bank of Canada has been declared for the current quarter, and that the same will be payable at its Banking House in the City of Winnipeg, and also at its branches, on and after Monday, the 2nd day of June, 1919, to shareholders of record at the close of business on the 16th day of May next.

The Transfer Books will be closed from the 17th to the 31st day of May, both days inclusive.

By order of the Board
H. B. SHAW,
General Manager

ORGANIZATION OF FRANCO-AMERICAN BANK

Announcement has been made of the formal organization of the French-American Banking Corporation in New York. Maurice Silvester has been elected president. The corporation, capitalized at $2,000,000, with a surplus of $500,000, represents a combination of the National Bank of Commerce of this city, the First National Bank of Boston and the Comptoir Nationnl d'Escompte of Paris, effected for the handling of long and short-term international credits. The total resources of the institution behind the new organization are $1,280,000,000.

URGE PREFERENTIAL TRADE WITH AUSTRALIA

Representations are to be made to Ottawa by the Victoria Board of Trade with a view to getting the Dominion Cabinet to take up with the Australian government the proposal of a preferential trade agreement between the two Dominions.

Mr Edwin Tomlin, who was appointed chairman of the board's trade, commerce and transportation committee, spoke on the subject at the initial meeting of the 1919 council, and was instructed to go further into the matter with his committee and take action.

DOMINION COAL AND SCOTIA STEEL ADJUSTMENTS

A bill has been introduced in the Nova Scotia legislature which has for its purpose an interchange of coal leases between the Dominion Coal Co.'s iron subsidiary and the Nova Scotia Steel and Coal Co. along the lines sought by the latter for some months back.

Scotia was given temporary relief some months ago by orders-in-council of the legislature, giving it a block of coal belonging to Dominion Coal, which enabled it to resume work, which had been stopped, on the claim that it could not profitably operate unless given access to the neighboring area under lease to the Dominion Coal Co.

The present bill is an entirely new one, which proposes to readjust the whole matter of coal area leases between the two companies, and against which the Dominion Coal Co. vigorously protests as confiscatory.

The claim is that the industrial progress of the province, as well as its revenue, are being seriously interfered with by the present situation, which calls for rectification.

GOVERNMENT AND MUNICIPAL BONDS

The following is a list of debentures offered for sale, of which particulars appear in this or previous issues of *The Monetary Times*:—

Borrower.	Amount.	Rate %.	Maturity.	Tenders close.
Moose Jaw, Sask. .	$ 210,000	5½	20 instal.	May 19
New Brunswick .	1,000,000	5½	3 years	May 14
Beamsville, Ont.	6,000	6	10 instal.	May 15
Capreol, Ont . .	18,775	6	10 years	May 15
Township of Barton, Ont.	30,000	5½	30-years	May 19
Renfrew, Ont.	15,520	6	30-years	May 16

Sherbrooke, Que.—The city will shortly make an issue of $542,500 paving and fire station debentures.

Coldwater, Ont.—A small block of $7,700 5½ per cent. 15-year bonds has been purchased by A. E. Ames and Co.

Aurora, Ont.—The council has under consideration the issuance of $100,000 sewerage system and $50,000 paving debentures.

Ingersoll, Ont.—The city council has decided to issue $10,000 debentures to provide a market building. They will be 10-year maturities.

Nova Scotia.—A bill providing for a $500,000 loan for provincial highways passed the third reading in the provincial legislature last week.

Capreol, Ont.—The town has extended the date upon which tenders were to be received for the $18,775 6 per cent. 10-year debentures to May 15th.

Renfrew, Ont.—Tenders will be received up till May 16th, 1919, for the purchase of $15,520 6 per cent. 30-year bonds. J. A. Devenny, clerk and treasurer.

Point Grey, B.C.—The School Board is asking the municipal council to submit a by-law to the ratepayers authorizing the issuance of $165,000 school-building debentures.

Brockville, Ont.—An election will be held on May 14th, and a by-law to issue $22,000 5½ per cent. 10-year site-purchasing debentures will be submitted to the ratepayers.

Guelph, Ont.—The city council has received a request from the finance committee of the Board of Education, asking for the issuance of $60,000 debentures for the building of a new eight-room school.

St. Thomas, Ont.—A by-law is before the council to raise $45,000 for the improvements and repairs of the St. Thomas Street Railway. The debentures are to run for twenty years, bearing interest at 5½ per cent., and the annual payments to be $3,765,50.

Township of Bartqu, Ont.—Tenders will be received up till May 19th for $30,000 5½ per cent. 30-year bonds. The money will be used for the enlargement of the school site and erecting two additional rooms for School Section No. 2. Alfred G. E. Bryant, township clerk.

Grimsby, Ont.—Messrs. G. A. Stimson and Co., Toronto, have purchased an issue of $15,000 6 per cent. 10-instalment bonds at 102.51, at which price the municipality pays about 5.47 for its money. The following is a list of bids:—

G. A. Stimson and Co.	102.51
J. F. Stewart and Co.	102.312
Turner, Spragge and Co.	101.33
C. H. Burgess and Co.	101.25
A. E. Ames and Co.	101.24
Ralph M. Bird and Co.	101.23
R. C. Matthews and Co.	101.20
MacNeill, Graham and Co.	101.032

Saskatchewan.—The following is a list of authorizations granted by the local government board from April 12th to April 26th, 1919:—

Rural Telephone Companies.—Wartime, $8,900 15-years not ex. 8 per cent. Beadle, $600 15-years not ex. 8 per cent. annuity. Thorndyke, $10,450 15-years not ex. 8 per cent. annuity. Hillview, $2,900 10-years not ex. 8 per cent. annuity. Glen Eagle, $1,000 15-years not ex. 8 per cent. annuity. Greenan, $500 15-years not ex. 8 per cent. annuity. Plenty, $1,300 15-years not ex. 8 per cent. annuity. Key West and district, $19,000 15-years not ex. 8 per cent. annuity. Woodleigh, $800 15-years not ex. 8 per cent. annuity. Big Butte, $200 7-years not ex. 8 per cent. annuity. Ogema N.E., $6,000 15-years not ex. 8 per cent. annuity. Howell, $18,700 15-years not ex. 8 per cent. annuity. Fulda, $39,100 15-years not ex. 8 per cent. annuity. New Finland, $10,500 15-years not ex. 8 per cent. annuity. Kindred, $700 5-years not ex. 8 per cent. annuity.

School Districts.—Avalon, $2,700 10-years not ex. 8 per cent. annuity. *Grierson, $1,200 10-years not ex. 8 per cent. annuity. NEW MATTAGAMI PULP FINANCING

In a recent issue of *The Monetary Times* reference was made to the new financing that was in prospect for the Mattagami Pulp and Paper Co. This preliminary notice has now been confirmed by an announcement issued by the Royal Securities Corporation to the effect that that company heads a group of Canadian and American interests for the purchase of a new issue of $2,000,000 7 per cent. convertible sinking fund mortgage debentures of the Mattagami Co.

The purpose of this new financing is to supply working capital and to increase the capacity of the company's plant from thirty thousand tons to forty-five thousand tons per year. A large portion of this increased production of the plant has already been booked for shipment abroad at attractive prices.

At the inception of the Mattagami Pulp and Paper Co. several years ago, the bonds and preferred shares of the company, aggregating some $3,500,000, were placed privately among investors in Canada and the United States by the Royal Securities Corporation and associated companies. The faith which the original holders then displayed in the prospect of the enterprise has been more than justified by the earning power of the company since that time.

A large portion of this issue of debentures has already been placed with those closely identified with the Royal Securities Corporation, and it is understood that a public offering of the securities will follow their private distribution.

Messrs. Hanson Brothers, bond dealers, and Hanson and Ferguson, members of Montreal Stock Exchange, have moved their offices from 164 St. James St., to the Guardian Building, 160 St. James St., Montreal.

Township of Tay, Ont.—Messrs. G. A. Stimson and Co., Toronto, have purchased a small block of $3,400 6 per cent. 10-instalment bonds, which were issued for telephone purposes.

North Bay, Ont.—Messrs. Wood, Gundy and Co., of Toronto, have purchased two blocks of bonds issued by the town. One block was for $22,000 6 per cent., repayable in 20 instalments, and the other for $4,400 6 per cent. 10-instalments. The price paid was 102.07.

ANOTHER DOMINION LOAN IN THE FALL

A domestic loan, similar to the Victory loan of a year ago, but not so large, will be floated by the government, probably in September, according to an announcement by Sir Thomas White in the House at Ottawa on May 8th. The loan is in connection with the $350,000,000 war appropriation to be voted by parliament this session.

PAPER COMPANY CONTEMPLATING BOND ISSUE

A letter has been issued by the Howard Smith Paper Mills calling a special meeting of shareholders for May 15th, 1919, for the purpose of obtaining permission to create and issue $1,500,000 first mortgage sinking fund bonds. Mr. C. Howard Smith, president, in a letter to the shareholders, says:—

"The total issue proposed at present amounts to $1,000,000. In order to provide for the cost of this installation and to retire the existing short-term bonds of the company and to pay off bank advances, it is proposed to issue at the present time $1,000,000, the balance remaining in the treasury for future extensions."

The outstanding bond issue to be retired amounts to $300,000 equally divided between the Crabtree and Beauharnois plants. There is an issue of $475,000 preferred on which 7 per cent. is being paid and $1,062,500 common on which three quarterly dividends of 2 per cent. were paid but ceased last year.

YIELDS ON INVESTMENTS IN STOCKS AND BONDS

The following table of investment yields of stocks and bonds has been compiled for *The Monetary Times* by Messrs. MORROW & JELLETT, Member Toronto Stock Exchange, 103 Bay Street Toronto:—

May 7th, 1919.

DEBENTURES FOR SALE

TOWNSHIP OF BARTON INVITES TENDERS

For $30,000.00 for enlarging the School Site and for the erection of Two additional rooms for School Section No. 2. The Debentures are 30-year bonds, 5½ per cent. interest, payable half-yearly.

Tenders to be sealed and marked "Tenders for Debentures" and addressed to the undersigned. For further particulars, apply to the undersigned.

Tenders close Saturday, May 19th, 1919. The lowest or any other tender not necessarily accepted.

ALFRED G. E. BRYANT,
Township Clerk,
Room 1, Court House, Hamilton.

DEBENTURES FOR SALE

TOWN OF CAPREOL

SALE OF DEBENTURES

Upon request, the Council of this Municipality have sanctioned date of extension of tenders to be received by the undersigned up to and including Thursday, the 15th day of May, A.D. 1919, for the purchase of Public School Debentures of the Town of Capreol for $18,775.00, bearing interest at 6% (six per cent.), principal and interest being repayable in annual instalments during a period of ten years.

The highest or any tender not necessarily accepted.

W. H. MATHEWS,
Clerk.

Capreol, Ont., April 29th, 1919.

DEBENTURES FOR SALE

$1,000,000 PROVINCE OF NEW BRUNSWICK 3-YEAR 5½ PER CENT. GOLD BONDS

Sealed Tenders endorsed "Tenders for Province of New Brunswick Bonds" addressed to the undersigned, will be received for the purchase of $1,000,000 (One Million Dollars) three year Gold Bonds of the above Province, to be dated May 15th, 1919, bearing interest at the rate of five and one-half per centum per annum, payable half yearly on the 15th May and 15th November. Principal and interest payable in Gold at the office of the Provincial Secretary-Treasurer, Fredericton, N.B., or at Bank of Montreal in St. John, Montreal or Toronto, or at the Agency of the Bank of Montreal in the City of New York, at the option of the holder.

Bonds to be in the denominations of $1,000 and $500 in amounts to suit the purchaser, with coupons attached, and may be registered as to Principal and Interest. Full payment for Bonds with accrued interest to date of payment to be made at the Bank of Montreal, Fredericton, on delivery of Interim Certificates at said Bank. Interim Certificates will be supplied, to be exchanged for definitive Bonds on completion by the engravers.

Tenders to be delivered to the undersigned not later than noon on Wednesday the 14th day of May 1919. Tenders must be for the whole amount offered and must be accompanied by marked cheque for $20,000, to be applied in the case of the successful tenderer in payment for Bonds.

The highest or any bid not necessarily accepted.

THE COMPTROLLER GENERAL,
Province of New Brunswick.

Fredericton, N.B., April 28th, 1919.

CITY OF MOOSE JAW

SALE OF DEBENTURES

Sealed tenders endorsed "Tender for Debentures," will be received by the City Commissioners up to noon of the 19th day of May, 1919, for the purpose of the following issues of debentures of the City of Moose Jaw:—

$210,000.00 debentures for extension to the Electric Light and Power Systems of the city. Tenders will be received alternatively for:—

(a) Debentures bearing interest at the rate of 5½% per annum, repayable in twenty equal annual instalments of principal and interest.

(b) Sinking Fund Debentures bearing interest at 5½% per annum repayable at the end of twenty years.

The highest or any tender not necessarily accepted.

S. A. HAMILTON,
Mayor.
GEO. D. MACKIE,
City Commissioner.

Moose Jaw, 29th April, 1919.

CONDENSED ADVERTISEMENTS

"Positions Wanted," 2c. per word; all other condensed advertisements, 4c. per word. Minimum charge for any condensed advertisement, 50c. per insertion. All condensed advertisements must conform to usual style. Condensed advertisements, on account of the very low rates charged for them, are payable in advance. 50 per cent extra if charged.

NEW INSURANCE COMPANY IN WEYBURN

The Central Mutual Fire Insurance Co., with headquarters in Weyburn, has been organized by farmers of the district. An application has been made for a charter, and it is expected the company will open for business about June 1st. The election of a board of directors was held and the following were elected: H. McGowan, R. F. Thompson, A. Schoenkeber, A. Peterson, J. N. Mertz, E. G. Stewart, E. R. Mooney, J. A. McBride, O. H. Peacock, A. B. Saunders, W. Hollinger and J. L. Dinsmore. At a meeting of the directors the following officers were appointed: President, R. F. Thompson, M.P.; vice-president, Robert Mooney; secretary-treasurer, J. N. Mertz.

GOOD MARKET IN BRITAIN FOR CANADIAN LUMBER

Sir James Ball, British Timber Controller, and Mr. Montague Meyer, British timber purchaser, were tendered a luncheon at the National Club, Toronto, this week by Ontario lumbermen and millowners. Sir James Ball stated that his work as controller was finished with the completion of the purchases made in Canada, and that it was now up to the Canadian lumber dealers to get it to the British market for them.

"Pre-war imports of timber into Britain were cut off 77 per cent. by the submarine campaign," he said. "British woods furnished in 1918 two and a half million tons of mine timber and a billion feet of sawn timber. The Canadian forestry corps, under Gen. Alex. McDougall, did magnificent work in this production."

He pointed out that before the war Britain imported eleven billion feet, and of this total only some 10 per cent. had come from Canada and 40 per cent. from Russia. With Russia cut off, Canada had a great opening. They would rather buy from Canada than Sweden.

Mr. Meyer said the Dominion government had arranged credit so that the trade balance might not be upset, and thereby they had been able to make such large purchases. At Ottawa 100,000,000 feet had been bought, and other large quantities along the St. Lawrence and gulf.

NEW PENSION BILL NEARLY COMPLETE

The new pensions bill in the hands of the special committee of the Commons is nearing completion. This bill will include nearly fifty clauses, and will authorize a number of increases in certain classes, as well as some extension of educational privileges to dependents of men who have lost their lives in the service of their country.

REDUCTION IN FIRE LOSS

Considerable reduction in fire loss in Ontario is reported by Deputy Fire Marshal Lewis, for the first three months of 1919, as compared with the same three months of 1918. Financial saving amounts to $1,165,257 and the number of fires is 363 less. Figures for the first three months of 1917, 1918 and 1919 are:—

1917—Fires, 2,583; total loss, $3,282,161; insured loss, $2,525,674; uninsured loss, $756,487.

1918—Fires, 2,589; total loss, $3,194,300; insured loss, $2,634,318; uninsured loss, $559,982.

1919—Fires, 2,226; total loss, $2,029,073; insured loss, $1,526,345; uninsured loss, $502,728.

In March there were 832 fires, with loss $795,791, and $618,555 was covered by insurance. There were 257 fires in Toronto during March, as compared with 206 during the same month of last year, but the total loss in Toronto was reduced by $44,445, or over 26 per cent., which more than offsets the increase of 24 per cent. in the number of fires.

Deputy Fire Marshal Lewis says these satisfactory figures are due largely to the fire prevention campaign begun last year.

INVESTMENTS AND THE MARKET

News and Notes of Active Companies—Their Financing, Operations, Developments, Extensions, Dividends and Future Plans

La Belle-Kirkland Mines, Ltd.—The company has decided to offer for sale 500,000 shares of treasury stock for the further development of the mine, which is situated in the north-east corner of the township of Teck.

Beaver Mines, Ltd.—News has been received of an important find on the company's property at Cobalt. This strike was made at the 600-foot level, and consisted of a four-inch vein of ore running $2,000 to $3,000 per ton.

Niagara Falls Power Co.—Combined gross earnings of Niagara Falls Power Co. and Canadian Niagara Power Co. for the quarter ended March 31st totalled $1,272,322; net after taxes $818,283 and surplus after charges $546,945.

International Nickel Corporation.—Directors of the corporation have passed the dividend on the common stock. Since February the payment to shareholders has been at the rate of 50 cents a share, but prior to that time the disbursement had been at the rate of $1 a share.

Shawinigan Water and Power Co.—Announcement has been made by the company of its intention to open an office in London, Eng., at an early date for the purpose of further developing the sale of the products of the various subsidiary companies allied to the Shawinigan enterprise.

Demerara Electric Co.—The annual report for the year ended December 31st, 1918, shows net earnings of $55,862, against $52,401 for 1917. The gross earnings increased greatly, but most of the increase was absorbed by additional costs of operation. The total assets are $1,147,241, an increase of $26,000 compared with last year; property constitutes over $1,000,000.

Canada Cement Co.—It has been officially stated that the company will shortly begin the erection at Port Colborne of a $500,000 plant for the manufacture of potash.

The most interesting fact in this announcement is that the potash will be made from waste at the cement mills of the company at Port Colborne. The dust is to be utilized and treated with potash as the product.

Trinidad Electric Co.—The 1918 income account shows a total of $265,125, and operating expenses of $176,908. Bond interest to the amount of $36,000 had also to be deducted, leaving net earnings of $52,216, which is less than last year by about $20,000. This was carried to surplus account, in which there was a balance of $276,076 from 1917, and, after deducting directors' fees, war tax, etc., the sum of $25,375 is carried forward in this account. Total assets are now $2,252,459, compared with $2,209,830 at the end of 1917.

Holt, Renfrew and Co.—Although nothing definite has been settled yet, negotiations are now under way for the purchase of the controlling interests of the company. The extensive fur business will pass to a syndicate composed of Montreal capitalists, whose names have not yet been disclosed. The sale of the business includes the Quebec, Montreal, Toronto and Winnipeg stores. The amount of purchase involved is said to be $2,250,000, but in the event of the negotiations ending in a sale, the present firm name will be retained and business continued with practically the same organization as in the present.

National Brick Co.—The annual meeting of the company was held on April 30th at Laprairie, Que. The business consisted mainly in the approving of a plan set forth by the bondholders for their protection, and at the same time whereby the company might continue to operate in the usual manner.

The main feature of the change consisted of a provision in the trust deed whereby the bondholders agree to accept a payment of 2 per cent. on their bonds after 1922, being sufficient to prevent the company going into liquidation.

The annual statement of the company was practically the same as it has been year by year since the commencement of the war.

Under the new arrangement the bondholders select and elect four of the seven directors and the shareholders the other three.

Havana Electric Railway, Light and Power Co.—The annual report for 1918, which will be submitted at the annual meeting on May 15th, shows the following results in comparison with last year:—

	1918.	1917.
Gross earnings	$8,176,544	$6,989,599
Operating expenses and taxes	4,376,655	3,385,469
Net income	$3,799,889	$3,604,129
Miscellaneous income	140,894	149,754
Total net income	$3,940,784	$3,753,884
First charges	989,138	1,138,623
Net profit from operation and miscellaneous income	$2,951,645	$2,615,260

Out of the net profits the sum of $203,000 was set aside as reserve for depreciation, and the remainder, when added to the balance at the credit of profit and loss from last year, made a total of $5,018,936. From this was deducted dividends at the rate of 6 per cent., requiring $2,155,612, provision for sinking fund, bad debts, etc.; the balance of $2,639,025 was carried forward to next year's account.

Toronto Paper Manufacturing Co.—The profit and loss account for the year ended March 31st, 1918, shows earnings of $162,373, less bond interest, dividends and depreciation, leaving $48,895 to be added to the balance from last year. This makes a total of $302,984. Last year the earnings were $198,039. Total assets are slightly higher than last year, being now $1,752,093, consisting of capital assets, $1,213,448; bonds purchased for sinking fund purposes, $48,400, and current assets, $490,245. In his report to shareholders, Mr. R. S. Waldie, president, said:—

"It was owing to our war tax payments that your directors decided that it was prudent to reduce the last bonus paid with the regular half-yearly dividend from 2 per cent to 1 per cent. There will be no change for the present in our dividend policy, which is to pay 3 per cent. half-yearly, together with any bonus we can pay with confidence. Our products continue to enjoy a good reputation in the trade, and you will be interested to know that at the conclusion of the war we are making a better standard of paper than at the beginning of it.

"While it is possible to forecast the future, we see no reason why we should not enjoy a good year's business. Although we depend upon the home market to absorb our output, we have thought it advisable to form a modest export connection."

The annual meeting of the company will be held in Toronto on Friday, May 16th.

NEW WIRE SERVICE IN MONTREAL

Messrs. O'Brien and Williams, members of the Montreal Stock Exchange, have announced that they have made arrangements with Hornblower and Weeks, members of the New York Stock Exchange, resulting in the establishment of their private wire service in the office of the Montreal firm.

WHY MUTUAL POLICIES ARE EASY TO SELL

First—Because of the co-operative and democratic principle on which the company is founded. The Mutual Life Assurance Company of Canada is a company consisting of policyholders, maintained by policyholders, exclusively for policyholders.

Second—Because the purpose for which the company was established is now generally understood: the company since its establishment in 1869 has consistently followed one aim—that of furnishing the largest amount of protection for the least possible outlay.

Third—Because the company's day-by-day activities advertise it: The Mutual of Canada since its organization has paid to policyholders or their beneficiaries or holds as a trust to guarentee future payments, over sixty millions of dollars.

RECENT FIRES

The Monetary Times' Weekly Register of Fire Losses and Insurance

Bow Island, Alta.—April 30—Mr Frank Reams had large barn destroyed. Cause, spontaneous combustion.

Bowmanville, Ont.—May 4—Farm buildings on the Crawford farm were damaged by lightning. Estimated loss, $6,000. Insurance carried, $3,000.

Frindale, Ont.—May 5—Store of John Barker was destroyed. Cause, careless throwing of lighted match. Two adjoining buildings were also damaged. Estimated loss, $10,000.

Forest, Ont.—May 2—Frame building at rear of Pressey's Market was destroyed. Estimated loss, $800.

Kingston, Ont.—April 26—Queen Street Methodist Church was destroyed. Cause, overheated furnace. Estimated loss, $20,000. Insurance, $33,950, as follows: Phœnix of Hartford, $10,250; London Assurance, $11,000; London and Lancashire, $12,700. Total, $33,950.

London, Ont.—May 2—Premises of the Murray Shoe Co. were damaged. Estimated loss, $2,000.

Melville, Sask.—May 1—The Saskatchewan Co-operative Creamery was destroyed. Estimated loss, $12,000. Insurance on building, $8,000; on stock, $3,500.

Moose Jaw, Sask.—May 2—The Canadian government terminal elevator, three miles west of the city, was damaged. Cause, spontaneous combustion. Estimated loss, $1,000.

Quebec, Que.—April 29—Bank Nationale building on St. Peter Street was damaged. Estimated loss, $10,000.

Sarnia, Ont.—May 2—The Sarnia steam laundry building was damaged. Estimated loss, $600.

Toronto, Ont.—May 2—Building at 1475 Queen Street West, owned by Smith, D'Entremont and Co., was damaged. Cause, friction from a lathe. Estimated loss, $1,200.

May 6—Dwelling of S. Bond, 1006 St. Claren's Avenue, was damaged. Estimated loss on building, $250; on contents, $150. Insurance to amount of $1,000 carried in Merchants Fire Insurance Co.

Windsor, Ont.—May 1—Barn at 265 Sandwich Street West was damaged. Estimated loss, $200.

Winnipeg, Man.—May 2—Warehouse of Thos. Kelly and Sons, Ross Avenue and Brant Street, and three Canadian Pacific Railway freight cars were destroyed. Estimated loss, $150,000. Warehouse is partly insured.

Wolfe Island, Ont.—May 4—Barn on farm of George Rattray was destroyed by lightning. Estimated loss, $1,500, partially covered by insurance.

Wasaga Beach, Ont.—May 4—Riveria Hotel and an adjoining cottage were destroyed. The loss on the hotel is estimated at $5,000, with insurance of $3,000. The loss on the cottage is estimated at $1,500, with little insurance.

ADDITIONAL INFORMATION CONCERNING FIRES

Montreal, Que.—April 23—The Jubilee Rink was destroyed. Estimated loss, $16,500. The following companies are interested: Liverpool and London and Globe, $3,000; Norwich Union, $2,500; North America, $2,500; Alliance, $2,000; Mount Royal, $1,500; Law Union and Rock, $1,000; North British and Mercantile, $1,000; Northern, $1,000; Employers, $1,000; Globe and Rutgers, $1,000. Total, $16,500.

Toronto, Ont.—April 27—The premises of the Wire and Cable Co., corner of Dundas and Chelsea Streets, were damaged. Estimated loss, $150,000. Insurance was carried to the amount of $277,000 as follows: Northern, $11,000; Economical, $2,000, Lloyd's, $10,570; Excess, $1,930; National Ben. Franklin, $2,500; Atlas, $7,500; Duquesne, $12,000; State of Pennsylvania $7,500; National of Hartford, $7,500; Nova Scotia, $6,500; North British and Mercantile, $10,000; Ætna, [illegible]; Home, $10,000; Fidelity-Phenix, $5,000; Merchants, $1,[illegible]; Montreal Underwriters, $5,000; Nationale of Paris, [illegible]; Stuyvesant, $3,500; St. Paul, $4,000; British Traders, $4,500; Ocean, $15,000; Millers National, $3,750; London Mutual, $3,750; London and Lancashire, $20,000; Employers, $5,000; London Guarantee and Accident, $10,000; Sun, $10,000; Norwich Union, $10,000; Dominion Fire, $5,000; Northwestern National, $5,000; Provincial, $5,000; Mount Royal, $11,000; Wellington, $2,000; Millers and Manufacturers, $7,500; Pacific Coast, $5,000; Century, $4,000; National Union, $4,500; Hand-in-Hand, $5,000; Queen City, $4,500; Union of Canton, $7,000; Queensland, $5,000; Rochester Underwriters, $3,000; Hartford, $2,500; Perth, $2,000; Gore District, $3,000. Total, $275,000.

Manitoba.—The following is the report of the Manitoba Fire Commission for month of March: Number of fires reported, 120; estimated value, $2,179,380; amount of insurance, $1,282,723; estimated loss, $104,523; loss ratio per capita, 0.1705; fatalities reported, two.

The following is the report of the commission for the three months ended March 31st: Number of fires reported, 312; estimated value, $10,339,761; amount of insurance, $8,138,203; estimated loss, $258,900; loss ratio per capita, 0.4223; fatalities reported, seven.

Winnipeg, Man.—Deputy Fire Commissioner Alexander Inch stated on April 25th that laxity in the enforcement of fire prevention laws on the part of civic employees exists in Winnipeg. He referred especially to the fire which occurred at the Brett Manufacturing Co.'s plant on April 22nd. "Many municipalities throughout the province are without fire prevention laws of any sort, while others have placed some on their books without taking trouble to enforce them," Mr. Inch said. From a survey made of towns and villages in certain parts of the province the deputy fire commissioner has found that many places have inadequate fire protection in spite of the fact that 90 per cent. of their buildings are of frame structure. In the business sections of the village the buildings are close together, and in the event of a fire starting it would be impossible to extinguish it.

The cause of the fire at the Scott manufacturing plant is believed to be a kiln for drying of wood used in manufacturing wooden machinery. The kiln was situated in the centre of the manufacturing plant and lumber was piled on all sides of it. Shavings caught fire, which rapidly spread to the main plant. Mr. Inch points out that if the fire laws of the city were properly enforced the authorities would never have allowed the kiln to be situated in a wooden structure which threatened all the buildings in that section of the city in case of fire.

After a thorough study of conditions in Winnipeg, Mr. Inch advocates that more rigid laws be enforced in this city. He urges that careless tenants of buildings be made responsible for any losses caused by fire which starts on property which they occupy. By bringing more rigid laws into force, Mr. Inch points out that the insurance rates would be decreased considerably.

"The time is here when preventive measures will take precedence over protective measures," Mr. Inch said. "Every municipality should have inspectors under an experienced head who would take charge of all matters pertaining to fire prevention. This matter has not been given sufficient consideration in Winnipeg. The fire department here is supposed to do the inspection work, and in this way become acquainted with the buildings in case of fire. There has been too much talk and too little action along this line in the past."

The Chicago office of the Bank of Montreal, which has for nearly twenty years been located in the Temple, 108 South La Salle Street, in that city, will, about the first of June, be moved to the National Life building, 27-29 South La Salle Street.

The American Foreign Banking Corporation of New York has opened a branch at Brussels, Belgium. In addition to the new branch, the corporation already maintains branches in Brazil, Cuba, Hayti and Panama. As soon as arrangements can be completed, agencies will be opened in Manila, P.I., and Harbin, Manchuria.

Canadian Life Insurance in 1918.

Returns Just Compiled by Insurance Department Show Total Increase in the Business in Force of $180,334,128—Details by Companies—Foreign Business of Canadian Companies

FIGURES of life insurance in Canada for the year 1918 have just been completed by the Department of Insurance, Ottawa, and are now available in abstract form. They show a substantial increase in premium income, new business, and net amount in force. Details are given herewith. A slight change in form is made this year, certain items in income and disbursements being divided into: (1), transactions of 1918, and (2), arising out of transactions of 1917 and earlier years. The abstract issued by the department also gives a detailed statement of the assets, liabilities, income and disbursements of the Canadian, British and foreign companies. There is included also for the Canadian companies a table showing the basis of valuation, excess reserve and statutory deduction in each case.

The totals for all companies for the years 1917 and 1918 with the increase or decrease are as follows:—

	1917.	1918.	Inc. or dec.
Total net assurance premium income	$ 54,843,609	$ 61,640,719	+ $ 6,797,110
Total net assurance premium income, arising out of transactions of 1917 or earlier	....	$ 591,704	......
New policies issued and paid for in cash (number)	497,754	533,165	+ 35,411
New policies issued and paid for in cash, gross amount	$ 282,120,430	$ 313,060,106	+ $ 30,939,676
New policies issued and paid for in cash, net amount	$ 277,532,095	$ 307,094,809	+ $ 29,562,714
Policies in force at date of return (number)	2,461,830	2,782,664	+ 320,834
Policies in force at date of return, net amount	$1,585,042,563	$1,565,376,691	+ $180,334,128
Policies become claims (number)	31,996	47,064	+ 15,068
Policies become claims, net amount, death	$ 22,175,645	$ 23,525,949	+ $ 7,415,129
Policies become claims, net amount, matured endowments	....	$ 6,064,825	......
Net disbursements in respect of death claims, matured endowments and disability claims	$ 21,442,962	$ 26,246,880	+ $ 4,803,918
Net disbursements in respect of death claims, matured endowments and disability claims, arising out of transactions of 1917 and earlier	....	$ 1,988,890	. .
Net payments due under assurance and annuity contracts, not resisted	$ 4,029,470	$ 7,244,204	+ $ 3,214,734
Net payments due under assurance and annuity contracts, resisted	$ 284,181	$ 150,131	— $ 134,050

Foreign Business of Canadian Companies

Several of the Canadian life insurance companies transacted an extensive business outside of Canada. This business is not included with the other figures given in the table, which represents in the case of Canadian companies, as well as of British and foreign companies, the business in Canada only. A summary of the foreign business of Canadian companies as given in the Department of Insurance abstract follows:—

	Net premium income, trans. of 1918.	Trans. of 1917 or earlier.	Net amount of new policies.	Policies in force (net amount).	Net disbursements, Trans. of 1918.	Net disbursements, Trans. of 1917 and earlier.
Canada Life	$2,376,906	$30,981	$ 6,174,343	$ 56,453,654	$ 878,735	$70,581
Confederation Life	899,236	1,772	3,271,122	17,309,690	255,860	......

MONEY AND WAR PRICES

Summary of an Address Before the University of Manitoba on May 12th, 1919

By Dr. Adam Shortt

"WE have assisted materially in fighting a long and severe war, and we imagined that this involved us in considerable sacrifices both in life and property. As to the heavy sacrifices in life there is no room for question, but as to the sacrifices in property and prosperity, there is apparently some doubt. Many statistics are cited to show that instead of emerging from the war much poorer than we entered it, we are in reality some hundreds of millions richer than before. Never before in such a brief period have we apparently accumulated so much wealth, have our industries been so fully employed, and reaped such large profits. Our laborers have been better employed and at higher wages than ever before. Our farmers found their produce in more urgent demand and at hitherto undreamt of prices. Our trade returns, especially in exports, have advanced by leaps and bounds, and our banking figures show unprecedented increases in deposits, especially in time deposits, which are always regarded as representing the general savings of the people. The national debt has greatly increased, it is true, but, owing to the astonishing increase in the wealth of the people during war, it has been chiefly taken up in Canada and the interest will remain in the country.

"In the face of this popular presentation of our economic situation, if war could only be waged without the loss of life, a few more years of world conflict would apparently have placed us in a condition of transcent prosperity.

"Strange to say, however, this statistical demonstration of wealth, which should promote a spirit of unbounded optimism, is accompanied by a growing wave of discontent and unrest. Notwithstanding the high prices of food, the farmer complains of the high cost of production and the great dearth of labor. The unprecendented wages obtained by labor leave him as short-tempered as ever on account of the cost of living, and he demands ever increasing wages. What then does all this mean? The answer can be found only by taking a rapid survey of the economic course which we have run during the war.

"When the war broke out one of the first actions of the government was to suspend specie payment, not only for the banks but for itself. This was a very regrettable but a quite indispensable sacrifice to make, in the face of the abnormal financial conditions precipitated by the outbreak of the war. It prevented a possible financial panic in Canada, and the shrinkage of assistance by the banks to the commerce of the country. It also prevented a run upon the government treasury for gold in the redemption of Dominion notes. But what permitted the banks and government to continue their existing credit advances, permitted them also to extend these indefinitely, under pressure of subsequent financial needs. The safety valve once closed off, you can get more work out of a good boiler, but it requires expert engineering to manage it, and Canada was fortunate in having expert management of her banking and finance.

Methods of Meeting Cost

"Apart from foreign loans there were three methods of financing the war open to the government: First, to obtain by taxation the necessary funds as required. This, of course, puts a very heavy strain on the country all at once. It prevents, however, domestic inflation of values, because the more the government takes, the less the people have to spend, a strict economy is enforced and values remain substantially at a balance. The demand for export goods would still be subject to conditions abroad, certain prices would rise whilst others declined. In a direct manner this method could be only partially applied in Canada because it had not sufficiently large quantities of surplus wealth or fluid capital. In connection, however, with the third method to be considered it contributed much more than commonly suspected. The second method is that of domestic borrowing. So far as levied upon a voluntary basis, this may not furnish adequate funds, but if the necessary pressure were used, as in Germany, it might be quite successful. The general effect upon prices would be much the same as in the case of taxation, because the spending power would be transferred from individuals to the government, and, therefore, not increased. The liquidation of the debt, however, would be transferred to the future and large charges for interest would have to be met in the meantime. This method was found to be more attractive than that of taxation, and was quite extensively employed when assisted by the third method.

"The third and last method is that of utilizing the credit system of the country in purchasing supplies and meeting the expanding outlays by drawing upon the credits of both the governments and the banks. The suspension of specie payment rendered this method practicable, because the credit obligations once launched could not return upon either the government or the banks, but must simply dilute the normal credit of the country, and when passed into the hands of the public, could be drawn upon again in the shape of loans, and thus facilitate a second movement. This process has the financial merit in times of drastic emergency of not only facilitating borrowing by the government, but of drawing upon the incomes of the citizens in a very effective though indirect manner. The process is analogous to the watering of milk. The milk supply being inadequate in its pure state, some citizens contribute water, and others milk, and these are mixed before being re-divided, the supply will then go around, and those who contribute the water will get their due share of milk. This is reflected in the fact that whereas in the beginning of the war an income of $1,000 would purchase a certain amount of real supplies, but at a subsequent stage of the war, when the credit system had been in operation for some time it would purchase just one half that amount of supply, the other half having gone to the government and through it to those who chiefly profited from government expenditure. In other words one-half the pre-war income became water, the other half remaining milk.

"We thus see that apart from borrowings abroad which merely postponed the process, in time each method or such combination of them results in the people as a whole having to contribute in one form or another the actual wealth required to carry on the war. As to how this is adjusted as between the individuals of the nation, is a longer and more detailed question. As a matter of fact, the government used not one of these methods but all three of them, direct taxation least of all, borrowing most of all, and the third to an intermediate degree, but as we have seen, with subtle supplementary relations to the other two. It is this process that requires some clearing up, as it affords the key to the explanation of the anomalous problem with which we started, that of statistical prosperity with much complaint as to difficulty in meeting the cost of living.

"The process of inflation of values through the expansion of credit has been shared in more or less by every belligerent and most of the neutral nations. It was brought to its highest pitch among our enemies, whose milk became almost entirely water, bringing about their collapse, although exhibiting statistically unbounded prosperity. The operation of the credit system presents much mystery to the ordinary man, who vainly imagines that the whole system might be escaped through a reconstruction of society. Yet every effort at such a revolution has been accompanied by an unbounded and unregulated recourse to exactly this expedient in its crudest forms, as in the French revolution and as now in Russia.

"The nature of the process, the great national sacrifices which it involves, and the apparent obscuring of the actual situation are revealed in a survey of the economic aspect of the war. When the troops began to be called out and sent away, the government obtained funds for the process, partly

THE GOVERNMENT SHIPBUILDING PROGRAMME

WHEN the armistice was signed in November the Dominion government found itself with a number of contracts outstanding for the construction of ships. These contracts had been let at practically the peak of high prices. It was, however, expected that costs would continue to increase as long as the war lasted and the Dominion government could not be expected to anticipate the dates of the cessation of hostilities.

This does not, however, justify the adoption of a government owned steamship service. It has been advocated that such a service is necessary to complete the transportation system of the Canadian Government Railways. When the taking over of the Canadian Northern Railway was being discussed no mention was made of this further advance in the scale of government operation. If it is necessary for the Dominion government to operate ocean ships, it may also be found necessary to operate an air service, elevator system, etc., which, entailing the losses which almost invariably accompany state management, will greatly increase the annual burden upon the Canadian people.

The orders for the ships now under contract were distributed on the basis, not entirely of economical production, but with some political consideration. For instance, British Columbia shipbuilders are paid $10 per ton more than eastern shipbuilders. In explanation of this Hon. J. J. Ballantyne said in the House of Commons, on May 8th:—"First of all, I endeavored to place contracts with British Columbia shipbuilders at the eastern prices, but they pointed out that the labor cost was $7 per ton more in British Columbia than in the east, and that freight rates were very much higher. After a great many interviews, extending over some months, the government agreed to pay the British Columbia shipbuilders $10 per ton more than the eastern price for a similar type of ship. For instance, if an 8,100-ton ship was being built by Vickers of Montreal for $180 per ton, the price for a similar ship in the British Columbia yards would be $190 per ton."

Further orders are to be placed to keep busy for some time the shipbuilding yards which have come into existence during the period of abnormal conditions. Referring to the policy of the government for the future, Mr. Ballantyne said:—

"I have already stated that we have forty-five ships under contract. There are at the present time certain yards in Canada that require business. Berths are becoming vacant, and many more will become vacant in the very near future. The government has not finally decided how many additional ships they will order but I will bring down in my Supplementary Estimates the amount that the government will think it wise to ask approval for. The sum of $30,000,000 that I am dealing with now is to complete the contracts that we have already let, but in view of the fact that there is a great demand for ships and also that we could sell some of our ships under contract at the present time if the government deemed it wise to do so, we are not going to discontinue shipbuilding for the moment. We realize that there are 30,000 men engaged in the shipyards throughout Canada, from Prince Rupert to Halifax, and there are fully 10,000 more engaged in the industry of making engines, boilers, etc., and to cause 40,000 men to be out of employment at this time would be rather a dangerous thing to do. It is therefore not the intention of the government to cease their shipbuilding programme now. We are going to order additional ships at least to keep the yards that are requiring work busy throughout the balance of 1919, and probably for a few months in 1920."

The minister added, however, that the government could not go on ordering ships, because it is now getting near the limit that can be used. "The shipbuilders must not expect," he said, "that there will be many more orders to follow, and they must, therefore, look for orders for their shipyards in the same way as any other industry in the country would. There is no protection whatever given to the shipbuilders in the way of duty and bonus, and when the yards of the United Kingdom are free, a year and a half hence, to take orders, it will be most difficult for the Canadian shipbuilder to compete unless some form of assistance is given by the government. What that form of assistance will be has not yet been determined, but between now and the next session of the House, we hope to have a policy ready to present to parliament."

CIVIC INDUSTRIAL ENTERPRISE

THE city of Winnipeg is planning two ventures in the industrial field. Curiously enough, Winnipeg does not operate its own street railway or telephone service, and public utilities are considered more suitable for public ownership than are ordinary industrial enterprises. One of the schemes which is planned is a pulp and paper mill. Preliminary steps with a view to the erection and operation of such a mill were taken by the city council at a meeting held on April 21st. It is calculated that an initial capital expense of $[illegible],000,000 would be entailed for this purpose. The other scheme which is receiving attention is a milk distribution plant. It is figured that this would eliminate the high costs of distribution, incident to the operation of several companies. An expert was engaged to investigate the possibilities and he has reported that the annual saving to the city, as compared with the present method, would be $2[illegible]5,000.

Before entering upon ventures of this kind, however, the city should thoroughly investigate a number of other experiments, which have been made by Canadian cities along similar lines, such as the Toronto civic abattoir and also of this kind carried on by United States cities. In a majority of instances the results have been distinctly unsuccessful. The fact that a city contemplates ventures of this kind has an injurious effect upon its civic credit, as borrowers in the distinctly favor municipalities which adopt a policy of retrenchment. The financial policy of the city of Winnipeg during the past few years, has attracted much commendation, especially its practice of including war expenditures in current account. The rather uncertain position at the present time of the Greater Winnipeg Water District's finances, in which district Winnipeg is the principal partner, is a sufficiently variable factor without the introduction of other industrial enterprises, the result of which is doubtful and in which more failures than successes have been recorded.

THE CONTROL OF AIR TRAFFIC

THE action of the Canadian Pacific in applying for an air charter is one which is welcome to the public in Canada as it is desirable that this new industry should be operated along economic lines. This can be best assured by private management, subject to government control through an organization similar to the Dominion Board of Railway Commissioners. The control of this traffic will be entirely in the hands of the federal government as the British North America Act gives it all the power that is necessary for this purpose. Numerous difficulties will inevitably present themselves during the early years of operation; the work of the board will, therefore, be extensive and it should be composed of competent members. The subject of air traffic should also be referred to a committee of the House of Commons for the consideration of legislation.

The plans outlined by Mr. Grant Hall, vice-president of the Canadian Pacific Railway, in a recent statement, indicate that the air system will be operated in close cooperation with the existing railway and steamship service of the company. The same thing can be applied to the national railway system which should compete on the same basis as private organizations.

EFFECT OF LOW MONEY VALUE

ACCORDING to Lord d'Abernon, who is distinguished for his work in overhauling the finances of Turkey and of Egypt, the depreciation in the value of money has been a large factor in bringing about unsettled industrial conditions. He points out that during the four years of war this was much greater than that from the year 1700 to 1900. This was due to the great increase during the war in the quantity of legal tender in circulation. Paper currency—having the power of legal tender,—is now outstanding to the amount of probably £6,000,000,000, whereas in 1914, the amount was about £1,000,000,000.

"That means," he says, "that the amount of legal tender has increased very much more rapidly than the amount of commodities in use, and consequently, even if the quantitative theory of currency is not fully accepted, that must have a very important effect on the level of prices.

"Take the United Kingdom, for example. The amount of legal tender in circulation is from two to three times as great as it was in 1914. In France and in Germany there are still greater increases. As for Russia, the increase is enormous, although it should be noted that the precise effect on the world increase of prices of a great rise of local prices in any particular country is very obscure. This vast increase in the quantity of currency meant a fall in the standard of value of from 50 to 60 per cent.

"It is ludicrous to suppose that such a radical alteration in the value of the counters in which financial transactions are measured can be lived through without radical readjustments. In the second place, if these fluctuations are to continue, either upward or downward, it is almost imperative to establish a sliding scale in accordance with which financial obligations can be adjusted. Is it not of obvious advantage to arrange such a scale in advance, to be applied automatically, rather than to permit each fluctuation in the value of currency to fall on an unprepared world and to be followed by a series of struggles between the parties to money agreements, in order to arrive at a satisfactory settlement?"

What Lord d'Abernon advises is the adoption officially of one of the tables of prices of a large range of standard commodities as an index to the true value of money. Some prices on the list may rise and some may fall; but, provided the selection is sufficiently extensive and varied from the average, the exact value of currency can be scientifically and accurately determined. Lord d'Abernon would then refer all wages and minor salaries as they fell due to the index and would require the payment, not of the face value, but of the amount to which the table showed it was then equivalent.

The World Trade Club, the head office of which is in San Francisco, Cal., is urging the adoption of the metric system in measurements and weights. All countries have adopted such a system excepting Canada and the United States, which have applied the decimal principle to currency only, and Great Britain, Australia and New Zealand, which have not adopted any of the important units of measurements. Such a system would unquestionably facilitate intercourse in trade and finance and would soon repay the effort put forth and the difficulty involved in obtaining it.

ALBERTA LAND SETTLEMENTS ASSOCIATION FORM

The Alberta Land Settlement Association was organized in the Calgary Board of Trade rooms last week, with an initial membership of forty-three persons and firms, representative of the principal firms in Alberta engaged in the business of selling farm lands. The association is for the purpose of enabling the agents of the Dominion government in centres in the United States to bring prospective settlers into direct communication with reliable men and firms in Alberta who are able to supply the American requirements. O. N. Gilbert, of Calgary, was elected president; R. B. Welliver, Red Deer, vice-president. The appointment of a secretary-treasurer is left to the members of the executive in Calgary.

MONEY AND WAR PRICES

(*Continued from page 8*)

by borrowing abroad, which was made immediately available by advances from the Canadian banks on the security of the foreign drafts, and partly from advances from the banks to be repaid from future loans, domestic or foreign, and future increases of revenue from new sources, thus putting into operation all three processes of financing the war already referred to.

"The first national sacrifice made in the economic line was the loss of the product of the labor and services of the troops enlisted and sent overseas. The second and much greater loss, was the cost of the special equipment of these troops for service at the front, the transportation, clothing, storing, etc. The second loss involved the setting aside of another large body of citizens with extensive plants and vast quantities of raw materials and other goods for the production of equipment, munitions, etc., destined to complete destruction without the return of anything to replace it. What we imported in connection with this process had to be paid for in the export of additional food, raw materials, etc. Thus, while our production was limited, the competition for it was greatly increased, and credit furnishing funds to the purchasers, prices continued to advance.

"The purchases and expenditures of the government naturally dominated the whole situation, determining prices for all others. It was no longer a question of finding a market for goods, but for finding goods for the market. The expansion of the credit documents which carried on the exchange processes dominated by the government occurred partly through the extra issues of Dominion notes. We need not take account of the notes issued for regular circulation—viz., the ones and twos and the few fives. We are concerned with the larger notes, chiefly of $1,000 and upwards, which are not intended or used for circulation, but which were issued to meet government payments, and passing into the hands of the banks, become one of the lines of security on which they extend their issues and credits. The credit expansion came mainly, however, through the advances made by the banks, especially the advances of credit to the government—largely in anticipation of future loans. Under the suspension of specie payment and taking the banking system as a whole, the indefinite continuance of this process is quite practicable because a credit once granted and poured by the issue of cheques into the general money volume of the country never passes out of that circle until it is retired, usually by conversion into another form, as when the bank advances are paid off from the further government loans. Thus a credit of $5,000,000, granted to the government is merely an entry in the bank's books, and when drawn upon by the government in favor of munition industries, transportation companies, and supply purveyors of all kinds, much of it may not leave the books of the individual bank involving nothing more than debit and credit entries in its ledgers. Even when the parties to whom the credits are transferred, keep their accounts with different banks, the interchange of such credits between the banks through the clearing house, practically offset each other in the long run. Thus a credit of even $5,000,000 on government account makes little or no drain on the individual bank, and none at all on the general circle of banks, unless it comes to a matter of foreign exchange. Here the matter first takes the form of corresponding offsets in the shape of exchanges against exports, or against funds of the government, or corporations borrowed abroad. During the war, in particular, our financial engineers arranged carefully for the balancing of our international exchanges, so that there should be no serious embarrassment on that score. To be sure the continuation of the advancement of bank credits must lead in the end to an adverse balance of exchange through the stimulus thereby given to purchasing abroad. This we see in the case of Canada at the present time, where there is no special object to be gained by the government coming to the rescue.

"In the meantime, the bank account of our more prosperous citizens and those corporations and individuals chiefly profiting by the extensive war expenditures, were accumulating much of the extensive profits advanced by the banks. They were thus in a position to subscribe heavily to the new loans issued by the government. These, when successfully floated, enabled it to wipe out the bank advances and thus prepare the way for new and larger advances on the next turn. Even between the subscription to the loan and the payment of the final instalments, many subscribers obtained from the disbursements of that very loan sufficient to make their later payment upon it. The laborer, of course, takes care that he shares with his employer in the extra profit of war industries or trade, but is always disappointed to find that his latest wage increase is soon overtaken by the steady increase in prices.

"When the credit and advances made by the banks come in competition with each other in the purchase of supplies, alike for export and for home consumption, it is found that the volume of purchasing credit has increased much more rapidly than the volume of supplies, which is the cause of the constant rise in prices. This is quite inevitable and quite independently of any manipulation by the middlemen, though, of course, the constancy and urgency of the demand is a guarantee to them of ready sales at good prices.

"Some of the bankers, it is true, attempt to hedge on this rapid increase of credits. They admit a certain proportional advance of pure credit, when it is made to the first party, as to the government in anticipation of loans, but when once the government has drawn a cheque against these advances for the purchase of goods or services, and that cheque is deposited by the second party, it is treated as a deposit of actual wealth, as distinguished from a credit advance, and becomes at once a basis for a further advance. Much the same is true of advances to foreign governments to assist in the purchase of Canadian supplies. These advances are made in return for the securities of these foreign governments which are placed in the vaults of the bank and counted among its most liquid assets, although it is well known that, however sound the permanent credit of the government issuing them, they are certainly only paper credits at the present time, and as far as their effect upon Canadian finance is concerned, are solely expansion of credits without an ounce of good behind them. They, too, increase the competition for our necessaries of life, thereby increasing prices and raising the cost of living, contributing, at the same time, statistical evidence of increasing prosperity.

"Reference has been made to the stage at which the inflation of credit in increasing prices, and thus fostering imports, develops an adverse balance of exchange. The net effect of an adverse balance of exchange in the main lines of a country's trade, as between Canada and the United States; is, first, to check imports and, secondly, to stimulate exports. It checks imports by adding its own rate, say 2 or 3 per cent. to the tariff barrier which already exists. It thus favors the domestic producer and increases the price of these goods to the consumer. It stimulates exports by adding the rate of exchange to the price received for them, and, by diminishing the supply at home, tends to raise the price for the domestic consumer. Thus inflation of credit is not baulked of its prey through the influx of foreign supply.

"We have seen, then, how subtle, effective and far reaching are the effect of the expansion of credits, and how useful, indeed indispensable, was this process to the financing of the war on the part of a country so little prepared for such operations as Canada. While, therefore, we cannot criticize the process as a war measure, it is plain that it assisted our country in making those huge sacrifices incidental to the war. It is now our task to reverse the process, to reduce the inflation, and this can only be done by the extra production of wealth. In a word, we must once more replace the water with milk, we must enable the people to receive for their labor the full value of it in goods and not merely in money.'

Provincial Power Upheld in Supreme Court

Companies' Acts of Manitoba and of Saskatchewan Held to Be Within Legislative Powers of Provinces — Manufacturers Will Probably Appeal to Privy Council

ON May 10th a decision was handed out by the Supreme Court of Canada regarding the validity of provincial statutes requiring Dominion companies to be registered or licensed as a condition of carrying on business in the province. The cases in question were the *Great West Saddlery Company* v. *the King*, *John Deere Plow Company* v. *the King*, and the *A. Macdonald Company* v. *Harmer*, in appeal from the Court of Appeal for Saskatchewan, and the *Great West Saddlery Company* v. *Davidson*, in appeal from the Court of Appeal for Manitoba. These cases were, with the consent of the parties, argued jointly in October, 1917. The province of Ontario was, as well as Manitoba and Saskatchewan, represented by counsel, and the appellant companies' case was presented by F. W. Wegenast, of Toronto. The sections of the acts in question were those requiring all companies to take out a license to do business and to renew such license annually. The decision of the justices regarding the cases under the Saskatchewan Act was unanimous, but in the Manitoba case Chief Justice Idington and Justice Mignault each presented dissenting judgments.

A similar case on the Ontario Act was decided by the Appellate Division of the Supreme Court of Ontario some time ago, but was not appealed to the Supreme Court of Canada. The cases were brought at the instance of the Canadian Manufacturers' Association to secure a ruling as to whether the decision of the Privy Council in *John Deere Plow Company* v. *Wharton*, on the British Columbia Act, was applicable to the acts of the other provinces. In this case it was decided that a Dominion company could not be compelled to take out a license under the British Columbia Act before carrying on business or maintaining actions in the province. Some of the provinces, as a result of this decision, made alterations in their acts. The question in the Great West Saddlery cases was whether the John Deere Plow Company case was intended to lay down as a general principle that a Dominion company could not be compelled to take out a provincial company license. The Supreme Court of Canada decides this question in the negative and distinguishes the acts of Saskatchewan and Manitoba from that of British Columbia. The decision on the Manitoba case would govern in Ontario because the provisions of the Ontario and Manitoba Acts are almost identical.

The Appellate Division in Ontario had decided that the Ontario Act was valid, making an exception, however, of the provision which prevented unlicensed Dominion companies from maintaining actions in the Courts. The Supreme Court of Canada makes no such exception.

Mr. F. W. Wegenast, counsel for the Canadian Manufacturers Association, at whose instance the cases had been instituted, while hesitating to express an opinion, admitted that the situation was rather serious for Dominion companies. "It will make a Dominion company practically an outlaw the moment it is incorporated. The company will depend, for all its corporate rights upon provincial company law and all its transactions will be illegal and invalid except so far as authorized by the province. The issue is not as to the power of the provinces to tax a Dominion company. It is conceded that a Dominion company, like every other company and every other citizen, must pay its taxes and obey provincial laws competently enacted. The provincial acts in question are not directed to taxation. Their real purpose is to deter companies from going to the Dominion for their charters. If the decision of the Supreme Court is maintained a provincial charter will be more effective than a Dominion charter because it will give to a company the right to carry on business in at least one province."

It has not been decided whether an appeal is to be taken from the decision of the Supreme Court, but it has been suggested that a number of Dominion companies may join in carrying the case to the Privy Council.

The judgment of Chief Justice Idington, applicable to all the cases, reads as follows:—

"These appeals were by consent re-argued together, and they ought to be decided upon the same single neat point of law, whether or not a local legislature can tax an incorporated business company deriving its incorporation from the Dominion Parliament.

"All the other issues attempted in argument to be dragged into the case seem entirely irrelevant. If the tax is paid the other issues become of no consequence for the purposes of the disposition of the litigation respectively involved in each case.

"The issuing of any more interrogatories on merely abstract points of law by the Dominion Government to this Court for purposes of information or of testing the limits of the powers of local legislatures in regard to some supposed assertion or possible assertion of power seems for the present to have reached the bounds of its toleration; yet that does not seem to have exhausted the resources of ingenuity on the part of others, for we are invited to answer in some of the cases questions needless to answer if the power of taxation in question exists.

"The legislature of Saskatchewan, having due and proper regard to the fate which rightly befell some extremely unjustifiable British Columbia legislation in the case of *John Deere Plow Company* v. *Wharton*, 1915, A. C. 330, decided to conform so far as it could to the decision in that case; repealed its old statutes bearing upon the like questions (of which some are not involved herein) and enacting a new Companies Act, wherein it incorporated a provision for registration and licensing of all corporate business companies, and subjected all, whether of local organization under the Act, or of Dominion or of foreign origin, to an initiative and annual license fee of the same graduated scale, fixing the amount to be paid in proportion to capital. It clearly did this by way of taxation, which the appellants seek to escape.

"I know of no reason why they should not be subjected thereto, or why the place of origin should be a ground for freeing them from the common burden all should bear in support of the government of the province—where they choose to carry on business—and seek the protection it gives. Nor do I see any imperative reason for confining the exercise of the taxing power to some statute ear-marked as a taxing Act.

"The questions of choice of subjects for taxation and equality of burden to be borne thereby, and best modes of enforcing payment thereof, have never yet been scientifically settled in a way satisfactory to those who have paid the greatest attention to such questions.

"What we have primarily to deal with is the single issue of whether the annual tax, for the non-payment of which one of these companies has been penalized, falls within what is referred to in the B.N.A. Act as "direct taxation."

"It seems to fall well within the decisions in the cases of *Bank of Toronto* v. *Lambe*, 12 A.C. 575, and the *Brewers' and Malsters' Association* v. *Attorney General of Ontario*, 1897, A.C. 231, as being direct taxation. Indeed, no question was raised in argument founded upon any doubt as to this tax being direct taxation. In the graduated scale as a basis for its application I cannot distinguish it from the former, and in the licensing fee as a mode of its imposition it seems to fall within the latter case.

"I cannot, where the power seems so clear, entertain as a valid argument, in answer to the judgment in the two firstly-named cases enforcing the penalties, the objection that there are provisions in the act claimed to be *ultra vires*.

These collateral contentions seem wholly irrelevant to the single issue before us, so far at least as concerns the respective judgments for penalties. Their introduction seems but an attempt to becloud the real issue, which is a very narrow one

"As to the Harmer case, though not differentiated in the argument from the other two, it occurred to me that possibly the introduction of some of these alleged objections was not so far fetched. In that we have to consider the basis upon which a shareholder is proceeding against his company for relief. I am, however, of the opinion that there is quite enough in the plaintiff shareholders' complaint, when confined to the question of improperly incurring penalties by refusing to pay the tax and all implied therein, to maintain the action and the resultant judgment, without considering the other excuses for not doing so or contentions set up by either party.

"It seems to me the same observations are applicable to the appeal in the Manitoba case. I observe, however, that there is a slight difference between the language used in the final clause of the case stated in the Harmer case and that used in the final clause of the case submitted to the Manitoba courts. I shall revert to this in closing what I have to say

"I agree entirely with the reasons assigned by the late learned Chief Justice of Manitoba, and substantially with all advanced by Mr. Justice Cameron in support of the judgment of the Court of Appeal from Manitoba in the Davidson case.

"In deference to the argument presented herein I desire to point out that, in my opinion, a corporation, by whomsoever or whatsoever power created, has no greater right in any province than a private individual enjoying full rights of citizenship, and not personally disqualified in any way, going there to do business; and in many respects has less, unless expressly given same by virtue of some legislative authority endowed with power to do so, as, for example, in the cases of banks or railway companies.

"If created by the Dominion authority its capacity must fall within what an exercise of the so-called residuary powers of the Dominion may create, unless in the cases specifically provided for either, expressly or impliedly, in the enumerated powers of the B.N.A. Act conferred on the Dominion.

"The G.W. Saddlery Company in question in no way falls within any of the latter. There is, therefore, no reason for relying upon any such implication as may arise in favor of the corporation created to execute the purposes of any of the said enumerated powers.

"It was suggested in argument that the judgment of the Judicial Committee of the Privy Council in the Wharton case had said the Dominion Companies Act rested upon item No. 2 of the said enumerated powers. I do not so read it. And after the numerous futile attempts theretofore made, before said Court, to make that item relative to "Trade and Commerce" subservient to the enlargement of the powers of the Dominion in relation to conferring extraordinary powers upon ordinary trading companies, I submit respectfully that any such expression, if to be read as suggested, must be treated as *obiter dicta*.

"It was in no way necessary for the decision of the single neat point decided in the Wharton case. Moreover, we have, since that case, the expression of opinion by it in the Insurance case (1915) 1 A.C. 596, which seems to deny the power to rest any licence thereon to carry on any 'particular trade.'

"The pith of the said expression of opinion is contained in the following extract:—

"'There was a good deal in the Ontario Liquor Licence Act, and the powers of regulation which it entrusted to local authorities in the province, which seem to cover part of the field of legislation recognized as belonging to the Dominion in *Russell* v. *The Queen* (7 App. Cas. 829). But in *Hodge* v. *The Queen* (9 App. Cas. 117), the Judicial Committee had no difficulty in coming to the conclusion that the local licensing system which the Ontario statute sought to set up was within provincial powers. It was only the converse of this proposition to hold, as was done subsequently by this Board, though without giving reasons that the Dominion licensing statute, known as the McCarthy Act, which sought to establish a local licensing system for the liquor traffic throughout Canada, was beyond the powers conferred on the Dominion Parliament by s. 91. Their Lordships think that as the result of these decisions it must now be taken that the authority to legislate for the regulation of trade and commerce does not extend to the regulation by a licensing system of a particular trade in which Canadians would otherwise be free to engage in the provinces.'

"This express declaration of the Court above relevant to the non-existence of the power claimed for the Dominion so far as rested upon the enumerated item of 'Trade and Commerce,' seems to me conclusive against the contention of appellant, for it is only by virtue of something alleged to rest upon said item the mysterious right is asserted. If the Dominion cannot assert the power claimed for it by way of an express licence, much less can it do so by mere incorporation giving specified rights to certain parties to trade in a corporate capacity. The legal entity must submit to the same laws properly enacted by and within the powers of a provincial legislature as the private individual.

"The power to impose a tax and enforce its collection by means of prohibition to trade until it has been paid and its payment evidenced by a licence has been asserted and upheld especially in relation to the manufacture and sale of liquor in so very many ways, that one is surprised to hear the argument now put forward that the doing so is to be treated as an improper assertion of power and a denial of anything more than it means.

"Though the testing of the power has been more in evidence before the courts in relation to the liquor traffic than any other the successful assertion of the power has been asserted in manifold ways by provincial legislation ever since Confederation. Much of that has been asserted through the powers given the municipalities, which again rests upon Item No. 9 of section 92 of the B.N.A. Act, as to the licensing power as a means of raising revenue. The taxation of transient traders by municipalities—a very old form of tax—and sometimes of the travelling circus, would be an illusory thing if the collection was not enforced by prohibition of carrying on the business of him so liable.

"I only present these casual illustrations as a test of the possible need of the power to prohibit the carrying on of business until the tax may have been paid, in order to render it effective, of which no reasonable person, speaking of its possible exercise in relation to such cases, would be likely to deny. A judicial creation of a mere theoretical power to tax without any potentiality of its enforcement is apparently the high aim of the appellants.

"But so long as the decision in the Parsons case and all involved therein stands as good law, the power of the provincial legislatures over contracts will remain what it was always intended to be. There would not seem to be in principle any difference in the quality of the power invoked whether exercised in relation to such transients or others presenting greater promise of permanency. Yet the transient trader or the circus man might easily become incorporated, and often is in fact. Are we to say incorporation by virtue of the Dominion legislation inherently carries with it a greater sanctity than any other.

"We do know from the record herein that the John Deere Plow Company, Limited, one of the appellants herein, became so incorporated on the application of four gentlemen of Moline, in the State of Illinois, one of the United States of America, and a dealer in Winnipeg.

"Why should such a legal entity be entitled to claim, merely because so created by virtue of Dominion legislation professing only to so create, and not pretending thereby to confer greater rights to trade anywhere in Canada than any mere private individual citizen of Canada possesses, that it has such superior rights?

The questions submitted are not necessary for the determination of the single issue which the pleading presents

VANCOUVER AND COAST PROSPEROUS

Business Much Improved in Vancouver—Change in Taxation System Wanted—The Loan Situation—Insurance

(Staff Correspondence.)

Vancouver, May 10, 1919.

THE general situation in Vancouver is considerably improved. There is the same feeling here, however, as everywhere else in Canada regarding the labor unrest, but it is predicted that the sane element in the labor ranks will ultimately triumph. In discussing the outlook with *The Monetary Times*, a prominent and old-time banker on the coast, said:—

"At the close of last year, after the armistice was signed, considerable apprehension existed with regard to the immediate future in both manufacturing and trading business. At the time of writing, business is getting on a better basis and the volume is increasing very satisfactorily. The bank clearings have shown a considerable increase over the corresponding period in 1918, and inquiries for our lumber, etc., point to large orders coming this way later, the present business being fairly satisfactory. It is likely, however, that there will be a decrease in shipbuilding after the present orders are filled, which may cause some unemployment. I think, however, with our agriculture and other employments showing signs of being in good condition, that there should not be any serious labour troubles on this coast.

"While no one here wishes to see another real estate boom, there is undoubtedly a revival in real estate values. This would be much more marked if some equitable system of municipal taxation were in force. At the present time, real estate has to carry about 4/5ths of the municipal taxes, which is unfair and which will, no doubt, be remedied by the broadening of the basis of taxation in the future."

Vancouver Housing Conditions

"During the past few months," said the manager of a large eastern trust company to *The Monetary Times*, "there has been a steady increase to the demand for small or medium-priced houses. With apartment houses filled and hardly a house to be had for rent, people are seriously considering the question of building. There has been a noticeable demand recently for desirable lots for building purposes, and prices, which, at first, were very much below pre-war figures, are beginning to stiffen up. In some sections of Vancouver the building activity is noticeable. In the investment field it may be stated that good investments are difficult to obtain. The demand for government, provincial and municipal bonds is so great that the yield rate of interest is gradually lowering. Good mortgage investments are hardly to be had, although money is available.

"There seem to be many inquiries from returned soldiers for small acreages partly developed, and with assistance from the government or Land Settlement Board, many of these men should soon be actively engaged in production. Undoubtedly, British Columbia has been widely advertised by its soldiers, and men from other provinces are seeking to locate in this province where climatic conditions are attractive. The Fraser Valley lands and lower portion of Vancouver Island seem to be more in demand than the agricultural lands in the interior or in the northerly portion.

"The prospect of increased taxation on real estate in Vancouver is agitating property owners and those acting for them. Pressure will likely be brought to bear on the powers that be to widen the basis of taxation, so that the burden of keeping up the city may not fall altogether on the owner of real property, but on those also who do business in the city, rent houses and obtain educational advantages for their children."

In discussing the mortgage situation, more particularly as it effects city and residential properties, with *The Monetary Times*, Mr. S. D. Macdonald, general manager of the British Columbia Permanent Loan Co., said:—

"I am pleased to advise you that the conditions which have for years prevailed and made the pathway of lenders exceedingly difficult at times, have practically passed away. During these years, rental values of both business and residential property sagged considerably below a level sufficient to cover carrying charges, and the situation was further complicated by a lack of demand for the natural resources of the province. During the past year, however, there has been a gradual return to normality, and conditions are vastly improved; in fact, granted we have no serious labor and taxation problems to face in the city, we are entitled, I think, to look forward to continued improving conditions.

"On looking back over the past four or five years, I have come to the conclusion, after viewing our company's experience, that the only safe and sane method of loaning upon city residential security, is the monthly repayment one, provided always, the abuses which too often characterize monthly loans are eliminated. The oft repeated reproach of usury in disguise, I unhesitatingly say, does not apply to this company, for we do not blend our payments, nor is the loan retired on any amortization plan. In fact, a monthly division into interest and principal is made upon the borrower's monthly receipt book, just as it appears on our own records, and he usually takes just as much pride in examining his pass book as the average man does with a savings bank account. I am rather inclined to the opinion that had our city loans been on a straight loan plan, our experiences during the past four or five years would not have been so satisfactory, for this reason:—

"Very few of us are constitutionally methodical, and by far the greater number need a compelling influence in order to be prepared to meet our obligations when due. This is particularly the case with people who are used to a weekly, fortnightly or monthly wage, so that a payment which appears on the horizon six months ahead is often only partially met, and then with considerable effort, but if the same could be looked after monthly, it would not only be looked after more easily, but more thoroughly."

Vancouver Insurance Impressions

With regard to insurance in general at the coast, the writer notes with satisfaction the solid expansion, which, in general, has characterized the past few years. Shipbuilding ranks foremost in this regard and the citizens generally and those primarily interested should co-operate to the fullest, in order that this great industrial asset, for which Vancouver and Victoria are so well adapted, may, if possible, be permanent and extensive.

Studying insurance affairs, which is one of the bulwarks of any city, the writer observes progress here during the past twelve months, and also notes that many companies in varied lines are entering British Columbia with a view of extending their lines into the casualty business, and some of the older companies are opening branch offices to cope with the increase in business. This is gratifying, as it indicates the public appreciation of the anchor of insurance and is a pleasant contrast to the speculative real estate days, which no doubt in a way hindered development and progress.

Insurance income in all branches is rapidly growing, the life and accident branches in particular, owing to the experience of the unfortunate influenza epidemic, which struck many unawares.

The automobile insurance business is growing by leaps and bounds, owing to the fact that prosperity has once again come upon this province, and it is interesting to note that during the first four months of this year over eight hundred touring cars and about seventy-five commercial trucks have been sold, all of which need insurance.

Fire experience is reported very satisfactory, though a fire boat is urgently needed, and it is sincerely hoped that same will be provided in the near future. In a city like Vancouver, with many old frame buildings and the water front, perhaps unavoidably, congested, this matter should receive the serious attention of the government, as fire, conflagration exacts a dread toll, with ruinous results both to the business fraternity, owners and insurance companies.

PUBLIC UTILITY COMPANIES IN 1918

Large Increase in Volume of Business, but Profits are Less Owing to High Operating Expenses

COMPARATIVE statistics of express, telephone and telegraph companies in Canada during the year ended June 30th, 1918, were given in the Dominion House of Commons on April 24th by Hon. J. D. Reid, Minister of Railways. The statistics were compiled by the statistical branch of the Department of Railways. Those dealing with the express companies show that the operating mileage on June 30th, 1918, was 43,247 in Canada, which was about the same as in the previous year, while foreign mileage was 19,296, an increase of about 3,000 miles. The cost of property and equipment of express companies was $1,949,246. Gross receipts totalled $18,680,092, as compared with $16,836,373 in the previous twelve months, while the net operating revenue was $450,243, as against $1,096,111 for the year ending June 30th, 1917. The net corporate income of the express companies was $443,535. In 1917 a dividend of 10 per cent., amounting to $200,000, was paid by the Dominion Express Co. and a similar amount applied to reserves, leaving a credit balance for the year of $522,123. Dividends were not declared by the express companies in 1918, nor were any sums set apart as reserves.

Telephone figures indicate a substantial development of the telephone business for the year ending June 30th, 1918. The number of reporting units increased from 1,695 in 1917 to 2,007 in 1918. The growth was greater in Saskatchewan than in any other province. The number of reporting units by provinces were as follows: Prince Edward Island, 32; Nova Scotia, 143; New Brunswick, 31; Quebec, 173; Ontario, 528; Manitoba, 38; Saskatchewan, 727; Alberta, 8; British Columbia, 14; Yukon, 1. It is noted that the governments of Alberta and Manitoba own practically all of the telephone systems in the two provinces. Saskatchewan is also a large owner of telephones, but there are in addition, in that province, about 1,000 lines in the hands of private organizations. The capitalization of telephone companies operating in Canada is given as $85,274,691 and the cost as $104,368,627, an increase of $10,000,000 as compared with 1917. Earnings of the telephone companies in the last twelve months under review amounted to $22,753,289, while operating expenses totalled $13,644,524. Net earnings as represented in the difference between gross receipts and operating expenses were $9,108,765 in 1918, as compared with $8,025,855 in 1917. Additions to and subtractions from primary net earnings reduce that amount to $5,187,323.

Coming to the telegraph companies, the figures presented show that on June 30th, 1918, their cost was placed at $10,226,988, a slight increase over the previous year, while the capitalization of the companies having headquarters in Canada was $6,300,000. The gross revenue was $7,770,646, as compared with $7,272,755 for the previous twelve months. Operating expenses were $5,820,335, as compared with $4,940,228 during the previous year. The net operating revenue amounted to $2,016,429. Wire mileage totalled 210,100, a slight increase over the previous year. The number of telegraph offices totalled 4,664, as against 4,615 at the end of June, 1917.

GOLD IN HAND, $121,141,122

According to the report on circulation and specie at the end of March, 1919, the gold held by the Minister of Finance amounted to $121,141,122, while the gold reserved to be held on savings banks deposits amounted to $5,126,267, thus leaving a total of $116,014,654 held for redemption of Dominion notes. The Dominion notes outstanding against deposits of approved securities amounted to $128,428,000.

The amount shown as held against savings banks deposits is 10 per cent. of the total of such deposits of $51,262,676.

The circulation of one dollar bills was greater than that of any other denomination, being $15,217,260, against $12,161,479 in two dollar notes and $4,772,455 in five dollar notes.

CANADIAN PULP AND PAPER EXPORTS

Increase in Value Nearly 100 Per Cent., Due to Federal Trade Commission Agreement

ACCORDING to a special report issued by the Canadian Pulp and Paper Association, Canadian exports of pulp, paper and pulpwood for February, 1919, amounted in value to $8,777,227, as against $4,402,456 for February, 1918, an increase of almost 100 per cent. A large proportion of the increase is accounted for by printing paper, of which 797,708 hundredweight, valued at $2,278,166, were exported in February, 1918, as against 1,242,674 hundredweight, valued at $4,305,099 in February, 1919. February, 1918, was one of the months to which the $60-a-ton price for newsprint paper, fixed under the Federal Trade Commission agreement, applied, while the February, 1919, fixed price was $75.05 a ton, which accounts for some of the increased value.

Exports of chemical pulp were 366,371 hundredweight, valued at $1,260,024, in February, 1918, and 491,061 hundredweight, valued at $1,916,828, in February, 1919. Groundwood exports fell off $3,824 in value for the month, 147,030 hundredweight, valued at $222,245, being exported in February, 1918, against 164,673 hundredweight, valued at $217,421, in February, 1919.

Unmanufactured Pulpwood

Exports of unmanufactured pulpwood in February, 1919, totalled 145,747 cords, valued at $1,411,100, as against 36,515 cords in February, 1918, valued at $359,486, an increase for 1919 of nearly 300 per cent, a significant showing in view of the agitation for a removal of the restrictions against the export of pulpwood cut from Crown lands. The 145,745 cords of pulpwood exported in February, 1919, were capable of producing 97,163 tons of newsprint paper, which, at the export price of $75 a ton, would have brought into Canada $7,287,025, instead of the $1,411,100 received, had the wood been manufactured into paper here and exported in that form.

Detailed Figures

The following are the comparative details for February:—

	1918.	1919.
Paper and manufactures of	$ 2,560,701	$ 5,231,878
Chemical pulp	1,260,024	1,916,828
Mechanical pulp	222,245	217,421
	$ 4,042,970	$ 7,366,127
Pulpwood	359,486	1,411,100
	$ 4,402,456	$ 8,777,227

The following are the detailed comparisons for the eleven months ended February 28th:—

	1918.	1919.
Paper and manufactures of....	$32,985,106	$43,195,197
Chemical pulp	17,223,731	28,184,972
Mechanical pulp	5,886,394	4,253,361
	$56,095,231	$75,633,530
Pulpwood	7,778,758	13,978,457
	$63,873,989	$89,611,987

CANADIAN NORTHERN RAILWAY CERTIFICATES

Seven million five hundred thousand dollars of Canadian Northern Railway equipment trust 6 per cent. gold certificates are being offered by Wm. A. Read and Co., of New York. The certificates are dated May 1st, 1919, and are due in semi-annual instalments of $375,000 each from November 1st, 1919, to May 1st, 1929, inclusive. The offering price ranges from a yield of 5½ per cent. for the six-months certificates to 6 per cent. in the case of those of longer date.

Is It Fair to Make Your Friend Your Executor?

Perhaps you feel you honor him with your trust. You certainly burden him with a great responsibility. Few individuals can spare the time and few have the ability or experience to properly carry on the duties of Executor of an Estate. Our thirty-seven years experience in the care and Management of Estates and Trusts is evidence of our worthiness to be appointed your Executor Write for our Booklet, "Making Your Will."

NOVA SCOTIA ACCOUNTS AND ESTIMATES

1918 Accounts Show Deficit of $219,965—Current Estimates Provide for Greatly Increased Expenditure

ON May 5th, estimates of the province of Nova Scotia for the current fiscal year of 1919, were given in the legislature along with a statement of revenue and expenditure for the year ended September 30th, 1918. The revenue was $2,332,632 and the expenditure $2,552,597, leaving a deficit of $219,965. This deficit is, of course, largely due to war conditions. The revenue from royalties on mines was less by $83,697 than on the previous year. On the expenditure side the expense of maintenance of public charities, owing to the cost of material, food, wages, etc., increased over the previous year by $151,157, a total difference, therefore, of $234,854, an amount greater, as will be observed, than the deficit for the year.

The attorney general, who presented the estimates, directed attention of the House to urgent necessity of devising means to equalize the expenditure and revenue. The avenues of taxation which were open to the province for purposes of revenue have been to some extent utilized during the past few years by the Dominion Government in connection with war requirements. It has been necessary, therefore, to provide additional taxation upon corporations and those liable to taxation under the present revenue acts. To this end revenue bills have already passed the House which will materially increase the amounts to be received from certain sources. He said that in no case are the burdens to be borne regarded as heavy, and they are in all cases lower than the same sources of revenue yield in other provinces of Canada. These bills also provide for revenue from certain corporations doing business in the province not hitherto taxed, including railways under provincial jurisdiction.

The subsidy that was received on population, allowance for government interest on debt account, and Baring Bros. deposit from year to year is a fixed amount, namely $636,000, and there was received $656,989, a decrease of oved 500 and received $14,717, while there is anticipated for this year $20,000. From Crown Lands there was estimated $25,000, received $24,009, and it is expected that $30,100 will be received this year. From education a total of $55,500 was estimated last year; $59,568 was received and $72,500 will be received this year. This increase is due to the increased revenue from technical education, from the sale of books to pupils and on account of an arrangement made with the Soldiers' Civil Re-establishment Bureau whereby three-quarters of the maintenance account of the college in certain items will be paid by the Dominion Government. The interest on consolidated mortgage Halifax and South Western Railway is the same amount, $155,645. From the mines of the province there was estimated last year $765,000, an dthere was received $656,988, a decrease of over $109,000, and it is estimated this year that the province will receive still less, namely $631,000, which is over $134,000 less than what was expected at this time last year and about $26,000 less than was actually received in 1918.

From the Nova Scotia Hospital the revenue in 1918 was estimated to be $145,100. $135,036 was received, and it is expected that $157,200 will come in this year, an increase of over $22,000. From private bills $1,000 was estimated last year, $1,664 was received, and $2,100 will be received this year. The amount of $1,600 appears as revenue, received from the Deputy Fuel Controller. From the provincial secretary's office the revenue estimated was $272,700. There was received $271,605 and there will be received this year $503,900. The increase over last year's receipts in this office is from a slight increase in the incorporation and registration of companies, an increase of $37,752 in registration of motor vehicles, $50,000 from taxation of certain companies, being the revenue anticipated from a bill which has just passed the House, and an increase on supplementary revenue account of $160,000, which is made up of increases in taxation of banks, insurance companies, loan companies, telegraph companies, express companies, railways, taxation of certain companies operating public utilities previously taxed. The estimates show the amount to be received from municipalities for highway purposes as $455,600. This includes the amount due in last year's account which was not paid until after the beginning of the present fiscal year and amounting to $120,000. The estimated revenue from cities, towns and municipalities for the present fiscal year for highway purposes is $335,600.

Estimates for 1918-19

The total revenue estimated to be received for this year is $3,229,896, which is $897,264 increase over the actual revenue of last year, and is accounted for by the amount estimated to be received from the municipalities and the additional revenue from other sources to the amount of $441,664.

The total expenditure is estimated to be $3,223,327, showing an estimated surplus of $6,569, itemized as follows:—

DOMINION AGRICULTURAL CONDITIONS

Small Amount of Wheat Winter Killed—Wet Weather has Retarded Work in Some Parts

THE Dominion Bureau of Statistics issued on May 12th the first crop report of the season of 1919 dealing with the winter-killing of fall-sown wheat, the condition of fall wheat and hay and clover meadows and the progress of spring seeding, the report being compiled from the returns of crop correspondents from all parts of Canada on April 30.

Owing to the exceptionally mild winter, the proportion of fall-sown wheat that was killed is very small, amounting in fact for the Dominion only to 5 per cent., representing 42,250 acres out of the 840,000 acres estimated as having been sown last fall. Only in the winter of 1915-16 was the proportion so low, the figure then for the Dominion being also 5 per cent. The proportion this year is in marked contrast to the severe winter of 1917-18, when over half of the area sown to fall wheat was destroyed. In Ontario, where the bulk of winter wheat is grown, the proportion destroyed is 5 per cent., or 39,000 acres, in Alberta it is 7 per cent., or 3,100 acres, and in British Columbia it is 2 per cent., or 150 acres. The area therefore under fall wheat in Canada which remains for this year's crop is 797,750 acres, as compared with the harvested area of 416,615 acres in 1918. The total for 1919 comprises 744,000 acres in Ontario, 6,100 acres in Manitoba, 40,600 acres in Alberta and 7,050 acres in British Columbia. The average condition of fall wheat at the end of April, weighted in proportion to acreage, is for the Dominion 103, or 3 per cent. above the average condition at the same date for the eight years 1911-1918. In 1918 the corresponding figure was 76, or 24 per cent. below average and in 1917 it was 88, or 12 per cent. below average. The condition in Ontario and in Manitoba on April 30, 1919, was 103, in Alberta it was 101 and in British Columbia 100, or exactly equal to the average.

About 6 per cent. of the area under hay and clover is reported as winter-killed, as compared with 11 per cent. last year and 9 per cent. in 1917. The condition of hay and clover meadows on April 30 last is reported as 99, or 1 per cent. below the average of the eight years 1911-18. By provinces, the condition is as follows: Prince Edward Island, 102; Nova Scotia, New Brunswick and Quebec, 101; Ontario, 98; Manitoba, 99; Saskatchewan, 94; Alberta, 95; and British Columbia, 100.

Progress of Spring Seeding

Practically no progress with spring seeding had been made by the end of April in the Maritime provinces and in Quebec. In Ontario very little had been done, and the spring is late. Snowstorms during the last week of April threw things still more backward and in many parts left the land too wet for seeding. In the west, the spring opened up late, but by the end of April good progress was being made, and a good seedbed was, as a rule, being obtained. Numerically, about 60 per cent. of spring wheat had been sown by April 30 in the five provinces of Ontario, Manitoba, Saskatchewan, Alberta and British Columbia, as compared with 66 per cent. last year, including Quebec. In Ontario the proportion was 29 per cent., as compared with 68 per cent. last year; in Manitoba 40 per cent. against 94 per cent.; in Saskatchewan 62 per cent., against 85 per cent.; in Alberta 77 per cent., against 92 per cent.; and in British Columbia 45 per cent., against 66 per cent. Of oats, the percentage reported as sown is 9 per cent. for the five provinces, and of barley it is 5 per cent. Of the total seeding, the proportion sown at the end of April was 30 per cent., or nearly one-third.

In a Quebec court it was recently decided that an illness gradually contracted owing to the nature of employment could not be called an accident in the terms of Provincial Workmen's Compensation Act.

DEMOCRATIC CONTROL OF INDUSTRY

Fundamental Changes Being Gradually Brought About in Distribution—Supplements Revolution in Methods of Production of Eighteenth Century

IN an address before the University of Manitoba on May 8th, Mr. W. A. Riddell, Ontario superintendent of trades and Labor, discussed the subject of "Competent Democracy." This was the first of a series of lectures being delivered under the auspices of the University on current problems.

"Last century saw an industrial revolution," said the speaker. "This industrial revolution is transferring the civilization of the world from the individualistic type to the social or collective type, thus increasing a hundredfold the possibilities of the common good or the common ill. It has practically solved the question of production, but it has complicated that of distribution, increasing the power of corporate wealth. It has become a threatening peril, profoundly stimulating popular discontent.

"For the first time in the history of civilization the economic foundations have become adequate for competent democracy. The world is just emerging from the throes of the greatest struggle of all history. Count Okuma, one of the oldest, most experienced and ablest of the statesmen of Japan, watching the conflict from the other side of the globe, declared it to be nothing less than the death of European civilization.

"This will depend largely on whether democracy proves competent or incompetent. Democracy has triumphed over autocracy. Will democracy triumph over the foes of its own household? Incompetent democracy or Bolshevism, as it has been called in its latest organized form, is more insidious than the Hun. It is not so much to be feared in the front line trench, but it is infinitely more to be dreaded in its public penetration behind the lines.

"Competent democracy works for all its citizens. It would make the test of greatest the greatest service to the whole people. If democracy is permanently to defeat autocracy then it must be competent and utilize to the utmost its ablest leadership, economic as well as political. Competent democracy buys and must buy the support of a great body of voters by offering to the community honest goods which the community wants.

"It must offer enlightened legislation and efficient administration. It must offer sanitation and education. It must offer improved living conditions. If competent democracy is to push its political offensive it must offer and give to the wage-earning masses an increasing share of the economic, no less than of the intellectual and the moral product of socially organized effort.

"Competent democracy can win its way against incompetent democracy only in this way. The Lloyd George programme of unemployment insurance, old-age pensions, employment exchanges, wage boards, work's committees, all go to show in probably the most complete democracy to-day some of the wares that must be exchanged for the voter's support at the polls. The British labor party programme of reconstruction after the war of December, 1917, as is to be supposed, goes much further. It states the four pillars of the house that we propose to erect, resting upon common foundation of the democratic control of society in all its activities, may be termed, 'the universal enforcement of a national minimum, the democratic control of industry, the revolution of finance and the surplus wealth for the common good.' "

Mr. J. A. Thomas, provincial fire inspector for British Columbia, in a recent report advises the department that he has ordered eight public garages to close and six others to make alterations. He also states that he has drawn the attention of the city fire chief to the danger of allowing moving picture films to be stored in buildings occupied by other tenants.

MANITOBA'S FINANCIAL POSITION

Provincial Treasurer Points Out Two Outstanding Features Unusual Compared With Other Provinces

THE Provincial treasurer of Manitoba has issued a statement of the provinces's financial position, which reads as follows:—

"In seeking to get a correct idea as to the real standing of the province from a financial standpoint there are two features of the situation which are unusual as compared with other provinces, and which should be borne in mind. The first is as follows:—

"The government of Manitoba has established n system of accounting which is quite up-to-date, and by reason of it the balance sheet presented is a true and correct statement of the position of the province in every respect.

"In the office of the comptroller-general (who has charge of every branch of the accounting throughout the province), the various departments of the government co-relate in the same sense as these departments are corelated in council from the standpoint of public policy. The advantage of this is that the treasury knows from day to day exactly how the accounting machine is working, and the cashier is able to present a statement every morning showing the amount of money that has been paid out from the various departments on the previous day and also the amount of revenue that has been received. The same relates to the operation of the capital moneys account and also the trust account. One can readily understand the great advantage to the administration in having this knowledge at their disposal from day to day, in place of working on estimates from month to month as is the practice in every other government in Canada.

"The public accounts consist of a recital of the expenditure in detail, of the various departments. The balance sheet is made up of assets and liabilities brought about by co-relating the various departments.

"In arriving at the actual results from year to year the government advertises for thirty days for all claims against the province, and any accounts remaining outstanding and unpaid are shown in the balance sheet as 'accounts payable.' Further, interest is charged on the bonded indebtedness of the province to the end of the fiscal year. Further, any revenue that have been received in advance of having been fully earned are charged against the administration. In the same way school grants that have been earned, but are not due for payment are shown as a liability.

"From the above it will be seen that the balance shown in the public accounts is an exact balance, such as you would expect to find in the accounts of any large corporation.

"Again, the public accounts show the following revenues, outstanding and unpaid, in the form of 'deferred revenues,' which are not taken into account in the actual balance sheet, as indicating the conservative way in which the accounts are prepared:—

Succession duties (unpaid)	$ 281,689
Interest on school lands	521,122
Interest on provincial lands (outstanding)	365,559
Giving a total of	$1,168,370

Second Feature

"Under an act passed by the legislature of the province during the session of 1917-18, it is provided that all moneys received from the sale of assets of the province such as land, timber, minerals, or assets of any kind or description, only the interest arising on these can be treated as revenue. All moneys representing the sale price are to be treated as principal moneys and earmarked for investment. The purpose of this act is to conserve the assets of the province for the benefit of the people, and to remove any incentive from the standpoint of administration to dispose of public assets in order to secure revenue. In addition, the moneys arising in this way are so invested as to more rapidly develop the resources of the province. To illustrate: In the budget statement issued for the fiscal year ended November 30th last, there is shown 'cash on hand,' and 'capital investment,' $7,642,292. This is against a net debt of fourteen millions. The purpose of the investment account is to overtake as rapidly as possible the debt of the province by way of interest earnings. If this policy is strictly adhered to, it will be readily admitted that in a very few years the position of the province will have greatly improved, and should the province secure control of the natural resources such as land, timber, minerals and water power, the application of the principal referred to will, in the next twenty years, create an investment account of a very large sum of money. No other province in Canada, not excepting the Dominion, has made such provision, but is in the habit of treating as revenue moneys that the province of Manitoba now treats as 'principal,' and which is earmarked for investment."

PRINCE EDWARD ISLAND ESTIMATES

Estimates of revenue and expenditure for the fiscal year 1919, as presented recently by Hon. A. E. Arsenault, premier of Prince Edward Island, show a total estimated expenditure of $527,423, including $21,500 on capital account. There may also be sums required for highway improvements and purposes connected with the war. The revenue, including war tax, is estimated at $528,166, the principal item of which is, of course, the Dominion subsidy amounting to $372,181. The total expenditure last year was $506,047.

MONTREAL EXCHANGE FIRM IN OTTAWA

The Montreal Stock Exchange firm of Redpath and Co., announces that it has opened an office at 51 Sparks St., Ottawa. Direct wire communication has been established between the Montreal office and the new branch. The Ottawa office will be in charge of Capt. J. Percy Shaver, recently returned from overseas, after several years' service in the Royal Flying Corps, during which he was wounded on the western front. Captain Shaver was for five years private secretary to Sir Clifford Sifton, and is well known in Ottawa.

PREPAYMENT OF FREIGHT NOT REQUIRED

On May 6th the Canadian Railway War Board announced that the requirement of a bond covering all credit accounts for shippers and consignors of freight had been done away with. The new credit rules call for the settlement of accounts as follows:—

Charges accumulated from the 1st to the 7th of the month must be paid by the 14th, from the 8th to the 14th must be paid by the 21st, from the 15th to the 21st must be paid by the 28th, and so on. Settlement within forty-eight hours after shipping or after delivery of the freight shall be considered cash in the case of shipper or consignee, respectively.

"The new rule does away with the bonding feature because the majority of Canadian shippers objected to it," said General Secretary W. M. Neal. "It was, and it will be, a perfectly sound and absolutely just rule, quite as much in the interests of the shippers and consignees as in the interests of the roads. The very same rule is still in force on the American government roads, where it was adopted from precisely the same sense of sound and fair business that influenced our proposal. We realize, however, that no rule can stand which lacks the sanction of public opinion. Such being the case in Canada, we have withdrawn it."

BANK BRANCH NOTES

The following is a list of branches of Canadian banks opened recently:—

Toronto, Ont. (Runnymede and Bloor)	Royal Bank of Canada.
Red Willow, Alta.	Royal Bank of Canada.
Telkwa, B.C.	Royal Bank of Canada.
Harbor Buffett, Nfld.	Royal Bank of Canada.
La Maya, Cuba	Royal Bank of Canada.
Winnipeg, Man. (Arlington and Westminster)	Imperial Bank of Canada.
Whitecourt, Alta.	Imperial Bank of Canada.
Rockfort, Alta.	Imperial Bank of Canada.
*Markhamville, Que.	Canadian Bank of Commerce.
†Elstow, Sask.	Canadian Bank of Commerce.
†Ochre River, Man.	Canadian Bank of Commerce.
Hull, Que.	Bank d'Hochelaga.
Edmonton, Alta.	Bank of Toronto.
Charlottetown, P.E.I.	Union Bank of Canada.
Campbellford, Ont.	Union Bank of Canada.
Ridgetown, Ont.	Union Bank of Canada.
Rodney, Ont.	Union Bank of Canada.
Heward, Sask.	Bank of Nova Scotia.

---

* Sub-agency to Compton.

† Formerly sub-agencies, now independent branches.

The Merchants Bank of Canada has just completed the purchase of the site on the south-east corner of Westminster Avenue and Arlington Street, Winnipeg. It is the intention of the bank to put up a modern bank building, and pending its erection, accommodation will be secured in the immediate neighborhood of the site.

Mr. C. Brooke Marsland, who has been manager of the Union Bank of Canada at Guelph for the past two years, has been transferred to Toronto. His successor is Mr. S. Craig Evans, of Hagersville.

The Royal Bank of Canada will, at an early date, open a branch at 28 Rue du Quatre Septembre, Paris, France.

Mr. J. A. Taylor, who for the past eight years has been the manager for the Royal Bank of Canada in Victoria, B.C., has taken charge of the branch of that bank on Portage Avenue, Winnipeg.

The opening of the Union Bank of Canada at Charlottetown, which was announced this week, gives the bank representation in Prince Edward Island for the first time. Mr. G. C. Temple, of Wiarton, Ont., has been appointed manager, and his place at Wiarton has been filled by the appointment of Mr. J. F. Stewart, of Mount Brydges, Ont., as manager.

The Royal Bank of Canada has purchased a site on the corner of Johnson and Kelvin at Elmwood, Man., and intends to build a new branch there.

MUNICIPAL FINANCE

Calgary, Alta.—About $300,000 is the amount given as the receipts from the city tax sale up to date. Of that amount $[illegible]0,000 has been taken in through actual sales.

New Westminster, B.C.—An increase in the assessment this year of $532,000, even with a reduction by the court of revision of $148,225, is the result of the final sitting of the court held at the city hall, for New Westminster district. The original net total taxable assessment, including taxable improvements, was $12,887,850 as compared to $12,207,625 last year. With the reductions made, the net total for 1919 is now set at $12,739,625.

Calgary, Alta.—In their process of cleaning up the financial affairs of the city, the commissioners have instructed the solicitor to go over all industrial sites disposed of under agreement of sale where balances still remain on the purchase price. If substantial payments cannot be had, the city will sue for specific performance. The sales date back as far as 1911, and range in amounts from $4,000 to $7,000.

Winnipeg, Man.—The city's dispute with the province regarding assessment for provincial taxation purposes may go to the courts. Mayor Gray is to take up the payment of some money in dispute with Premier T. C. Norris, and report to the city's finance committee. A letter from T. A. Hunt, city solicitor, recommends that the validity of the provincial assessment act be tested in the courts.

The city's finance committee has asked Secretary M. Peterson to ask all chairmen of other capital expenditures for the year submitted to the committee within the two weeks from May 10th. It is hoped to have the tax rate struck by the end of the month.

Vancouver, B.C.—Ratepayers of the city have passed a resolution protesting against any increase of civic taxation until the basis of taxation in the city is broadened so that those not now paying taxes will be included. The resolution further asked that, pending such relief, the council limit the expenditure of this year to the amount provided for last year. The estimates last year called for the expenditure of $5,167,441 and this year's unrevised estimates are for $5,863,518.

Hon. John Hart, minister of finance, has stated that the report of the special audit in connection with the affairs of the Vancouver assessor and collector of taxes, had now been completed and submitted to him for presentation to the cabinet.

Victoria, B.C.—A comparison of the civic estimates for 1918 and 1919 shows an increase of $204,320, representing a fair increase in all departments, except in salaries of the municipal council. The following shows the civic estimates for 1918 and 1919 compared:—

	1918.	1919.
City debt	$ 463,243	$ 485,551
Municipal council	7,000	7,000
Legal department	7,690	9,440
Civic salaries	31,244	35,043
City institutions	313,767	364,354
Buildings	2,000	2,050
Miscellaneous	59,900	83,360
Taxes on city property ..	27,500	......
Education	362,581	429,713
Board of health	40,224	41,945
Works department . .	201,674	223,821
Waterworks	247,539	286,405
Total	$1,764,362	$1,968,682

Winnipeg Water District.—The Board of Commissioners of the Greater Winnipeg Water District call attention to the misleading and inaccurate reports which have been circulated as to the quality of the water furnished from the new soft water system which has recently superseded the old artesian well system. The Manitoba Board of Trade has declared in favor of the system by the following resolution:—

"Be it resolved that this council goes on record declaring that we are well satisfied with the Shoal Lake water and that it is a pure, wholesome and soft water, and fulfils all our expectations, and further that we deprecate the attempt of any newspaper to give any other impression or to say that the citizens are disappointed with same."

Other local organizations express the same opinion and the commissioners have received a letter from Prof. Slichter, of Wisconsin University, which refutes the statement that the new water supply is unsatisfactory.

South Vancouver, B.C.—The quarterly financial statement of the municipality has been completed by Commissioner Gillespie, and has been forwarded to the minister of finance. The following are the details:—

Current income: Cash on hand January 1st, 1919, $34,869; taxes, 1913-16, $12,017; taxes, 1917-18, $34,478; waterworks collections, $33,905; departmental collections, $3,027; school grants, $18,260; school rents and refunds, $1,021; interest, $51; corporation property sales, $442; sundry collections and refunds, $8,305. Total collections, $111,510; temporary loan, $447,370; cancelled cheques, $750; dishonored cheques, $47. Total income, $594,548.

Current expenditure: Outstanding voucher accounts, $5,310; commissioner's department, $1,638; departmental, $23,625; litigation, $281; interest, $12,054; street lights, $4,891; ditches, $429; public charity, $768.14; Vancouver and district joint sewerage board, $9,794; water department, $12,760; sewerage maintenance, $1; general finance, $300,052; store purchases, $915; tax adjustment, $1,184.

Total administrative expenses, $380,879; fixed charges, $99,131; health department, $2,041; educational, $87,832; cash on hand, $19,352; total, $594,548. Tax returns show that the collections for the first four months of 1919 are $77,129, against $55,317 for the same period last year.

Regina, Sask.—The city had, at the end of last year, one and a half million dollars of sinking funds invested, and a further quarter of a million to the credit of the fund in cash and in levies due from the civic exchequer, according to a report presented at the annual meeting of the sinking fund trustees held a few days ago.

The report showed that the investments had netted a surplus of $45,500 over and above the four per cent. which they are required to yield for the purposes of the fund, since the appointment of the trustee board. Of this amount $40,000, or approximately one mill, has been used to reduce the taxes, the remaining $5,500 having been set aside as a reserve fund, at the suggestion of the local government board. Over one hundred thousand dollars has been invested this year by the trustees in securities, principally in rural telephone debentures. Out of the $1,525,411 total investment, the trustees hold securities as follows:—Government bonds (war loans), $766,007; rural telephones, $404,805; city of Regina stock and debentures, $278,538; rural municipal debentures, $9,000; rural school debentures, $2,411; farm mortgages, etc., $64,650.

In the report submitted by the delegates who recently went to Ottawa to lay the claims of the cyclone sufferers before the Dominion government, an interesting history of the Regina cyclone and a complete and concise statement of the case on the cyclone sufferers in asking for financial assistance from the federal and provincial governments and the city is given.

The total loss of real property, without taking into account losses of personal property, is estimated at $600,000. The suggestion is that each of the three governments mentioned should contribute $150,000 towards the reimbursement of the sufferers, leaving them to shoulder the remaining $200,000.

Edmonton, Alta.—The following summary shows that a net surplus of $50,623 has been produced on all utilities for

the first quarter of 1919 (inclusive of the deficit on the street railway) as compared with $37,999 for the corresponding last year, after providing for all capital and depreciation charges:—

	three months to March 31, 1919.	Corresponding period last year.
Surpluses.		
Electric light	$51,266.31	$43,168.12
Telephone	12,290.51	9,138.97
Waterworks	8,951.14	6,812.60
	$72,507.96	$59,119.69
Deficit.		
Street railway	$21,884.97	$21,120.31
Net surplus	$50,622.99	$37,999.38

In a summary which has been prepared by City Comptroller Mitchell, it is shown that the gross earnings of the civic utilities, including the electric light, street railway, telephone, and waterworks amounted to $503,768, against $459,979 for the same months in 1918. The combined operation and maintenance expenses on the other hand show an increase of 13 per cent. on last year. Notable increases in surpluses are reflected in the electric light, telephone and waterworks departments. The deficit on the street railway is $764 more than last year's first quarter. The gross earnings of the utilities were as follows:—Light and power, $172,609; 1918, $160,192; street railway, $157,097; 1918, $141,216; telephone, $78,419; 1918, $68,968; waterworks, $95,641; 1918, $89,601.

Under expenditures, it is shown that the outlay for operation and maintenance in the departments was as follows:—Light and power, $75,058; street railway, $115,317; telephone, $23,799; waterworks, $49,499. The total is $263,674, against 232,317 last year. The surplus on operations this year is $240,094, while for the same period in 1918 it was $227,662. Net surpluses are as follows:—Electric light, $51,226; telephone, $12,290; waterworks, $8,951. The net deficit of the street railway is $21,884, against $21,120 for 1918.

Montreal, Que.—In accordance with the terms of the city charter, the city treasurer has prepared a list of properties on which taxes are overdue for two years. This procedure is followed every year, and it is an indication to proprietors concerned that if the taxes are not paid before October 15th next, the properties will be sold by the sheriff.

The properties on the list on April 30th, numbered 11,848, as compared with 13,576 in 1918; 7,664 in 1917; 6,044 in 1916 and 6,606 in 1915. On the 11,848 properties which appear on this year's list, $1,800,000 is due in taxes for the year 1917 and 1918, the sum of $811,000 being due for 1917 and the balance is due for 1918. Between now and the date of the sheriff's sale in October, all but a few hundred proprietors will have paid up.

A net economy of nearly one million dollars is the result of the efforts of the Administrative Commission during the seven months of 1918 during which the commission was in charge at the city hall, according to a statement issued by Chairman E. R. Decary recently. The budget prepared by the old board of control for 1918 provided for an expenditure of $19,513,248.93. The total amount actually spent by the city on this budget was $18,643,892.08, making a saving of $869,356.85. To this must be added the sum of $188,081 which was used to cover a deficit in 1917. This forms the gross economy of $1,057,437.85. However, from this gross economy must be subtracted the sum of $115,000 which was set aside as a special reserve fund to cover possible deficit in revenue, and the sum of $130,000 which represents credits voted in 1917, but not spent. This leaves the net economy for 1918, $812,437.85.

For the first quarter of the current year the collections of arrears for water rates and business taxes show a marked improvement as compared with previous years, according to a statement prepared for the city treasurer. The total amount unpaid on water rates on December 31st last was $1[illegible] and $67,776 in business taxes, making a total of $264,411. From this amount the sum of $32,500 was deducted, as representing the reductions made by the assessors, and loss on account of vacant houses, leaving a net balance of $231,911. Of the latter sum the city had collected $139,154 in the water rates and $38,958 in business taxes, or a total of $178,113, leaving a balance of $53,798 due on May 5th.

RAILROAD EARNINGS

The following are the earnings of Canada's transcontinental railways for the first week in May:—

Canadian Pacific Railway

	1919.	1918.	Inc. or dec.
May 7	$2,856,000	$3,033,000	— $177,000

Grand Trunk Railway

	1919.	1918.	Inc. or dec.
May 7	$1,130,352	$1,069,998	+ $ 60,354

Canadian National Railways

	1919.	1918.	Inc. or dec.
May 7	$1,543,413	$1,393,791	+ $149,622

COBALT ORE SHIPMENTS

The following is a statement of the shipments of ore, in pounds, from Cobalt, for the week ended May 9th, 1919:—

Penn Canadian Mine, 60,000; Beaver Mine, 87,055; Buffalo Mines, 266,380; McKinley-Darragh, 147,189; Coniagas Mine, 214,447. Total, 775,071.

The total since January 1st is 7,622,825 pounds, or 3,811.4 tons.

WEEKLY BANK CLEARINGS

The following are the bank clearings for the week ended May 8th, 1919, compared with the corresponding period last year:—

	Week ended May 8, '19.	Week ended May 9, '18.		Changes.
Montreal	$133,725,196	$ 92,370,152	+	$41,355,044
Toronto	79,569,070	68,827,857	+	10,741,213
Winnipeg	44,999,086	40,381,055	+	4,618,031
Vancouver	12,402,453	10,115,852	+	2,286,601

DEBENTURES FOR SALE

CITY OF MOOSE JAW

SALE OF DEBENTURES

Sealed tenders endorsed "Tender for Debentures," will be received by the City Commissioners up to noon of the 19th day of May, 1919, for the purpose of the following issues of debentures of the City of Moose Jaw:—

$210,000.00 debentures for extension to the Electric Light and Power Systems of the city. Tenders will be received alternatively for:—

(a) Debentures bearing interest at the rate of 5½% per annum, repayable in twenty equal annual instalments of principal and interest.

(b) Sinking Fund Debentures bearing interest at 5½% per annum repayable at the end of twenty years.

The highest or any tender not necessarily accepted.

S. A. HAMILTON,
Mayor.
GEO. D. MACKIE,
City Commissioner.

Moose Jaw, 29th April, 1919.

CONDENSED ADVERTISEMENTS

"Positions Wanted," 2c. per word; all other condensed advertisements, 4c. per word. Minimum charge for any condensed advertisement, 50c. per insertion. All condensed advertisements must conform to usual style. Condensed advertisements, on account of the very low rates charged for them, are payable in advance. 50 per cent extra if charged.

POSITION WANTED.—Young man, at present in Straits Settlements, desires connection with firm engaged in or wishing to establish Export and Import business. Leaving Straits October. Box 181, *The Monetary Times*, Toronto.

POSITION WANTED.—Young lawyer, returned, would devote part time representing new or small company in Toronto, using his office as central headquarters. Box 185, *The Monetary Times*, Toronto.

MERCHANTS FIRE OF NEW YORK

Messrs. Shaw and Begg, of Toronto, have been appointed general agents for Ontario for the Merchants Fire Assurance Corporation of New York. This company has total assets of $2,786,431, valued at market values on December 31st, 1918. The unearned premium reserve on the same date was $1,043,259; reserve for taxes, federal taxes and contingencies, $200,000; losses payable, $274,059; and total surplus to policyholders, $1,269,113, including the capital of $400,000. During the five-year period from 1915 to 1919 the net surplus has increased from $401,651 to $869,113, and premiums written from $442,394 to $1,792,427.

The Hamilton Radial Co. will probably apply again for permission to increase its fares, according to a statement recently made by the president, Sir John M. Gibson.

AGENTS WANTED IN TORONTO

We have vacancies in Toronto for good producers, who want to make more money this year than last. Liberal contracts. Write, stating experience, with reference as to record and character, to

F. C. ALWARD, City Agency Manager

THE CONTINENTAL LIFE INSURANCE CO.
TORONTO, ONTARIO.

HYDRO ELECTRIC POWER COMMISSION OF ONTARIO

HYDRO LAMPS
SPEED PRODUCTION

IF factory production falls below normal when the sun goes down and the lights go on, the fault most likely is with the lighting system. You may give your working people enough light but it may not be the right quality.

HYDRO Lamps are comfortable for workers' eyes. They contribute towards better working conditions.

HYDRO Gas Filled Lamps not only give a great volume of light, but their rays are of a quality that prolongs the day artificially—from sunset to sunrise if you wish.

In spite of their greater brilliancy and better quality of light, Hydro Gas Filled Lamps consume but little current. Long life and freedom from mechanical defects are assured by the Hydro-Electric Power Commission of Ontario through tests made in the Commission's laboratories.

Owner, manager, superintendent of factory or any person responsible for production is urged to investigate the merits of HYDRO Gas Filled Lamps. Arrange with the Hydro Shop for a convincing demonstration at our expense.

GOVERNMENT AND MUNICIPAL BONDS

The following is a list of debentures offered for sale, of which particulars appear in this or previous issues of *The Monetary Times*:—

Borrower.	Amount.	Rate %.	Maturity.	Tenders close.
Moose Jaw, Sask.	$ 210,000	5½	20 instal.	May 19
Township of Barton, Ont.	30,000	5½	30 years	May 19
St. John County, N.B.	100,000	5	20 years	July 1
Kentville, N.S.	10,500	5½	15 years	May 19
Shawinigan Falls, Que.	132,000	6	Various	May 28

Sudbury, Ont.—The council is seeking to borrow $65,000 for the erection of schools.

Guelph, Ont.—The council has approved of the issue of $[illegible]8,000 debentures for the erection of a new public school in St. David's ward.

Kentville, N.S.—Tenders will be received up till May 19th, 1919, for the purchase of $10,500 5½ per cent. 15-year sewer debentures. J. Carroll, clerk and treasurer.

St. John County, N.B.—Tenders will be received up till July 1st, 1919, for the purchase of $100,000 5 per cent. 20-year tax-free debentures. The bonded debt is $328,300, floating debt $120,000, sinking fund $73,806, assessed valuation, $46,4[illegible]7. J. K. Kelly, county secretary.

Shawinigan Falls, Que.—Tenders will be received for the purchase of the town's 6 per cent. bonds up till May 28th, 1919, as follows: $75,000, redeemable May 1st, 1958; $37,000, redeemable May 1st, 1948; $20,000, redeemable May 1st, 1928. Also separate tenders will be received for the total amount of these debentures—viz., $132,000, redeemable May 1st, 1923, at 5 years. A. J. Meunier, secretary-treasurer.

Secure More Bids

By inserting debenture advertisements in The Monetary Times of Canada municipal officials get at once into direct touch with all investment dealers who handle municipal bonds—those responsible for the purchase of bonds for insurance, trust and loan companies, as well as most of the discriminating investors.

It means more bids, ensures real competition and the maximum price.

Send your next debenture advertisement to

Monetary Times of Canada
TORONTO WINNIPEG

Regina, Sask.—At a meeting of the Provincial Exhibition Association last week, it was decided to increase the seating capacity of the grand stand to 2,000. The cost will be between $20,000 and $25,000 and the undertaking is to be financed by the issue of debentures, a new form of financing for the association. On the recommendation of the executive and finance committee, it was decided to issue five-year debentures bearing interest at 7 per cent., the principal being repaid in five equal annual instalments. The first payment will be made to fall due August 1, 1920. The debentures will be issued in denominations of $100 each and each subscriber will be limited to one bond, the object being to give as many people as possible an interest in the undertaking.

Drummondville, Que.—The town has sold an issue of $30,000 6 per cent. 10-year bonds to Messrs. Crédit-Canadién, Inc., at 101.05. The following is a list of tenders:—

Crédit Canadién, Inc.	101.05
A. E. Ames and Co.	100.79
Corporation des Obligations Municipales	100.66
Versailles, Vidricaire and Boulais	100.00
Provincial Securities, Ltd.	99.56
Crédit Anglo-Francais	98.26
Canadian Bonds Co.	98.00
Crédit Rural Enré	97.00

East Flamboro Township, Ont.—Messrs. G. A. Stimson and Co., Toronto, were the successful tenderers for a block of $55,000 5½ per cent. 20-instalment bonds of School Section No. 3, East Flamboro Township and the village of Waterdown. The following is a list of tenders:—

Geo. A. Stimson and Co.	100.26
Turner, Spragge and Co.	100.063
C. H. Burgess and Co.	100.044
A. E. Ames and Co.	99.59
W. L. McKinnon and Co.	99.53
W. A. Mackenzie and Co.	99.57
Bankers Bond Co.	99.371
A. Jarvis and Co.	99.05
Brent, Noxon and Co.	98.50
R. A. Daly and Co.	98.35
Macneill, Graham and Co.	98.03

Saskatchewan.—The following is a list of authorizations granted by the Local Government Board from April 26 to May 3rd, 1919:—

The World
Must Have Paper

Canada is one of the few countries that can supply the demand.

Big industries, drawing on Canada's vast resources of timber and water power, have been built up because of that demand.

Yet the possibilities of the industry (despite the $100,000,000 Export Trade in 1918) have barely been touched.

We are offering an issue of fully secured Convertible Mortgage Debentures of an established Pulp and Paper Corporation yielding over $75 on every $1,000 invested.

It will be worth your while to write now for full information.

CANADIAN MANUFACTURERS' CONVENTION

The annual general meeting of the Canadian Manufacturers' Association for 1919 will be held in Toronto on June 10th, 11th and 12th. Three of the most important matters for discussion at the meeting are the readjustment of existing relations between employers and employees, the revision of the tariff, and the development of export trade. In addition there will be reports of the various committees which, during the past year, dealt with an unusually large number of subjects of importance to Canadian manufacturers.

PROVINCIAL POWER UPHELD IN SUPREME COURT

(*Continued from page 16*)

in either the Harmer case from Saskatchewan or the Davidson case from Manitoba. Each plaintiff is entitled to succeed by reason of the respective company attached defying the law of the province in question and thereby becoming liable to penalties and possibly more serious consequences.

"I am strongly impressed with a suspicion begotten of circumstances coming under my observation in these proceedings and the needless frame of the questions submitted, that these actions are collusive and used as a means of interrogating this Court in a way it should not submit to at the mere whim of any private individuals desiring to know how far their companies can go.

"Long ago in the Province of Ontario provision was made by legislation for the settlement of contentions between that province and the Dominion, or it and other provinces. And likewise provision was made for the Court having jurisdiction at the suit of either the Attorney-General for Canada or the Attorney-General for Ontario to entertain an action for a declaration as to the validity of any statute or any provision therein, and the Constitutional Question Act of Ontario had existed from an earlier period. The existence of such legislation as well as similar legislation by the Dominion seems to indicate, to put it mildly, a doubt as to the propriety of private individuals attempting what is attempted by some part of what is before us herein.

"I think the appeal should be dismissed with costs to each of the respondents in the respective case wherein he is concerned."

OLD BANKING HOURS AGAIN

On June 1st, 1918, the hours for banking in Canada were altered from 10 a.m.-3 p.m. to 9.30 a.m.-2.30 p.m. On Monday, May 12th, however, a return was made to the former hours. This has been made possible by the increased clerical labor now available, and is more convenient to business institutions, as it gives them an additional half-hour to do business with the banks in the afternoon.

TEN PER CENT. INCREASE TO BELL TELEPHONE

On May 13th, the Railway Commissioners of Canada issued its judgment on the application of the Bell Telephone Co. for an increase of 20 per cent. in rates. A 10 per cent. increase is to be allowed and the new schedule of long distance rates as filed by the company is to be permitted. It is estimated that these two allowances will be sufficient to provide an additional income of $1,100,000.

The judgment states that the company, since October, 1908, has been earning on its outstanding securities less than 4 per cent., while there is an admitted need of an expenditure of $7,000,000 for replacements and new construction. In regard to the reserves, which were criticized during the course of the hearing, the judgment states that these are invested in the plant, and that this is "admittedly good business practice and at the same time lessens the burden of necessary revenues." The chief reason for the increase in rates is the addition of over $500,000 to the annual wage bill, which is still rising. Operating costs since October, 1918, have been 90 per cent. of gross operating revenue. Connection charges as asked for are not allowed because of the limitations of the Bell Telephone legislation. The moving charges, as asked for, and not objected to, are allowed.

No specific date is fixed by the judgment for the coming into effect of the new rates. Where no contractual obligations limit the company, the increased rates may be put in on one week's notice. Where there are contractual obligations, if any, the rates may be put in at the earliest moment the company is free from such obligations.

INDUSTRIAL CONDITIONS IN THE MIDDLE WEST

Royal Commission on Industrial Relations has Now Completed Western Sessions—Views More Moderate Than in British Columbia

As the Royal Commission on Industrial Relations, which is now receiving evidence in Canada, moves eastward the views expressed before it appear to become less radical. British Columbia has, of course, been regarded as a centre for extremist agitation. This is more particularly true of the foreign element, and in lesser degree of the general wage-earning population employed in the mines and in shipping, but a suggestion which was made to the commission on May 1st by Frank W. Macey, a Vancouver architect, can only be called distinctly radical. He stated that a large industrial loan for the development and enrichment of the people should be floated immediately, and that by order-in-council the individual capitalist, the profiteer, the large loans, insurance, bank and industrial companies should be compelled to subscribe largely to this loan. Four per cent., he says, should be allowed, provided the industries so developed were able to earn sufficient profits, but no interest guarantee should be made by the government.

Alberta

Sessions were held in Calgary on May 3rd and 4th. A consideration of the coal industry occupied much of the time. A memorandum presented by the Western Coal Operators' Association recommended that the coal industry in the west should be controlled by an independent board, including one man thoroughly familiar with the problems of the operators and one man with the experience and qualifications necessary to act as chairman. It was pointed out that it is practically impossible to market the coal at the present high costs, owing to the competition from other fields. It was suggested that powers be given to this board similar to those possessed by Mr. Armstrong, war-time director of coal operations for the district. The operators are of the opinion that a joint council of employers and employees could not bring harmony in the industry at the present time because a large proportion of the operators are foreigners.

On May 3rd Mr. W. S. Henderson, representing operators of Drumheller, stated that he believed that nationalization of the coal industry would be worth seriously considering. A representative of the Canadian Pacific Railway telephone operators was in favor of joint control, as it would make for greater efficiency and harmony, and would enable men to learn the value of their own labor.

Mayor Marshall, of Calgary, expressed fear regarding the employment conditions next winter, and urged that Dominion, provincial and local governments should agree upon a common building policy. Regarding the city industries, he said the most conspicuous case of friction was in the street railway, which had resulted from only a part of the employees being members of the union.

Saskatchewan

The investigation in the province of Saskatchewan commenced in Saskatoon on May 6th. According to the evidence presented, there is less employment there than anywhere else so far visited. Various social theories, of course, were presented, but there appeared to be little dissatisfaction with present industrial conditions. Wm. Mill, president of the Local Trades Council, favored production for use, to be achieved gradually. He is not enthusiastic about the Whitley scheme. J. J. McGrath, the representative of the plumbers, was of the same opinion.

In Regina, on May 8th, one of the principal witnesses was Joseph Sambrook, secretary of the Trades and Labor Council. He considered that the Whitley scheme did not give the men sufficient control in management, as they acted merely in a consulting and advisory capacity. The business agents of the regular unions are, he said, in much better position to give such advice. The Rockfeller plan will not be considered, he said, because it insists upon the open shop, and, therefore, organized labor is antagonistic to it. Industrial councils, he said, will contribute nothing toward a solution of the unemployed problems, but, by promoting efficiency and greater production, they will actually tend to aggravate the problem. These works committees, however, might very well serve a useful purpose in enabling workmen to become familiar with operating problems and in training them to qualify for eventual management of industry. The principal cause of present discontent, he said, is the rapid increase in the cost of living during the past few years, and he maintains that business-for-profit can never be satisfactory. The present methods, he thought, are being maintained through a system of publicity and propaganda which cultivates and perpetuates economic ideas which work to the advantage of its political parties and commerical enterprises.

In Moose Jaw, on May 9th, the blame for the evils of the present day was placed upon the federal government. One of the principal witnesses, Mr. James Somerville, representing the Machinists' Union, stated that the want of confidence on the part of the workers was an important factor. Control of industry should be public rather than private, and the joint council, he thought, might help. Thomas J. Oliver, of the Western Canada Interior Association, complained regarding civil servants, and he criticized strongly the Civil Service Commission. George C. Ingram, general manager of the Security Lumber Co., stated that the principal complaint was insufficient remuneration; he thought that the shorter day was curtailing production, but was, on the other hand, adverse to the introduction of cheap labor. Business at the present was above rather than below normal, he said. E. P. Cook, representing the Brotherhood of Railway Tradesmen, dealt with both unemployment and the wage scale in relation to the cost of living. The latter is due in part to the existence of too many middlemen, he said. Two other witnesses pointed to the fact that the supply of farm labor was not equal to the demand.

Manitoba

The Winnipeg session commenced on May 11th, just at a time when the city was being threatened with a general strike to enforce the principle of the closed shop. Mr. J. B. Hugg, K.C., who appeared on behalf of one hundred of the leading manufacturers and employers of the city, described the scheme drawn up by the employers. This scheme proposed joint planning councils for the adjusting of differences and establishing better relations between employer and employee. There would then be the provincial joint councils, including representatives of the government. Finally, there would be a Dominion joint council to deal with wider phases of industry. The government itself could go no further than make an authoritative report, as it could not compel a business man to carry on business at a loss, nor could it force labor to work under unsatisfactory conditions. There was nothing in such a scheme, he said, to prevent organization of labor.

On the afternoon of May 10th a radical witness appeared before the commission in the person of Mr. William Ivens. He advocated a parliament of workers, nationalization of all essential industries, a democratic judiciary and abolition of profits. He maintains that labor can be the only satisfactory basis of exchange. He maintained that the commission was not coming into sufficiently close touch with the actual life of the wage-earners in making its investigation. The chairman, Mr. Justice Mathers, admitted that this is the feeling of the members, but that their time is limited, as the government wants the report before the present session of parliament adjourns. In reply to a criticism by the witness that the commission was appointed by a government hostile to labor, the chairman pointed out that there were three representatives of labor among the members The wage system, he said, has failed, and referred to the difficulty in the building trades in Winnipeg, where reasonable demands of the workingmen could not be met without practically eliminating the industry. He was in favor of nationalization of all the essential industries, and in the substitution of labor in place of gold as a medium of exchange.

DIVIDENDS AND NOTICES

BANK OF MONTREAL

Notice is hereby given that a Dividend of Three per Cent. upon the paid-up Capital Stock of this Institution has been declared for the current quarter, payable on and after Monday, the Second Day of June next, to shareholders of record of 30th April, 1919.

By order of the Board.
FREDERICK WILLIAMS-TAYLOR,
General Manager.
Montreal, 25th April, 1919.

THE CANADIAN BANK OF COMMERCE

INVESTMENTS AND THE MARKET

News and Notes of Active Companies—Their Financing, Operations, Developments, Extensions, Dividends and Future Plans

Trinidad Electric Co., Ltd.—The following is a statement of earnings of the company for March, 1919:—

	Gross.	Net.
Railroad	$14,529.36	$4,777.36
Light and power	9,931.93	1,734.24
Ice and refrigeration	3,490.27	562.26
Total net		$7,073.86

Demerara Electric Co., Ltd.—The following is a statement of the earnings of the company for March, 1919:—

	Gross.	Net.
Railroad	$6,814.75	$ 345.71
Light and power	8,803.99	4,206.52
Miscellaneous	......	161.59
Total net		$4,713.82

Holt, Renfrew Co.—Arrangements were completed last week by a Montreal syndicate, headed by Lorne C. Webster, for the taking over of the fur business of Holt, Renfrew and Co.

The new organization will have a capitalization of $225,000 bonds, $1,000,000 preferred stock and $1,000,000 common stock, and it is announced that the Montreal Securities Corporation, Ltd., and Messrs. McDougall and Cowans, members of the Montreal Stock Exchange, will bring out the new issue.

If present plans are carried out, the entire staff of experienced workers that has made the business one of the largest in Canada will continue with the new company. The new board will include Sir Herbert Holt, A. E. Renfrew, Lorne C Webster, J. W. McConnell, A. J. Brown, K.C., R. B. Lindsay, W. H. McWilliams, of Winnipeg.

Reid-Newfoundland Railway Co.—According to the returns of the company, just tabled in the legislature, the loss on operation amounted to $346,624. The full earning power of the railway was $1,253,565, the receipts being: Passenger traffic, $527,690.95; freight, $579,302.71; mails, $61,251.47, and other sources, $85,230.86. The gross operating expenses were $1,600,190.84, and were divided as follows: Maintenance of line, buildings, etc., $243,839.32, of which amount wages was responsible for an outlay of $162,039.96, ballasting $27,718.68, and snowclearing $19,352.28; working and repairing of engines, $599,701.41, of which $365,436.59 was spent on coal; repairs to cars, $120,302.41, and general expenses, $201,874.72. This latter amount covers office expenses, management, station agents, etc. The above figures deal solely with the railway and do not include the returns from the company's steamers or their other branches of industry.

Chicoutimi Pulp Co.—Notice has been given by the North American Pulp and Paper Companies Trust of a special meeting of the shareholders, to be held in the Ritz-Carlton Hotel, Montreal on May 22nd, 1919, for the purpose of considering the exchange of the Chicoutimi Pulp Co.'s common shares for a like amount, par value, of common shares of the Saguenay Power Co., to authorize an increase in the number of preferred shares from 25,000 to 30,000, and to reduce the dividend thereon from 7 per cent. to 6 per cent., cumulative from April 1st, 1919; to change the preferred shares so increased into Saguenay Power shares, and to increase the number of directors of the Chicoutimi Pulp Co. to nine.

The Saguenay Power Co. will become the Saguenay Pulp and Power Co., and proposes to acquire the controlling interest in the Chicoutimi Pulp Co., the St. Lawrence Pulp and Lumber Corporation, the Chicoutimi Freehold Estates, Ltd., the Roberval-Saguenay Railway Co., the Saguenay Light and Power Co. and the Chicoutimi Port Co.

National Breweries, Ltd.—The annual statement of the company was presented to the shareholders at the annual meeting, held in Montreal last week. Gross profits for the year were $616,265, an increase of about $200,000, or 50 per cent., over a year ago. The amount available for common stock dividends, after allowance for bond interest, preferred dividends and $82,226 for depreciation, was $236,509, equal to 10.5 per cent., against 1½ per cent. the previous year and 2½ per cent. the year before.

The most notable changes are in the company's balance sheet. Cash on hand amounted to $1,212,403, against $803,059 the previous year, an increase of 50 per cent. Total working capital amounted to over $2,000,000, current assets of $2,462,562, comparing with $256,640 current liabilities, against $1,295,926 current assets and $235,798 current laibilities the previous year. Accounts receivable amounted to $1,250,000, against less than $500,000 the previous year. The surplus of $236,509 for the year brings the total surplus up to $900,592, representing about 18 per cent. on the combined preference and common shares outstanding at the end of the year.

Calgary Petroleum Products, Ltd.—The shareholders of the company have endorsed a proposal of the directors to authorize them to borrow $500,000 on an issue of the debenture stock, bearing interest not to exceed 8 per cent., the proceeds to be employed in further development of the field. At a recent meeting the managing director, Mr. A. W. Dingman, gave a detailed statement of the workings and plans of the company in connection with the audited financial statement which was presented to the meeting.

Mr. Dingman stated that, whether the $500,000 loan was authorized or not, the company was in a position to proceed with its development work, but that it would naturally be slower, and that with the loan available to clear off some present bank and guarantee liabilities, the company would be in a position sooner to pay dividends on its stock.

The total share capital of the company is $1,500,000 of a par value of $1 each. Up to the end of September, 1918, 885,635 shares have been issued, leaving 614,365 shares in the treasury. Under the terms of its charter such stock could only be sold at its par value, and, as a "curb market price" was persistent at from 20 to 25 cents—made possible by transactions in a few speculative holdings—no negotiations could be successfully initiated for the placing to advantage the whole or part of the treasury stock. Efforts made to dispose of these shares in order to provide working capital were, therefore, not successful.

Canadian Cottons, Ltd.—The profit and loss account for the year ended 31st March, 1919, shows a net manufacturing profit of $1,365,103 and rentals from the Mount Royal spinning mill of $198,000, compared with $926,615 and $199,510, respectively, last year. This made a total of $1,563,103, of which bond interest and dividends at the rate of 6 per cent. on both preferred and common stock absorbed $592,320. The sum of $400,000 was set aside for depreciation on plant, $200,000 as a reserve for replacements and $15,000 for bad debts. The balance of $355,783 was carried forward into the balance sheet, where it is added to the balance at credit of profit and loss at 31st March, 1918, of $1,873,109. Total assets are now $14,863.442, a reduction of about $1,000,000, compared with last year. This is mostly due to decreased materials for manufacturing on hand and partly to a reduction in the valuation of properties, water power, etc.

The year was, therefore, a highly successful one, as all obligations were met, a reasonable dividend paid, and such ample provisions made for future contingencies as greatly strengthens the financial position of the company.

At a meeting of the bondholders, held in Montreal on May 12th, the proposal to sell the Mount Royal spinning mill to the Dominion Textile Co. was ratified. Canadian Cottons is to receive $2,375,000 for the property; half the purchase price to be paid in cash and the balance in Dominion Textile 6 per cent. bonds. The proceeds of the sale will be turned over to the trustee of the bondholders and held for the benefit of the latter.

SECURITY ABOVE ALL

Whether with the intention of taking out insurance or associating yourself as representative with a life company you first look for security.

The figures for 1918 emphasize the unexcelled financial position of the North American Life. After a year of War and Pestilence, the Company emerges stronger than ever meriting its motto, "Solid as the Continent."

Business in Force -	over	*$70,900,000*

WHY MUTUAL POLICIES ARE EASY TO SELL

First—Because of the co-operative and democratic principle on which the company is founded. The Mutual Life Assurance Company of Canada is a company consisting of policyholders, maintained by policyholders, exclusively for policyholders.

Second—Because the purpose for which the company was established is now generally understood: the company since its establishment in 1869 has consistently followed one aim—that of furnishing the largest amount of protection for the least possible outlay.

Third—Because the company's day-by-day activities advertise it: The Mutual of Canada since its organization has paid to policyholders or their beneficiaries or holds as a trust to guarantee future payments, over sixty millions of dollars.

"BE A MUTUALIST!"

BALANCING DEBTS BY LIFE INSURANCE

Do you ever think of Life Insurance as a means of counterbalancing unavoidable debt?

There are bushels of ways in which debt may creep upon a man, unavoidably almost, legitimate debt in many cases.

He may undertake to purchase a home, secure credit to extend his business. Ill health may hamper and swallow his savings. Crops may fail and business losses occur.

All manner of calls tug at a man's purse strings, and do their best to make the domestic balance sheet a poor exhibit.

But Life Insurance will restore the balance.

RECENT FIRES

Assiniboia, Sask.—May 8—The home of Mr. Jack Smith was destroyed. Total loss, $2,500. Not covered by insurance.

Bowmanville, Ont.—May 8—Barns owned by Mr. Fred Foster were destroyed. Cause, lightning. Estimated loss, $6,000. Insurance carried, $3,000.

Edmonton, Alta.—May 2—The Standard mine was damaged. Estimated loss, $3,000, covered by insurance.

Halifax, N.S.—May 11—The Wellington barracks were damaged. Cause, cigarette thrown upon waste paper in the telephone booth.

Hull, Que.—May 8—Hull Steel and Iron Foundries, Montcalm Street, were damaged. Cause, explosion due to overheating of an electrical furnace. Estimated loss, $2,000.

Kenora, Ont.—May 13—A big block of trimmings pile of the Keewatin Lumber Co. was damaged. Estimated loss, $5,000.

Kentville, N.S.—May 9—The buildings of the Advertiser Printing Co., the Green Lantern Restaurant and the Stickler Photo Studio were destroyed. Cause, combustion of photographic chemicals. Estimated loss, $50,000.

Kingston, Ont.—May 4—The Queen Street Methodist Church was damaged. Cause, defective furnace. Estimated loss: On stock, $8,427; on buildings, $16,288. The insurance carried amounted to $32,200 in the following companies: London and Lancaster, $25,000; Phœnix of Hartford, $5,000; London Assurance, $1,700.

Parry Sound, Ont.—May 14—The home of Mr. Mark Taylor destroyed.

Renfrew, Ont.—May 8—A building owned by the M. J. O'Brien Co., Ltd., was destroyed. Estimated loss, $7,000. Covered by insurance. The barn and implements of Mr. William McKay was destroyed. Cause, spark from burning building of the M. J. O'Brien Co., Ltd. Estimated loss, $1,000.

Toronto, Ont.—May 9—Life-saving station at Eastern Gap was destroyed. Estimated loss, $31,000.

May 10—The home of Mr. Leo W. Guthrie, 527 Jones Avenue, was damaged. Estimated loss, $1,000.

Victoria, B.C.—May 7—The residence at 1157 Johnson Street damaged. Estimated loss, $300.

Winnipeg, Man.—May 9—The Majestic Theatre was damaged. Cause, defective electric wiring. Estimated loss, $300.

PERSONALS

Mr. E. W. Beatty, K.C., has been appointed to the directorate of the Bank of Montreal.

Mr. Gaspard DeSerres, treasurer and city commissioner for Montreal, has submitted his resignation to the administrative commission.

Mr. A. H. Tovell has been appointed secretary-treasurer of the Alberta hail insurance board. This office will be combined with the post of chief adjuster.

Mr. W. T. Perry, manager for Canada of the Ocean Accident and Guarantee Corporation, left last Friday on a business trip for the west, calling on all important places between Toronto and Vancouver.

Mr. J. B. Waddell, who after six years is retiring from the management of the Union Bank of Canada, St. James Street branch in Montreal, to become associated with the private enterprises of Sir Mortimer Davis, has been appointed a member of the advisory board of the Union Bank at Montreal.

Sir David Paulin and Mr. George Readmond, two well-known Scottish financiers, recently visited Canada regarding investments. Sir David Paulin is president of the Board of Directors of the Edinburgh Canadian Mortgage Company and is a director of the Scottish Life Assurance Company, of which he was managing director until 1918. He is also director of the Arizona Copper Company, of which Mr Readmond is chairman of the Board of Directors. They visited Arizona prior to coming to Canada.

DOMINION FIRE PREVENTION ASSOCIATION

Second Meeting, Held in Ottawa on May 9th—Several Previous Resolutions Rescinded

The Dominion Fire Prevention Association met for the second time on May 12th. It became apparent that some of the resolutions which had been passed at the preceding meeting on December 31st, 1918, had aroused strong objections from several quarters. Some of them were, therefore, rescinded. It was also decided that the organization should be called "Association" instead of a "Committee," because it would be necessary to apply the latter term to different sections which are to be formed. Most of the members were in attendance, representing the Canadian Fire Underwriters' Association, non-tariff insurance companies, Canadian Manufacturers' Association, Canadian Credit Men's Trust Association, Retail Merchants' Association of Canada, Wholesale Grocers' Association, Canadian Bankers' Association, Dominion Mortgage and Investments Association, Fire Chiefs' Association, Commission of Conservation, Department of Insurance. The membership also includes representatives of United Farmers of Alberta, United Farmers of Ontario, Association of Architects, Trades and Labor Congress, Saskatchewan Fire Agents' Association, Toronto Insurance Conference, Montreal Insurance Brokers' Association, Ottawa Insurance Brokers' Association and the Boy Scouts of Canada.

The resolution which had been passed at the December meeting to the effect that an insurance company be required to report to the government every risk in which objectionable conditions are found when the owner or tenant fails to comply with the company's suggestions for improvement was rescinded. This is looked after by the Fire Marshal Acts, which are in force or are being introduced into all Canadian provinces.

The resolution urging that every person effecting insurance against fire should be required to sign an application was referred to the executive committee for a report at the next meeting.

The resolution advocating that large risks be required to have sprinkler equipment, which had also been passed at the December meeting, was referred to a special committee for report at the next meeting.

Among the other subjects which came up, the question of the constitution and membership of the association was discussed. The committee was appointed for the purpose of advising the Insurance Department as to ways and means of fire prevention, and for this purpose it was made representative, so far as possible, of all organizations which are interested in this subject. The work, however, will not be limited to possible legislation or regulations of the Insurance Department, but the association as now formed will pursue broader methods to attain the purpose. In fact, it was emphasized at this meeting, and the members generally concurred, that a programme of stringent legislation, such as that requiring the installation of automatic sprinklers or the signing of applications, would antagonize the public and ultimately defeat the purpose of the association. Co-operation with institutions whose interests were practically connected with fire protection might achieve excellent results, it was pointed out. This could be done, for instance, in the case of automatic sprinkler companies, who already had literature prepared on the advantages of their equipment, and what was necessary was merely to secure a proper distribution of suitable information and arguments of this kind.

The preparation of a constitution and by-laws was referred to a committee. The question of membership also presented difficulties, because some of the organizations are national in extent, while others, such as the Canadian Fire Underwriters' Association or the United Farmers of Ontario, represent only some parts of Canada. Then, again, there are interests, such as the non-tariff insurance companies, which have no organization which could be called representative, and which are nevertheless greatly interested in the subject. It was decided that the present membership should be constituted of the organizations represented above, and that further applications should be considered as they arose.

Professional Business Education for Canada

Advanced Training should be Adjusted to Requirements of Business—Much Wasted in Present System—Many Valuable Studies Omitted from University Curriculums

By R. J. McFALL

DOES Canadian business need any special training for its leaders other than that acquired in practical experience?

Canada has entered a new era in her history; an era which her wealth of natural resources, her fortunate geographical situation and the staunch character of her citizens promise to make a period of wonderful prosperity. The full measure of prosperity in the coming years, however, can no more be ours without proper training for leadership than we could have secured victory in the war without generals and training camps. Had we known the war was coming we would have had more leaders trained and more training camps in readiness. We do know, however, that there is a campaign of trade and commerce at hand from which we can win wealth if only we succeed in getting the proper leaders and executives in our business community. Shall we trust merely to the random training and selection of our commercial life to supply the proper force of business executives or should we inaugurate a scientific system of instruction for our young men who aspire to the profession of business leadership.

One thing has been forced home to those who have had some part to play in the war-time regulation of trade and manufacture; the efficiency and acumen of our business executives are, in some cases, not of such an exalted character that there is room for any argument against scientific training of the on-coming generation for economic efficiency. In fact, the only word to describe the lack of efficiency and acumen in some prominent quarters is the term appalling. If lapses which have manifested themselves in certain cases had been uniformly favorable to the industry in question we would be ready to join the fetishism of the man in the street who exalts the ability of our captains of industry while he envies their wealth. The lapses, however, have not been uniformly favorable to the parties involved. Canada has prospered and her industrial life these last few years has been peculiarly fortunate, but we hope not to have another war-bought prosperity again. All evidence points to a period of keen competition ahead when all the efficiency, all the foresight obtainable in our industrial life will be necessary to bring to Canada the share of prosperity she deserves.

We would not for anything suggest that the business ability of Canadians is one whit behind that of other nations. There is not sufficient ground for argument on this score to advance the overwhelming facts of recent experience to establish the contrary. It is true, however, that we have not yet seriously undertaken the means of improving the education of executives for our business world as some other peoples have. We cannot afford to? The question is rather whether or not we can afford to neglect this means of successfully meeting oncoming economic competition and enlarging our prosperity.

The chief objection raised against professional schools of business administration is that the best way to prepare for executive positions in the business world is to grow up with the business. This method of education is supposed to save the novitiate from impractical theories and keep him continually in touch with actual conditions. True, the young men entering business should be kept constantly in touch with actual conditions and will not gain much from impractical theories. It is also true that some great business men have been, and will be, produced by the practical mill of experience alone. But, is growing up with the business the best method, or have men succeeded in spite of its shortcomings? Men of great natural capacity will succeed and perhaps be greater on account of the very difficulties of this system. Men lacking in natural ability cannot be trained into able executives. But will we get anything like an adequate number of able business leaders from the mill of experience alone? There are many men whom proper education would develop from mediocrity into men of real executive capacity. It is highly detrimental to Canada to have an unnecessarily limited number of men qualified for positions of leadership in our business world.

The time was when our lawyers, our doctors, our chemists, our architects, our engineers and all our other professional men were trained solely in the school of practical experience. That time has passed, and now almost no professional men are so trained. What chance would a man trained only in the old school of experience, unless he happened to be a rare genius, have in competition with men of modern professional training? Even the farmer is coming to appreciate the value of a professional training to fit him for his chosen calling. And yet we hold to the archaic method for the profession of business.

Failings of Present System

The method pursued at present for training our business executives is extremely wasteful; it leaves each individual to learn from costly experience what others have discovered over and over again; it takes fifteen to twenty-five years for any young man (unless the son of the owner, who usually learns some other business) to pass through his period of instruction; it gives little or no opportunity to know anything at all of the methods pursued, and their results, in other firms than the one in which the candidate for leadership has served his time. It gives absolutely no opportunity to benefit from experience in foreign countries. By the time a man has passed through the ordinary mill of learning by experience he is usually reduced to a creature of routine, lacking initiative, resourcefulness and enthusiasm, and he is so busy that he has had no time for the study of other organizations than the one in which he works. We have, as the result a flock of so-called efficiency experts, some very few of them rare souls of genius and talent, who continually hover over the heads of the untrained and unwary business men. We have men running large businesses with no [illegible] book of account than their bank book, and that an [illegible] therefore. We have enterprises undertaken that have not more than three economic chances in a hundred of success in Canada, and eventually land in the scrap heap, while on the other hand we neglect industries for which nature has given us abundant guarantees of success in the utilization of natural resources, power and advantageous geographic position. War tax burdens of the next generation will make such conditions impossible luxuries.

No, we are not much behind others economically as some critics would lead us to believe, when we consider all the factors of our natural environment. Nor is our futuro anything but bright. But we have many steps to take in the coming years, and a most vital one will be the establishment of professional schools of business administration in connection with our larger universities; schools where undergraduate and even post-graduate training will be given in the profession of business as well as in the trades of business. While we already have trade schools which instruct in ordinary vocations, we yet have a serious lack of the proper education to fit men for executive positions. Although business may have been preceded even by agriculture in insisting upon professional scientific training, the time is not very far distant when we may count it as one of the foremost trained professions.

One reason why the professional training of business executives has not made greater strides is the character of the courses provided with this in view. One would rather turn for medical advice to a person with merely practical nursing experience than consult a practitioner trained on archaic theories which had not been harmonized with facts by clinical contact with the real world. If one who lays some claim to being an economist may say so, our courses in political economy have often been too far removed from the real world of facts. We heard too much about Robinson Crusoe communities and theoretical abstractions; about theories and ideas that were propounded at the time of the American revolution or earlier; things which may be a joy to the speculatively minded and those who think that science, particularly in university life, should be a thing to be pursued, like virtue, for its own sake and not for any reasons that would perchance aid in the production of bread and butter. What business executives need is a live science of the world they hope to live in for a few brief decades rather than metaphysics coated with a frosting of industrial terminology.

Must be Linked Together

Yet economics, or political economy, if we choose so to designate it, is a science, and the science which underlies what is in the process of becoming the science of professional business administration. It has already almost arrived. We really do not have to work out a new professional science. Our best economists now live less in the ethereal bliss of abstractions than did their predecessors; in fact, economics has recently become so practical a science that it is fast becoming one of the most popular studies among the serious minded students. It is becoming so much sought after that the faculties of rival courses are evidently worried lest this new interloper far outweigh the more cultural courses of study. It is becoming so practical that the leading business men of the largest American cities are taking the keenest interest in extending the work laid upon its foundations to form truly professional schools of business administration. Leading American banks have taken great steps toward closer connections with the economics departments of the leading universities in selecting and training their young men. Business and the science of economics were rapidly drawing together before the war. The war has given a tremendous impetus to draw practical business and economics into closer relations with each other, with the greatest benefit to each, and both together have been drawn into very much closer relations with national affairs.

Our economists, if untrammelled by the exponents of the strictly cultural studies, with the co-operation and advice of those men of genius who have become real business professionals in the school of experience, can work out the curriculum and content of courses for a genuinely scientific school of professional business administration, a school which will prepare our promising young men for the task of leading Canada into a greater prosperity. Building from the foundation already made in the work in economics and business in certain of our universities, our leading educators should, with the advice of the leaders, both capitalistic and labor, in our industrial and commercial life, be given the opportunity to work out such a programme of instruction.

The goal in view should be the training of business executives of a professional standing, as the civil engineer today has his professional standing. The graduates of these schools will be the leaders of the nation to-morrow. Their training, accordingly, should be to equip them as broad-minded citizens as well as business men. The curriculum should not be composed exclusively of the so-called practical studies. If we avoid this one-sidedness our hopes of escaping serious social unrest in the future, when these men are the economic leaders, will be greatly improved. Certainly these men require a knowledge and appreciation of state-craft as well as industrialism, and a state-craft that will have something of idealism in it beyond a bare description of the rather non-idealistic political machinery of to-day. Just as surely they must have a knowledge and appreciation of the hopes and aspirations of the laboring classes, and the courses on these social problems should certainly be worked out in co-operation with our ablest labor leaders. Nor should the strictly cultural subjects of our universities be left out. The man as well as business must be developed. It is a good thing to appreciate that our highest values cannot be measured in money.

Course of Studies Suggested

The main burden of the work, particularly in the later years of the regular course, should be equipment for the practical affairs of business. While it should be made possible for special students to take any courses for which they are prepared, yet it is imperative that special emphasis be laid upon the regular course. This regular course, starting from a good grounding in the more cultural studies, should require five years study for the degree of Bachelor of Business Administration, with additional work of higher standing eventually provided for the Master's degree. The main portion of the summer vacation of the students should be spent in practical business work, this work being required for graduation. In order to give certainty of the proficiency of the candidates for graduation a thesis should also be required which will prove the student's ability to solve practical business problems.

In addition to the more strictly professional or scientific courses, auxiliary trade courses which will teach the practical details of the various subjects are necessary. For example, in addition to the professional or scientific courses on banking which give the fundamental principles underlying banking, its relation to other phases of business, and the systems of other nations, it is also necessary to have courses covering the details of running our banks, courses which will equip a young man for getting into the harness of a bank or advancing himself once he is engaged in that calling. Together with courses in the scientific principles of transportation and rate regulation required of all students, will be courses in the trade side of transportation, which will prepare the student for going into the traffic department of a railroad or the transportation division of a commercial house.

These trade courses might well be made evening work to render them available for men who are already at work and wish to advance themselves. It will be found that this work which trains for the trades of business will be a highly important adjunct to the work in business administration. Many will avail themselves thereof who would care nothing for a degree, but yet provision should be made for a certificate for those who have satisfactorily completed a sufficient amount of such work. A certain amount of this work should also be required of all candidates for the professional degree, these students taking the major portion of the trade work offered in connection with the professional line elected as their major study in the later years of the course.

The regular course should start with two years' work not wholly different from ordinary university work, yet always with a specific view toward the profession. The Freshman year ought to include a course in rhetoric prepared especially for these students, giving attention to forms of writing more likely to be used by business men rather than to short stories and poetry. It is essential that the rhetoric department co-operate with the School of Business Administration to the end of the five years' course in requiring correct English in all written papers. Modern languages must also be started in the first year, and they should be taught in such a fashion that the students have the mastery of the vocabulary of business and ordinary life rather than that of literature, and, what is most important, should be able to speak the language. Special work for this school would be absolutely necessary, but should be given by the staff of the Modern Language department. This work also is to be kept up until graduation, the student being required each term to do a certain amount in these languages under the joint direction of the school and the Modern Language department. Mathematics should be required also in this year as well as History and Science, emphasis in History being laid on the industrial side.

In the Sophomore year we would continue Modern Languages and History, giving in this latter a strong course in Canadian, British and Foreign Economic History. A course in Political Science and a half-year course in Psychology are additional requirements. The remainder of this year should be taken up with Economic subjects; a full course in the Elements and General Problems of Economics and a half-year course each in Economic Geography and the Industries and Commerce of Canada should be required of all. One other course, preferably Accounting, might be left for election.

Commencing with the third year, the work would consist more largely of the professional courses. Certain work, however, such as English Literature and advanced courses in Political Science, must be taken at some time in the upper years, the work in Rhetoric and Modern Language being carried on, as specified above.

These professional courses should include Banking, Transportation, Public Utilities and Rate Regulation, Business Cycles and Barometrics, Insurance, Taxation and Public Finance, advanced work in Foreign Trade, Commercial Policies, International Law, Marketing, Advertising, Accounting, Business and Factory Management, Public Statistics and Business Statistics, Corporation Finance, the Trust Problem, Public Finance and Taxation, Business Law, Labor Problems and Programmes, and advanced work in Economic Theory. These courses could be grouped together and combined with the so-called "Trades" courses to make systematic curricula. A large degree of election within this line of subjects and to a certain extent in other university work, might be allowed the students, particularly in the later years, but certain of these courses should be made imperative and students kept reasonably within certain groupings in the main portion of their work. Before beginning the work of the last year the student must show a reading and speaking knowledge of at least one modern language.

This school should be run as a distinct professional branch of the University just as Medicine, Law and Engineering. Only so can it attain the necessary freedom from certain branches of the various departments who wish to thrust their work unduly upon all students, and only so can it attain real professional standing. The members of the faculty would include, besides the teachers in full standing in this school, those in charge of the prescribed work in outside subjects such as Rhetoric and History. Members of this faculty of full professorial rank, together with representative business and labor leaders, should compose a council to decide all the most important matters, such as curriculum and appointments, their decisions to be subject only to the veto power of the highest authority of the university.

The standard of scholarship must be maintained at a very high level. This is one reason for separation from the Arts College of the University. Students may more easily be held to high standards of conduct in a professional school whose practical ends are in closer view than they will in the ordinary arts course. Only thorough work should be accepted.

A point to be particularly emphasized is the relation of the school with business concerns and with the departments of the Dominion, provincial and municipal governments. Not only would it be advantageous for all these to patronize such schools, but they should also give the opportunity to the students to do practical work and research in the summer and along with their studies.

Canada has found money for many professional schools of the highest rank; she has given opportunities of the highest order, and yet to take work in business subjects of real professional standing our young men must go outside of Canada, usually to the United States, where they are generally tempted to remain once they have left their native land. We need all of the talent of our young men. We need more business executives, and we need these leaders to have the broadest possible vision of economic problems and social life. Such results can be achieved to full measure only by spending money and devoting time and care to the development of these schools, but money could not be spent to much better advantage in Canada in the coming decade.

LONDON AND LANCASHIRE FIRE

A substantial gain in profits is shown in the results of operations in 1918 of the London and Lancashire Fire Insurance Company, Limited, summarized elsewhere in this issue. The marine business increased greatly as compared with last year and showed a profit of $2,181,845. The results of the fire and of the accident and general departments were also satisfactory, the total profit from the three accounts being $5,431,440. When this was added to the balance brought forward from last year and interest included, the total available in profit and loss account was $9,917,810. Provision was made to the extent of $2,500,000 for the cost of businesses acquired and to the extent of $2,000,000 for the income tax on profits and the excess profits duty. After paying dividends, interest on debenture stock, etc., a balance of $1,255,465 was carried forward, being an increase of $70,000 compared with last year.

The company's assets now total $53,575,000 of which over $15,000,000 is invested in British Government securities. There are also large amounts of securities of other governments, over $6,000,000 being invested in United States government state and municipal bonds.

At the annual meeting held in Liverpool on April 30th, the deputy chairman, Mr. J. W. Alsop, in the absence of the chairman, Mr. John H. Clayton, stated that the company now transacts one of the largest, if not the largest, marine business of any company, since the Marine of London and the Standard of Liverpool were taken over. Both of these companies have enjoyed a high record. Referring to the future he said: "War risks are now done with and underwriters will be satisfied if their operations compare at all favorably with those prior to the war. But the most important feature of our success last year was the proof of the quality of our business and in our other departments of fire and accident. These departments, as you are aware, have been very little affected by the war and good results are the natural fruition of the labor and work in previous years. Our fire loss percentage of 49.4 per cent. is quite a rarity." He also referred to the taking over of the four fire insurance companies purchased in Canada, and of the Law Union and Rock. 97 per cent of the shares of the latter have already been acquired.

The business of the London and Lancashire Life and General Assurance Association in Canada for 1919 thus far shows an increase of about 75 per cent. compared with last year.

PERSONAL NOTES

Mr. W. K. George, well-known Toronto business man, has been elected director of the Gore Mutual Fire Insurance Company of this city, filling the vacancy on the board caused by the death of the late W. K. McNaught, also of Toronto.

Lieut.-Col. H. K. Newcombe, formerly a major in 181st Canadian Battalion, has been appointed comptroller of the Franco-British forces in the Caucasus. Col. Newcombe was formely manager of the Union Bank at Dauphin, Manitoba.

Mr. Alexander Bissett, manager for Canada, of the London and Lancashire Life and General Assurance Association, has just returned from an extended trip through the west. He reports a general improvement in conditions in the west, particularly at Vancouver.

Mr. Chas. F. Batchelder, formerly assistant manager of the bond department of the Guaranty Trust Company, of New York, has been elected vice-president and director of the United Financial Corporation, Limited, of Montreal, Canada. He has arrived in Montreal and taken up his new duties.

Mr. H. M. E. Evans, formerly mayor of Edmonton, has transferred his miscellaneous financial interests, other than the management of the Western Canada Land Company and the Western Canada Mortgage Company, to H. M. E. Evans and Company, Limited, giving an interest in the company to some of the members of the staff.

Mr. T. H. Rieder, who recently resigned from the Canadian Consolidated Rubber Company, will be elected to the presidency of Ames-Holden-McCready, Limited, and D. Lorne McGibbon, who has been at the head of the Ames-Holden organization since the formation of the company, will assume the chairmanship of the board of directors.

NEW WHALEN PULP AND PAPER PRESIDENT

Significant of the growing importance of the pulp and paper industry in Canada is the announcement which has just been made of the election of Sir George Bury as president and chief executive of the Whalen Pulp and Paper Mills, Ltd. His offices will be in Vancouver, B.C. Sir George Bury recently retired from the vice-presidency of the Canadian Pacific Railway Co. His retirement last October was stated at the time as being due to ill-health. He entered the service of the company in 1883, and during the following 35 years was promoted through many positions until he finally became vice-president. He takes up his new duties at once.

IMPERIAL BANK RESERVE INCREASED

The annual statement of the Imperial Bank of Canada for the year ended April 30th, 1919, shows profits, after deducting charges of management, auditor's fees, interest for depositors, etc., of $1,247,516, compared with $1,185,066 last year. This statement will be submitted to the shareholders at the annual meeting, to be held on Wednesday, May 28th. The dividend, at the rate of 12 per cent. per annum, required $840,000, and after meeting the war tax on bank circulation, contributions, etc., the sum of $500,000 was transferred to reserve fund. The balance of $865,459 was carried forward to the credit of profit and loss, compared with $1,204,942 brought forward from last year. Adding the $500,000 transferred to reserve fund, however, there was a net gain of about $160,000 for the year.

The reserve fund is now $7,500,000 and the paid-up capital $7,000,000. Circulation of both classes of deposits showed a substantial increase during the year. Total assets are now $112,186,457, or about $10,500,000 more than at the end of the previous year. The deposit in the central gold reserve increased by $2,500,000 to $6,000,000, although the bank's holdings of current coin and of Dominion government notes decreased slightly. Holdings of Dominion and provincial government securities amount to $5,934,919, and Canadian municipal securities, British, foreign and colonial public securities other than Canadian, totalled $14,702,059. Loans to cities, towns, municipalities and school districts are somewhat less than last year, indicating that many of these have liquidated their bank loans by the issue of securities. Cash and liquid reserves held by the bank amount to $58,584,393, or 60 per cent. of the total liabilities to the public.

ATLAS ASSURANCE COMPANY, LIMITED

The results of the financial year ended December 31st, 1918, showed a profit from the fire account of $1,482,655, from the employers' liability, accident and general account of $106,145, and interest, dividends and rents not carried to other accounts of $420,935. After paying income tax, excess profits duty and other expenses, a balance of $717,690 was carried forward, subject to payment of excess profits duty this year. This is about $370,000 more than the balance brought forward from 1917.

In the life department new business was issued to the amount of $4,012,925. The amount of the life insurance funds is now about $13,000,000. The fire insurance funds amount to about $8,500,000, and those for employers' liability, accident and general insurance funds are $550,000.

The fire insurance fund at the beginning of the year amounted to $7,479,670. Premiums for the year were $8,203,030 and interest dividends, etc., carried to this account totalled $312,590. The claims paid and outstanding amounted to $3,335,325; commissions were $1,328,275; and expenses $1,113,130.

The total assets of the company are over $30,000,000, of which the largest single item is British government securities to the amount of $6,000,000. The other investments are well distributed, as indicated in the detailed statement given elsewhere in this issue.

The organization of the Atlas Assurance Companies is extensive throughout the British Empire and in the United States. The manager for Canada is Mr. Matthew C. Hinshaw, Montreal, who has for more than fifteen years successfully directed its affairs here.

A number of insurance companies are now offering insurance contracts to cover malicious damage by strike, riots or civil commotion. The statutory conditions to be included in fire policies of most of the Canadian provinces provides that the company is not liable "for loss caused by invasion, insurrection, riot, civil commotion, military or usurped power."

INDUSTRIAL CONTROL

THE acute industrial difficulties of the past week have increased the element of uncertainty in the industrial and financial outlook in Canada. It has become apparent that, while some of the demands of labor are far reaching, there are manufacturers on the other hand who have not given unions the recognition which is warrented by the record of organized labor. As has been pointed out the unions stand for peaceful action and latest reports from Winnipeg indicate that in that city they have not at any time considered violence. Such difficulties as the present, however, afford to revolutionary agitators the opportunity which they desire.

While there is agitation in some instances for an increased wage scale and shorter hours of labor, the general opinion is that these are already satisfactory. The excessive cost of living at the present time will gradually be relieved by declining prices. The root of the economic unrest is to be found in the fact that the part of labor in industry has hitherto been merely a negative one, the option being to work in accordance with conditions prescribed by the employer or to express dissatisfaction with those conditions by ceasing work. It is, after all, unreasonable to expect that the parties who furnish the capital to an enterprise should entirely control its operations. Labor should be given a positive voice in the management of concerns and the committee or board on which it is represented should be not merely a "welfare" committee to consider the grievances of employees, but a final authority in determining all the activities of an industry, including purchasing and sales, the conditions of labor and the introduction of new capital.

Incident to these new privileges of having a voice in determining its own conditions of labor, the accompanying responsibilities would, we are sure, be accepted automatically. The evidence received before the Dominion Commission on Industrial Relations indicates that there is no feeling in Canada that the capitalist should not receive interest on his investments nor that skilled work should not have the remuneration to which its special qualifications entitle it. It is not conceivable that any organization representing labor, which maintains that it should not have to work unless under satisfactory conditions, should demand the investment of capital unless interest were assured in accordance with market conditions and the risk attendant upon the industry concerned. This process of introducing new representatives in the direction of business enterprise must be gradual as it will take considerable time for leaders to be trained in the knowledge necessary to make them competent administrators. The development of capable trade union leaders, however, indicates that the plan is quite feasible and what is now necessary is the application of that administrative ability which has hitherto been confined to the organization of labor itself. To the actual problems of handling business as a whole.

Such a change would go far towards removing many misconceptions which now prevail, as to the possibility of obtaining shorter hours and an indefinitely increased scale of wages. We are of the opinion that large profits in a few industries have been to a considerable extent responsible for this view, and that if the profits of all Canadian concerns were thoroughly known to labor leaders it would become at once apparent that the divisible margin is very small. One case was mentioned before the Dominion Commission at its session in Hamilton, Ontario, where the employees of a company who had been demanding an eight-hour day, upon being shown that the profits of the company were not sufficient to allow such a concession, unanimously agreed to waive it. Such a change would make it impossible hereafter for the statement to be made that labor is bought and sold like the other elements in production.

SHARING TRANSPORTATION COSTS

A PROPOSAL that the cost of constructing the roadbed and laying the rails of street railway and steam railways should be met by taxation is put forth by R. J. Deachman in a pamphlet recently published at Calgary. This, he says, would be the same as in the case of highways, pavements and sidewalks. The cost of operation, apart from these fixed charges, would be met by those making use of the service, just as with highways at the present time.

The exact line of division between services to be rendered free of charge and those to be maintained by rates is one which cannot be decided on any permanent basis. Highways were first constructed as a private industry, and tolls were charged to meet the expenses and yield a profit. This method became cumbersome, however, and it was also realized that the use of highways for purposes of commerce was of value to the community, apart from the individuals who immediately profited by them. Consequently, these enterprises are now constructed and maintained in all civilized countries by public taxation. When steam railways were first proposed in England, on the other hand, it was the intention that the roadbed and rails should be public property, while the companies would merely operate the trains. This, however, was soon supplanted entirely by private ownership and management. The general trend has, of course, been in the direction of providing more and more services free of charge. In addition to the instance mentioned above, other outstanding examples are education, the use of public libraries, and the free distribution of literature by government departments.

Ownership and operation at the public charge of important utilities, such as the street railway, telephone and waterworks, is not a new proposal, but there have been substantial reasons which have heretofore made these schemes impracticable. If all charges, or part of the charges, of operation were met at the public expense, the use of the services would be immensely increased, and the burden of taxation would be much greater than under the present system of operation on a self-sustaining basis, in which the charges imposed acts to limit their use to those to whom the services are of greatest value. Municipalities in Canada which own street railway and waterworks systems are continually endeavoring to maintain these upon a self-supporting basis, and there is no evidence of any general sentiment that this effort is in the wrong direction. The same conception of the purpose and method of operation of our national railway system is not disputed.

But the writer of this pamphlet goes further. His aim, it would appear, is not so much to remove a portion of the expense from consumers who make use of these means of transportation as to shift it specifically to the landowner, who, he says, benefits by the construction of a street railway or of a steam railway system. But it does not seem possible to prevent an addition to the value of property through the construction of a wisely-planned transportation service. Under the present method those who benefit by that service pay for it. In a medium-sized Canadian city, for instance, it is the suburbanites, whose property has been undoubtedly benefited by the construction of lines, who bear the expense of construction and operation, while those living in central parts of the city do not pay any of the cost. Mr. Deachman does not discuss any plan for meeting the fixed charges by the taxation of the property specially benefiting, and presumably he would meet them by a general levy on land values. This would mean that part of the cost would be borne by the owners of centrally located property, to whom a street railway system is only of indirect value, while suburban property would benefit through receiving transportation service at less than present rates.

WHAT WILL BONDHOLDERS SAY?

THE financial programme of British Columbia for the current year provides for expenditures on projects which have been considered as being distinctly in the field of private enterprise. An outline of the plans was given by the premier in an address before the Vancouver Board of Trade, reported elsewhere in this issue. One of the features is the provision of $2,000,000 to be expended for industrial development. This money will be advanced, we understand, not on the security of land or improved property, but on the credit of a company or of an individual. As an example of this kind, a co-operative concern is being formed with a capital of $300,000. It will consist of 150 shareholders, who will subscribe $400 each, making a paid-up capital of $60,000. It is proposed to ask the government to provide the remaining $240,000. The concern is to engage in the manufacture and sale of products already supplied to the people of British Columbia by manufacturers in eastern Canada.

Such a move on the part of British Columbia, if carried out, will have the effect of making the provincial government a partner in industry. It is distinctly a socialistic move, and at variance with the view hitherto accepted in Canada, that the state should assist, but not partake in industry, excepting where private enterprise is not practicable. The incurring of new capital obligations for the carrying out of an experimental programme affects the security of present bondholders, and some joint action on their part might be worth considering.

ARE PRICES COMING DOWN?

THE index number issued by the Canadian Department of Labor indicates that wholesale prices in Canada have been on the decline since November, 1918. This index number is the most reliable prepared in Canada, and is based on the prices of 262 commodities. The average price during the years 1890-1899 is taken as 100, and present prices are compared with this figure. For January, 1918, the index number was 258.7, an increase of over 250 per cent. as compared with the average price for 1890-1899. By November, 1918, it had risen to 290.9, but since that month it has now declined to 277.6, which is the figure for March. The manner in which the index number is compiled is given below.

The reason why this decline in prices has not become apparent to the average consumer is that, in the first place, it is based on wholesale prices, changes in which usually precede by several weeks or months similar changes in retail prices. In the second place, many of these declines have taken place in the prices of fundamental commodities which are not immediately consumed by the general public. The declines in these cases, however, ultimately affect the cost of almost all commodities. For these two reasons, therefore, it would appear almost certain that retail prices in the near future will commence to decline.

The following are the index numbers for each month since the beginning of 1918:—

1918.	January	258.7	1918.	September	285.3
"	February	263.5	"	October	289.6
"	March	269.2	"	November	290.9
"	April	269.4	"	December	288.8
"	May	275.8	1919.	January	286.5
"	June	280.6	"	February	279.8
"	July	284.0	"	March	277.6
"	August	284.3

Dominion Commission on Industrial Relations

THE Winnipeg meetings of the Dominion Commission on Industrial Relations ended on May 12th. In addition to the witnesses mentioned last week several others were heard. Mr. Wm. Pearson claimed that the present conditions were temporary although he considered that permanent measures such as unemployment insurance and old age pensions would be of value in the economic world. T. R. Deacon, president of the Manitoba Bridge and Iron Works, referring to the agitation that business for profits should be abolished, stated that if this system were done away with there would be no incentive and industry would become stagnant. Manufacturers, he declared, were not obtaining undue profits. It was frequently overlooked that a substantial appropriation had to be made each year for repairs, depreciation, etc.

In Fort William, Ontario, on May 14th, J. H. Irwin, manager of the Consolidated Elevator Company, complained that workmen frequently did not live up to their agreements and that such actions would rouse enmity to trade unions. He did not wish to be quoted as being against unions but the loss of money had probably exceeded the good that the unions had accomplished. He believed in state control of utilities but companies could usually succeed in concealing profits if they wished to. Employees must realize that their prosperity depends upon their own energy, thrift and efficiency. Regarding unemployment, he said that there were certain seasonal industries which had to have extra help at certain times. In the case of his own company, he said, the staff was about doubled during the busy season. At the present time there are reported to be 10,000 men out of employment in Vancouver, while Saskatchewan is asking for more than this number for farm work at good wages.

J. M. Shaver warned the Commission against the revolutionary propaganda which is being circulated among labor men and advocated that an efficient secret service should be maintained.

A session was held at Sudbury, Ontario, on May 17th. The principal complaint there was that the two large nickel concerns, the Mond and the International, had refused to recognize and deal with organized labor. Complaint was also made that the employers had released three thousand men since January, owing to the dullness in the nickel market. Witnesses from the employers stated that there was comparatively little employment, whereas some of the labor witnesses maintained the number unemployed ranged from one thousand to four thousand. Land owners and high rentals also came in for severe criticism in Sudbury.

At the meeting held in Sarnia, Ont., on May 19th, the principal subject of criticism on the part of the workers was the employees' welfare scheme of the Imperial Oil Co. The complaints were also made that this company was hiring too many women, who were doing work formerly done by men.

London, Ont.

Varied evidence was received in London regarding the cost of living, the financial system, government ownership of railways, etc. Mr. Frank Broad pointed to the immense increase in rentals which had taken place during the past forty years. Wage earners, he said, should have a larger share of profits regardless of what the effect would be on prices.

Labor men attended the London session in an official capacity. They testified that there was very little trouble and practically no unemployment in the city. H. H Wright, president of the Local Trade and Labor Council, said the chief complaint was regarding the cost of necessary food commodities. Cold storage plants should, he said, be subject to government regulation, and buying and selling prices should be fixed. Collective bargaining had come to stay, he said. A couple of years ago only about ten per cent. of the men in the city belonged to unions whereas now the proportion had increased to about seventy per cent. He criticized piece work as being injurious to the worker and having a tendency to produce a poor quality of work.

Frank McKay, vice-president of the Trades and Labor Council, said that the eight hour day and the forty-four hour week was wanted.

E. G. Henderson, president of the Canadian Salt Company, Sandwich, Ontario, while admitting that wages had not on the whole kept pace with the cost of living, also pointed out that a taste for luxuries had developed. He did not want a standard minimum wage because he thought that this might put a premium on idleness, but he might favor some standardization of wages. Men at his works had been given a bonus at the same rate as the dividend paid but they preferred an immediate increase and got it as well as an eight and a half hour day. Competition with American manufacturers was very keen and the increase in the wage scale was distinctly limited. When the practice of laying aside sums for a reserve each year was referred to, Mr. Tom Moore, one of the commissioners, asked if this did not mean that so much was deducted from the rightful remuneration of labor. Chief Justice Mather, however, pointed out that this is a recognized procedure, as if no such reserve were provided a company would have nothing on which to operate in a year of bad business, and workmen would be thrown out of employment just as soon as a slack season arrived.

R. H. Hissell outlined as follows the causes of labor unrest:—"Living had increased eighty to ninety per cent. while wages had increased about thirty; non-recognition of unions; competitive system of labor; watered stock in big concerns, which has kept down the wages to pay dividends on non-existing investment; manipulation of prices by cold storage companies. While admitting that the government could not fix the price to the farmer he thought that they could fix it for the cold storage and for the retailer.

Col. W. M. Gartshore, vice-president of the McClary Manufacturing Company, favored gradual changes in the industrial system. His firm had a committee of 75 to help settle disputes. Thus far there had not been any examination of profits, etc., on the part of this committee. The company had a scheme of building houses which were sold to employees at a small initial payment and monthly instalments, which helped to solve the housing difficulty. About $1,000 per year was, he said, the average wage paid in the plant and this was a fair wage for the city.

Thomas J. Hussey, corresponding secretary of the Trades and Labor Council, complained that the government had not fixed prices when they were rising rapidly during the war years, and gave as example the prices of woollen goods which he handled in his own business.

Hamilton, Ont.

Evidence received in Hamilton on May 21st and 22nd, indicated fairly satisfactory conditions in industry. On the side of labor, Richard Riley, business agent of the International Association of Machinists, and John A. Flett, general organizer in Canada for the American Federation of Labor, stated their case. Wm. McKinley and H. Radcliffe, laborers, represented unorganized labor, and urged an extensive government ownership scheme. F. H. Whitton, vice-president of the Steel Company, of Canada, which employs about 6,000 men; Chas. T. Grantham, general manager of the Empire Cotton Mills, Welland; F. J. Gernandt, superintendent of the International Harvester Company, and Charles Pook, works manager of the Westinghouse Company, represented the employers.

While the high cost of living figured among the complaints as one of the causes of unrest, it occupied a secondary position. The refusal of the employers to grant the eight-hour day, and the claim that they refused to listen to, or

ACKNOWLEDGMENT OF BANK DEPOSIT

Court Holds Bank Liable for Cheque for Which Presenter Denies Having Received Payment

IN the Superior Court in Montreal recently, the Royal Bank was held liable for $101.90, the amount of a cheque drawn upon the Hochelaga Bank and deposited in a branch of the Royal Bank. The cheque was endorsed in blank and had been cashed by the plaintiff, Mr. Laramee, who sent it by a lady employee to the Royal Bank together with another cheque for $24.10 with instructions that both be deposited to the credit of his current account. The teller, however, entered only the amount of $24.10 on the deposit slip; both cheques were duly presented at the Clearing House and were collected from the Hochelaga Bank. The bank claimed that the other cheque had been cashed. In giving judgment, Mr. Justice Greenshields said:—

"The facts appear to be thoroughly well established and cannot be contested. It is true plaintiff in his declaration alleges the receiving teller or some other employee of the the defendant bank, appropriated the cheque. This has not been proven, but one thing is clear: it is that plaintiff, the holder for value of the cheque in question, never received one cent of the proceeds thereof. There is the clear proof made by the defendant that it did get from the Hochelaga Bank the proceeds of that cheque.

"Defendant realizes its position, and proceeds in defence to the action to allege that the receiving teller employed in its branch paid in cash to the person presenting the cheque the amount thereof ($101.90), and that person being an employee of the plaintiff—and being entrusted with the possession of a cheque endorsed in blank—the plaintiff must suffer the loss."

The judge said the burden of establishing the truth of that allegation of course rested upon the defendant. Proceeding then to analyse the evidence given as a whole, His Lordship quoted plaintiff's employee as stating she handed the two cheques to the teller, who made out a deposit-slip which she never saw, and she swore positively that she never got one cent from the receiving teller. The bank clerk's version, the judge said, was that the young lady handed to him a cheque for $24.10 for deposit; that he was in the act of making out the deposit-slip when she handed in another cheque for $101.90. He said he looked at the endorsation and asked her if she wanted the money. He said she made no reply in words, but made a sign which he interpreted to mean an answer in the affirmative, and he counted out the money to the last cent and handed it to her and she went away.

"These," continued Justice Greenshields, "were the conflicting statements made by these two witnesses of what occurred on August 1. For the purpose of determining the issue, I hold it has not been proven that the young lady got the proceeds of the cheque. The bank clerk asserts it; she denies it. I can find nothing in the record that would justify me in accepting the statement of the bank clerk rather than that of the young lady.

"I am forced to follow the general rule where two persons of equal credibility are squarely in contradiction upon a fact, and where there is no outstanding circumstances to aid, that the party who asserts the fact has failed to prove it. In this case the bank has not proved the fact of the payment of this money to this young lady. We have therefore left this fact: that the bank received a valuable security (cheque for $101.90), the property of the plaintiff. The bank realized upon that security, cashed the cheque and received the money from the Hochelaga Bank and failed to pay it over to plaintiff.

"Counsel for the defendant urged that the bank's possession of the cheque was a presumption that the bank had given value for it. I cannot find in law any such presumption. The cheque was not drawn on the bank defendant. The bank defendant was not ordered by the cheque to pay to anyone. The bank defendant was not the debtor on August 1st of the plaintiff for the amount of that cheque. The plaintiff was a customer of the bank; was in the habit of making deposits there, and the mere fact that the defendant found itself at one time, and for a limited time, in possession of a cheque endorsed by the plaintiff and drawn on another bank does not create a presumption that the bank paid the money to the plaintiff on that cheque. And the bank fully realized this when it affirmatively alleged the payment of the cheque to the plaintiff's employee, which allegation it has failed to prove. Under the circumstances I am compelled to maintain the plaintiff's action, and judgment will go against the bank for the amount claimed."

NON-TRADERS AND BANKRUPTCY ACT

Several clauses in the Bankruptcy Bill, which were formerly allowed to stand when the bill was last up before the House, were passed last week.

J. Archambault moved an amendment, the purpose of which was to have the Act apply to the non-trading classes only. This was the first time, he said, a bill had been introduced in parliament providing for bankruptcy proceedings applicable to people other than traders. England and the United States, he said, are the only countries which include non-traders in their bankruptcy legislation. The enforcement of a bankruptcy law allows the creditors to find out matters of a very private nature regarding the debtor. Only the most important reasons can justify such legislation, such as the necessities of trade. A bankruptcy law is necessary for the protection of creditors, more particularly those at a distance; but these considerations do not apply to professional men or others who live on an income. They must live on their earnings, and in case debts are contracted none of the debtors are likely to live at a distance. He thought that the intention of the British North America Act was that bankruptcy laws in Canada should not be applicable outside of trade and commerce.

BANK OF MONTREAL

The half-yearly statement of the Bank of Montreal to April 30th, 1919, recently issued, gives the first financial statement after the acquisition of the Bank of British North America.

The statement shows capital stock increased to $20,000,000 from $16,000,000, with a similar increase in the rest of the account. Combined capital and rest of the Bank of Montreal is now $40,000,000, as compared with $26,400,000 in 1910 and $19,000,000 in 1900.

The addition of $4,000,000 to the capital stock is practically accounted for by the capitalization of the Bank of British North America.

Profit and loss account shows net profits for the half year of $1,751,237, as compared with $1,287,587 in the corresponding period last year. This year the balance of profit and loss brought forward amounted to $1,901,613, and in addition to the premiums on new stock amounted to $3,500,000, which brings the total amount available for distribution at the end of the six months period up to $7,152,850.

The following are the principal comparisons:—

	April 30, 1919.	April 30, 1918.
Total assets	$489,271,197	$426,322,096
Liquid assets	293,980,708	291,624,073
Current loans and discounts in Canada	157,683,463	100,294,678
Call and short loans in Great Britain and United States	76,653,440	96,584,365
Dominion notes	54,107,243	60,457,838
Gold and silver coin	24,743,935	20,931,133
Deposits bearing interest	268,167,111	247,904,855
Deposits not bearing interest	124,736,111	109,851,949
Profits for the six months	1,751,237	1,287,586
Capital stock	20,000,000	16,000,000
Rest account	20,000,000	16,000,000

DOMINION COMMISSION ON INDUSTRIAL RELATIONS

(Continued from page 12)

even reply to, twenty circular letters sent out by Mr. R. Riley asking for this, were the two main causes of complaint. In stating this, Mr. Riley added that how serious the workers judged this to be could be figured from the fact that every local in his district, which included the whole Niagara district and also Brantford and Dundas, had taken a strike vote, and that every machinist would come out in the course of a few days if the request was not granted. Coupled with this demand, which was general among all the organized men, was one for the 44-hour week. Mr. Riley put the general cause of unrest down to the refusal of the employer to even consider the worker, and the feeling of hostility between them. This failure of the two rival camps to get together and talk things over, was the primary cause of trouble. There are about 1,500 machinists in the district.

The union men present made it clear that they would be willing to grant the concession of a forty-eight-hour week to some business which had to have this for certain reasons, but that the eight-hour day admitted of no argument. At present the week's work runs to fifty hours with a nine-hour day and five hours on Saturday. It was claimed that employers in this district, in which the open shop is the rule, discriminated against union men. They might be employed, but they were dismissed on any excuse. This was flatly denied by several of the employers present, who stated they were absolutely fair to union or non-union men.

The suggestion that Industrial Committees on the basis of the Whitley plan, as used in England, found favor with scarcely any of the Labor men. They claimed that it merely represented an attempt of the employer to head off the union so that the men could be kept more under control, and that all the work of such committees would be directed from the offices of the companies. As an instance, Mr. Riley stated that the International Harvester Company men, who are mainly unorganized, and have such a council, asked for an eight-hour day and were refused.

Wm. McKinley, a non-union worker for this company and a member of the committee, stated that the company had shown the men the books and had convinced them that they could not meet the eight-hour day, so that they had decided unanimously to withdraw the request.

Another case against the employers, as put by Mr. Riley, was that they promised improved conditions and the eight-hour day after the armistice was signed and the labor scarcity was not so bad, but that this promise had been broken. There was unemployment in Hamilton and the district, but it was not bad enough to give serious concern yet. Old age pensions hadn't given the men much concern, because they had to fight too hard for a bare living to think of them, and they also thought that the first thing was to secure wages sufficient to make them able to care for themselves in old age. Summed up, the contention was that the workmen deserved a better standard of living, and the unrest was caused by their starting out to get it.

William McKinley and H. Radcliffe, representing unorganized workers of Hamilton, gave the low wages and high cost of living as the cause for unrest. The average wage paid unorganized men was about $17 a week. Houses rent from $22 to $25 a month. They thought the position of their class, manual laborers, absolutely desperate. Mr. McKinley suggested that the reduction of the cost of living would not altogether fit the situation, because wages would come down again as well. In suggesting some way of regulating the hospitals and doctors, Mr. McKinley stated that a poor man couldn't afford a good doctor, and had to enter the city hospital as a charity patient, and that he did not receive the expert medical aid which might restore him to health.

The Moyes Chemical Co., Ltd., Toronto, has made an assignment to N. L. Martin. A meeting of creditors will be held on May 28. Liabilities are said to be in the neighborhood of $15,000.

YIELDS ON INVESTMENTS IN STOCKS AND BONDS

The following table of investment yields of stocks and bonds has been compiled for *The Monetary Times* by Messrs. Morrow & Jellett, Members Toronto Stock Exchange, 103 Bay Street Toronto:—

May 21st, 1919.

Instalment Mortgages and the Interest Act

Review of the Sinking Fund and Blended Payment Mortgage in Canada—Latter Has Many Advantages if Rate is Reasonable—Interpretation of the Interest Act

AT the recent convention in Toronto of the Dominion Mortgage and Investment Association, a valuable address was given by F. C. L. Jones, barrister, of Toronto, on instalment mortgages and their relation to the interest act. This subject is of peculiar interest at the present time in view of the probable revival of building, and loan companies are being asked to give it careful consideration. The speaker, referring to the government plan of cheap money for housing, expressed the opinion that: "The educative effect of this vast new system of lending will, in all probability, produce a revival of the popularity of this type of mortgage, while the competitive effect upon loan companies forms a matter for interesting speculation."

Mr. Jones reviewed the early growth and decline in Canada of the mortgage repayable in blended payments of principal and interest or on the sinking fund plan. The instalment mortgage, he said, was introduced into Upper Canada by the old building societies established on the English model and designed to gather in small savings. After the scope of the societies had been extended, however, in Upper Canada, to allow the issue of debentures, etc., the interests of the investing members became diverted from those of the borrowing members. The investment and profit-making feature began to dominate the policy of the management and the practice grew up and flourished in the sixties and seventies of making company loans repayable by fixed instalments of blended principal and interest at high rates, extending over 10, 15 and 20 years. The rate of interest was either not stated at all or, as was frequently the case, was referred to in such a manner as to mislead, making it practically impossible to ascertain the rate being paid without a difficult calculation, only possible to a mathematician. Dissatisfaction resulted, which culminated in 1880 in the passing of the Interest Act, or, as it was first known, the Mortgage Regulation Act. This enabled the borrowers to repay loans after five years. The instalment mortgage, having combined payments had become so unpopular, however, that it almost disappeared and the practice became universal of making straight loans for different periods, repayable either by fixed instalments of principal or of postponing payment until the end of the term, a custom that has, on the whole, resulted in injury and loss to many classes of the community.

About ten years after the passing of the act a revival of the old type of building society took place in Ontario. Many disputes arose in connection with the new forms of mortgage used, but no decision upon the clauses of the Interest Act of 1880 affecting them was reached until 1912. The provisions of the Interest Act that affect the question are contained in sections six and seven as follows:—

"Section 6.—Whenever any principal money secured by mortgages or real estate is, by the same, made on the sinking fund plan, or any plan under which the payments of principal money and interest are blendod, or on any plan which involves an allowance of interest on stipulated repayments, no interest whatever shall be chargeable, payable or recoverable on any part of the principal money advanced, unless the mortgage contains a statement showing the amount of such principal money and the rate of interest chargeable thereon calculated yearly or half-yearly, not in advance.

"Section 7.—Whenever the rate of interest shown in such statement is less than the rate of interest which should be chargeable by virtue of any other provision, calculation or stipulation in the mortgage, no greater rate of interest shall be chargeable, payable or recoverable, on the principal money advanced, than the rate shown in such statement."

These sections, as Mr. Jones pointed out, evidently, do not aim at usury as they place no restriction upon the rate of interest which may be specified.

For many years the statement adopted by instalment mortgage companies supposed to give the information required by the act had been somewhat as follows: "And it is therefore agreed between me and the mortgagees that the principal hereby secured is .... and the rate of interest chargeable thereon is ...... per cent. per annum, as well after as before default."

The sufficiency of this statement came into question in the courts of Alberta and a decision was given against the companies which would have had the effect of preventing the collection of interest on a large portion of the mortgages outstanding. An appeal to the Supreme Court in 1917, however, resulted in a decision favorable to the companies, with two dissenting judgments. The decisions made it clear that the sections of the Interest Act previously referred to contained several distinct prohibitions—namely, one, that interest must not be collected oftener than half-yearly; two, that it must not be calculated in advance; three, that no higher rate can be obtained either by way of penalty or otherwise than the lowest rate expressed.

In conclusion Mr. Jones said: "I would suggest that the remedy can easily be applied by an amendment to the Interest Act providing that calculation required by section 6 may be made in accordance with standard repayment tables adopted or approved by the government through one of the departments. The insurance department, for instance, has produced tables of all kinds relating to bonds, and it would be a simple matter to secure their approval to a set of tables like Watson's or any other that they may adopt. The great advantage of the uniform method of calculation which would be provided by such a set of tables, duly legalized and accepted in the courts from one end of Canada to the other, would work for a great simplification in the accounting of instalment mortgage loans, and in my belief, would restore this type of mortgage to favor. Until this has been done, however, we must deal with the act as we find it in the light of the recent decisions, and where so many expressions of doubt as to the exact meaning of the language of the act still remain, my view is that it would be well to err on the side of safety in the preparation of mortgages and in all cases incorporate in the mortgage a statement, complete in itself, specifying principal and interest, accompanied by a declaration in the exact words of the statute that the interest is calculated yearly or half-yearly (as the case may be) and not in advance."

PUDDY'S, LTD., STOCK OFFERING

Three thousand three hundred shares of common stock with a par value of $100 of Puddy's, Ltd., is being offered by the company direct to the public. This company has been engaged in business in Toronto since 1890 and operates an extensive packing and provision business. Yearly sales have advanced from $387,750 in 1909, to $1,448,919 in 1918, and the average annual net profit over this period exceeded 12 per cent. Up to the present time no outside capital has been employed. The proceeds from the sale of this stock will be used to enlarge the buildings and plant.

An Act which has just passed the Nova Scotia legislature fixes 5 per cent. per annum as the rate of interest on judgment debts.

BRITISH COLUMBIA'S FINANCIAL PROGRAMME

Large Sums to be Spent This Year Will Result in Increased Taxation—Results Uncertain

BRITISH COLUMBIA must have more population, according to Hon. John Oliver, premier of the province, who addressed the Vancouver Board of Trade on May 13th. In order to accomplish this considerable money is to be spent this year on railroads, highways, land settlement and development of industry. The speaker said he did not know what the results would be, financially, as the experimental element was considerable. The sum of $11,500,000 was proposed to be borrowed this year to carry out the extensive programme of the government. Of this amount the interest and sinking fund would amount to $862,500. This big increase in financial expenditure, the premier frankly told his audience, would result in increased taxation. In order to bear the increased taxation it was necessary to increase the production of the country as well as the population of the province. He stated that British Columbia was not the only place faced with increased taxation, but the United States intended to resort to immense increases in taxation. If the United States, which had only been in the war a year and a half, found it necessary to increase its taxes, what about Canada?

Describing the programme of the government for the year Premier Oliver said that it was proposed to spend $1,500,000 for public works. In this connection he declared that the land settlement policy of the government was now bearing fruit. Thousands of settlers were pouring into the northern country, and he declared that the interests of Vancouver would be just as well served by roads opened up in the interior of the province as by motor roads in the vicinity of Vancouver. There was also a sum of $1,000,000 for conservation and land improvement, with an additional million for the work of the land settlement board. The reclamation of the Sumas prairie was included in this and the speaker said that it would be known when the report of the engineer was received in a week or two whether this work would go on. There was also included the amount of $1,500,000 for soldiers' housing, and $1,500,000 for construction on the Pacific Great Eastern, which had to be continued with, and on which a considerable amount of work would be done before the fall. In this respect the premier said that he had just returned from a trip over this line and was sorry to report that it would be necessary to abandon some sections of the railway and to find a new route. It would mean that the ultimate cost of the construction of the road would be very much more than at first anticipated. Another item in the proposed expenditure was the borrowing of $2,000,000 for industrial development in the province.

Financial Position

At the outset of his address the premier stated that he wanted to avoid anything in the nature of party politics and yet give the members a clear statement of the government's situation. In 1914, the net debt of the province was $8,743,000, and in 1916 $16,500,000, and in 1917 over $20,000,000. In the year 1914 the public accounts amount to take care of interest and sinking fund was $529,000, but in 1917 this was $1,409,000. In addition the government was paying out annually the sum of $1,125,000 on the interest of the money invested in the Pacific Great Eastern. In 1914 the provincial income was about $10,500,000, while the expenditure was $15,955,000. In March, 1918, the income of the government was about $8,000,000, while its expenditure was $9,349,000. This was the smallest deficit for a number of years and it included several payments on capital account. He announced that there would be no deficit for the financial year that had just expired. The premier pointed out that the expenditure of the government in 1914 had been over $15,000,000, but in 1918 it had been but $9,349,000, despite the fact that last year was one of inflated values. In 1916 the revenue had been $6,201,000, while in 1918 it had increased to $8,[illegible]82,000. This increase in revenue was due to two important factors. One was increased taxation and the other was that the collectors had got busy and had insisted that arrears of taxes should be paid up.

In touching upon the bonded indebtedness of the province the speaker said that in March, 1917, the bonded indebtedness had been over $25,000,000, on which the sinking fund and the interest was $3,240,000, leaving a net indebtedness of $19,724,000. In the following year the bonded indebtedness had been over $23,000,000, on which the sinking fund was $4,209,000. This month showed that the bonded indebtedness for the province was $27,571,000 and the sinking fund and interest about $5,000,000. This left a net debt of $22,571,000 and in addition a floating debt of $2,810,000. In explaining what had caused an increase in the public debt of $5,657,000 Premier Oliver said that the Pacific Great Eastern accounted for $4,630,000 of this amount. The Land Settlement Board had $648,000 and the Soldiers' Land Settlement Act a further $372,000, while treasury notes of municipalities had absorbed $790,000. These made a total of over $6,400,000. The premier also referred to the civil service salary list. In March, 1916, this amounted to $1,544,000 and in 1918 it had been reduced to $1,336,000, or a reduction of over $200,000. However, it was not fair to expect that the men on the civil service should work for less in 1918 than in 1916. The government was being hammered continually to increase the civil service salaries and the civil service commissioner was at present going through the list. The government had to fulfil its pledges to the men who had enlisted from the service to make up the difference between their salaries and army pay as well as to replace them on their return.

Premier Oliver touched upon the sources of revenue at the disposal of the government. In the boom years the revenue had been largely secured through the sale of capital assets. In 1912 and 1913 the revenue had been over $12,000,000 and he said that 40 per cent. of this was from the sale of capital assets. The government was not receiving this same percentage, but the premier said that from 25 to 30 per cent. was still secure from what was really a disposition of capital assets.

NEWSPRINT INVESTIGATION FINISHED

On May 10th the investigation by R. A. Pringle, K.C., of certain points in the newsprint inquiry, which had been referred back to him by the paper control tribunal, was completed. His conclusions are to be forwarded to the control tribunal.

OCEAN ACCIDENT AND GUARANTEE CORPORATION

The annual statement for the year 1918 of the Ocean Accident and Guarantee Corporation, Ltd., shows that the company had, at December 31st, assets totalling $28,778,660, as compared with $24,494,760 at the end of 1917. Investments in securities have increased very substantially, while mortgages on property in the United Kingdom declined in amount. Additional investments are also shown in railway and other debenture stocks, and the balances due from branches, agencies, etc., have increased in proportion to the enlarged business. This increase in assets almost entirely represents additional provision for claims outstanding and balance at the credit of revenue account. The latter figure is now $15,304,600, including $6,119,485, which is the proportion of premiums unearned. The revenue for the year amounted to $19,650,330, the total premiums, less reinsurances and bonus to assured, being $18,846,300. Claims paid and outstanding, including incidental expenses, amounted to $10,154,445.

This completes the company's forty-eighth year of business. It has written accident lines in Canada since 1895, and now writes fire, automobile, personal, accident, plate glass, guarantee, employers' liability, public liability and teams' liability insurance. Mr. W. T. Perry, who became manager for Canada about one year ago, is a casualty underwriter of long and thorough experience. He has an excellent lieutenant in Mr. J. A. Mingay, his assistant manager.

Is It Fair to Make Your Friend Your Executor?

Perhaps you feel you honor him with your trust. You certainly burden him with a great responsibility. Few individuals can spare the time and few have the ability or experience to properly carry on the duties of Executor of an Estate. Our thirty seven years experience in the care and Management of Estates and Trusts is evidence of our worthiness to be appointed your Executor. Write for our Booklet "Making Your Will."

BUILDING ACTIVITY IN SIGHT

Coast May Have Moderate Boom in Real Estate—Site Values Still Low—Fire Prevention Necessary

(Staff Correspondence.)

Vancouver, May 17, 1919.

IN assessing business conditions in Vancouver, E. B. McDermid, managing director of the Royal Financial Corporation, stated to *The Monetary Times* that, in his opinion, business in Vancouver was never as good as it is to-day.

"The number of men released by the aeroplane spruce department of the Munitions Board have been absorbed by the mining and other companies, and while it may be true that there are a number of men out of work within the city itself, yet there is plenty of work offering in the outlying districts. In fact the farmers are greatly handicapped through lack of labor. Mining companies also have difficulty in securing the number of men they require. Shipbuilding has been curtailed and some hundreds of men have been released from this industry. These men also have had no difficulty in finding other work.

"The demand for labor in the building trades is rapidly increasing as the number of new houses under construction is being added to daily. The construction of hundreds more will begin, as soon as the general public realizes that present building costs have come to stay. The increased cost of building in Vancouver is in one sense largely mythical for the simple reason that home sites can be purchased at from one-quarter to one-half their old values and consequently the cost of a home, including the site, is no greater to-day than it was prior to the war.

"Considerable activity has developed during the past few months in unimproved residential property. A local concern recently placed on the market a subdivision of twenty acres. It was the first subdivision placed on the market for six years. Practically every lot was sold in one week and in almost every case the purchasers intend building homes this summer. So far as I know, there is nothing doing in real estate speculation. Local investors are more conservative and almost without exception are placing their spare cash in government and municipal bonds. The business of the local bond houses is growing rapidly and it is not too much to say that this business has increased tenfold in the past twelve months.

"Much attention is being given by local business men to industrial development. Many of our local manufacturers have more business on their books than they can take care of for the balance of the year. I think I am quite safe in stating that Vancouver was never on as sound and solid a basis as it is to-day."

Fire Prevention in British Columbia

In an interview with *The Monetary Times* on the above subject, J. A. Thomas, fire prevention officer of the department of insurance for the British Columbia government, said: "That one dollar spent for fire prevention will accomplish more than fifty dollars spent for fire protection is recognized by every one who has given the matter of fire loss and its control any thought or study. That the responsibility for fire losses should be placed on those who knowingly allow conditions to exist that will cause fires which destroy life and property, is the concensus of the opinions of many fire prevention engineers and others. The idea that the only work of fire marshals and inspectors is to investigate and prosecute in cases of suspicious fires is obsolete. Reliable statistics show that a very small percentage of fires are, strictly, of incendiary origin. It is now a well-known fact that nearly 75 per cent. of all fires are easily preventable. The expense of maintaining fire departments increases every year and fire losses are mounting at an alarming rate. Could we eliminate 75 per cent. of the runs made by fire departments we would decrease the cost of their maintenance in proportion. We are learning by experience that the best time to put out a fire is before it starts. The work of the fire prevention branch of the department of insurance for the government of British Columbia, as outlined by the superintendent of insurance, is along the lines of fire prevention. Enquiries and investigations into fires are being held to ascertain, if possible, the cause and the best methods of preventing fires. A survey of the business districts of the different cities is being made. In this work we are co-operating with and working through the city officials and organized fire departments as far as possible. Manufacturing plants, business blocks, apartment houses and public buildings are being inspected and recommendations are made as to proper methods of fire prevention. Inflammable trash, the accumulation of years, is being cleaned out and destroyed. Buildings unfit for the purpose for which they are being used, are being closed by the authorities. New by-laws are being brought into force to comply with new conditions that have developed in recent years. A campaign of education is being carried out through the public press and platform. While some startling facts have been brought out with reference to the conditions that exist, and we receive some adverse criticisms because of the publicity given, yet we find that we are getting the warm support of the best business men of the community. As a result of the work being done in the city of Vancouver along these lines, I am informed that in a number of cases insurance rates have been lowered. Other firms have been notified that if the recommendations of the inspectors are carried out the rates will be lowered accordingly. The co-operation of the underwriters along these lines is of great value to us in our work. The task before us is colossal and means much hard and persistent work, but we feel that we are already seeing results, and, while our work has only just commenced, we are determined to place British Columbia in the front line in the work of fire prevention." The subject of fire protection on the water front for Vancouver was also discussed with Mr. Thomas and the importance of providing fire boats for this city cannot be too strongly urged.

PUBLIC ACCOUNTS OF NEW BRUNSWICK

The report of the comptroller-general of the province of New Brunswick for the financial year ended October 31st, 1918, shows total ordinary revenue of $2,357,909, and there was also about $125,000 received from the Dominion subsidy for agriculture, municipal road taxes, etc. The ordinary expenditure totalled $2,399,062, and capital expenditure was $833,934.

New Brunswick is one of the three Canadian provinces, whose accounts are kept on a revenue basis instead of the old cash basis. Capital transactions and bank accounts are kept separate and distinct from revenue transactions and their bank accounts. In the first part of the report the capital balance sheet and the current balance sheet are shown and the consolidated cash statement includes all cash transactions with the exception of those pertaining to the capital account during the fiscal year. The balance of this cash statement is transferred to the current balance sheet. A new statement of revenue and disbursements contains only those transactions belonging to the fiscal year.

Commenting on methods of keeping public accounts, the provincial comptroller-general, Mr. W. A. Loudoun, says:—

"I would like to see all the provinces of Canada adopt the plan of keeping their accounts on the revenue basis instead of the cash basis. Great advantage would accrue from same if backed up by a stringent audit act. Controversy in regard to the 'juggling' of accounts would be eliminated, uniformity in provincial accounting throughout Canada would be assured, and a true presentation of affairs, in so far as it is possible to get one, would be accomplished."

A committee from the city of St. Boniface, Man., recently made an effort to secure a reduction in the scale of fire insurance rates for the city. No immediate result was, however, secured.

NOVA SCOTIA COMPENSATION ACT AMENDED

New Regulations as to Employment of Workmen Outside the Province

AN Act has been passed by the legislature of Nova Soctia amending the Workmen's Compensation Act of 1915. "Accident fund" is now to mean the fund provided for the payment of medical aid, outlays and expenses in addition to compensation. "Dependents" are not to include persons who become dependents by reason of the marriage of the injured workman between the date of the accident and the death of the workman resulting from such accident.

Section six of the Act of 1915 is repealed and the following section is substituted:—

"The board may by regulation exclude from the scope of this part any industry or industries in which not more than a stated number (fixed by regulation) of workmen, or workmen other than temporary workmen, are employed, and may define the meaning of 'temporary workmen.' The board may, from time to time, revoke, alter or modify any such regulation, provided that any industry so excluded may be readmitted by the board as being within the scope of this part. The board may likewise exclude the mayor, warden, clerk, treasurer, controller, councillors and aldermen and other officers of the city, town or municipality, and the president, vice-president, directors and other officers of any company without excluding the other persons in any industry."

Section eight of the Act, as amended by chapter 70 of the Acts of 1917, is repealed and the following substituted therefore:—

(1) Every contract entered into in Nova Scotia whereby the relationship of employer and workman as defined by this Act arises in an industry which, if carried on in Nova Scotia, would be within the scope of Part 1, having regard to any regulations made by the board for the exclusion or inclusion of any industry or industries, shall, unless there be an expressed agreement in writing to the contrary signed by the workman, be subject to and be deemed to include the following covenant on the part of the workman with his employer, which covenant shall bind the workman, his heirs, executors, administrators and assigns as effectually as if made in writing and under seal, viz.:—

Workman's Covenant with Employer

"The workman, for valuable consideration and as a condition of his being employed, convenants with the employer that, in the event of an accident happening to such workman while employed elsewhere than in Nova Soctia, and while the workman and the industry carried on out of Nova Scotia in which he is so employed are within the scope of Part 1 of the Workmen's Compensation Act of Nova Scotia, he will accept the provisions of Part 1 of said Act in lieu of all rights and rights of action, statutory or otherwise, which he may have or to which he may become entitled against his employer, and that he will not commence or prosecute any action or other proceeding against his employer by reason of such accident or any injury resulting therefrom, and that this covenant and section "8" of the Workmen's Compensation Act may be pleaded as a bar to or otherwise made use of to defeat or stay any action or proceeding that the workman may commence against the employer within or without Nova Scotia."

(2) (a) Every contract entered into in Nova Scotia whereby the relationship of employer and workman as defined by this act arises in an industry to which this subsection is made to apply by virtue of subsection (b) hereof, and whereby the workman agrees to perform, or by virtue of which he does perform any work or services out of Nova Scotia, shall, unless there be an agreement to the contrary in writing signed by the workman, be deemed to include and be subject to the following covenant on the part of the employer, his heirs, executors, administrators, successors and assigns as fully and as effectually as if executed in writing by the employer and under seal, viz.:—

Employer's Covenant with Workman

"Subject to the provisions of section "8" of the Workmen's Compensation Act, the employer, for valuable consideration and as a condition of the workman's consent to perform, or of his performing, work or services out of Nova Scotia, covenants with the workman that before the workman shall be required or permitted by the employer to perform any work or services out of Nova Scotia in the industries set forth in subsection (b) hereof, he (the employer) shall apply to the Workmen's Compensation Board of Nova Scotia to have the industry in which such workman is employed admitted as being within the scope of Part 1 of the Workmen's Compensation Act—if the same be not then within the scope of said part—and that the employer shall furnish all information and pay such assessments as may be required to obtain a certificate of admission from the board; and if such industry be so admitted, or is at the time within the scope of said part, that the employer shall pay all assessments and furnish information required by the board to keep such industry within the scope of said part during the whole period of the workman's employment in such industry, and that if the employer refuses, neglects or fails to perform any of the foregoing covenants, the workman, and, in the case of his death, his dependents, shall, in the event of any accident happening to such workman while employed in such industry out of Nova Scotia, be entitled to recover in an action from the employer an amount equal to the compensation, or the capitalized amount of compensation, that would be payable under said Act if the industry were within the scope of Part 1 of said Act at the time of the accident."

SASKATCHEWAN MUNICIPALITIES CONVENTION

The 1919 convention of the Union of Saskatchewan Municipalities is to be held in Saskatoon on June 25th, 26th and 27th. The sessions will be opened by the Lieutenant-Governor, Sir Richard Lake, and addresses will be given by Premier Martin, Hon. George Langley, Minister of Municipal Affairs, and J. J. Smith, Deputy Minister of Municipal Affairs. All resolutions are to be submitted to the secretary at least seven days before the convention.

On the first day, after the registration of delegates, appointment of committees, addresses by the Lieutenant-Governor and by Mayor F. R. MacMillan, of Saskatoon, the president's address and the address of the secretary-treasurer will be given. Reports are to be received from G. F. Blair, member of the advisory committee of the local government board, and from C. J. Yorath, delegate to the Union of Canadian Municipalities. A discussion on the subject of public health and on the relation between the Dominion, the provinces and the municipalities will also take place.

On June 26th taxation will be discussed, including the question as to whether there should be an unearned increment tax, taxation of improvements and an income tax. Suggestions for a more equitable distribution of taxation according to ability to pay are also to be received. This discussion will be led by L. A. Thornton, city commissioner of Regina, and G. D. Mackie, city commissioner of Moose Jaw. The arrears of taxation, including the procedure and costs of the land titles office and the Dominion and school taxes before title issue, will also be under discussion, led by F. J. Pikington, town clerk of Yorktown, and O. G. Godfrey, town clerk of Indian Head. Town planning and housing will also be taken up. The last day will be occupied principally with resolutions, elections, etc.

The forty-fifth annual convention of the American Bankers' Association will be held in St. Louis during the week of September 29th, 1919. The invitation was extended by the St. Louis Clearing House.

AUDITOR'S REPORT.

This statement has been duly vouched by comparing all entries with the books at the Chief Office and certified Returns from the Branches, and in my opinion is properly drawn up so as to exhibit a correct view of the condition of the Bank.

Cash and Securities have been checked at the Chief Office at 30th April, 1919, as well as at another time during the year, as required by section 56 of the Bank Act.

I have obtained all the information and explanations required, and am of the opinion that the transactions of the Bank, which have come under my notice, have been within the powers of the Bank.

SHERMAN E. TOWNSEND, C.A., Auditor

Equalizing Production and Consumption

Summary of an Address Before the University of Manitoba on May 13, 1919 Importance of Agriculture—Return to Normal Conditions

By Dr. ADAM SHORTT

REALIZING the sacrifices and losses to which we have been required to submit during the war, the dislocation of industry, the inflation of values and the consequent lack of adjustment between production and consumption—it is the [illegible] in connection with readjustment to face this problem squarely, and to take practical steps towards its solution. The central feature is that we have not a sufficient supply of the necessaries of life, good clothing, shelter and fuel to meet the normal requirements of our population, much less a sufficient surplus to meet demands from abroad. So long, however, as we continue to render it more attractive for the ordinary citizen to seek and find employment in the cities and larger towns, in connection with non-essential or wholly unnecessary services and supplies, the situation will remain aggravated, and continue to breed class jealousies and proposals for economic and political revolution. The attempt to escape immediate trouble by providing employment in the construction of public works, or any other expenditure which does not result more or less immediately in adding something to a supply of the necessaries of life can only postpone trouble for to-day by aggravating it for to-morrow—since it will but lead to the perpetuation of inflation, the maintenance of high prices, and the demands for increased wages.

The fact that many public expenditures which are unavoidable must of necessity increase the demand upon the means of life without contributing any equivalent in return only aggravates the situation—thus, the enormous and steadily increasing disbursements by the government in the way of pensions and retiring gratuities to the soldiers, must greatly and unavoidably increase the competition for the necessaries of life without replacing them to any similar extent. Hence every delay in extending the field of production of the necessaries of life only makes the siutation more difficult of readjustment in the future.

The first great requisite, alike for domestic consumption and for foreign supply, is that of food. Here the solution of the problem is not simply one of finding employment on the land for all those who are out of work. In the older days of eastern Canada that would have been practically necessary, inasmuch as most of the agricultural products were the result of the personal application of labor to the land. Within the past half century, however, farming and especially western farming, has been revolutionized by the introduction and development of machinery. The result is that at the present time the great majority of the cultivators of the lands between Winnipeg and the Rockies are actually living in the cities, chiefly of the east. They are working in the agricultural implement factories, making tractors, plows, cultivators, seeders, binders, threshers, dairying equipments, etc. Another large body of workers is preparing for them their buildings, raw materials, machinery, etc., and contributing to transportation, warehousing, office work, etc. A very important, but limited number of persons, the actual residents on the land, are operating all this elaborate machinery in cultivating relatively large areas, the product from which will support not only themselves, but this army of urban dwellers, who know little or nothing of actual farming. The modern farmer, also unlike his earlier representative, constructs little or nothing of his household equipment. The personal expenditure, therefore, of himself and family goes to the support of another large body of citizens, chiefly in the cities and towns.

Obviously, only a limited number of persons are required to actually go upon the land, in order to set in motion the whole train of productive industry, in the supply of that prime necessity, food. Unless, however, that very essential link is in position and effectively discharging its function the whole chain of industry, before and after, is paralyzed. Stagnation and unemployment reigns, and an inadequate supply of food accounts for the high cost of living; which, in turn, determines the high cost of everything else, accompanied by universal discontent and unrest.

Social Considerations

The rural agricultural problem, therefore, is a very crucial one in a country such as Canada, and especially in this western country. It is plainly not an isolated problem, but is an essential factor in the solution of many city and town problems as well. The solution is, however, only partially economic; it is largely social, and in that the voice of the family is most important. On the economic side the remuneration of the farmer as a class must be even more attractive than what is open to him in the towns and cities. There must also be certain compensations for himself, and especially for his family to offset the apparent, if not always real, attractions of the larger towns and cities. This is not a new problem, it is a very permanent one, but its constant presence, and its undoubted difficulty leads us to tire of it somewhat, until at such critical periods as the present, its extremely vital importance to the whole country forces it to the front, and at least some honest progress in its solution is indispensable.

It is true that much of the improvement of the social life of the farmer is quite within his own reach, if only he has sufficient income to provide it. Other means for the amelioration of life in the country are not within the personal choice of the farmer, but involve the co-operation and assistance of many other persons and factors. Thus the prosperous farmer may furnish himself with a more comfortable house but he cannot provide himself with electric power or telephone service. He may purchase a victrola, but he cannot provide a concert, or a moving picture show. He might buy a few stray books or magazines, but he cannot provide himself with a well selected circulating library.

The first object, however, is to render the farmer as well, or somewhat better off than he would be in the city. To this end, by far the most important factor is the capital outlay in the equipment of his farm. It is essential, therefore, that he should be able to obtain capital at as low a rate as is consistent with the reasonable security of the investment. He should also be able to obtain his machinery at the lowest possible costs for a reliable article. He should not, therefore, be handicapped by a tariff which compels him not only to increase his capital outlay, and to pay interest upon this for a considerable time. Such an added burden can have no compensating importance for the national revenue, and should not be exacted by the Canadian manufacturers with such a very large market before them, and which should be encouraged to become larger still. It is quite another matter to claim tariff exemption for the farmer on the goods which he purchases for consumption; there is capital is not being increased, and interest piled on interest. He is simply called upon to pay, as all other citizens, a tax from his income, on what he consumes and only when he consumes it. So long as the customs tariff is the chief method of taxation for the support of the federal treasury it is difficult to see how such exemption could be justified, especially as it covers many other classes than the farmer.

On the other side the farmer, as indicated, is certainly entitled to all the assistance that can be rendered towards improving his social life, especially in lines that are largely beyond his own individual or local control. A great boon has been extended to the farming community in the extension of the telephone service. It is to be hoped that before long a similar and still more important benefit may be rendered in the corresponding extension of an electric service. It is true, the absence of water power in the most

BRANCHES: Montreal, Winnipeg, Regina, Calgary and Vancouver extensive farming districts has hitherto discouraged that. But in these very districts are found extensive deposits of lignite, and other cheap coals. Extended experiments are now being made in the treatment of these low grade fuels, not to enable them to be profitably burned, but to be economically transported, owing to their tendency to disintegrate when exposed to the air for sometime. There should be no difficulty, however, in constructing electrical plants where they are mined, and where they can be used to develop electrical power at a very moderate rate, for distribution throughout the prairie regions. Such a service, for both commercial and domestic use, would be of inestimable convenience in the homes of the rural districts.

On the purely social side, the development of the community life of the smaller towns and villages affords a large field for a combination of local spirit and organized assistance from without. Here indeed is an excellent field for the growing activities and responsibilities of public spirited women, and an excellent meeting ground for the co-operation of local talent and city assistance. The automobile, has, to a large extent, solved the transportation problem, permitting of the co-operation of settlers over a comparatively wide area. This would permit of the introduction of real but not deteriorating amusements, suited to the tastes of a normal community and combining in reasonable measure instructive, as well as attractive entertainment, such as moving pictures of travel, varied scenery, historic compositions and wholesome comedy. There is also the comparatively unexploited field of circulating libraries for rural districts, also made possible by constantly improving methods of transportation. In a word, it is highly necessary to render life in the country quite as attractive and probably more wholesome than corresponding life in the cities and larger towns. To all this the filling up of the intermediate areas of good, cultivable land throughout the west would very materially contribute at a comparatively small cost.

With improvement in the food supply of the country many other steps may be taken in getting back to normal conditions and resuming the line of progress. While in the cities there is naturally perhaps not much duplicating or overdoing of the services which appeal to the intellectual, artistic and spiritual life of the community, and practically never any complaints of profiteering in these lines, yet there is constant complaint of exorbitant profits and oppressive monopolies in the services which cater to the physical wants of the community. There is also an immense waste of labor, energy and capital in the discharge of the functions of middlemen and petty traders. The obvious economies which are associated with the conduct of industry and trading on a large scale are frequently prevented from finding their normal development on account of the very general suspicion of large economic concerns and the constantly recurring outbreaks of public sentiment against the more successful of them. This attitude of the public has caused, or at least encouraged most of these corporations and establishments to keep their financial situation and profits out of the public gaze. They are diffident of the random and violent criticism of certain elements of the public, and they also do not wish to invite active competition by exposing their affairs to their rivals.

Industrial Commission Needed

Before the government found itself compelled to take over the railways of the country, the functions of the Dominion Railway Commission assisted as much in protecting the railways from each other, as in protecting the public and the railways from each other. To my mind, there is no question but that a similar commission is necessary to protect the great industrial corporation from one another, and to assure to the public adequate and efficient service at moderate rates; thus, incidentally, protecting these establishments from the merely ignorant and vindictive assaults of public sentiment. A permanent commission authorized to obtain detailed information as to the operation of industrial and trading corporations over a certain size and to regulate their services and supplies, within certain limits, would accumulate records of actually invested capital, of costs, prices, profits, replacements, and capital extensions. This would enable competent observers among the public to determine the exact services which are rendered the remuneration they receive ,and the justice of the relation between these; this would invite and bring to bear upon these establishments such intelligent and fair criticism as would undoubtedly assure the maximum of benefit at the minimum of cost, and at the same time give every encouragement for continued improvement.

The advantage to be gained from large scale industry, and the lines within which it might be most profitable, would thus be demonstrated, and the elimination of uneconomic and inefficient small competitors would take care of itself. The latter would of necessity be converted into useful workers in other lines. On the other hand, that the tendency of all economic production and service is towards large and all-absorbing establishments, is far from true. Indeed, with the production of electric power which may be utilized in small establishments, or even in individual workshops quite as economically and efficiently as in large factories, a decided limit is set to the concentration of numerous industrial processes in large establishments. Under the older system many industries were gathered in large factories for no other sufficient reason than to share in one common power plant. Where human skill is a much more important factor than raw material, there is every inducement to carry on a successful industry on a small scale.

These and other aspects to the subject are indefinitely expansible. It is abundantly evident, however, that improvement in the economic life, and through it the social life, for the immediate future lies in two lines, a greater application to the production of the necessaries of life, and the elimination of waste and inefficiency in the duplication of work which could be so much more profitably employed in more essential directions.

PUBLIC OWNERSHIP LOSING GROUND

In "Investment Items" for May 15th, issued by the Royal Securities Corporation, Limited, attention is directed to the effect of the disastrous results of government operation of railways in the United States.

"Canadian attention has been more and more forcibly directed to the failure and the growing unpopularity of public ownership in the adjacent Republic, the admirable address to the Montreal Canadian Club by Mr. C. E. Mitchell, president of the National City Company, creating a deep impression all over Canada. The speaker reviewed the fifteen months of government operation of the railways of the United States. He showed that, in spite of an increase of 25 per cent. in freight rates and of 50 per cent. in passenger rates—larger than private owners had ever dared to dream and producing an increase in gross revenue of $865,000,000—net earnings decreased $285,000,000, the people of the country, after suffering inferior service, being called upon as taxpayers to advance a further $210,000,000, the amount by which net earnings failed to equal the rental guaranteed the road by the government. The total cost to the people of the United States of the fifteen months' experiment has therefore totalled $1,075,000,000.

"In the face of these figures, it is not surprising that American passion for government ownership and operation has sensibly cooled, a reaction in public opinion which has since been amazingly confirmed by the grotesque incident of the back-down of Postmaster Burleson of the United States in the matter of his proposed nationalization of the telephone, telegraph and cable systems.

"Thus, for the first time in several years the friends of public ownership in Canada are distinctly on the defensive, with a definite and extensive system of government railway operation which they must stand by or abandon their case, weakened by the sad but convincing story of our government-managed roads over a long period of years and with the experience of the United States, from which most of their arguments were formerly drawn, turning strongly against them."

LIFE INSURANCE IN ALBERTA

The Alberta insurance department has just completed its figures of life insurance in the province during the year 1918. The volume of new business during the year was $30,278,709, compared with $27,665,722 during the year 1917. The results by companies were as follows:—

	Premiums.	Amount written.	Amount at risk.
Alberta, Saskatchewan...$	5,578 $	42,500 $	184,500
Canada Life	261,649	1,802,208	8,121,704
Confederation Life	125,637	1,113,457	4,554,615
Continental Life	52,521	903,345	1,903,395
Crown Life	50,128	614,522	1,885,674
Dominion Life	57,217	533,994	1,698,129
Excelsior Life	99,366	754,375	2,923,026
Equitable Life	49,345	516,750	1,228,587
Great West Life	486,457	3,759,042	15,967,712
Imperial Life	224,592	1,863,226	7,019,711
London Life	33,382	282,000	1,232,935
London and Lanc. Life and Gen.	29,851	93,780	916,314
Manufacturers' Life	239,150	1,876,305	7,560,443
Metropolitan Life	284,668	3,010,000	9,120,000
Mutual Life of Canada...	268,796	1,315,263	7,185,104
Mutual Life of New York	68,619	517,097	2,258,535
Monarch Life	33,369	924,979	2,330,429
National Life	49,271	322,642	1,567,107
New York Life	216,648	1,599,895	5,183,865
North American	196,022	1,792,932	5,641,780
Northern Life	41,895	321,214	1,049,834
Policyholders' Mutual	12,363	272,000	507,373
Prudential	195,522	2,383,319	6,448,743
Phœnix	5,301	12,000	237,731
Royal	5,922	....	175,760
Sun Life	386,116	1,694,000	11,126,808
Sovereign Life	28,736	542,100	891,600
Standard Life	22,780	225,500	680,260
Travelers	39,636	376,264	1,477,662
Western Life	37,246	534,500	1,217,635
Western Empire Life	9,399	279,500	676,000
Totals	$3,617,198	$30,278,709	$112,972,973

Details of the results in other lines will also be available shortly. Both premiums and losses were heavier in the fire insurance business than in 1917. Fire premiums amounted to $2,861,235 as against $2,560,518, and the losses were $1,280,648 as against $856,142. Company hail insurance for the year totalled $1,017,681, which was some $750,000 less than in the previous year, and the losses were $190,278 as compared with $1,183,537. Accident and sickness insurance amounted to $261,304, with losses of $133,638. Live stock policies were written to the amount of $34,355, and the losses were $13,137. There was a large gain in automobile insurance, the premiums in which are given at $89,722, and losses at $39,294, as compared with $39,032 and $10,144 in the previous year. Guarantee insurance totals up to $52,430, with losses of $21,953.

MANITOBA INDUSTRIAL RELATIONS BOARD

The Manitoba government has announced its intention of making effective at once the Provincial statute governing investigation and settlement of trades disputes. The board named comprises: J. W. MacMillan, chairman; F. W. Weir and W. C. Angus, representing labor; W. R. Ingram and L. R. Brett, representing employers. It is thought the board will meet before the end of the week to organize. It is given wide powers all to the end that settlement of labor disputes be effected through arbitration and conciliation.

BRITISH BILL TO REGULATE BANK MERGERS

A bill has been introduced in the British parliament for controlling bank mergers, in view of the criticisms about recent amalgamations. It is provided that an application must first be approved by the treasury and the board of trade after a reference to a committee of two persons, one named by the treasury and one by the board of trade. Failing agreement, a third man will be called in. The report of the committee will decide the matter.

MONTREAL STOCK EXCHANGE ANNUAL

The annual meeting of the Montreal Stock Exchange was held in Montreal on May 9th. Edgar M. Smith, of Smith, Fairbanks and Co., was re-elected by acclamation chairman of the governing committee, while C. Simpson Garland was returned unopposed to the post of vice-chairman. C. J. Hodgson was re-elected secretary-treasurer, with the following chosen as the six members of the committee: Purvis McDougall, of McDougall and Cowans, Major Hartland B. Macdougall, of Chas. Meredith and Co., E. Ernest Gault, H. A. Ekers, of Ekers, Cushing and Co., C. H. Branchard, of L. G. Beaubien and Co., and G. W. S. Henderson, of Burnett and Co.

A discussion ensued as to the rates of commission to be applied to New York business in view of the recent increases adopted by the exchange in Wall Street. The majority opinion expressed was in favor of charging customers of local brokerage firms a flat one-eighth over the commission rates charged by New York houses, but, as the Montreal Exchange has no authority over its members so far as outside business is concerned, the matter will probably rest as one for individual decision.

SUCCESSION DUTIES ON MORTGAGES

The Privy Council of Great Britain, in a recent judgment on an appeal by the Toronto General Trusts Corporation, decided that the province of Alberta could collect succession duties upon that portion of an estate invested in mortgages upon Alberta lands where the deceased person resided, before his death, outside the province. It was contended by the trust company that the duplicate copy of mortgages, held by the deceased and not the original mortgage registered in the registry office, should decide the location of the property, and consequently, in the case of mortgages held by persons having their residence before decease in the province of Ontario, succession duties could not be collected by the province of Alberta. The Privy Council has upheld the decision given by Hon. Mr. Justice Hyndman in Regina, and confirmed by Alberta Court of Appeal, and again confirmed by the Supreme Court of Canada, namely, that succession duties may be collected by the province of Alberta from the estates of persons holding mortgages upon Alberta lands, notwithstanding the fact that such persons were resident outside of Alberta at the time of their decease. This is a very important decision, in so far as the province is concerned, because it involves many thousands of dollars of revenue to the province each year from estates of deceased people who were resident in other provinces of Canada or elsewhere than Alberta at the time of their decease.

The office of the Canadian Bankers' Association has been moved from the National Trust Building, Montreal, to the Bank of British North America Building, 140 St. James St.

Messrs. Homer L. Gibson and Co., dealers in mining stock, have opened an office at 11 St. Sacrament Street, and Mr. A. W. Reid, who has just returned from overseas, will be in charge.

Decline in Trade of Canada

THE preliminary statement of the trade of Canada for the month of March, 1919, compared with March, 1917-1918, and for the twelve months ended March, 1919, compared with previous years, shows a considerable falling off. Total imports of merchandise for the month are $15,500,000 less than last year, and for the year they are $46,000,000 less than for the year ended March 31st, 1918. Exports of Canada produced for the year fell off by the large amount of $333,000,000. The greatest declines are shown in our imports from the United Kingdom and from the United States, and in our exports to the United Kingdom and France. The figures follow:—

	Month of March			Twelve months ending March		
	1917	1918	1919	1917	1918	1919
Imports for Consumption.	$	$	$	$	$	$
Dutiable Goods	54,571,450	50,637,294	49,102,408	461,708,206	542,319,623	526,495,717

BANK BRANCH NOTES

The following is a list of branches of Canadian banks recently opened:—

Bellis, Alta.	Canadian Bank of Commerce.
Ashmont, Alta.	Canadian Bank of Commerce.
Whitecourt, Alta.	Canadian Bank of Commerce.
Rochfort, Alta.	Canadian Bank of Commerce.
Bloomfield, Ont.	Bank of Montreal.
Napanee, Ont.	Standard Bank of Canada.
Sussex, N.B.	Union Bank of Canada.

The Union Bank of Canada will, on May 26th, open a branch at Truro, N.S.

Ontario branch staff changes are announced by the Union Bank of Canada as follows: W. T Hodgson, of Thornton, has been appointed manager at Erin; F. L. Walker, manager at Erin, has been transferred to Hagersville as manager, and S. C. Evans, of Hagersville, becomes manager of the Guelph branch. H. J. Thompson, of the Hamilton branch, becomes manager at Thornton.

Bankers from eighty points in Manitoba and Saskatchewan were at the Fort Garry Hotel, Winnipeg, at a conference under the direction of the Canadian Bank of Commerce recently. The meeting was held in the regular order for the discussion of all matters relating to the welfare of the institution. Representatives of various sections of the country read papers. Vere C. Brown, superintendent for the central west, presided, and all the prominent officers of the bank in Winnipeg were present. Other similar conferences will be held at a later time through the west.

The Home Bank of Canada has announced the return of former managers who have been with the Canadian forces overseas, and have been placed as follows: Lieut. S. T. Stephens returns to Calgary, Alta. Major Bart Charlton goes to Cabri, Sask. Mr. W. K. L. Greig, head of the statistical department at the head office, goes to Winnipeg, Man., as supervisor of western branches. Mr. P. M. Wood, of London, Ont., branch, succeeds Mr. Reid as manager at Winnipeg. Mr. F. G. Nickerson, manager from Moose Jaw, Sask., takes charge of the London office. Mr. J. F. McCallum, who leaves the Cabri branch to Major Charlton, takes over the management of the Moose Jaw branch. Mr. John Mount Ducket, of the Montreal office, goes to Winnipeg.

An attempt to rob the Bank of Nova Scotia at Agincourt, Ont., was made on May 20th, but was frustrated by the efforts of Mr. R. T. Laing, manager, and his girl assistant. Mr. Laing was severely wounded, but is expected to recover. Both the robbers were shot by the manager, and one of them will probably die.

LIFE INSURANCE LESS ACTIVE IN APRIL

Following three months of unusual activity in life insurance, figures received for April indicate a slight falling off in the amount of new business written. Reports received by *The Monetary Times* from ten representative companies doing business in Canada show a total of new business in April amounting to $18,534,589. This is slightly less than the average of $18,668,433 for the same companies for the first three months of the year. The claims of these companies paid during the month of April amounted to $1,106,555.

BUILDING PERMITS INCREASE

March figures for 35 representative cities are forty per cent. above last year. Building operations in Canada have actually begun to increase according to the building estimates collected by the Department of Labor. These are given below with comparisons with February of this year and with March of last year:—

DEPARTMENT OF LABOUR FIGURES	February 1919	March 1919	March 1918	Mar., 1919, compared with Mar., 1918 Increase+ Decrease− Amount	Per Cent.

RESOLUTIONS OF FIRE PROTECTION CONVENTION

The eleven resolutions, given in *The Monetary Times* on May 9th, which were introduced at the annual convention of the National Fire Protection Association in Ottawa, were accepted with three changes. The last word of the second resolution is "neglected" instead of "impracticable." At the end of resolution eight, "fire department" was changed to "authorities having jurisdiction." The following resolution was substituted in place of number ten:—

"That the use of motion picture projection machines, without a standard booth ventilated to the outside of the building, in churches, schools, clubs, hospitals and homes, be prohibited unless the film used is of the slow-burning type, and that state and municipal laws and ordinances be adopted regulating motion picture exchanges, tending toward the ultimate end that motion picture films of the nitro cellulose type be replaced when practicable by a slow-burning film."

The special resolution introduced by George F. Lewis was passed after the words in section one limiting the expenditure of the federal and Dominion governments to [illegible] was removed.

*Preliminary figures. †Nine commodities off the market, fruits, vegetables, etc. One line of spelter was dropped in 1915.

ACCEPT BUSINESS FROM GENERAL PUBLIC

Announcement has been made by Messrs. Shearson, Hammill and Co., a New York firm with offices in Montreal, to the effect that hereafter it would accept business from the general public, instead of confining transactions to members of recognized stock exchanges in Canada. The change of policy, it was stated, was made in view of the broadening Canadian interest in New York stocks and to meet the aggressive competition for business in United States stocks.

The Maritime Fire Insurance Co. recently incorporated by a special Act of the Nova Scotia legislature, has an authorized capital stock of $500,000. As soon as $200,000 is subscribed and $50,000 paid up in cash, the company may commence doing business.

WHY MUTUAL POLICIES ARE EASY TO SELL

First—Because of the co-operative and democratic principle on which the company is founded. The Mutual Life Assurance Company of Canada is a company consisting of policyholders, maintained by policyholders, exclusively for policyholders.

Second—Because the purpose for which the company was established is now generally understood; the company since its establishment in 1869 has consistently followed one aim—that of furnishing the largest amount of protection for the least possible outlay.

Third—Because the company's day-by-day activities advertise it: The Mutual of Canada since its organization has paid to policyholders or their beneficiaries or holds as a trust to guarantee future payments, over sixty millions of dollars.

"BE A MUTUALIST!"

BALANCING DEBTS BY LIFE INSURANCE

Do you ever think of Life Insurance as a means of counterbalancing unavoidable debt?

There are bushels of ways in which debt may creep upon a man, unavoidably almost, legitimate debt in many cases.

He may undertake to purchase a home, secure credit to extend his business. Ill health may hamper and swallow his savings. Crops may fail and business losses occur.

All manner of calls tug at a man's purse strings, and do their best to make the domestic balance sheet a poor exhibit.

But Life Insurance will restore the balance.

STERLING BANK PROFITS INCREASED

The net earnings of the Sterling Bank for the year ended April 30th were $213,632, compared with $186,120 for the preceding year. After paying dividends at the rate of 6 per cent., which required $73,146, $50,000 was added to reserve, $70,000 written off for depreciation and reduction of bank premises and a balance of $40,910 was carried forward to profit and loss account. The bank's reserve is now $400,000.

The bank's toal assets are $19,430,884, of which $8,103,906 consists of bonds. Total current loans amount to $6,486,849, or slightly more than last year. Total deposits have increased by more than $3,000,000. During the year the bank opened seven new branches in Ontario, two in Manitoba and one in Saskatchewan.

At the annual meeting held in Toronto on May 20th, the directors were re-elected. In his address to the shareholders, the president, Mr. G. T. Somers, stated that it had been decided to increase the dividend to 7 per cent. per annum, from May 1st, 1919.

"Our total assets," said the president, "now stand at $19,430,884, and have been actively but conservatively employed. In this connection I want you to observe our cash assets, which amount to $3,730,579, equal to 21 per cent. of our liabilities to the public. Our total readily available reserves stand at $12,354,919, or 75.48 per cent. of our deposits and more than 63 per cent. of our total liabilities, including our capital and reserve, a position of strength and stability which induces confidence, and to which I attribute the successful position we find ourselves in to-day. Amongst these assets we hold the large sum of $8,103,906 in bonds, of which $6,863,258 are bonds of the Dominion, provincial and British governments, the balance being almost entirely Canadian municipal bonds. A large proportion of these are of the war loan issues, and at present prices would provide a very substantial profit. I look for a further advance in the value of these securities."

The Canada Standard Loan Company
520 McIntyre Block, Winnipeg

Ingersoll, Ont.—The town council has decided to issue [illegible] 1[illegible]-year market building debentures.

Morden, Man.—The ratepayers have favored the issuance of $[illegible],000 6 per cent. 20-year electric works extension debentures.

Goderich, Ont.—The town has sold an issue of $11,000 debentures locally, at a price to yield the purchasers 5½ per cent.

Vermilion, Alta.—Messrs. C. H. Burgess and Co. have purchased $[illegible],000 7 per cent. 20-instalment Vermilion Hospital District debentures.

County of Ontario.—Tenders will be received up till June 4, 1919, for the purchase of $10,000 5½ per cent. 10-year instalment, bridge building debentures.

Guelph, Ont.—The city council has received a request from the finance committee of the Board of Education asking for the issuance of $60,000 school building debentures.

Renfrew, Ont.—Tenders will be received up till June 2, 1919, for the purchase of $16,000 6 per cent. 5-instalment debentures, and $8,000 6 per cent. 10-instalment debentures.

Township of Barton, Ont.—Sealed tenders will be received up till May 31st, for the purchase of $55,000 5½ per cent. 20-year debentures. (See notice elsewhere in this issue.) Alfred G. E. Bryant, township clerk.

Tillsonburg, Ont.—The citizens have passed a by-law to guarantee the bonds of the Tillsonburg Shoe Co. to the extent of $25,000 for the purpose of a new addition and equipment costing at least $35,000.

Newmarket, Ont.—A money by-law for the issue of debentures up to $40,000 for the construction of a sewerage system was read twice at a meeting of the town council on May 21st. On June 16th, money by-laws will be voted on. The sewerage system will cost $70,000 more than the first debenture issue.

PRICES OF HIGH-GRADE

Government and Municipal Bonds

Are steadily advancing, due to the limited supply and the insistent demand for securities of this type.

Those having funds for investment are advised to take advantage of present opportunities to obtain long term bonds at present attractive yields.

We recommend the following:

$100 000	United Kingdom of Great Britain and Ireland......	5½%	1937
100 000	Province of Saskatchewan	5%	1939
100.000	Prov. of British Columbia	5½%	1939
100 000	Government of Newfoundland	5½%	1939

For investors desiring shorter maturities and higher yield we recommend the following

$15 000	Montreal Tramways and Power Company, Limited	6½%	1924
30 000	Fraser Companies, Ltd. .	6%	1923
20 000	Fraser Companies, Ltd .	6%	1924

Prices and full particulars on request.

W. A. MACKENZIE & COMPANY

Newfoundland.—In the Newfoundland legislature on May 15th, the finance minister, Sir Michael Cashin, tabled his annual review of the colony's fiscal and commercial positions. He showed that for the last fiscal year ended June 30th, 1918, the colony had enjoyed a revenue of nearly $7,000,000, which yielded a surplus of $1,170,000, while for the current fiscal year, ending six weeks hence, he estimated a revenue of $8,600,000, and a surplus of $1,900,000. He also showed that the savings of the people during 1918, as represented by interest-bearing deposits in the savings banks and by the purchase of Victory bonds of the colony's loan last year, totalled $5,000,000. The trade totalling millions five years ago, would exceed sixty millions for the current year.

The sale of the colony's $5,000,000 5½ per cent. 20-year bonds to Messrs. Wood, Gundy and Co., Toronto, at 97.71 and accrued interest, New York funds, was announced, and the following is a list of tenders received, as given out by the Minister of Finance:—

	New York payment.	Canadian payment.
Wood, Gundy and Co.	97.71	....
Dominion Securities Corp., A. E. Ames and Co., Wm. A. Reid and Co., and Lee, Higginson and Co., New York	....	100.31
Royal Securities Corp.	....	98.58
F. B. Curdy and Co., Hanson Brothers, Brent, Noxon and Co., National City Co., and W. A. Mackenzie and Co.	95.62	98.42

The syndicate managed by A. Jarvis and Co., Toronto, comprising Osler and Hammond, Canada Bond Corporation, Morrow and Jellett, Toronto, Greenshields and Co., Montreal, and Spitzer, Rorick and Co., Toledo, Ohio, bid 97.63, but no place of payment was stated in the tender.

The above loan was floated to refund a $5,000,000 three-year 5 per cent. war issue, sold to a New York syndicate in July, 1916, and which was wholly placed in the United States. In this case, provision was made for consideration of alternative offers on both sides of the line. The present price of exchange makes a difference of almost 3 per cent. Prior to the 1916 issue, Newfoundland's financing had all been arranged in England, but last year Wood, Gundy and other firms placed a $4,000,000 issue in Canada with outstanding success, the whole loan being absorbed in three days.

Messrs. Wood, Gundy and Co. are now offering the bonds through the firm's Toronto, Montreal and New York offices. The yield is on a 5.30 per cent. basis, and the dealers report the issue as being practically all sold.

MUNICIPAL FINANCE

Annual Reports of Vancouver and Victoria—Saskatoon Estimates—Tax Rate Up in Walkerville

Saanich, B.C.—The council has approved the assessment roll for 1919 at $11,010,000, this being a reduction of 10 per cent on the figures for last year.

Chatham, Ont.—According to the figures presented to the city council by Assessors Stevens and Knight, the assessment now totals $10,094,195, an increase of $1,230,399 over last year.

North Vancouver, B.C.—The consolidation by-law, whereby payments on arrears in taxes may be spread over a period of ten years, providing taxes for 1918 are paid, has been passed by the council.

Windsor, Ont.—On April 30th, the city had a bank overdraft on the current account of $300, according to the report of the city auditor. At the beginning of the month, there was a balance on hand of about $45,000.

Edmonton, Alta.—The civic finance committee has arranged for a loan of $2,000,000 from the Imperial Bank of Canada against current taxes. The committee also agreed to the strong plea for economy put forward by the bank, and informed the manager that the amount of credit will not be extended.

Regina, Sask.—The programme of proposed capital expenditure by the city for this year was introduced to the aldermen in special committee last week. The total proposed appropriation is $98,201, of which $7,411 should be deducted for materials on hand and amounts authorized under previous by-laws.

New Westminster, B.C.—At a recent meeting of the council the tax rate was cut to 32 mills, as compared with [illegible]18 mills last year. This rate, while not yet definitely decided upon, will probably stand. It is estimated that all receipts, other than taxes, are $342,113, as compared to $307,[illegible]74 last year. The estimated expenditures as now brought down is placed at $77[illegible],7[illegible]8.

Guelph, Ont.—A statement of the city's finances for 1918, has just been received by *The Monetary Times*. It shows that the assessed value of taxation is now $12,105,942, and the exemption not included in that amount is $2,195,190. The general debenture debt (including local improvement) is $[illegible], and the sinking fund, $734,435. The general tax rate was 14.[illegible]2 compared with 19.3218 for 1919. Assets of the municipality total $2,346,020.

Victoria, B.C.—The annual report for the year ended December 31st, 1918, shows that the city's assets now total $[illegible], including $2,510,387 of arrears of taxes, and $[illegible]02 of local improvements. The balance sheet shows that this is a surplus of $3,386,220 over and above liabilities. The general debenture debt is $10,396,481, and the local improvement debt is $8,360,242, of which, however, almost $2,000,000 is as yet unsold. The statement of receipts and disbursements shows that $208,390 of tax arrears was collected and that the general taxes for 1918 amounted to $7[illegible].

Montreal, Que.—According to the outcome of a recent meeting of the city council, the city will likely adopt a new local improvement tax. Some aldermen expressed their willingness to support the local improvement tax if the period allowed for payment by the proprietors was stretched from ten to twenty years.

Mayor Martin stated that although he was in favor of a twenty-year payment plan, in the event of the council allowing the report of the commission to go through on the chairman's word that he would ask for extension, he, as a member of the legislative council, would see that no extension would be granted. A vote was then taken, resulting in fourteen for rejection and seven against rejection.

Walkerville, Ont.—The tax rate has been raised from [illegible] mills to 27.5 mills, owing to a much heavier budget than [illegible]. For current expenses, which have greatly increased, the town treasury must have $186,000, including the additional $6,000 asked for by the Walkerville school board and there is an increased debenture debt of $9,000. On top of all this, the whole street lighting system will be in use this year and an enormous amount of street repairing and paving is planned, so that the increased tax rate is regarded by some as being of little consequence compared with the public improvements contemplated.

The by-law to raise $50,000 for the erection of a new wing to the King George school has been passed by the council.

Winnipeg, Man.—A by-law asking the people to authorize the expenditure of money up to $600,000 for the municipalization of the milk supply, will be submitted to the electors shortly.

Suburban municipalities of Winnipeg will spend about $500,000 on local improvements this summer.

The civic works committee has passed a total estimate of expenditure for public works of $400,000. This is to be submitted for approval to the finance committee.

Saskatoon, Sask.—The following is the statement of the estimated requirements on current account of the city for the month of May which has been forwarded to the Bank of Montreal:—

"The net amount required is $35,720. The estimated requirements for March amounted to $149,021, which included $119,405 interest due April 1st, while the actual expenditure was $143,432."

Vancouver, B.C.—The annual report for the financial year ended December 31st, 1918, shows that the city had at the close of that period a capital surplus of $9,684,513, being the difference between the capital assets valued at $45,499,664, and the debenture debt, etc., on capital account. Current assets totalled about $6,700,000 and the current surplus is $138,405. Included among the current assets, however, are tax arrears totalling $5,456,453, including arrears of local improvement taxes. The revenue account for the year shows that of the net tax levy of $3,775,595 there was $2,521,055 collected, the balance being included in the arrears referred to above. Other sources of revenue were the local improvement taxes of $610,784, license fees, etc., government grant for schools and interest accrued on building taxes, the total income being $5,605,367, including the waterworks revenue of $455,382. This was a balance over and above expenditure of $80,470, which was carried to revenue surplus account.

At a meeting of the city council and property owners last week, the impossibility of the city securing a grant from the provincial government for school purposes in order to bring down the potential tax rate was pointed out by Hon. John Oliver, premier. The premier also led the meeting to understand that there was little possibility of the city securing power this year to broaden the basis of taxation so that property owners would not have to pay several mills more taxes than last year.

Edmonton, Alta.—Estimates for the current year covering both controllable and uncontrollable expenditures, and amounting to $2,970,000, have been approved by the city council. The estimates for the police and fire departments are not included in this amount, not having been approved of yet. Also, there is a deduction of $640,000 on account of estimated revenue. The controllable expenditure, covering the various departments but not utilities, at present approved of stands at about $570,734. Interest and exchange is estimated at $522,916. Other large items are general debenture interest and redemption, $876,899; public schools, $760,000; separate schools, $90,000; library board, $20,000; allowance for discount, $130,000. Under the head of sundry revenue, there is $333,293 estimated, while the business and income taxes are expected to yield $300,000. The heaviest expense under the expenses for departmental administration is for the streets department, where $163,000 is estimated. Street lighting is estimated at $40,000. Grants and donations are placed at $111,227, assessor's department, $30,254; children's shelter, $15,989; commissioners, $11,245.

INVESTMENTS AND THE MARKET

News and Notes of Active Companies—Their Financing, Operations, Developments, Extensions, Dividends and Future Plans

The stock market during the past week has been characterized by considerable strength throughout the list, distinct advances being made by Steamships and Maple Leaf common. Canada Steamships preferred, which a week ago was being quoted at about 46, advanced to as high as 52⅛, but dropped back to around 50. Canada Steamships preferred advanced from 85 to 87, but receded again to the former figure. Maple Leaf common has made a net gain of over ten points, from 97 to 108, accompanied by a substantial volume of business. War loan and other bond issues continue strong.

Toronto Paper Co.—At the annual meeting of the company on May 16th all the old directors were re-elected. The financial report, which was recently outlined in *The Monetary Times*, was adopted. President Waldie spoke of the prospects of extending the company's market by export trade, which had begun in a small way, but said that the main reliance would still be on the home market.

Montreal Tramways Co.—According to an announcement just made in Montreal, the company and the employees' union will probably compromise on the subject of wages, hours, etc. The employees' demands would have made an increase in annual operating expenses of $1,600,000. The terms now practically agreed upon will reduce this increase to about $1,200,000. The company has a service-at-cost arrangement with the city.

Bell Telephone Co.—The directors of the company have announced a new issue of $4,500,000 of capital stock at par, which will increase the companys capital from $18,000,000 to $22,500,000. Each stockholder of record of May 26th will be entitled to take at par shares of the new stock in proportion of one for every four shares now held. The right to subscribe will expire on June 16th. The company's stock now sells around 130, and the dividend is 8 per cent.

Puddys, Ltd.—A new issue of $300,000 additional common stock is announced by the company. The company has now $200,000 outstanding, and no bonds or preferred stock, either authorized or issued. The object in view is to enlarge the present building, plant and cold storage to enable them to handle an ever-increasing business. It is the directors' intention to carry several new lines, such as canned goods, honey, jams, package goods and fish, as well as carrying on the present provision, beef and pork packing business. Puddys, Ltd., is a pork packing concern, and also deals in provisions. The offices and plant are at Toronto.

General Motors of Canada, Ltd.—A new motor company, with a capitalization of $10,000,000, and connected with the General Motors Corporation of the United States, has been formed under the above name.

Mr R. S. McLaughlin, president of the McLaughlin Motor Car Co., Oshawa, has been elected the president of this new concern. Mr. McLaughlin was recently re-elected a director of the General Motors Corporation—a three-hundred-million-dollar corporation in the United States. He is also vice-president of the same concern and a member of the executive committee. As president of General Motors of Canada, Ltd., Mr. McLaughlin will have charge of the Canadian business of this mammoth corporation.

Western Homes, Ltd.—Shareholders, at a recent meeting of the company, authorized the directors to increase the capital stock from $500,000 to $1,000,000.

It was stated at the meeting that, although the capital of the company was only $500,000, applications had been received for shares to the amount of $560,000, or $60,000 in excess of the present authorized capital. As soon as the legal formalities are complied with these shares will be issued. Stock is being sold at a premium of $10 a share.

The directors are optimistic with reference to the future of Winnipeg and Manitoba, and expect that in the next decade there will be an enormous development of the natural resources of the country. Both farm and city property will make large gains in price.

Western homes is a mortgage and building company, and the directors believe that it will be able to render an important service in the next decade.

Crow's Nest Pass Coal Co.—At the annual meeting of the company on May 20th, Mr. Elias Rogers, president, said: While labor conditions in western Canada are generally unsettled, the situation, so far as the company was concerned, was at the time satisfactory. In outlining the financial condition of the company, he said:—

"The balance at the credit of the profit and loss account brought forward from 1917 was $381,013. To this has been added the sum of $216,984, being the company's net profits from all sources of the operations for the year 1918, making a total of $597,997. From this amount your directors have paid three dividends of 1½ per cent. each, making a total of 4½ per cent. for the year, and amounting, in all, to $279,499, leaving a balance at the credit of profit and loss to be carried forward to 1919 of $318,497.

"The profits of the Crow's Nest Pass Electric Light and Power Co., Ltd., for the year were $2,191, and the Morrissey, Fernie and Michel Railway Co. $3,560, and in each case the amount has been set aside for depreciation. During the year the company spent on improvements and developments in connection with the coal company, $43,828.

"The coal mined during the year amounted to 681,942 tons as against 504,768 mined in 1917, and the coke produced was 183,771 tons, as against 146,533 tons in 1917."

The company has declared a dividend similar to that of last year—1½ per cent., payable June 1st to shareholders of record May 23rd.

Lake Huron Steel Corporation.—A new steel corporation under the preceding name has been established to manufacture automobiles, motor parts, tractors, trucks, etc., with a capitalization of $15,000,000.

This corporation has secured 1,000 acres of land in the north part of Goderich and in Goderich township, Ont.

In connection with this scheme large development is planned, and it means the trebling, at least, of the town's population, and within two years 2,000 houses will be built.

As the manufacturing is to be done by electric process, a new Hydro power line is to be built to furnish 25,000 horsepower. This is an entirely new development in this part of the country.

J. J. Mahon, of Newark, late steel expert of the Imperial Munitions Board, was in Goderich recently and put the final seal of approval on the enterprise. The negotiations have been carried on through Bert H. McCreath, of Toronto, who has been acting for the American interests.

The corporation expects to start work on its plant within two months. Though ultimately it is intended to carry the manufacturing process right through from the ore to finished steel products, at first the plant will be used for assembling work such as is now done at many automobile and other works in this country. The company is in a sense an amalgamation of various steel and steel products companies, with a Detroit automobile, a St. Paul tractor, and others interested. The capital will be largely from the United States. It is claimed that it will mean the manufacture in Canada of many millions' worth of steel products now imported.

DIVIDENDS AND NOTICES

BANK OF MONTREAL

Notice is hereby given that a Dividend of Three per Cent. upon the paid-up Capital Stock of this Institution has been declared for the current quarter, payable on and after Monday, the Second Day of June next, to shareholders of record of 30th April, 1919.

By order of the Board.
FREDERICK WILLIAMS-TAYLOR,
General Manager.
Montreal, 25th April, 1919.

THE CANADIAN BANK OF COMMERCE

DIVIDEND No. 129

Notice is hereby given that a dividend of Three per cent. upon the capital stock of this Bank, being at the rate of twelve per cent. per annum, has been declared for the quarter ending 31st May next, and that the same will be payable at the Bank and its Branches on and after Monday, 2nd June, 1919. The Transfer Books of the Bank will be closed from the 16th to the 31st of May next, both days inclusive.

By Order of the Board.
JOHN AIRD,
General Manager.
Toronto, 17th April, 1919.

MORTGAGE SALE

EDMONTON CITY WAREHOUSE

Pursuant to the directions of the Registrar and by virtue of the Powers of Sale provided by "The Land Titles Act" under a certain mortgage, which will be produced at the time of the sale.

There will be offered for sale by public action at the Sale Rooms of Robert Smith, 10167 99th Street, in the City of Edmonton, in the Province of Alberta, on Friday, the 6th day of June, 1919, at the hour of 3 o'clock in the afternoon, the following property, namely:—

Lot 147 in Block 4 of the Hudson's Bay Company's Reserve in the City of Edmonton, Plan BI, subject to the reservations and conditions contained and referred to in the existing Certificate of Title.

Terms of sale to be ten per cent. cash at the time of the sale and the balance in sixty days.

The above property will be offered for sale subject to a sealed reserved bid and free from all encumbrances, save: subject to a certain Caveat as to costs of a Spur Railroad Track in rear of said premises and taxes for the current year.

The vendor is informed that the above property is situated centrally within the City of Edmonton, and that a spur track runs at the rear; that on the land is erected a warehouse 50' x 120', containing basement 9' 6" high. First Floor, 11'; Second Floor, 9' 6"; Third Floor, 9' 6", and Fourth Floor, 10' high. Outside walls of brick of average thickness of 1' 6", basement of concrete; that the whole is of modern first-class fireproof construction and steam-heated; that each floor contains office accommodation, enabling each to be let separately; that there are two freight elevators adjoining platform by Railway spur.

For further particulars and conditions of sale, apply to
EMERY, NEWELL, FORD & LINDSAY,
Vendor's Solicitors.

Approved.
H. J. DAWSON,
Registrar.

UNION BANK OF CANADA

The Monetary Times' Weekly Register of Fire Losses and Insurance

Aberdeen, B.C.—May 9—Four thousand-ton twin-screw wooden hull, with adjoining ways, sheds and docks, was destroyed. Estimated loss, $500,000.

Cobalt, Ont.—May 18—Buildings at 137-139½ Lang Street were damaged.

May 17—Twenty buildings in South Porcupine were destroyed. Insurance, $17,000. House occupied by Mr. Laro was damaged. Insurance, $1,200.

Fredericton, N.B.—May 13—Barn and contents, owned by Mr. Arthur Rice was destroyed.

May 14—The house and barns of Mr. A. Grant at Elm Tree were destroyed. Estimated loss, $4,000. Insurance, $1,000.

Halifax, N.S.—May 18—The building of the Salvation Army barracks was destroyed. Estimated loss, $15,000.

Hanna, Alta.—May 9—Geo. A. Jamieson's theatre was destroyed.

Harriston, Ont.—May 13—The Harriston High School was damaged. Cause, explosion in the chemical room. Estimated loss, $5,000. Insurance, $12,000.

Lakefield, Ont.—May 20—House owned by Mr. Arthur Payne was destroyed. Estimated loss, $10,000.

Millidgeville, N.B.—May 16—Four houses and a shed, belonging to the E. L. Jewett estate, were destroyed. Estimated loss, $15,000. Insurance, $1,600.

Neepawa, Ont.—May 9—Car, owned by Mr. Hanna, resident of the Mill Creek District, was almost destroyed. Cause, striking a match over a gasoline tank. Estimated loss, $400.

St. John, N.B.—May 17—A barn, owned by F. C. Kinsman, corner of Paradise Row and Southwark Street, was damaged. Estimated loss, $500.

Toronto, Ont.—May 15—The home of Mr. and Mrs. Payne was damaged. Estimated loss, $500.

Weston, Ont.—May 21—The building of the Reliable Bedding Co. was destroyed. Cause, short circuit in the electric equipment. Estimated loss, $20,000. Insurance, $8,000.

Windsor, Ont.—May 13—Tweedale's drug store, Sandwich Street West, was damaged. Estimated loss, $50,000.

NEW TORONTO BOND HOUSE

The firm of H. R. Brereton and Co. has been formed, with offices in the Dominion Bank Building, Toronto, to deal in government, municipal and corporation bonds.

HOWARD SMITH BONDS

Messrs. Nesbitt, Thomson and Company, have purchased the issue of Howard Smith Paper Company, bonds to the amount of $1,000,000, and it is understood will make a public issue shortly. The bonds are first mortgage, 15-year, six per cent., and represent a part of the authorized increase in outstanding bonds of $1,500,000.

ROYAL SECURITIES TO REOPEN HALIFAX OFFICE

Captain W. B. Milner, who, prior to the war, was associated for some years with Messrs. F. B. McCurdy and Company in their Halifax office, and later as manager of their St. John, N.B., branch, and who since February, 1917, has served overseas, has joined Royal Securities Corporation. Captain Milner has had successful experience in financial matters and is acquainted with local conditions throughout the Maritime Provinces. He will have charge of the Halifax office, shortly to be reopened in the Royal Bank Building, Hollis and George Streets.

GOVERNMENT AND MUNICIPAL BONDS

(Continued from page 40)

Point Grey, B.C.—A by-law has been passed authorizing the issuing of debentures to the amount of $165,000 for the erection of two schools. Authority is being sought by the Vancouver and District Joint Sewerage and Drainage Board for a bond issue of $800,000 for extension purposes. Should this issue be authorized it is proposed to spend $500,000 of the amount for the purpose of running a sewer main from Sixteenth Avenue to Thirty-seventh Avenue.

Verdun, Que.—At a meeting of the city council on May 19th, the financial condition of the city was discussed. Mayor Leclair stated that for the present fiscal year there was a shortage of $225,000, represented by $96,000 taken from revenue and used as capital account for public works, which had to be paid back, and by $120,000, being shortage in revenue. To raise this amount, Mayor Leclair advised the adoption of a by-law authorizing a loan of $225,000 for twenty years. After reading the proposed by-law, Mayor Leclair said that the legislature at its last session decided that the council must submit any project for borrowing money to the ratepayers for approval. The by-law will be submitted, therefore, on June 6, 7 and 9.

Moose Jaw, Sask.—Messrs. Wood, Gundy and Co., Toronto, have purchased an issue of $210,000 5½ per cent. 20-year straight-term bonds at 97.66, which is on a basis of about 5.70 per cent. In calling for tenders, the city called for bids on both straight-term and instalment bonds. The following is a partial list of tenders:—

	Straight.	Instalment.
Wood, Gundy and Co.	97.66	96.78
A. E. Ames and Co.	96.69	96.69
Canada Bond Corporation	95.81	96.15
Dominion Securities Corporation	95.77	95.98
Brent, Noxon and Co.	95.63	95.63
R. C. Matthews and Co.	94.50	95.03

Barton Township, Ont.—The Dominion Securities Corporation, Toronto, has purchased an issue of $30,000 5½ per cent., 30-year straight-term bonds at 103.52. The following is a list of tenders:—

Dominion Securities Corporation	103.52
W. L. McKinnon and Co.	103.35
Macneill, Graham and Co.	103.27
John Stark and Co.	103.132
J. F. Stewart and Co.	103.107
Bankers Bond Corporation	103.03
Canada Bond Corporation	103.01
Wood, Gundy and Co.	102.87
Turner, Spragge and Co.	102.77
W. A. Mackenzie and Co.	102.57
G. A. Stimson and Co.	102.51
A. E. Ames and Co.	102.36
A. Jarvis and Co.	102.12
C. R. Clapp and Co.	102.078
R. C. Matthews and Co.	102.03
W. A. Dyment and Co.	102.03
Sterling Bank of Canada	101.806
Housser, Wood and Co.	101.78
Ralph M. Bird and Co.	101.76
Brent, Noxon and Co.	101.663

Inflated Conditions Must be Removed

Massey Harris Head Says this is Necessary for Real Prosperity—Production Must Not be Curtailed—Views of Industrial Leaders Before Royal Commission—Profit Incentive is Indispensable to Success

As indicated by the evidence outlined in *The Monetary Times* last week, there is much less radicalism among labor in the east than there is in the west. Actual conditions of industry are also indicated, as being more satisfactory. In Hamilton, Ontario, there is apparently very little unemployment.

Mr. F. H. Whitton thought that the eight-hour day was a new thing in the trouble. It had come on suddenly after the employers had been busy taking care of the returned soldiers. He did not think the men at the Steel Company were either dissatisfied or badly off, as they had, assisted by the company, purchased $642,000 worth of war bonds in 1917 and $951,000 in 1918. His company had to face lower prices for steel after stocking up at high prices, and the dividend paid now was seven per cent. on preferred stock and six on common. The average wage of the men in 1913 was $669, and in 1918, $1,343. Mr. Whitton thought that prices would gradually adjust themselves to wages. Mr. Tom Moore interjected that they hadn't yet, but had continued to rise about three times as fast as wages, and that this was where most of the trouble came in.

In dealing with the eight-hour day, Mr. Whitton declared that foreign competition, particularly from Japan and countries where the living standard was low, would not permit Canada to risk curtailing production by adopting it. He thought parliament should settle the eight-hour-day question, and hinted that some legislation would have to follow on the lines of tariff if it were adopted. Otherwise Canada's national wealth would decrease. He favored better housing conditions, advanced education, particularly technical, and improved conditions for the working classes. Nursing organizations should be subsidized so that efficient nurses would be within the reach of the ordinary workingman. We must be as efficient as other peoples in order to meet competition. The real patriots were those who bought made-in-Canada goods. Mr. Whitton disapproved of the Whitley system. Although an Englishman, he thought England was going down hill, and that Canada could do better to copy the United States.

Charles T. Grantham, of the Empire Cotton Mills Company, Welland, declared that while wages in his establishment were the same as in 1916, the selling price of his goods had decreased. "That's the first time we ever heard that yet," remarked one of the Commission. He employed from 500 to 700, and the company let them good, comfortable houses. The average wage was $4 a day, although some women earned less. "The women could earn $18 a week if they would attend to business, but they don't, and it was too hard to get help during the war to discipline them," witness said. Like all the other employers, he denied discrimination against union men.

F. J. Gernandt, superintendent of the International Harvester Company, stated that the men at the plant were purchasing company stock. "What is the capitalization of your company?" he was asked. "Ours, here, is a subsidiary company to the Chicago firm. The capital is $140,000,000." "Not much chance of your men ever securing control," was the comment. The company, witness stated, did not see any signs of unrest. Wages had increased 100 per cent. They paid as much as competitors, and a little more. He favored an eight-hour day law, and thought that this would help a lot in reducing any discontent. They had an Industrial Committee working, and found it a good scheme, and even had union men as members of the committee, which proved that there was no discrimination.

John A. Flett, general organizer for Canada of the American Federation of Labor, sounded a warning to employers by declaring that the Bolshevist element in organized labor was attempting to secure control. "If the manufacturers of this country are wise, they would encourage the union, and encourage the best men to join it," he stated. He warned the manufacturers that their refusal to treat with the union was causing trouble, and giving the revolutionaries a chance to get control as they had done at Winnipeg. If the present wise leadership of labor unionism, which never fomented a strike and spent only thirty per cent. of its funds in defense work, i.e. strikes, were overthrown, there would be a real revolution, and the manufacturers would be to blame.

Several witnesses described profit sharing and stock bonus systems in use in three local industries. Considerable complaint was made that a local ordinance prohibiting the display of the red flag, etc., would have the effect of preventing legitimate discussion. Rev. E. J. Etherington complained that the government had not acted with courage, and that there had been too much of a hush-up policy followed. He knew that there was serious unrest among the working classes, due largely to the high cost of living and the fear of unemployment.

H. G. Foster, an officer of the Cigarmakers' International Union, dealt with the conditions of the cigarmakers in Hamilton, London and Toronto. Mr. Foster said that in Hamilton up till last July the average rate of wages was $14 per week. The union decided to ask for a revision of the scale, and a 10 per cent. increase. Two firms refused to deal with the union, while one effected a settlement on a basis of 10 per cent. The Tuckett Co. secured soldiers in its London factory through the government, but when a protest was made the government ceased to co-operate. He believed that the employers were making a concerted effort to break up the union. One big Toronto firm locked out its employees and the Hamilton strike followed the request for an increase here. The strike is still on. Among the unskilled laborers there was a realization of helplessness, and it was among this class that the one big union movement was making progress. He advised the provincial government to go into productive industry, such as hydro-electric, with a view to lowering the cost of living and absorbing the unemployed.

"Broken promises on the part of the Federal government and employers generally are the reasons for the great unrest," declared Alex. Boyd, a union blacksmith, who said he was unemployed no doubt on account of his union activities. Mr. Boyd said that the open door of the Steel Co. of [illegible] by the manager, generally let out the [illegible] with a complaint. It was fear of discharge [illegible] in the plant from joining the [illegible].

H. O. [illegible], of W. H. [illegible] and Co., spoke of trade conditions in Ottawa. The tendency is towards centralization and monopoly, which was bad for the country as a whole. He suggested that an inland trade commission be appointed to make inquiries and issue orders, just like the Railway Commission does in telephone matters.

Geo. E. [illegible], of Thornton and Douglas, discussed conditions among the clothing trade and told of voluntary [illegible] that had been made. Like other manufacturers and labor men who have testified, he thought the eight-hour day should be fixed by law.

Kitchener, Ont.

According to witnesses in Kitchener, Ont., where a meeting was held on May 2[illegible]d, that city is in a very enviable position. Both employers and employees agreed that there was no unemployment to speak of and several of the manufacturers stated that one thousand men could be absorbed without great difficulty. Several witnesses maintained that the home-owning instinct of the people of the city made for stability in its manufacturing industries and accounted for the comparative labor quiet in the city.

President O. Hughes, of the Trades and Labor Council, stated that there was considerable unrest, although this was not very apparent. He said the high cost of living was the reason for the dissatisfaction. He considered that it was the duty of the government to control the high prices of the necessities of life. The nationalization of public utilities should be undertaken and pressed further. He said that as [illegible] arises the nationalization of particular industries might be also undertaken. Other labor men who gave evidence were M. Weinstein of the furniture workers union, and J. Lockhart. As to the rates of wages paid by the furniture manufacturers, there was some difference of opinion between the labor men and the manufacturers who were on the stand. As to the idea of industrial councils and co-operation between employer and employee to settle disputes the opinions expressed by the representatives examined showed that there was no definite and concrete idea on the subject. It was brought out that both the labor men and the local manufacturers were ready to co-operate in settling differences, but how far they should go in this direction, no one seemed to know. Among the manufacturers who were on the stand were: E. O. Weber, Geo. C. H. Lang, Mayor Gross, President N. M. Davidson, of the Board of Trade, C. A. Ahrens, J. Newton, Oscar Rumpel, Ald. W. T. [illegible] and George Schlee.

Toronto, Ont.

At Toronto, on May 26, 27 and 28, a wide variety of evidence was received from employers, employees and farmers. W. C. Good, of the United Farmers' Association, told of the operations of their institution and how it had cut [illegible] to consumers in Sydney Mines 12½ per cent. He did not place the suggestion before the Commission as a cure-all, but as one means of eliminating the middleman profiteer. N. A. Powers, also representing the United Farmers' Association, advocated government action to assist in securing farm help.

Mr. W. A. Douglas, appearing for the Single Tax Association, made a strong plea for the adoption of the single tax system. Under the present system, he said, thousands built houses without ever owning them. Mr. Thomas Harrison, Weston, contended that the small population in Canada required a different solution for its industrial problems than did that of Great Britain, and he outlined a scheme which he thought would be applicable.

At the morning session, S. R. Parsons, president of the British-American Oil Co., said in his evidence: "It should be pointed out that fuel has been added to the revolutionary fires [illegible] found in our Dominion by a few, well-meaning theorists in church and state, as well as in our college halls. These men are like doctors without a practice.

"The profits of industry have been greatly exaggerated in the minds of many of the workers, and they have been led here and there to believe that industries were always both greedy and prosperous. As a matter of fact one of our great writers on industrial problems in England has figured out that over a period of one hundred years the profits of industry, considering the good and the bad times, the capital that has been lost as well as that which has made good, have not been over 5 per cent. In Canada probably the same comparison would hold good.

"It should not be overlooked that if we attempt to destroy individuality in our social and industrial life and bring all men to a dead level, we simply destroy human liberty, which must be preserved at all costs.

"In the matter of hours of work, my own conviction is that eight or nine hours a day should be considered ample. Where the work is very hard and wearing, probably eight hours is as much as should be expected. Men ought to have a reasonable time for rest and recreation. If they do not use their leisure hours properly it is the fault of our civilization, and opens a wide door of opportunity for all organizations that are formed to serve mankind.

"The question of wages is a most difficult one, particularly at the present time. Employers are on a war-time basis of general costs, wages and values of raw materials, and so far as the seemingly high wages are concerned, these must be maintained as long, at all events, as the high cost of living continues. The business that is being done, however, is on a peace basis, which means in most cases heavy reductions of both volume and profit. While on the one hand manufacturers, generally speaking, are not thinking of profits just now, but rather keeping their organizations going and their people employed, yet it is difficult on account of conditions mentioned to meet the views of many of the employees. Those who have wages or salaries larger than a low average, do not need to spend such a large proportion of them in the actual necessaries of life, and, therefore, do not find it so hard to get along. We ought to face this problem very honestly and sincerely and address ourselves to the task of making sure that the costs of living are fair and reasonable at the present time."

From A. McMordie, general secretary of the Letter Carriers' Association, came the advice that this Commission had better recommend something worth while, or else chaos might follow the present unrest among the workers. In the last five years, he said, the letter carriers had been robbed of $1,505 by the government, and the Ottawa powers had even so far refused a conciliation board to listen to their arguments. "If this Commission won't go the length of putting the workingman where he can reap the benefits of his own labor, we are not going to be able to allay the discontent which is in evidence." The reason the Toronto postmen were not out on strike now, Mr. McMordie said, was because they were good, sensible people. "That means," he added, "that we are more abject slaves and duller than those people in the West who are on strike. They say so. You can no more stop this tide that is coming than you can stop the Atlantic with a pitchfork." In conclusion, he advocated a tax on land.

Canadian Conditions Best in World

An analysis of present conditions by Thomas Findley, general manager of the Massey-Harris Co., which employs 4,000 men in its four plants, evidently impressed all members of the Commission. After describing the company's own industrial councils and retirement system, he said: "I attribute the general unrest, more than anything, to the expectations that have been held out during the past two or three years to workers generally of vastly different conditions after the close of the war. I believe myself there will be betterment, but I am very pessimistic about the immediate future. I do not think that everything can be expected to be done at once under present industrial conditions. There never was a time, it seems to me, when it was harder to get the wheels of industry running. Whatever industrial conditions are in Canada—and to my mind they are not ideal—they are, nevertheless, the best in the world to-day. Compared with conditions in Europe, in Asia, in Australia, they are very good.

"We are all faced with the great problem of how we are going to get rid of inflated prices. I do not know how, but I do know that we cannot have real prosperity until we do get rid of that inflation. I was hoping for a gradual reduction—that we would not, so to speak, come to earth with a thud. I am beginning to fear that is not going to happen. I think I was one of the first manufacturers who stated that, after the armistice, there should be no attempt to reduce wages until the cost of living came down. I said that when, as a matter of fact, it would have been easy to lower wages with the inrush of men, but I felt that it could not be done unless the cost of living came down. But I have no patience with the idea that this is the time for increasing wages.

"Whether we are going to come out of this thing smoothly and get the industries running, I cannot say, but everything that is happening just now is certainly making it more difficult. One of the dangers is that of anticipating our trade. The only thing that is going to get us out of this trouble is more production and lowering of costs. If we are going to have a shortening of production at this critical time, shorter hours will, in my mind, perpetuate the unrest prevailing."

Mr. Findlay told how the present inflation of prices was curtailing consumption to a tremendous extent. People simply would not buy a single article more than they were compelled to. The Massey-Harris output, he estimated, was curtailed one-third by the present high cost of living. Asked by Commissioner Tom Moore if the cafeterias, the first-aid department and the pensions scheme adopted by the Massey-Harris had added materially to the cost of the articles produced, the witness said that so far it had not. When asked what he thought of the proposed 44-hour week, Mr. Findley replied, "I think it is the most unwise proposal that could possibly be brought forward now. The workingmen believe that curtailing working hours would increase the opportunities for employment. In my mind it would have a directly opposite effect, simply because it would be perpetuating high costs."

Mr. Findley remarked that his own concern was producing now six months ahead of schedule, and was asked by Mr. Moore if it were not a fact that the warehouses were full of goods, if they could but be released. "I don't think the warehouses are full," replied the witness, "but my impression is that the people are holding off from buying."

Imperial Oil Industrial Plan

Mr. Findley said that there was a surplus of labor in Toronto at the present time, but nothing abnormal. In reply to Commissioner Moore, he said he did not believe that the law of supply and demand should govern the wages paid workingmen. "Every concern," he said, "should pay a living wage irrespective of the law of supply and demand." He said he hoped the Massey-Harris council of workmen would bring to the company's directors sane statistics as to what constituted a living wage.

The following statement was submitted by Dr. D. Strachan, assistant to the president of the Imperial Oil Company, Limited: "A few days ago in Sarnia the Commission heard the evidence of a witness who testified that the Industrial Representation plan of the Imperial Oil, Ltd., has been a failure; that the workers in the company's refineries are dissatisfied with it; that it was being used as a weapon to combat trade unionism; and that it could not bridge over the chasm which existed between the workers and the company at that moment.

"It is only fair to these workers to state that this evidence was as unauthorized by them as it was unjustified by the facts. The witnesses, who in the press reports were made to appear as employees of the company, speaking with authority and upon behalf of their fellow-workmen, were outsiders, intent upon discrediting the Industrial Representation plan, and to undermine its influence in maintaining harmony and mutually satisfactory relations within the enterprise.

"It is significant that the only criticism which the plan has received has come from the one outside source and that following it a report was sent out from Sarnia that a strike was imminent at the refinery there. So far from this containing any more truth than did the criticism of the plan, only a few days ago, at a meeting of the representative council, representatives of all the Sarnia Refinery employees, at which, after [illegible] of our [illegible] and scientific inquiries into the trend of the cost of living had been placed before them, a new wage scale was unanimously adopted by the representatives and ratified by the company. A further resolution was moved by Delegate Hampton, representing the Acid Works, and Delegate B[illegible], representing the Car Repairers, expressing to the officials of the company appreciation of the general scale of wages which became effective May 1st, and assuring the officials that the new wage scale would be entirely satisfactory and highly appreciated by employees in the plant. This resolution, upon being put to a vote, was carried unanimously.

"I mention this for the reason that practically every reader of newspapers in Canada is now laboring under a complete misapprehension as to the outcome of an earnest and sincere effort to bring about such harmony and co-operation in Canadian industry as would endure, because it was based upon justice. The inauguration of the plan was not an expedient to combat any labor menace, because in the twenty-one years of its existence there has never been a strike at the Sarnia Refinery. Rather, it was the outcome of a long and intimate association between all classes of workers in the company's service, and the conviction, which was deepened by the war, of the necessity of mutual consideration and unity in industry. As I have said, a deliberate effort has been made to prejudice the Industrial Representation plan in the eyes of employees and employers alike, and I am impelled to make this public statement, because I feel that this is no time to permit the attitude of those concerned in industrial operations in this country, who are at peace with each other, to be misrepresented. In absolutely refuting the statement that the Industrial Representation plan had been in any degree a failure I make no claims for it, except that it affords a point of direct contact between every interest in our industry. It provides for the discussion of questions relating to wages, hours, working and living conditions at conferences, the constitution of which provides an equal representation of the employees and the executive. I believe in the plan because I feel that any medium which forces men of varying opinions to sit down, face to face, week after week, in an open, untrammelled exchange of views, must result in a fairly even balance of the rights of each being ultimately established."

The employment of skilled labor is better now in Toronto than that of unskilled labor, according to Mr. T. A. Russell, of the Russell Motor Car Company. The strike called by the metal trades workers in Toronto was not brought about by the workers themselves, but by outside influence, declared Mr. Russell. The men had no grievances with their employers warranting a strike, he maintained. Only in cases of unemployment, sickness or old age, over any of which factors the men had no control, did men have grievances which should be adjusted. Asked by Commissioner Moore about the minimum working hours in the metal trades, Mr. Russell declared that he believed it a mistake to limit the working week below 48 hours. The acute period of unemployment and unrest to-day is a reproduction of conditions of 1914 and 1915, and was an outgrowth of the war. The lack of sympathy shown by employers toward labor organizations was attributed by the witness to be the opposition of the unions to payment on piece work and not allowing their members to work on more than one machine.

The war profiteer in Canada, by his bleeding of the public, was largely responsible for the present industrial unrest, according to Mr. John Doggett, secretary of the Toronto Industrial Council. The regulation of prices on stable articles of food should be undertaken by the Dominion government, he stated. The need of a system of co-opera-

[illegible] rather than the conduct of industry for [illegible] was [illegible] to allay unrest. Suspicion and distrust on both sides was also a cause of unrest, he mentioned. The chairman, Chief Justice Mathers, asked the witness whether he considered the Toronto Industrial Council would help to bring about a better understanding and remove this distrust. Mr. Doggett replied in the affirmative. Mr. Doggett also spoke of the introduction of the apprenticeship system for boys going in for trades, and said that as soon as the employers of this country agreed to provide facilities for the instruction of these boys the trade unions would get the youths needed, and thus have mechanics trained in this country instead of bringing them out from Britain.

Mr. James Gunn, of the Joint Industrial Council of the Building Trades, maintained that "while representative government during the past couple of years had not altogether disappeared, the free use of 'orders in council' and interferences with the customs and civil liberties of the people all had tended to cause the people to be dissatisfied." He maintained that sympathetic strikes tended to stabilize industry, because instead of many industries being affected by numerous individual strikes, all the affected industrial workers came out together and had all their disputes settled at once.

Rev. J. C. Hodgins, a Unitarian clergyman of Brantford entered into a scathing denunciation of the present trade union organizations of Canada. While a believer in trade unionism, he assailed the present leaders of labor in this country, whom he likened unto "men not grown up." Trade Unionists to-day, he said, were a corporation of capitalists neither cultural, religious nor broadly national. It was a tyranny pure and simple. Sympathetic strikes should be called epidemic strikes, and were wholly wrong, he maintained.

James Ballantyne expressed the opinion that the tariff issue should be entirely removed from politics and be in the hands of a commission. Workers were beginning to associate the tariff with the high cost of living. J. Taber, of the Taber Laundry Works, stated that, in his opinion, every workman should be a partner in industry. Industrial councils should be compulsory by federal law, and there should be some kind of industrial parilament for the country as a whole. Some radical views were expressed by Dr. Salem Bland to the effect that the eight-hour day should be immediately adopted, taxation should be entirely transferred from necessaries of life to luxuries, to incomes and to inheritances, and land, insurance and banking should be nationalized. He upheld the resolutions of the Methodist conference last year, recommending that the profit system in industry should be done away with. This feeling, he thought, was very general. The industrial councils now being discussed might be a useful beginning, as he considered that the change could only be gradual.

CANADIAN MANUFACTURERS' ASSOCIATION

The programme for the forty-eighth annual general meeting of the Canadian Manufacturers' Association on June 10th, 11th and 12th has been announced, and members are being urged to attend. On the first day there will be the report of the general manager, of the treasurer, the president's annual review, report of executive committee and of the insurance committee. On the second day reports will be received from the legislation committee, tariff committee, transportation committee and membership committee. Business of the third day will consist of amendments to by-laws, elections of officers and committees and resolutions. The headquarters will be the King Edward Hotel, Toronto, and a trip of inspection about Toronto harbor will be included in the programme.

United States fire losses aggregating $290,000,000—the greatest in any year except 1906, when the San Francisco earthquake and conflagration occurred—were reported for 1918 by the National Board of Fire Underwriters.

OBITUARIES

Mr. James T. Matthews, vice-president of the Matthews Steamship Co., died at his home, 114 Farnham Ave., Toronto, on May 20th, 1919.

The **Hon. C. C. De Lorimier**, retired judge of the Superior Court, died on May 24th, at the age of 76, at his home, 226 Lafontaine Park, Montreal.

Mr. Herbert Waddington, well-known financier and real estate man, and managing director of the Standard Reliance Mortgage Corporation, died at his hone, 97 Glen Grove Avenue, Toronto, on May 24th.

Mr. Joseph J. Bell, assistant secretary in the Toronto office of the Dominion Fire Assurance Company, died on May 21st, at his residence, 49 Roxborough avenue west. Mr. Bell had lived in Toronto since 1908, and had been with the Dominion Fire Assurance Company for five years.

Mr. William Pearson Gundy, who for the past winter had been residing at Ottawa, died on May 25th, with heart seizure. He was president and general manager of the W. J. Gage and Company, president of the Kinleith Paper Company, St. Catharines; president of the Educational Book Company, of Toronto, and president of the Toronto Board of Trade, in 1914. He was born in St. Catharines, Ont., in 1858, and after spending a short time in the Ontario civil service, joined W. J. Gage and Company. He opened their Winnipeg branch in 1882, and became manager in 1890. He has been associated with many public and philanthropic movements.

Mr. Wilmot D. Matthews, of W. D. Matthews and Company, grain dealers, and a director of the Canadian Pacific Railway, died on May 24th, at his home, 89 St. George Street, Toronto, following an illness of about ten days. The late Mr. Matthews was born at Burford, Ont., June 22nd, 1850, and was educated at the Toronto Model School. At the age of twenty-three he entered the grain trade with his father. His grain interests led to his association with lake transportation, and in 1890 he became director of the St. Lawrence and Chicago Steam Navigation Company, and later director of the Toronto and Montreal Steamboat Company. Every two or three years thereafter saw a new field open to his activities, and he sat on boards of mining, coal, real estate and railway enterprises. He served as chairman, Eastern Grain Standard Board, in 1897; as a member of the Grain Survey Board in 1904; as president of the Toronto Corn Exchange, and president of the Toronto Board of Trade in 1888 and 1889. In 1892 and 1896, he was a delegate to the Imperial Commercial Congress in London, England.

BUDGET SPEECH NEXT WEEK

On Tuesday, Sir Thomas White, Minister of Finance, announced that the budget speech would be delivered on Thursday, June 5th. It is fully expected that this will be the occasion of a debate of outstanding interest during the present session. Recent developments in the industrial field have introduced new factors which will no doubt be considered. Our national revenue depends in large degree upon the tariff and the tariff is an important factor in the cost of living in Canada. On the other hand the industrial situation is most acute in our larger cities and as far as unemployment is concerned there is practically none in the rural districts and small towns and cities. Any tariff reduction would, therefore, accentuate the difficulties of the manufacturer and be a serious blow to such centres as Quebec, Montreal, Toronto and Hamilton. In spite of the strong agitation on the part of members from Western Canada and also by representatives of rural districts in the east, it is not anticipated that any tariff reduction will be made excepting possibly the removal of the 7½ per cent. war tax. Something may be said, however, about the creation in Canada of a permanent tariff commission to make a thorough and continuous study of the relation of import and export duties to our economic system. Such a body would probably have powers of investigation and recommendation. Its reports would be for the consideration of parliament. No such organization can, of course, withdraw the tariff entirely in the field of politics because in the final analysis it is a question to be settled through the strength of political parties. The value of such a commission would consist in its scientific investigations in the effect of existing measures and the possible effects of those proposed; the fundamental policy would still be determined in the political arena.

Canada's income tax is still below that of the United States and that of Great Britain and it is expected that a further upward revision will be made with increased progression. There is also a strong feeling that the collection of the tax has not been sufficiently enforced and that large numbers of farmers, for instance, have escaped it because it has not been properly computed.

Industrial conditions will probably be much more difficult during the next few years than during the war period and with declining prices and falling profits this will mean that business profits as a source of revenue should not be depended upon to yield increased amounts. Capital must be assured an adequate return if our industries are to be maintained and funds secured for further Canadian development. In our present economic system there is no way of eliminating the supply and demand ruling in the fixation of the interest rate. Something will probably be said regarding the next Dominion of Canada war loan. According to recent transactions, bond prices continue to rise and the next loan should be floated on terms much more favorable to the government than was the last. It is too early as yet to predict the amount or maturity of the loan. There is a strong feeling, however, that there is no longer any occasion for the issue of tax exempt securities.

Among other changes anticipated in the near future is an effort to reduce the cost of living in Canada. On Thursday, the Finance Minister announced that a committee of the House would shortly be appointed to look into this question. They are to examine "the prices charged throughout Canada for foodstuffs, clothing, fuel and other necessaries of life, and as to the rates of profit made thereon by dealers and others concerned in their production, distribution and sale; also as to rentals of dwelling houses in industrial centres of Canada, and rates of return of capital invested therein, with power to send for persons, papers and records, examine witnesses under oath, engage accountants and other necessary assistants, and to report to the House from time to time the result of the inquiry, with any recommendations they may make with a view to effecting a reduction in such prices and rentals."

TAXATION OF UNEARNED VALUE

THERE undoubtedly exists in Canada at the present time a popular disposition to levy tribute on those values which are created not by labor but by the growth of population. Ample evidence of this disposition has already been given in the evidence of the Royal Commission on Industrial Relations. That there is such socially created value is not seriously disputed, either by economists or by the general public who have given attention to such matters. Why, then, has no such value been appropriated to the public treasury and the burden of taxation in other forms been thereby removed?

Possibly the main reason has been the difficulty of determining exactly what is meant by such terms as "community value," "social value," "unearned increment," which are commonly applied to this form of wealth. The instance most frequently cited is in the case of land where it is applied to that proportion of value remaining after allowance is made for all improvements. In the case of Canadian farms the proportion of value represented by improvements is substantial, particularly in those sections which had to be cleared. The mere site values which in large cities have attained to phenomenal figures are conspicuous examples of community value. But undoubtedly there are values created by societies other than in the case of land. The value of a railway, or of a public utility franchise, or of an industry possessing a virtual monopoly in a community is increased by additions to the population, and this increase may, with probably equal justice, be also called unearned.

So much for the value side. The object of appropriating all or part of this value, however, is not to deprive the owner of it, but to relieve other classes who, it is maintained, should not be required to pay taxes from their earnings, so long as wealth which is not accrued by individual effort is available for this purpose. If all such values were not required for the purpose of revenue, presumably they would not all be appropriated; if they were found to be insufficient, other sources would have to be utilized besides, that is the "single tax" would not be feasible. It is likely that in most countries, however, the adoption of such a basis of public revenue would render unnecessary all other sources including, in Canada, the protective tariff and the income tax. But the former serves an important economic function by creating an artificial market for goods of home production, while the latter acts in a mild degree towards redistribution of wealth. In opposition to the special tax on land values, therefore, the landowner, who stands to suffer in the first instance, is joined by the manufacturer, who views with some anxiety any such possibility, and by a class of social reformers who aim to effect a final readjustment of wealth through an increasingly progressive income tax coupled with large succession duties.

A third objective is that such taxation could scarcely be made retroactive. Land values of the present could not with justice be wiped out and the best that could be done would be to so adjust taxes on land as to deprive the owners of the benefit of future unearned increment. Even if it were considered desirable to eliminate the present site values, such elimination would have to be brought about over a long period, in order to protect mortgage holders and, in some degree, land owners themselves.

LIFE INSURANCE AND INDUSTRIAL STABILITY

THE value of life insurance as a stabilizer of industrial conditions was emphasized in an address before the Life Underwriters Association of Toronto, on May 28th, by James E. Kavanagh, third vice-president of the Metropolitan Life Insurance Company of New York. His subject was "Opportunities of Life Insurance Agents," and he pointed to the beneficial effect of life insurance upon a community, and the resulting satisfaction to the agent, quite apart from financial benefit. The occupation offers physical health and progress—intellectually, social and morally—financially. The agent makes a community better, because he encourages thrift which means the postponement of pleasure. What would appear to be even more important at the present time, however, is the fact that every policy holder acquires a stake in the community, and thereby becomes a supporter of law, order, and the maintenance of property rights. "If Russia had had 100,000,000 policyholders," said Mr. Kavanagh, "it would not have been so ready to tear things up."

Policyholders as a class are realizing more than ever that their money is a factor in economic development; it is invested in bonds, mortgages and other securities, upon the safety of which the insured depends.

EMPLOYMENT CONDITIONS NOT SERIOUS

Reports Received from Government Employment Offices Indicate Good Demand for Competent Help

FOR the past few weeks the weekly employers' reports to the Employment Service of the Department of Labor show a steady and fairly rapid improvement in employment conditions in Ontario and Quebec. For the week ending May 3rd returns were received from 1,969 firms in these two provinces. On April 26th these firms had 247,832 persons on their payrolls; on May 3rd they had increased their labor force by 2,[illegible], or 1.03 per cent., and during the week ending May 10th they expected to make a further net addition of 1,977, or .79 per cent.

Reports for the week ending May 10th show that this anticipation was more than realized. The 2,324 firms, whose reports were compiled as of this date, were employing 289,893 persons on May 3rd; on May 10th these identical establishments were employing 292,890, an increase of 2,997, or 1.03 per cent., and during the week ending May 17th they anticipated making a further increase in their payrolls of 2,083 persons, or .71 per cent. This increase during last week was anticipated in thirteen out of seventeen industrial groups. Of these thirteen groups the following had also shown actual increases during the week ending May 10th: Lumbering clay, glass and stone products; food, drink and tobacco; pulp, paper and printing; vehicles; woodworking and furniture; railroad construction; railroad operation, and miscellaneous occupations.

The largest increases, both actual in the week of the 10th and anticipated during the week of the 17th, are found in lumbering, where sawing operations are well under way, railroad construction, railway operation, food products, woodworking and furniture, and vehicle manufacturing. The metal trades show a decline of 70 during the week ending May 10th, but expected to "take on" 214 additional employees during the following week. Builders and contractors reported an increase of 362 men during the week of the 10th, but anticipated a net decline of 29 during the subsequent week. In the other industrial groups such changes as occur are wholly nominal.

The figures given above do not take any account of strikes.

Four employees of the Merchants Fire Insurance Co., of Toronto, who had just returned from overseas, were tendered a reception by the company on May 22nd. The first vice-president, Mr. G. R. Ryerson, pointed out that the growth of the company's business during the past few years, enabled the directors to offer the returned men better positions than those which they had left; he also presented them with one-half their salary during the entire period of enlistment.

ADDRESS:

THE MANAGER, BOND DEPARTMENT,
TORONTO 82

PERSONAL NOTES

Mr. Aemilius Jarvis, Jr., has been elected a member of the Toronto Stock Exchange.

Sir Mortimer B. Davis, recently elected a director of the United States Rubber Company.

Mr. A. J. Glazebrook, of the firm of Glazebrook and Cronyn, Toronto, has gone to England, and will be away about six weeks.

Mr. E. R. Wood, president of the Dominion Securities Corporation, has returned from a holiday in California, but [illegible] after his arrival in Toronto left for Ottawa.

Mr. C. F. Batchelder, who recently came to Montreal as vice-president and chief executive of the United Financial Corporation, Limited, was associated for a number of years with the Guaranty Trust Company of New York. The latter company, it will be remembered, was one of the parties which organized the United Financial Corporation. Mr. Batchelder has already arrived in Montreal, and has taken up his duties there. The United Financial Corporation, Limited, took over the business of C. Meredith and Company, Limited, and has succeeded to all that firms connections.

Canadian Newspaper Service Photo

Mr. E. W. Beatty, K.C., president and Mr. D. C. Coleman, vice-president of western lines of the Canadian Pacific Railway, have been in western Canada on a trip of inspection of the company's lines.

Mr. Gordon F. Rennie, has been appointed special agent of the British Columbia territory, by the Insurance Company of North America, which company has just opened an office in Vancouver.

Mr Charles Allen, formerly in charge of the Winnipeg branch, and of latter years on the staff of the home office of the Guarantee Company of North America, has been appointed an assistant secretary of the company.

Mr. A. G. McCandless, has resigned the office of inspector of federal taxes in British Columbia, which he has held for three years and will re-enter business life with his son, P. A. McCandless, by the establishment of a motor truck business.

Mr. J. Leonard Apelaide, has been appointed managing director of Messrs. Price Brothers and Company, Limited. For several years past, Mr. Apelaide has been resident partner of Geo. A. Touche and Company, chartered accountants, Montreal.

Mr. B. S. Webb, who has been Canadian Trade Commissioner in Argentina for nine years, is visiting manufacturing plants throughout Canada. Prior to entering the service of the Department of Trade and Commerce, he was living in South America and this is his first visit to Canada.

Mr. Arthur G. Fenwick has retired from the firm of Fenwick and Ryan, members of the Montreal Stock Exchange, the partnership agreement between him and J. R. Ryan having been dissolved. Mr. Ryan will retain his membership on the Exchange and will carry on business under the firm name of J. R. Ryan and Company.

Mr. J. Robertson, joint general manager of the Northern Assurance Company, Limited, of London, England, and Mr. A. H. Roberts, underwriter of the Indemnity Marine Insurance Company which is owned by the Northern Assurance Company, are now touring Canada. They passed through Toronto on their way west this week, accompanied by Mr. G. E. Moberly, manager for Canada, of the Northern Assurance.

Mr. F. D. Williams, of the London Mutual Fire Insurance Company, returned to Toronto a few days ago, after an absence of some weeks in London, England, where he concluded re-insurance arrangements for the company. He has now gone to Winnipeg, where he will reside and take charge of the western business. The London Mutual Fire was purchased a few weeks ago, it will be remembered, by Mr. Williams and Mr. A. H. C. Carson, of Toronto.

Mr. T. Fred Aspden has been appointed vice-president of the Park-Union Foreign Banking Corporation, which will open for business at 56 Wall Street, New York City, on June 1st, according to announcement made by the Union Bank of Canada, this week. Mr. Aspden, who resigned the vice-presidency of the American Foreign Banking Corporation to accept this latest appointment, is a former Canadian banker of prominence, and is well-known in Toronto, where he was at one time identified with the Canadian Bank of Commerce.

CANADIAN FIRE UNDERWRITERS' ANNUAL

The [illegible] annual meeting of the Canadian Fire Underwriters' Association will be held on June 24th at Bluff Point, New York State.

ALBERTA TRUSTS COMPANY, LIMITED

A new trust company, with provincial charter, has started business under the above name, with head offices in Edmonton. It is strictly a local company, and no stock is at present being offered to the public. The charter was secured four years ago, but it was considered that conditions did not warrant the commencement of business until the present time.

Although the company has obtained full trust company powers it will not for the present accept executorship of estates or take money on deposit for withdrawal without notice. It will act as an investment and financial agency, buying and selling bonds, loaning money on improved farm land security, and handling all branches of insurance. The company will have a direct London connection.

The active management includes C. S. Wallis, president; Geo. T. Bragg, vice-president and secretary, and J. J. Anderson, managing director. Mr. Wallis has been a resident of Edmonton for the past seventeen years, carrying on business as financial agent and trustee. Mr. Bragg has been engaged in real estate and in insurance in Edmonton for the past twenty-seven years. Mr. Anderson opened the branch of the Union bank in Edmonton in 1901, and was manager until 1917.

CALEDONIAN INSURANCE COMPANY

The report for the year 1918 of the Caledonian Insurance Co. shows that it has been quite able to keep pace with the keen competition and difficult conditions of the past year. This is the first complete annual report of the administration of the new manager, Mr. R. Hill Stewart, who succeeded Mr. [illegible] in that capacity in the latter part of 1917. The Caledonian is the oldest Scottish insurance company, having been founded in 1805. While the business activities are directed largely to the life department, it does a fire business on quite a large scale in different parts of the world, the American and Canadian branches playing quite an important part in this department of the company's activities.

The net fire premiums for the year amounted to $3,102,-[illegible], showing an increase of $366,940 for 1918, following an increase of $2[illegible]4,620 for the previous year over 1916. The satisfactory character of the increase in premiums is reflected in the loss ratio of 48.96, and, notwithstanding the unfavorable conditions under which business management has been carried on, owing to the high pressure of war conditions, the expense ratio shows the satisfactory figure of 35.90. The reserve for unexpired risks has been increased by the addition of $124,760, which, with the additional reserve of $1,[illegible],060 and $886,599 at credit of profit and loss, makes a total sum of $2,941,514 available for this purpose. The total funds of the company have increased during the past year from $21,100,575 to $23,066,193, an increase of $1,370,-4[illegible] for the year, which, considering the adversity of war conditions, is considered a very satisfactory statement by the manager.

The old "Caledonian" has been operating in Canada for nearly forty years, and is very widely known throughout the country, its agencies being scattered from coast to coast, as well as in Newfoundland. Mr. John G. Borthwick's administration as Canadian manager extends over a period of eight years, and during that time the progress of the company in Canada has been very substantial. The net premiums for the year 1918 for the Canadian fire business amounted to $467,411, an increase of $30,000 over 1917. This is exclusive of the income which the company receives from the investments of its life funds in Canada, which are quite extensive in the western provinces.

LOOK INTO CANADIAN ARCTIC RESOURCES

On the recommendation of Hon. Arthur Meighen, Minister of the Interior, a commission, consisting of J. G. Rutherford, of the Dominion Railway Commission; J. S. McLean, manager Harris Abattoir Co., Toronto; J. B. Harkin, Commissioner of Dominion Parks, and Vilhjalmur Stefansson, the Arctic explorer, has been appointed by the Dominion government to make a thorough enquiry into the potentialities of the Arctic and sub-Arctic regions of Canada as a grazing and food-producing country. Mr. Rutherford will be the chairman of the commission, which, apart from expenses, will serve without remuneration.

LIFE INSURANCE IN SASKATCHEWAN

Life insurance premiums collected by companies operating in Saskatchewan during 1918 amounted to $4,401,954, as compared with $3,787,423 the preceding year, an increase of over $600,000.

While there was a substantial increase in the premiums collected, there was also a big increase in the amount of the claims incurred and the claims paid. The total amount of the claims incurred was $1,789,921 as compared with $708,801 the previous year, an increase of over a million dollars. The increase in the amount of the claims paid was over a half a million dollars, the respective totals being $1,222,767 and $705,690.

The total amount of life insurance written by the thirty-four companies operating in the province last year amounted to $34,482,980, bringing the total amount of business of insurance in force as at the end of the year up to $133,572,067.

MERCHANTS BANK EARNS GOOD PROFIT

An excellent showing is made in the annual statement of the Merchants Bank of Canada, to be submitted at the yearly meeting of the shareholders of the institution on June 4th. Net profits for the twelve months ending April 30th last amounted to $1,383,569, an increase of $146,888 over those of a year ago, and $263,260 over the previous period. The year's profits represent an earnings ratio of 19.76 per cent. on the outstanding share capital of the bank, against 17.66 per cent. in 1918 and 16 per cent. in 1917. After distributing the sum of $805,000 among shareholders during the year, as compared with $700,000 in the previous year, and allowing for all deductions, including a writing off of $300,000 for premises, there remained to be carried forward into the current year's profit and loss account $574,043, against $437,973 last year and $421,293 in 1917.

A survey of the balance sheet of the bank discloses a position of record strength, and also the fact that the institution is playing a highly substantial part in the transition of the Dominion from war-time to peace conditions. Total assets show a growth of nearly $26,000,000, standing at $166,725,404 at the end of the last fiscal year. The liquid condition is well maintained, cash holdings of the institution standing at 18 per cent. of liabilities to the public, or approximately at the same level as a year ago, although the ratio of total liquid assets shows a slight contraction at slightly in excess of 41 per cent., as against an excess of 45 per cent. in the 1918 statement. This reduction, however, is more than accounted for in the increased deposits shown in the report, to which notice deposits contributed almost $16,000,000.

Current loans in Canada grew from $76,194,016 at the end of the 1918 period to $95,874,426 in 1919, an increase of nearly $20,000,000, indicating that the bank is contributing its full quota during the period of reconstruction following the end of the war. It has been announced that Lorne C. Webster had been elected to the board of directors of the institution.

BARRIE GAS COMPANY OFFERED TO TOWN

The town of Barrie has received an offer from the Barrie Gas Co. to sell its plant to the municipality for $30,000. Although this plant is long established, it has never paid dividends, and there have been deficits the last three years owing to increased operating expenses. The company is now controlled by the Canada Life Assurance Co., which recently acquired nearly all the stock. E. M. Saunders, of the Canada Life, Toronto, is president of the Gas Co.

TRADE MARK FOR CANADIAN PRODUCTS

The Canadian Pulp and Paper Association recently started on a quest for a trade mark such as could be used for the purpose of labelling and identifying all the pulp and paper products made by its members. The association invited suggestions from everybody interested and offered to pay $100 for the suggestion adjudged best adapted to the purpose in view, as well as to pay the price placed upon it by the person submitting it. The winning design shows an idealized spruce tree (the basis of the Canadian pulp and paper industry) enclosed in a triangle, around which the words, "Canadian Pulp and Paper Association" are disposed. At the back of the tree appears a rising sun whose radiating rays spread out to the inner lines of the triangle. In the right and left corners appear maple leafs, a Canadian national emblem, made universally familiar by its appearance on the shoulder-straps of the Canadian soldiers.

Used as a label and in other forms where the use of colors is practicable, the trade-mark will appear in three colors, the tree and the maple leaves in green, the orb and its radiating rays in red or orange and the rest of the design in black. When reproduced in this form the design appears very effective, while even in subdued black and white it has a distinction and character quite impressive. The design is to be registered as a trade mark. It will be used on all packages and boxes, etc., containing Canadian-made good paper and pulp products. In order to familiarize the Canadian public with its appearance, the association is planning an extensive advertising campaign in which the merits of Canadian-made paper will be extolled.

JUDGMENT AGAINST INSURANCE COMPANIES

In a judgment handed down by the Supreme Court of Canada at Ottawa, the courts may now relieve the insured from failure to give proof of loss within the time specified in fire insurance contracts, and the judgment of Mr. Justice Newlands and that of Mr. Justice Lamont are upheld. The judgment was given in the cases of Merchants Bank versus Glens Falls Insurance Co., New York, and Merchants Bank versus the British Dominions Insurance Co. This was an appeal from the Appellate Court of Saskatchewan, and the appeal by plaintiffs was allowed with costs. Chief Justice Davies and Justice Mignault dissenting.

The action occurred over a fire which destroyed a hotel at Margo, Saskatchewan, two years ago. The insurance companies at the time delayed paying claims pending investigation into the cause of fire. The Merchants Bank and Robert Sheppard, proprietor of the hotel, did not put in proof of loss until just prior to action for recovery in the courts. The companies refused to pay, alleging that proof of loss had not been put in in time specified in contract, and also alleged that the owner of the hotel had set fire to the building, this a privilege in their statement of defence. Action was taken to Regina before Mr. Justice Newlands, who gave judgment for the plaintiffs, Merchants Bank and Robert Sheppard. The judgment taken to the Appellate Court and reversed, Justice Lamont dissenting. The plaintiffs then took the case to the Supreme Court, which allowed the appeal with costs.

MEETING CALLED FOR BANK OF NOVA SCOTIA

A special meeting of the shareholders of the Bank of Nova Scotia is being called for July 8th for the purpose of electing directors in addition to those elected at the last annual meeting of the shareholders. This is in connection with the absorption of the Bank of Ottawa.

BRITISH AMERICA AGENTS IN THE MARITIME

The following have been appointed agents for the British America Assurance Co. automobile department, according to the announcement made by Mr. J. L. Johnston, manager of the automobile department of that company: Messrs. Rainnie and Keator, Ltd., Halifax, general agents for province of Nova Scotia, for the automobile department, and W. K. Rogers and Co., Ltd., Charolttetown, general agents for Prince Edward Island.

COBALT ORE SHIPMENTS

The following is a statement of the shipments of ore, in pounds, from Cobalt for the week ending May 23rd, 1919:—

Buffalo Mine, 88,000; La Rose Mine, 65,932; McKinley-Darragh, 83,175; Kerr Lake, 120,976. Total, 358,083.

The total since January 1st is 8,661,361 pounds, or 4,330.6 tons.

WEEKLY BANK CLEARINGS

The following are the bank clearings for the week ended May 22, 1919, compared with the corresponding period last year:—

	Week ended, May 22, '19.	Week ended, May 23, '18.		Changes.
Montreal	$126,194,719	$ 86,671,849	+	$39,522,870

Actuarial Society of America

Officers Re-Elected—Taxation of Life Insurance Companies—Critical Developments of Past Few Years—War Experience—Annuity Business

About one hundred and twenty members were present at the annual meeting of the Actuarial Society of America, held in New York on May 15th and 16th. The officers re-elected for the ensuing year were:—Henry Moir, president; Wm. A. Hutcheson, Arthur B. Wood, vice-presidents; Wendell M. Strong, secretary, and David G. Alsop, treasurer. D. E. Kilgour, actuary of the North American Life, Toronto, was among those elected members.

The address of President Moir was of outstanding interest, his subject being "Taxation, Especially in Its Bearing on Life Insurance." The first part of his address dealt with the general economic subject of taxation as developed by political economists from Adam Smith to date. It gave the accepted canons of taxation and outlined the best sources of revenue for a nation, showing that the taxation of capital is unthrifty, although that course may properly be followed in times of great emergency. The taxation of necessaries and of luxuries was also dealt with, showing that the former are positively harmful, while taxes on the latter may be properly imposed.

Passing from this subject, Mr. Moir referred to the taxation of life insurance, stating that while the questions are not necessarily clear cut and definite, nevertheless there is no doubt that life insurance is an enterprise for mutual good; therefore, it should be fostered by the nation. Moreover, it is more in the nature of a necessity than of a luxury, and it is in no sense income, but rather capital. Accordingly, following the generally accepted canons of justice and proper taxation, life insurance has an excellent plea for exemption.

He went on to show the many forms in which life insurance is taxed; the extent of the excessive taxation of premiums, of profits, of capital, even of excess profits which do not exist in any common sense viewpoint of life insurance. After this taxation during the continuance of the policy contract, there is still another drain when a claim arises, for the policy then becomes subject to inheritance taxes, Federal as well as State. The imposts upon insurance as affecting the public were discussed and explained.

He finished with a plea for the same exemption from taxation that is accorded to fraternal societies granting insurance benefits, and to savings banks, since the scientific life insurance company is a combination of these two sources for the encouragement of thrift.

"The most intelligent writers on taxation," Mr. Moir said, "have all urged exemption of the life insurance as being a tax upon thrift, prudence and frugality. Why should those steps taken to avoid losses and calamities to a nation be made a source of national revenue? It shows lack of intelligence, yet a careful student of the subject, F. L. Hoffman, writing several years ago, said: 'Life insurance companies are more heavily taxed than any other commercial interest, and the rate of taxation is increasing more rapidly than the growth of the business.'

"Not only are the taxes excessive; but the principles on which they are applied violate all the primary rules of just taxation. We have seen how there is lack of equality—how older men pay more than younger—how different states impose varying imposts, how a mutual company is taxed differently from a proprietary, and how there is a discrimination as between participating and non-participating insurance. The indefiniteness of the laws are another source of trouble—litigation has been frequent and more litigation seems inevitable, since it seems impossible for experts to agree on the meaning of many obscure sections.

"There may also be raised an interesting question as to whether the constitutional amendment authorizing an income tax will permit and cover the assessment of such a tax on the proceeds of policies payable to corporations and others.

"Many of the difficulties attending the Federal taxation of life insurance could have been avoided. A committee of experts in 1918 submitted another plan in lieu of the complex conglomeration now on the statute books. This substitute measure was approved by the Treasury Department, also by the Senate Committee. It was drawn as an emergency measure on simple and scientific lines to provide revenue while the war was still raging, and it would inevitably have granted the revenue desired. But in conference Committee Representative Kitchin showed that he distrusted, or failed to understand the measure, and insisted on his own original plan. Then with grim humor the influenza took a hand in the proceedings, and in the last month or two of the year wiped out any profits which Mr. Kitchin was attempting to tax.

"The total taxes paid by life insurance companies thirty years ago were represented by about 1.42 per cent. of the premium income. This figure has gradually increased to some 2.20 per cent. of the maximum premiums. If the computation were made upon the premiums actually paid by policyholders the rate would be about 2.70 per cent. for 1918, although the effect of the Federal tax laws of 1917 and 1918, had not yet become apparent in the published accounts of the companies. We may therefore say that the cost of insurance would be about 2½ per cent. less each year if the business interests of the people were studied in this question, which is both a national and a local issue.

"We have dealt with the multitudinous and complex forms of life insurance taxation; we have seen how the treatment, both of companies and of individual policyholders, runs counter to the best thought and best systems of taxation as planned for the common good; we have seen also how instead of the appropriation of public funds for building up this 'enterprise for mutual good' the enterprise itself is made to furnish a revenue for general State and Federal purposes; we have seen how there is a discrimination and inequality of taxation as between companies of different character and operating in different states; and lastly we have seen that the determination of the taxes payable is intricate through the ambiguous expressions often used and through the nature of life insurance which differs from that of ordinary commercial business.

"The power to tax is the power to destroy, and life insurance should be fostered, not hindered. We may therefore make a strong plea for some proper consideration being given to this large question, and especially we can claim that life insurance in its protective nature and in its building up of the capital assets of the country should have the same favorable treatment which is accorded to the fraternal orders, where in general pure insurance protection is granted, and the savings banks which, like life insurance companies, give evidence of the thrift of the people and form a means whereby middle class and poor people may accumulate small sums against the time of calamity and stress."

American-Canadian Mortality Experience

Mr. Arthur Hunter, chief actuary of the New York Life, dealt with the results of the American-Canadian mortality investigation which has recently been completed by the Acturial Society of America, with the co-operation of the American Institute of Actuaries and the National Convention of Insurance Commissioners—an American-Canadian Mortality Investigation. This investigation is based on the experience of life insurance companies of the United States and Canada during the years 1900 to 1915, inclusive, on policies issued from 1843 to 1914, inclusive, the number of policies investigated being about 1,800,000, and the investigation being on the basis of amounts so as to give financial results.

This table was the result of the feeling that the American Experience Table for insurance purposes in this

[illegible] was 50 years old and did not show true results, and should perhaps be superseded. The feeling particularly was that perhaps both premium rates and reserves would be reduced by a new table. The new table shows a very considerably lower mortality than the American table at the younger ages, the difference gradually decreasing until, from age 75 on, it was small.

A considerable part of Mr. Hunter's paper is devoted to examining the effect of using the new table for premium rates and reserves. With regard to premium rates he finds that if the mortality were taken on the new table and a rate of interest assumed, namely, 4½ per cent., which is higher than many state laws permit as a reserve basis, and which certainly is as high as could be assumed to be realized for 30 or 40 years to come, the companies could not well reduce rates under non-participating policies, unless they found some way in which to reduce expenses. In other words, he states that the loading in the present rates is not sufficient to cover expenses and contingencies, and it requires, in addition to this loading, just about the excess of the American Experience net premium over the net premiums by the new table with the very high assumed rate of interest of 4½ per cent.

The cases which he investigated would give a saving, but only about sufficient to make up the deficiency in loading. Thus, he concludes that the adoption of the new table would not make any great difference in non-participating rates. As regards participating premium rates, he calls attention to the fact that what such rates are is of comparatively little importance to the policyholder, provided dividends are distributed on a proper basis, since the dividends return what is left after the cost has been covered. In connection with this he points out that under certain methods of distribution of mortality profit those insured at the older ages would be treated more favorably than at the younger ages, by assuming that the mortality is that of the new table. In this connection, however, he recognizes and calls attention to the fact that since the new table has been completed we have had the influenza epidemic, which has made a great increase in mortality, such increase being almost entirely at the younger ages, so that if the influenza years had been included in those investigated the result at the younger ages would have been very different.

In connection with the reserves he finds that although the net premium on the new table, particularly at the younger ages, is considerably lower than under the American table, the reserves under ordinary life, and to less extent under limited payment life, would be higher, so that the reserve of the company as a whole, assuming its business to be 50 per cent. on the ordinary life, 30 per cent. on the limited payment life, and 20 per cent. on the endowment, with a typical distribution of ages, would be increased by about two per cent. If a company had a larger proportion of its business on the ordinary life, or if the proportion of the endowment were lessened it would increase the excess of the reserve of the new table over that of the American table.

In regard to the limitation of expenses under the New York statute, Mr. Hunter shows that on the basis of the new table the amount available would be much decreased because of the decrease in the mortality gains as compared with the assumed mortality gains in use.

Influenza Losses

Jas. D. Craig, assistant actuary of the Metropolitan Life of New York, and Dr. Louis S. Dublin, gave an elaborate analysis of the mortality caused by the influenza epidemic, based upon the experience of the Metropolitan which, at the end of 1918, had 17,750,000 industrial policies in force in the United States and Canada; 1,000,000 intermediate policies and nearly 900,000 ordinary policies. The company was, therefore, in close touch with the industrial classes, the middle classes, and, to a smaller extent, with the classes able to carry larger insurances. Charts were presented showing the mortality by cities, by classes of policies, etc. Referring to the experience on influenza and pneumonia claims incurred during October, November and December, 1918, Messrs. Craig and Dublin said:—

"Having studied the general mortality of the company during the year, the natural interest centres more directly on those claims caused in the last three months from influenza and pneumonia, and accordingly two charts are presented showing the mortality from influenza and pneumonia. In making these charts the claims incurred in December have been included, even though paid in 1919, as far as the records were available. The rate on industrial policies is higher than on intermediate, while the latter, in turn, is higher than on ordinary policies and so confirms the chart showing the total mortality in the three departments. Another chart shows the industrial influenza claims subdivided according to white males, white females, colored males and colored females, and also shows that influenza and pneumonia affected the colored males and females about the same, but caused more deaths among white males than among white females at all ages above 20. This again is in harmony with the charts showing that the industrial white males had higher mortality rates than the industrial white females at the older ages.

"The epidemic is still influencing ordinary claims, but the industrial mortality has become less than for the corresponding period of last year. For the six weeks ending April 29th, 1919, the number of industrial claims paid was over two per cent. less than the number paid for the corresponding period in 1918, while for the ordinary it was materially higher. The effects of the epidemic were felt quicker among industrial policies than among ordinary policies. For the week of October 8th, 1918, the industrial claims had increased to double those for the same period in 1917, whereas the ordinary had only increased 50 per cent. We cannot, therefore, complete our final investigation of the influenza and pneumonia deaths and this paper is presented at this time in order that the statistics available may be presented to the members. Such further data as become available during the summer may be added later."

Gain and Loss on Annuity Business

A discussion was presented by Mr. J. W. Tebbetts, of the Mutual Benefit, of the method of analyzing the sources of surplus from annuity business, special attention being given to the gain or loss on account of mortality and, in that relation, to the items entitled "Expected Disbursements to Annuitants" and "Reserves Expected to be Released by Death," mentioned in the gain and loss exhibit. Fundamental principles relating to a life annuity upon a single life, the income under which ceases with the last instalment preceding the annuitant's death, are set forth and the subject is then developed in relation to annuities payable other than annually, annuities apportionable to the date of the annuitant's death, joint annuities, joint and survivor annuities, reversionary annuities and deferred annuities. The analysis is carried out in considerable detail and the results are related to the usual approximations adopted in practice. Attention is given to the treatment of terminations and of new issues in the calendar year of observation.

Use of Formulae

Mr. E. G. Fassel, of the Imperial Life of Toronto, discussed the formulae used by various companies in computing the expected mortality on net amount at risk. In connection with this subject the author has obtained statements from 34 domestic companies concerning their methods in computing "Expected Mortality" under insurance contracts for the gain and loss exhibit. It was found that, while great diversity existed as to details the processes used divided themselves into two classes, the results attained in individual cases in one or other of these groups depending upon the methods of approximation adopted. One general principle is identified as C. D. Higham's, and consists simply in applying the tabular rate of mortality to the net amount at risk, that is, the excess of sums assured over the corresponding reserve, arranged by attained ages; the other is designated as G. F. Hardy's principle, and is defined as a recognition of the fact that reserves and net premiums are scientifically calculated to give proper effect to mortality and interest, so that by

Is It Fair to Make Your Friend Your Executor?

Perhaps you feel you honor him with your trust. You certainly burden him with a great responsibility. Few individuals can spare the time and few have the ability or experience to properly carry on the duties of Executor of an Estate. Our thirty-seven years experience in the care and Management of Estates and Trusts is evidence of our worthiness to be appointed your Executor Write for our Booklet, "Making Your Will."

[illegible] the rate of interest it is possible to obtain the expected mortality without having recourse to the rate of mortality. A theoretical investigation is presented of these [illegible] principles in various phases and the formulae used in [illegible] are fully considered in relation to the general [illegible]. Finally, the practical effect of various [illegible] is measured by applying them to a model company, [illegible] on simple lines but suited sufficiently to the requirements.

Things to be Considered.

A paper by D. H. Rose, president of the Maryland Life, dealt with the various financial phases of the last few years as affecting the life insurance companies, and the difficulties resulting therefrom in connection with maintaining the scale of dividends of recent years.

The depreciation in bond holdings was first examined and attention was called to the decrease in value of these, the decrease in a selected company from market values of December 31st, 1912, to the actual market value of December 31st, 1918, being shown to vary from two per cent. for State, city and county bonds to eleven per cent. for railroad bonds. The market value used, however, for 1918, was not the actual market value for that date, but an average value [illegible] determined by the commissioners. If the commissioners' valuation had been taken the decline would have been from two-thirds of one per cent. to about seven per cent. The figures did not include any securities of foreign countries. While Mr. Rose recognized that a decline in market value of bonds, so long as the bonds remained good, was of no particular importance to life insurance companies, he calls attention to the fact that some bonds which have been in the past extremely good, can now, with the peculiar situation of railways and street railways, be put in the doubtful class.

A second important item affecting the financial results of the companies was the percentage of the actual to the expected mortality, which he found for every one of thirty companies he examined to be considerably larger than for the average of the preceding five years, the average of these percentages for the various companies being one-half as much again for 1918 as for the preceding five-year period. It was found also that the higher rate of mortality for 1918 caused a loss to the companies of about 25 per cent. of all the surplus of these companies.

The fact was set out that in all probability extra mortality due to the influenza, and also an extra mortality due to strain of the war may be expected for at least several years to come, this adding another unfavorable financial influence.

The question was asked on the other hand whether this will not be compensated for by increased interest earnings from the ability to invest in recent years on a much more favorable interest basis than heretofore. The answer was that the government bonds in which the companies have had to invest so heavily return a lower rate than the average earned by funds of most companies.

The item of increased expenses was also considered, and the conclusion reached was that the insurance companies cannot [illegible] this any more than other lines of business.

Mr. Rose said in conclusion:—

"Bond depreciation, heavy mortality, increased expenses from increased prices, increased expenses for the time being from an abnormally large volume of new business, all these things are to be considered in connection with dividends or return premiums.

"Before 1905 the older actuaries thought it better to keep a larger percentage of surplus than has of late years been regarded as at all necessary. Perhaps they were right. At any rate is it not the part of wisdom for all the companies now to try to increase surplus, and is there any practicable way of doing it under existing conditions but by greatly reducing [illegible] for a while? It is a question for each company to solve with reference to its own condition and [illegible], but to increase the surplus of any company just now can do no harm and may avoid difficulties hereafter."

Heart Murmurs and Mortality

In a paper on "heart murmurs," Dr. Oscar H. Rogers and Arthur Hunter, chief medical director and chief actuary, respectively, of the New York Life, gave the experience of the New York Life on the various classes of heart murmurs accepted under substantial insurance. The experience was a large one, considering that it dealt with substantial risks, and was the first of its kind to be made public. An examination of the different kinds of heart murmurs, with the mortality as compared with the standard M.A. table, was made.

Under mitral regurgitation without hyperthropy or other impairments, which forms the largest group, the percentage of actual to expected deaths was found to be 181 per cent. A subdivision was made to determine the effect of build, and it was found with the underweights the mortality was the lowest, with the overweights the highest. The authors qualified the results, however, in regard to this by saying that "the amount of material available is hardly sufficient to justify a very positive statement on this subject."

In the class of mitral regurgitation with hypertrophy, a ratio of actual to expected of 225 per cent. was found. Cases where mitral regurgitation was associated with the history of inflammatory rheumatism formed a separate class. Where there was no hypertrophy, the ratio of actual to expected was found to be 299 per cent. Where there was also hypertrophy, it was found to be 455 per cent.

In the group of aortic obstruction without hypertrophy but with other minor impairments, the ratio of actual to expected was found to be 179 per cent.

With functional heart murmur the ratio of actual to expected was 114 per cent.

Some of the groups were small and the number of deaths few, so that the percentage should be taken only as reflecting the general tendency of such groups.

GUARANTEE AGAINST RE-EXPORT NOT NEEDED

Foodstuffs of all descriptions may now be sent to Norway, Sweden, Denmark, Holland and Switzerland direct to purchaser without the guarantees against re-export required until recently. The information, which is of importance to Canadian exporters, is conveyed in a cablegram from the Canadian Mission to the Canadian Trade Commission at Ottawa. Other goods may be sent to Norway, Sweden, Holland and Switzerland consigned to the appropriate associations for named sub-consignees. Owing to the fact that the Danish Association is unwilling to accept goods for sub-consignees, it is considered inadvisable to consign goods other than foodstuffs to Denmark without the usual guarantees.

PRICE OF STEEL PLATES REDUCED

As the price of steel plates which the Dominion government contracted for with United States firms has gone down from $3.25 a hundredweight to $2.75 a hundredweight, the government will, on that account, get its ships a little cheaper than it had anticipated. The government's contract with the firms of Pittsburg called for a maximum of $3.25, and for anything less if the price goes lower.

It is possible that the price will go still lower. The government will buy the steel at the Pittsburg price and sell to shipbuilders throughout Canada at $3.25 a hundredweight. This will mean a profit of $10 a ton, which the government can apply to reducing the cost of its ships. For one of the standard 8,100-ton ships 2,800 tons of steel plates would be used, so that on each ship the government will save $28,000. As many of the Pittsburg furnaces have been closed down and painted for lack of orders to keep them running, there will be no difficulty for some time in the government securing any steel it may need, for shipbuilding steel is the only material used in shipbuilding on which a drop in price has been reported.

BRITISH INDUSTRIES FAIR

Canadian Companies Exhibits Admitted for the First Time, Provided Control is Not Foreign

THE British Industries Fair, 1920, will be considerably expanded in its scope, according to a statement which has just been issued by the Department of Overseas Trade, Development and Intelligence. The arrangements, so far, make it probable that there will be sufficient space for the manufactures of suitable Dominion firms to be included. The fair is confined to British manufacturing firms, and the definition of a British firm, in this instance, is a firm whose principal works and head offices are situated within the British empire and which is not controlled by foreign interests. Canadian manufacturers, therefore, coming within that definition, will be eligible as exhibitors.

In order to assist manufacturers who have no British representatives to arrange for the erection of their stands, the Department of Overseas Trade, Development and Intelligence will undertake the work on their behalf, but it will be necessary for firms who have no representatives, to pay in advance not only 2s., in the case of the fairs being held in London and Glasgow, and 3s. 6d. in Birmingham, per square foot of floor space applied for; but, in addition to the above, 3s. per square foot for the erection of their stands. For example, a firm making application for 100 square feet at London or Glasgow would have to pay in advance the total sum of £25, whereas a firm requiring 100 square feet at the Birmingham Fair would have to pay £32 10s.

Not only do the department reserve to themselves the right to allot space in any position, but also to allot any less amount than that for which applicants have asked. In the event of applicants applying and paying in advance for more space than can eventually be allotted to them, the difference will of course be refunded.

The actual regulations for the coming fair have not yet been drawn up, but there is no doubt that they will differ only in minor details from the regulations of the fair recently held. A regulation which is particularly important to Canadian firms is regulation 10, which states that each stand or exhibit must be in the charge of a competent representative.

For the coming fair in London the department has secured the Crystal Palace, the largest exhibition building in the world. The fair in Glasgow is organized by the municipality of the city of Glasgow with the support of and under the auspices of the British government's Board of Trade. The Birmingham committee are also acting under the auspices and with the support of the British government's Board of Trade.

The three fairs, though held in different cities (London, Birmingham and Glasgow), are in reality one fair. They are held concurrently, each fair representing a specified group of industries, and no one industry being permitted to exhibit at two fairs.

It is anticipated that there will be several thousand exhibitors at the 1920 fair in London alone. There is also every reason to anticipate that several thousand overseas buyers will visit the fair.

In view of the fact that admission to the fair is confined to trade buyers only, the general public not being admitted, it is satisfactory to be able to record that about [illegible] different visitors entered the fair during the eleven days it was open this year, and between them placed orders amounting to close on £2,000,000.

The British Industries Fairs are not exhibitions. They are trade fairs to which admitance is restricted to bona-fide trade buyers seriously interested in the participating trades, and admission is by invitation only.

The fair will be open on Monday, February 23rd, and close on March 5th.

Copies of the regulations and full particulars with regard to the coming fair, as well as catalogues of the fair just held, may be seen at the offices of the British Government Trade Commissioners in Canada. Applications for space from eligible manufacturing firms in Canada can be received only through the British Government Trade Commissioners in Canada, as follows: Montreal, 367 Beaver Hall Square (G. T. Milne, O.B.E.); Toronto, 260 Confederation Life Building (F. W. Field); Winnipeg, 610 Electric Railway Chambers (L. B. Beale).

RAILWAY PASSENGERS ASSURANCE COMPANY

The Railway Passengers Assurance Co. is the oldest accident company in the world, having been founded in 1849, when the railway mileage of the world was comparatively small, with the object of insuring passengers against accidents. Since that time, however, the operations of the company have extended to other lines of insurance, such as guarantee, motor car, plate glass, burglary, general accident, etc. In 1902, Mr. F. H. Russell brought the company out to Canada, and, during that interval, under his careful management, the company has increased its Canadian business steadily. It is now writing insurance in every province of the Dominion. The total premium income in Canada in 1918 was $315,000, against $247,000 in 1917. Going back to 1913, it is found that the company in that year had a premium income of $192,000 which, compared with 1918, shows a gratifying increase of $123,000. The figures quoted above indicates a substantial growth in Canada of this old and strong insurance company.

Total premiums were $2,908,450 and interest and dividends in the revenue account made an additional $66,475. Payments on policies, including medical and legal expenses, totalled $1,106,115, commissions $399,715 and expenses $561,765. The reserve funds were increased from $1,770,665 at the beginning of the year to $2,028,135 at the end of the year. A balance of $651,860 was carried to profit and loss. Interest and dividends to the amount of $113,745 were also added to profit and loss, and after paying dividends of $150,000 and providing for income tax and bad debts, a balance of $2,434,240 was carried forward in this account, as compared with $1,925,560 brought forward from last year.

The assets now total $5,757,715, of which over $2,000,000 are invested in British government securities. The substantial amount of $1,200,000 is kept at loan on stocks and shares. In addition to the reserve and balance at the credit of profit and loss, the only liability is about $300,000 made up of miscellaneous accounts due, etc. The paid-up capital is $1,000,000. The financial strength of this company is obvious, as the balance at profit and loss is more than the reserve and there are, in addition, assets covering the paid-up capital and sundry liabilities.

TRADE COMMISSION RULES ON FOREIGN ORDERS

A number of conditions to guide trade group organizations in allotting foreign orders under the credits establishment have been issued by the Canadian Trade Commission. They are briefly as follows:—

(1) No discrimination against any manufacturer because of his not belonging to any organization.

(2) Manufacturers getting orders must be manufacturing, or equipped to manufacture, a similar class of goods to that in the order.

(3) Executives of any export organization can refuse orders to manufacturers whom they believe to be not in a position to produce a satisfactory article.

(4) Manufacturers not able to complete orders received cannot arrange for manufacture elsewhere.

(5) Manufacturers can appeal from ruling of executive of export organization to the Trade commission.

(6) Commission must confirm all allotments.

(7) Commission will withdraw orders again from manufacturers not speedily conforming to standard of products required.

AUDITORS' REPORT

We beg to report that we have, from time to time in the course of the year, audited the Accounts of the Company, and that we have verified the whole of the Investments at 31st December, 1918, with the Documents of Debt and other vouchers.

We have further to report that we have obtained all the information and explanations we have required, and that in our opinion the foregoing Balance Sheet is properly drawn up so as to exhibit a true and correct view of the state of the company's affairs, according to the best of our information and the explanations given to us and as shown by the books of the Company.

IMPERIAL BANK OF CANADA

Forty-Fourth Annual Meeting of the Shareholders

Held at the Head Office, Toronto, Wednesday, May 28th, 1919, at 12 Noon.

The Forty-fourth Annual General Meeting of the Imperial Bank of Canada was held in pursuance of the terms of the Charter at the Banking House of the Institution May 28th, 1919.

THE REPORT

The Directors have pleasure in presenting to the Shareholders the Forty-fourth Annual Report and Balance Sheet of the affairs of the Bank as on 30th April, 1919, accompanied by statement of Profit and Loss Account, showing the result of the operations for the fiscal year.

The balance at credit of Profit and Loss Account carried forward from last year was	$1,204,942.91
The net profits for the year after deducting charges of management, Auditors' fees and interest due depositors and after making provision for bad and doubtful debts and for rebate on bills under discount amounted to	1,247,516.75
Making a total at credit of Profit and Loss Account	$2,452,459.66

This amount has been applied as follows:—

Dividends at the rate of 12% per annum	840,000.00
Annual Contribution to Officers' Pension and Guarantee Funds	42,500.00
Special Contribution to Pension Fund	100,000.00
Contributions to Patriotic and other War Funds	34,500.00
War Tax on Bank Note Circulation	70,000.00
Transferred to Reserve Fund	500,000.00
Balance of Account carried forward	865,459.66
	$2,452,459.66

Branches of the Bank have been opened during the year as follows:

In Alberta: Bear Lake, Crossfield, Daysland, Edson, Grande Prairie, Greencourt, Rocky Mountain House, Sangudo, Spirit River, Sylvan Lake, Waterhole.

In British Columbia:—Kimberley.

In Manitoba: Gimli, Riverton.

In Quebec:—St. Jovite Station.

In Ontario: Toronto—Danforth and Carlaw, Queen and Carlaw, St. Clair and Boon, Leaside; Simpson Street, Fort William; Grand Valley, Glenmorris, Kirkland Lake, Port Robinson, Queenston, Richards Landing, Smooth Rock Falls, Welland South, Waldemar.

In Saskatchewan: Canwood, Dafoe, Edenwood, Fielding, Hepburn, Krydor, Lestock, Piapot, Waldheim.

The following branches have been closed:—

In Ontario: Iroquois Falls, Leaside and Mount Dennis.

In Saskatchewan: Kandahar and Lestock.

Since the close of the fiscal year branches have been opened at Colinton, Rockfort and Whitecourt, Alberta; Westminster and Arlington Sts., Winnipeg, Manitoba; Matheson and Nobleton, Ontario.

The Head Office and branches of the Bank have as usual been carefully inspected during the year and the Auditors appointed by the Shareholders have also made their examinations as required by the Bank Act. Their Report and Certificate will be found attached to the Balance Sheet. They offer themselves for re-appointment.

It is with much regret that your Directors have to report the death during the year of Mr. Cawthra Mulock, and Hon. W. J. Hanna, K.C. Their places on the Board have been filled by the appointment of Mr. Frank A. Rolph and Mr. Robert S. Waldie.

Owing to ill-health, Mr. Edward Hay was obliged during the year to relinquish his position as General Manager. His place has been filled by the appointment of the Assistant General Manager, Mr. William Moffatt, who has been in the service of the Bank since 1881.

The Directors have pleasure in again testifying to the satisfactory manner in which the officers of the Bank have discharged their respective duties.

All of which is respectfully submitted.

PELEG HOWLAND, President.

LIABILITIES

Notes of the Bank in circulation		$ 11,870,723.00
Deposits not bearing interest	$21,486,089.28

AUDITORS' REPORT TO SHAREHOLDERS

We have compared the above Balance Sheet with the books and accounts at the Chief Office of Imperial Bank of Canada and with the certified returns received from its Branches, and after checking the cash and verifying the securities at the Chief Office and certain of the principal Branches on 30th April, 1919, we certify that in our opinion such Balance Sheet exhibits a true and correct view of the Bank's affairs according to the best of our information, the explanations given to us and as shown by the books of the Bank.

In addition to the examinations mentioned, the cash and securities at the Chief Office and certain of the principal Branches were checked and verified by us during the year and found to be in accord with the books of the Bank.

All information and explanations required have been given to us and all transactions of the Bank which have come under our notice have in our opinion been within the powers of the Bank.

G. T. CLARKSON, F.C.A.
R. J. DILWORTH, F.C.A.
of Clarkson, Gordon and Dilworth.

The customary motions were made and carried unanimously.

Mr. G. T. Clarkson, F.C.A., Toronto, and Mr. R. J. Dilworth, F.C.A., Toronto, were appointed Auditors of the Bank for the ensuing year.

The Scrutineers appointed at the meeting reported the following Shareholders duly elected Directors for the ensuing year: Messrs. Peleg Howland, Elias Rogers, William Ramsay (of Bowland, Stow, Scotland), William Hamilton Merritt, M.D. (St. Catharines), Sir William Gage, Sir James Aikins, K.C. (Winnipeg), John Northway, J. F. Michie, Sir James Woods, E. Hay, Frank A. Rolph, R. S. Waldie.

At a subsequent meeting of the Directors Mr. Peleg Howland was re-elected President, and Mr. Elias Rogers Vice-President for the ensuing year.

PELEG HOWLAND, President. W. MOFFAT, General Manager.

BOND REGISTER

A convenient bond register has been prepared by R. C. Matthews and Co., bond dealers, Toronto. In this book all essential information regarding a bond can be recorded, such as number, maturity, interest yield at the price paid, etc. Columns for recording the interest dates are arranged so that payments in any month can be easily picked out.

New Issue

Mattagami Pulp 7% Convertible Debentures

Investors who have purchased into sound Canadian pulp and paper companies when they were in their early stages have secured high yields and eventual large profits.

The Mattagami Company is as well situated for low cost operation as any company we know of in the east. In the long run low costs mean high profit.

These debentures yield 7½% at the issue price and are convertible at any time in the next 10 years into common stock.

We have purchased a portion of this issue and recommend it as a well secured investment with prospects of eventual appreciation.

LA BANQUE NATIONALE STATEMENT

The financial statement of La Banque Nationale for the year ended 30th April, 1919, has just been issued, and shows a substantial increase in assets. These were $50,433,531 on April 30th, compared with $41,195,179 at the end of the previous year. In this growth the total quick assets have kept pace, amounting to $23,181,829, compared with $15,585,871 a year ago, showing an improvement of $7,595,958. Profits for the year were larger, being $533,450, against $435,283 in the preceding year, and the total available for distribution, including last year's balance from profit and loss, was $568,699. Out of that total $520,000 was distributed, leaving a balance of $48,699, which compares with a carry-over of $35,249 a year ago. The management made another reservation of $100,000 for the reserve fund, bringing the total up to $2,200,000, compared with the total paid-up capital of $2,000,000. An additional $100,000 was set aside for depreciation on securities and for contingencies. Other provisions and write-offs are slightly increased.

RAILROAD EARNINGS

The following are the earnings of Canada's transcontinental railways for the first three weeks in May:—

Canadian Pacific Railway

	1919.	1918.	Inc. or dec.
May 7	$2,856,000	$3,033,000	—$177,000
May 14	2,959,000	3,109,000	— 150,000
May 21	2,957,000	2,847,000	+ 110,000

Grand Trunk Railway

May 7	$1,130,352	$1,069,998	+ $ 60,354
May 14	1,181,138	1,118,634	+ 62,504
May 21	1,214,465	1,167,270	+ 47,195

Canadian National Railways

May 7	$1,543,413	$1,393,791	+ $149,622
May 14	1,727,076	1,463,167	+ 263,909
May 21	1,770,271	1,543,062	+ 227,209

YIELDS ON INVESTMENTS IN STOCKS AND BONDS

The following table of investment yields of stocks and bonds has been compiled for *The Monetary Times* by Messrs. MORROW & JELLETT, Members Toronto Stock Exchange, 103 Bay Street Toronto:—

May 28th, 1919.

Subscription lists will close on or before June 15th, 1919

New Issue

MONTREAL, May 29th, 1919

$2,000,000

Mattagami Pulp & Paper Company
Limited

7% Convertible Sinking Fund Mortgage Debenture Stock

Dated May 1st, 1919. Due May 1st 1949

Interest ($35 every six months on each $1,000 of Debentures) payable on May 1st and November 1st. Principal and Interest payable at Montreal, Toronto, New York or London, England

DENOMINATIONS: $100 and multiples thereof

The Company may redeem Debentures as a whole within ten years at 1[illegible] and accrued interest, and at 10[illegible] and accrued interest at any time after ten years.

CAPITALIZATION

	Authorized	Outstanding
Common Shares	$[illegible],000,000	$[illegible],000,0[illegible]
7% Cumulative Preferred Shares	[illegible],000,000	[illegible]
6% First (Closed) Mortgage Sinking Fund Bonds	2,000,000	1,[illegible]
7% Convertible Mortgage Debenture Stock	[illegible],000,000	[illegible],000,000

MAY BE EXCHANGED FOR COMMON SHARES

Holders may exchange Debentures for an equal par value of Common Shares at any time up to May 1st, 1929. If Debentures are redeemed by the Company (at 115 and accrued interest) before May 1st, 1929, holders will have three months' notice of the Company's intention to redeem them, during which time the exchange may be made.

SECURITY FOR MORTGAGE DEBENTURES

Debentures will be secured, subject to the lien of the First Mortgage Bonds, by direct Mortgage upon all the Company's extensive Freehold and Leasehold Lands and Water-powers, upon all Plants and Properties now owned or hereafter acquired, and by a floating charge upon all the Company's other Assets.

SINKING FUND TO RETIRE DEBENTURES BY MATURITY

The Trust Deed provides for an annual cumulative Sinking Fund commencing May 1st, 1924, amounting to 2% of the total Debentures issued. It will retire the total issue by maturity.

A Sinking Fund is already in operation which will retire First Mortgage Bonds at maturity.

THE COMPANY

Complete prospectus (copies of which will be mailed on request) contains a letter from the President of the Company, from which we summarise as follows:

1. **Mattagami Pulp & Paper Company, Limited,** operates a modern and up-to-date plant at Smooth Rock Falls, Ontario, for the manufacture of high-grade Sulphite Pulp.

The Company's limits and plant are almost adjacent to those of the Abitibi Power and Paper Company, Limited. Their location with reference to markets is ideal, the National Transcontinental Railway furnishing direct outlets to the Atlantic and Pacific seaboards and intermediate markets.

The Company also owns its own Townsite at Smooth Rock Falls, an extensive development embracing Hotel Property, School House and Dwellings, also Water, Electric Light and Sewage Systems.

2. **Annual Capacity**—45,000 tons Easy Bleaching Sulphite Pulp. Present production 30,000 tons per annum, now being increased to 45,000 tons by addition of new drying machine expected to be in operation October, 1919.
3. **Pulpwood Lands**—810 square miles of Leasehold and 125 square miles of Freehold Lands situated adjacent and tributary to the Mattagami watershed in Northern Ontario—containing more than 4,000,000 cords of spruce pulpwood.
4. **Capacity of Water Powers**—18,000 horse-power, of which 9,000 horse-power is developed.
5. **Value of Assets**—$8,000,000.
6. **Funded Debt**—$3,933,500 including the $2,000,000 issue of 7% Convertible Mortgage Debentures.
7. **Net Earnings** for six months ending October 31st, 1918, certified by Clarkson, Gordon and Dilworth, available for Interest and Depreciation amounted to $302,306.18, against Interest Charges of $97,000.

Earnings for the next twelve months estimated at $750,000, as against $256,010 Interest on whole Funded Debt, including this issue.

A large portion of this issue has been sold in the United States and in Canada. We offer for sale the unsold portion of the balance at

94 and accrued interest, yielding over 7½%

Payable as follows: *20% of the par value on application.*
40% of the par value on June 20th, 1919.
34% of the par value on July 20th, 1919.

Interest will be allowed on payments at the rate of 7% per annum. Payments may be anticipated in whole or in part at any time. Accrued Interest will be adjusted upon final payment.

Of the deposit in Central Gold Reserves $10,500,000 is in gold coin; the balance is in Dominion Notes.

T. C. BOVILLE, *Deputy Minister of Finance*

NEW YORK BROKERS OPEN IN MONTREAL

Sutro Brothers and Co., of New York, announce the opening of their Montreal office at 57 St. Francois Xavier Street. This office is a branch of the head office at 120 Broadway, New York, and is opened for the conduct of a general banking and brokerage business in conjunction with the New York office. It is intended primarily to furnish to the members of the Montreal Stock Exchange service upon the stock exchange in New York. Private wires connect the Montreal and New York offices. Lieut.-Col. Stancliffe W. Watson, who has recently returned from overseas, is the manager of the new office.

The Imperial Oil Co. is conducting extensive experiments for oil resources in Northern Alberta. It is expected that a well will be drilled this summer on the Mackenzie River.

April Bank Statement

Savings Deposits Close to Record of October 1918.—Slackening of Business Indicated By Decline of Current Loans—Circulation Increased

	April. 1918.	March. 1919.	April. 1919.	Year's inc. or dec.	Month's inc. or dec.
Deposits on demand	$558,509,221	$ 566,797,268	$ 571,112,857	+ 2.3	+ .9
Deposits after notice	933,644,668	1,037,851,766	1,070,985,080	+14.7	+ 3.2
Current loans in Canada	884,089,402	1,117,197,446	1,107,986,523	+25.2	— .9
Current loans elsewhere	99,267,660	123,984,608	125,328,561	+26.2	+ 1.6
Loans to municipalities	55,685,350	11,993,305	47,911,199	—14.6	+14.6
Call loans in Canada	77,497,360	87,601,337	86,091,844	+11.7	— 1.2
Call loans elsewhere	179,818,531	160,116,443	155,533,666	—13.4	— 3.1
Circulation	192,969,079	216,529,576	223,763,426	+16.2	+ 3.2

An easier tendency in general business conditions, with slightly lower prices in the case of some commodities, is reflected in the statement of Canadian chartered banks to the Dominion government. The principal changes, as compared with the previous month and one year ago, are indicated above. The April statement will be found in full on pages [illegible] of this issue.

The following table gives record of deposits for the past thirteen months:—

	Deposits payable on demand.	Deposits payable after notice.
1918—April	$558,509,221	$ 933,644,668
May	535,655,731	947,757,337
June	549,327,078	965,934,556
July	549,068,651	992,015,137
August	554,906,517	1,014,711,865
September	588,940,119	1,037,498,920
October	644,220,998	1,076,514,627
November	666,366,359	939,329,271
December	711,034,060	958,473,557
1919—January	623,919,410	990,000,085
February	566,775,434	1,018,184,512
March	566,797,268	1,037,851,766
April	571,412,857	1,070,985,080

The course of the deposits account during the past six years is shown in the following table:—

April	On demand.	After notice.	Total.
1914	$350,515,993	$653,679,223	$1,004,195,216
1915	347,325,937	686,075,124	1,033,401,061
1916	402,060,955	748,359,957	1,150,420,912
1917	471,312,285	874,948,724	1,346,261,009
1918	558,509,221	933,644,668	1,492,153,889
1919	571,412,857	1,070,985,080	1,642,397,937

The trend of the Canadian loans account for the past thirteen months is shown in the following table:—

Loans.	Current in Canada.	Call in Canada.
1918—April	$ 884,089,402	$77,497,360
May	894,817,113	78,466,582
June	897,226,012	76,970,920
July	905,677,233	74,382,762
August	920,775,269	73,509,571
September	942,802,018	74,137,860
October	1,003,593,603	73,685,136
November	1,082,709,655	85,675,063
December	1,075,640,003	89,120,423
1919—January	1,080,340,861	87,598,427
February	1,095,301,791	79,154,121
March	1,117,197,446	87,601,337
April	1,070,985,080	86,091,844

The following table shows the course of the principal loan accounts during the past six years:—

April.	Current loans in Canada.	Current loans elsewhere.	Call loans in Canada.	Call loans elsewhere.
1914	$ 835,705,064	$ 54,362,513	$68,523,774	$139,937,027
1915	762,931,851	37,705,039	68,599,095	121,522,971
1916	777,764,682	57,008,965	82,572,448	147,146,443
1917	880,523,897	86,058,220	82,737,417	159,156,054
1918	884,089,402	99,267,660	77,497,360	179,818,531
1919	1,070,985,080	125,326,561	86,091,844	155,533,666

Cable transfers	4.7720	4.7760	Nominal

Sterling demand in New York, 4.63⅛, nominal.
Bank of England rate, 5 per cent.

MATTAGAMI PULP AND PAPER ISSUE

The issue of mortgage debenture stock of the Mattagami Pulp and Paper Co., Ltd., to which reference was made in these columns several weeks ago, is now being offered to the public by the Royal Securities Corporation, Ltd., at 94 and accrued interest, yielding over 7½ per cent. The total issue is $2,000,000, the stock being dated May 1st, 1919, and due May 1st, 1949, with interest payable semi-annually. In point of security this stock ranks second to the issue of 6 per cent. first mortgage sinking fund bonds of which $2,000,000 were issued and $1,933,500 are now outstanding, the remainder having already been retired under the sinking fund arrangement. Total assets are valued at $8,000,000, so that the margin of security appears to be ample. Coming after the present issue is the preferred stock, outstanding to the amount of $1,500,000, and the common stock, outstanding to the amount of $2,000,000.

As the stock is convertible into common stock an opportunity will be available to share in profits should conditions be sufficiently favorable. Provision is also made, it will be noted from the prospectus elsewhere in this issue, for a sinking fund at the rate of 2 per cent. per annum, which will retire the total issue by maturity.

A continued demand for Canadian Pulp and Paper products is assured and the fact that the raw materials of this industry are undoubtedly being depleted, makes practically certain the maintenance of the values of timber limits and other properties.

AUDITORS' CERTIFICATE AND REPORT.

We have audited the Balance Sheet of the Company dated 31st December, 1918, as above set forth, and have obtained all the information and explanations we have required.

The Assets and Liabilities appearing in the Balance Sheet include those which constitute the Funds representing the security of the Policy Holders of the Eagle Insurance Company, the Star Assurance Society, Limited, the Sceptre Life Association and the English and Scottish Law Life Assurance Association. Our audit does not embrace those Funds which have been certified and reported upon by their respective Auditors. The Assets and Liabilities included in respect of sundry other companies taken over during the year are as shown by the respective balance sheets of these companies which have not been included in our audit.

With the exception of the certificate for Rbls. 100,000 Russian 5½% War Loan (costing £5,948-6-9) which is deposited in Russia, we have satisfied ourselves that the investments and cash balances as at 31st December, 1918, were either in the Company's possession or deposited as security. The Stock Exchange securities which are shown in the Balance Sheet at cost have been valued as at 31st December, 1918, by the Company's Brokers, and the depreciation disclosed by such valuation is more than covered by the amount of the Investment Reserve Fund.

We report that, subject to the above observations, we are of opinion that the Balance Sheet is properly drawn up so as to exhibit a true and correct view of the state of the Company's affairs according to the best of our information and the explanations given us, and as shown by the books of the Company.

IMPERIAL BANK PROGRESS

The annual meeting of the Imperial Bank of Canada was held on Wednesday, May 28th, in Toronto. The financial results for the year, which were very satisfactory, have already been reviewed in these columns. The president, in his address, referred to the number of branches which had been established during the year. These numbered by provinces as follows: British Columbia, 1; Alberta, 12; Saskatchewan, 9; Manitoba, 2; Ontario, 15; Quebec, 1. Since the close of the fiscal year on April 30th, 1919, six more branches have been opened.

FRANK ROLPH.

Two new directors have been appointed in the persons of Mr. Frank A. Rolph, of Rolph, Clarke, Stone, Ltd., and Mr. R. S. Waldie, vice-president of the Victoria Harbor Lumber Co. and president of the Toronto Paper Co. These appointments fill vacancies caused by the deaths of Hon. W. J. Hanna and Mr. Cawthra Mulock. Mr. Rolph served as a member of the Canadian War Board at Washington.

R. S. WALDIE.

In his address to the shareholders Mr. Peleg Howland said:—

"We are looking forward to reasonably good results this year, though conditions are very uncertain and expenditures must of necessity increase, for we are endeavoring to take into service every member of the staff who left to enlist in good standing and who returns fit, and are, as far as possible, reinstating them on salaries equivalent to those they would have received had they remained at work. We all realize, with heartfelt gratitude, that the great conflict has ceased, but peace has not been signed, and the peace problems are quite as complex as during the period of active warfare. Labor of all kinds is being paid at rates impossible of belief in the past, and further advances are being demanded, with fewer working hours, and in some cases other concessions that must affect output. How, under the conditions described, is it possible either to produce or distribute goods at low cost, and how can any other notion be formed than that we are in for a further period of high prices, with apparent prosperity and perhaps further inflation?"

Mr. Elias Rogers, vice-president, in seconding the resolution, expressed sympathy with the cause of labor, and hoped the leaders would not be led to extremes.

The future was also discussed by general manager William Moffatt. "We must not overlook the fact that the war is now over," he said, "and war contracts at an end. What effect this will have upon deposits is yet to be seen. To me it appears not unlikely that, for a time at least, the banks will find great difficulty in keeping up normal strength in this department, and I shall be agreeably surprised if some shrinkage is not shown in our next statement." Mr. Moffatt feared some portion of the expanded note circulation must be attributed to inflation in prices, and added: "We must not overlook the fact that we are entering a period of reconstruction, and a period in which the rates of interest may fall, and a period in which it will be more difficult to show as satisfactory profits."

Dr. Wm. Hamilton Merritt, of St. Catharines, one of the directors, was welcomed back after four years' service at the front, and delivered a brief address.

NATIONAL STEEL CAR COMPANY

The negotiations between the American Car and Foundry Co. and the National Steel Car Co., of Hamilton, Ont., for the sale of the latter have been broken off. The terms proposed by the American company were unsatisfactory. They offered to put up $500,000 with the bank as security and to pay the shareholders out of profits. The shareholders, however, considered that there was no assurance that the plant would be operated.

The western head office of the Chevrolet Motor Co. will be established at Winnipeg, according to announcement made by C. E. McTavish.

DEBENTURES FOR SALE

CITY OF CALGARY

PROVINCE OF ALBERTA, CANADA

Sealed tenders marked "Tender for Purchase of Treasury Notes," addressed to the Chairman of the Finance Committee, will be received at the office of the City Clerk, up to 3 p.m. (mountain time), of Friday, June 9th, for the purchase of the whole or part of the issue of $1,500,000 6% City of Calgary five-year Treasury Notes, redeemable at maturity or drawings at interest periods. Interest payable semi-annually. Issue on security of general credit of city, and if required by hypothetication of proportion of arrears of taxes. Purchasers solicitors approval proceeds of issue payable $250,000 on acceptance of bid balance thirty, sixty and ninety days or at purchasers option over above period.

Financial statement and detailed particulars on application to the City Treasurer, Calgary.

City reserves right to accept or reject any or all tenders, in whole or in part, or to accept any bid on a basis other than as above specified, if in the city's interest so to do.

J. H. MERCER,
City Treasurer.

EAGLE STAR AND BRITISH DOMINIONS INSURANCE

The report of this company for the year 1918, including the business of the British Crown Assurance Co., which was taken over during the year, shows total assets as at December 31st, 1918, of $85,517,325, compared with $66,618,[illegible] at the end of 1917. The marine account shows premiums less reinsurances and returns, of $8,379,530, claims amounting to $[illegible],524,270, expenses of $1,765,770, and an increase of about $1,[illegible],000 in the funds. The fire and general revenue account shows premiums, after the deduction of reinsurances amounting to $4,[illegible]46,205, claims paid and outstanding $1,[illegible], and an increase in funds of $1,100,000. Total premiums in the life insurance and annuity revenue account were $4,917,[illegible]40, the claims by death and maturity being $4,[illegible],000. The amount of the life assurance and annuity funds at the end of the year was $62,913,395, an increase of about $12,[illegible],000. The sinking fund and capital redemption funds increased from $375,000 to $1,130,000.

The largest single item of investment is British government securities which are held to the amount of over $20,[illegible]. The assets on account of life insurance constitute over $[illegible]5,[illegible],000. One of the assets originally valued at nearly $[illegible],000—namely, the cost of businesses acquired [illegible] extraordinary expenses, has been over half written off.

The year was, therefore, distinctly successful and the Canadian branch itself showed profitable results under the management of Mr J. H. Riddel.

DOMINION TRUST DEPOSITORS MAY COMPROMISE

It is expected that the claims of the depositors of the Dominion Trust Co., now in liquidation, will be settled by compromise. Three of them have, however, taken legal action and been admitted as creditors by the Supreme Court of British Columbia. A meeting was held in Vancouver on May 14th, when the liquidator, J. C. Gwynn, proposed a compromise which was accepted by practically every depositor present, subject to the approval of Mr. Justice Murphy, the winding-up judge. The depositors will receive in the settlement half the dividend payable to the other preferred creditors. Mr. Gwynn pointed out that the remainder of the depositors could individually, if they chose, proceed to be admitted as creditors, but that if this were done the costs would be excessive, whereas if the compromise were accepted they should receive something. The depositors expressed strong disappointment that apparently all that would be realized on the bond issued by the Railway Passengers Assurance Co. for $200,000 would be $20,000, on the basis of a compromise offered by the company in lieu of contesting its liability for payment in full in the courts. It was pointed out, however, that the assurance company was considered as having a good chance to escape all liability whatever on the ground that the company itself had been the victim of fraud on the part of the Dominion Trust Co., when the bond was issued in the first instance.

An effort is being made to obtain the signatures of a majority of the depositors to the agreement, which reads as follows:—

"We, the undersigned depositors of the Dominion Trust Co., having considered the possibility or otherwise of our being finally admitted as creditors of the company, hereby agree, as is testified by our signatures appended hereto, to accept in full settlement of our properly established claims against the Dominion Trust Co., or Dominion Trust Co., Ltd., a dividend or dividends equal to one-half of the pro rata dividend to be paid to the ordinary unsecured creditors.

"It is understood by us in agreeing to this settlement that the three depositors who have successfully appealed from the Registrars Certificate disallowing the claims are to rank for the full dividend on their claims and that any dividend paid to the depositors shall be subject to a deduction for any cash received or to be received from the bond of the Railway Passengers' Assurance Co., now in the hands of the Minister of Finance for B.C.

"And it is further understood and agreed that this compromise is conditioned upon its acceptance by the liquidator of the Dominion Trust Co., guided as he may be by the number of depositors agreeing thereto and upon the approval of the winding-up judge in the liquidation."

The Supreme Court of Canada has handed down judgment dismissing the action brought to prevent the Dominion Trust Co., Ltd., from being wound up. This leaves the way open for the liquidator to proceed against the shareholders of the original company for the amounts unpaid on their share purchases.

MORE MUNICIPALITIES WANT HYDRO

A new organization under the name of "The Associated Municipalities of North-Western Ontario," has been formed at Port Elgin for the purpose of laying before the Hydro Commission the fact that thirty-three municipalities, comprising twenty townships and thirteen towns and villages, desire to obtain Hydro power. The territory concerned is about 75 miles in length, with towns extending from Southampton to Wingham across to Mildmay. Delegates were present from practically all the towns and some of the townships. The feeling of those present was that this portion of the province had been neglected. That while other portions of the province surrounding them were glorying in the reduced rates, the north-western municipalities were handicapped industrially. The meeting was called by the Port Elgin Board of Trade and there was a fine attendance. H. H. Stevens, president of Port Elgin Board of Trade, presided.

PUBLICATIONS RECEIVED

Italy as a Field for International Imports and Exports.—This pamphlet was compiled by the Credito Italiano, Milan, and is available for those interested through the Royal Bank of Canada. It gives statistics of Italian production and trade.

Toronto Municipal Year Book.—The second edition has just been issued by the Municipal Intelligence Bureau, which is under the direction of Mr. Hubert Groves. It contains useful information about Toronto, its government, industries, the Board of Trade, the stock exchange, the Canadian National Exhibition and other organizations in the city.

Early Courts of Justice of Upper Canada.—The fourteenth report of the Ontario Bureau of Archives contains records of the Early Courts of Justice of Upper Canada, preceded by a short historical account. The records are divided into the three districts of Hesse, Mecklenburg and Lunenburg into which Upper Canada was divided. This report is the work of Mr. Alexander Fraser, provincial archivist.

Western Canada Mining Directory and Year Book for 1919.—Published by the Progress Publishing Co., Ltd., London Building, Vancouver, B.C. 114 pages, $3. This volume contains a list and a brief description of mines of all kinds throughout the four western provinces and the Yukon. It also gives a list of the officials, both Dominion and provincial, who have charge of mining administration. The coal mines and coal production in British Columbia, Alberta and Saskatchewan are also given. The volume concludes with quotations of mining stocks, statistics of production, a bibliography on British Columbia mining and a buyer's guide.

Graduation of Mortality and Other Tables.—By Robert Henderson, principal contributor, and H. N. Sheppard, associate contributor. 82 pages. This is volume four of the studies issued by the Actuarial Society of America. It assumes such a knowledge of mathematics as is possessed by students of actuarial science. The various methods of constructing a graduated table from a given mortality experience are discussed, including the graphic method, Higham's formula, Spencer's formula and Makeham's formula. A comparison is given in tabular form of graduations calculated by the graphic, interpolation and summation methods and by Makeham's formula.

War Finance.—By C. W. Barron. Thomas Allen, 215 Victoria Street, Toronto. $1.50. Mr. Barron, who is manager of the Boston News Bureau, Wall Street Journal and Philadelphia Public Ledger, is already well known to the public of the United States and Canada, especially through his recent books, entitled "The Mexican Problem" and "The Audacious War." In this volume he discusses in an entertaining and comprehensive fashion some of the main considerations in the financing of the European nations. In fact, be discusses many things besides the mere figures of war finance. Switzerland he found to be in a prosperous condition, the war having left it with a balance on the right side. Most of the book is devoted to France and England, a special chapter being included upon Canada.

Fifty-two Questions on the Nationalization of Railways.—By "Fabius." Published by J. M. Dent and Sons, Toronto. This little volume is a summation of non-technical arguments against public ownership. The author is evidently familiar to some extent with the technicalities of railroad operation, and also the political forces which are at present operating for and against public ownership. He submits that if we could not trust our national politicians to look after the public interest in their dealings with the railways, this is conclusive argument why we should not trust them with the ownership and management of a great railway system. A government road cannot be operated as a private concern. He also finds that the present government system has all the elements essential to a successful and paying railway, and the argument that the Grand Trunk is necessary to complete the system does not hold.

Office Management: Its Principles and Practice.—By Lee Galloway, Ph.D. Published by the Ronald Press Co., New York. 701 pages, with index; bound in flexible leather, $6. It is quite evident from reading this book that the author has become familiar with the most modern office practices and appliances, and that he has the ability to describe them in a readily intelligible manner. There is now such a variety of office equipment that a work of this kind, suitable for reference purposes, has become almost indispensable to the office manager, chief accountant and others engaged in the administration of clerical work. The author, however, takes a broad view of the functions of the office, showing that the manager must co-ordinate activities of other branches, such as purchasing, production, sales, etc. He, moreover, deals with such questions as the selection and layout of an office and the internal arrangement of the various departments. A number of forms are given in the appendix, and the work is well illustrated.

Sources and Characteristics of the Principal Mortality Tables.—By Henry Moir, principal contributor, and L. D. Craig, L. K. File, A. T. Maclean and H. H. Wolfenden, associate contributors. Published by the Actuarial Society of America, 346 Broadway, New York. 78 pages. This is Volume I. of the Actuarial Studies, publication of which has been commenced by the Actuarial Society of America. The first volume gives a historical account of the collection and use of mortality experience, showing how the modern life tables have developed from the early records. It will, therefore, be valuable to actuaries for reference purposes and to students of actuarial science. Among the sections in this volume is one on the United States life tables, tables from the experience of life companies, life tables, mortality of annuitants, and miscellaneous mortality investigations. Heretofore, with the exception of the "Text Book of the Institute of Actuaries of Great Britain,'which covers the fundamentals of actuarial theory, and a few other more elementary text books, the literature of actuarial science has been practically altogether contained in scattered original papers, each usually covering only a subdivision of some larger subject. These papers are in many cases contained in society transactions difficult to obtain, and thus are not available to all.

Economic Reconstruction.—By J. Taylor Peddie, F.S.S. Published by Longmans, Green and Co., New York. 242 pages, with index, $2.25. Mr. Peddie, who is already known as the author of books on broad, economic questions, takes a somewhat unorthodox view of capital, emphasizing the personal element. He discusses how the present abnormal economic conditions may be gradually transformed. He is opposed to conscription of capital, because "it would be necessary for the government to make provision for the masses who labor until such time as the conscripted capital could be replaced by new capital, which would, no doubt, take many years to accomplish." Regarding the attitude of the government, he concludes as follows: "It is clear, then, that the duty of the government is: 1. To create the most favorable working conditions for the development of productive industry. 2. To provide remunerative employment for the masses who labor upon the most humane and scientific principles. 3. That if effect be given to items 1 and 2, productive industry and commerce as a whole shall, in return, liquidate the national debt, subject to certain conditions we shall mention hereafter." There is, he points out, however, a limit to the income tax rate, but the government should offer to compound the income tax, and holders of the securities should voluntarily turn them in as the treasury is in a position to redeem them.

Directors of the newly-organized Chatham Chamber of Commerce elected officers as follows: President, C. H. Houseon; first vice-president, George W. Wands; second vice-president, Arthur J. Dunn; secretary, Harry Collins; treasurer, F. Biette.

SECURITY ABOVE ALL

Whether with the intention of taking out insurance or associating yourself as representative with some company, you first look for security.

The figures for 1918 emphasize the unexcelled financial position of the North American Life. After a year of War and Pestilence, the Company emerges stronger than ever meriting its motto, "Solid as the Continent."

WHY MUTUAL POLICIES ARE EASY TO SELL

First—Because of the co-operative and democratic principle on which the company is founded. The Mutual Life Assurance Company of Canada is a company owned by its policyholders, maintained by policyholders, exclusively for policyholders.

Second—Because the purpose for which the company was established is now generally understood; the company since its establishment in 1869 has consistently followed one aim—that of furnishing the largest amount of protection for the least possible outlay.

Third—Because the company's day-by-day activities advertise it: The Mutual of Canada since its organization has paid to policyholders or their beneficiaries or holds as a trust to guarantee future payments, over sixty millions of dollars.

"BE A MUTUALIST!"

BALANCING DEBTS BY LIFE INSURANCE

Do you ever think of Life Insurance as a means of counterbalancing unavoidable debt?

There are bushels of ways in which debt may creep upon a man, unavoidably almost, legitimate debt in many cases.

He may undertake to purchase a home, secure credit to extend his business. Ill health may hamper and swallow his savings. Crops may fail and business losses occur.

All manner of calls tug at a man's purse strings, and do their best to make the domestic balance sheet a poor exhibit.

But Life Insurance will restore the balance.

Briggs & Turvias of Canada, Ltd., $1,000,000; J. L. Ross, A. W. Holmsted, A. R. Kinnear. Great West Natural Gas Corporation, Ltd., $12,500,000; G. Cooper, H. A. Hall, L. M. Heal, L. Dillon.

The French American Banking Corporation has leased the ground floor at 65 William Street, corner of Cedar, New York City, and will open for business there about June 1st. The lease extends for a period of years.

BANK BRANCHES OPENED AND CLOSED IN APRIL

There were 104 branches of Canadian banks opened in April and 13 closed, according to the May edition of Houston's Bank Directory. The following table shows the number of branches opened by each bank:—

Bank of Montreal	3
Bank of Nova Scotia	6
Bank of Toronto	5
Molsons Bank	2
Banque Nationale	2
Merchants Bank of Canada	10
Banque Provinciale du Canada	4
Union Bank of Canada	3
Canadian Bank of Commerce	16
Royal Bank of Canada	8
Dominion Bank	3
Bank of Hamilton	1
Standard Bank of Canada	4
Banque d'Hochelaga	27
Imperial Bank of Canada	7
Weyburn Security	3
Total	104

The following is a list of branches closed:—

Charlottetown, P.E.I.	Banque Provinciale du Canada
Montreal, Que. (Beaubien St.)	Royal Bank of Canada
Nottaway, Que.	Banque Nationale
Ottawa, Ont. (Booth and Queen)	Nova Scotia
Rosalind, Alta.	Merchants Bank of Canada
Windham Centre	Merchants Bank of Canada

All the branches of the Bank of Ottawa have been taken over by the Bank of Nova Scotia as at May 1st, of which seven have been absorbed.

Of the 104 branches opened 36 were sub-branches, and of the 13 closed two were sub-branches.

BANK BRANCH NOTES

The following is a list of branches of Canadian banks opened recently:—

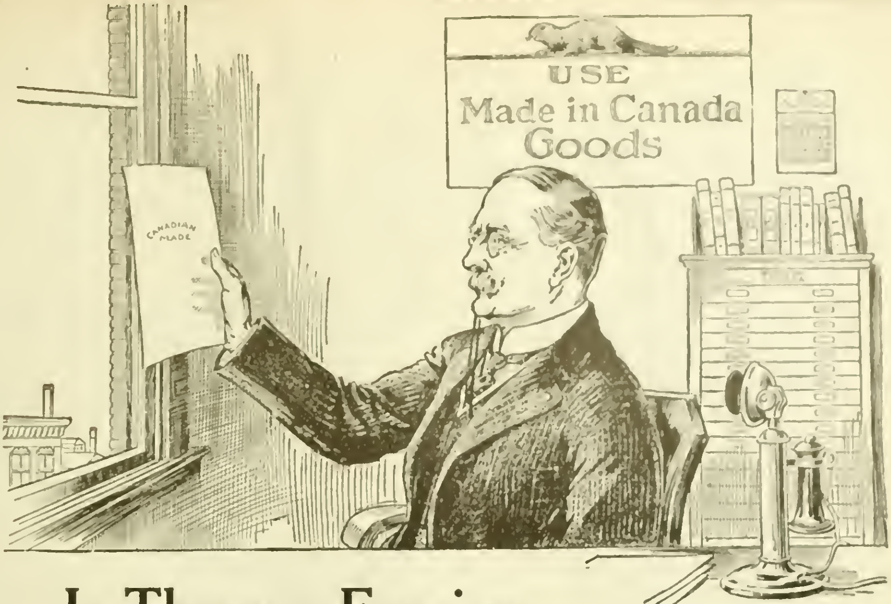
Ladner, B.C.	Canadian Bank of Commerce
Beaver Lodge, Alta.	Canadian Bank of Commerce
Montreal, Que. (Lasalle and Adam)	Montreal City and District Savings Bank
Carbonnear, Nfld.	Bank of Montreal
Truro, N.S.	Union Bank of Canada
Kemptville, N.S.	Union Bank of Canada
Brantford, Ont.	Dominion Bank
Ladner, B.C.	Canadian Bank of Commerce
St. John, N.B.	Provincial Bank of Canada

Mr. E. S. Martin, manager of the Bank of Montreal, Saskatoon, has been appointed to the Toronto branch of that bank, one of the most important positions in the service.

The Provincial Bank of Canada will open about June 5th next a branch in the north end of St. John, N.B. The branch recorded above is in the south end.

INSURANCE COMPANIES APPEAL

The North British and Mercantile Insurance Co. and the Guardian Assurance Co., Ltd., of London, England, are appealing for judgments in connection with the loss at the plant of Curtis and Harvey, near Rigaud, Quebec, on August 18th, 1917. The plea of the companies is that the losses were due to explosion and not to fire.



Is There a Foreign Watermark on your Stationery?

Use Canadian-Made Papers

Look for this mark on the wrapper of every package of paper you buy.

Canadian-made Papers for
Stationery
Booklets
Circulars
Ledgers, etc.
Stock Certificates
Wrapping Papers
are second to none in quality and value

You receive a convincing letter appealing to you to buy certain goods, because they are MADE IN CANADA. You hold the letter up to the light. The watermark shows the stationery to be of foreign make. What is your natural mental attitude?

Your correspondent has no chance to explain why he uses foreign paper—and, indeed, no explanation is valid, for he could have bought equally good paper of Canadian make without spending any more money.

You see the importance of using "Made in Canada" stationery?

Bond papers of all qualities are made right here in Canada—papers for every purpose. Make it a personal matter to see, hereafter, that your stationery is not only of such a quality as represents your house, but that it is genuinely MADE IN CANADA.

Write for booklet "Some Facts About the Pulp and Paper Industry of Canada."

GOVERNMENT AND MUNICIPAL BONDS

Government Issues Show Strength—Ontario Five per Cent. Bonds Sold Below Par

THE principal event in the bond market in Canada during the past week has been the purchase by the National City Co., by private arrangement, of an issue of $4,000,000 province of Ontario 5 per cent. bonds. Details are given below. The price paid was 100.27, which was very favorable, and is made possible by the sale of the issue in New York, where investors can benefit by the present high premium of New York funds and, therefore, secure a better yield. The offering price is 98⅛.

Several government issues show strength, particularly the Russian government external bonds, which have advanced about seven points compared with last week. The following quotations, furnished by the National City Co., Ltd., are in New York funds, the present exchange rate being [illegible] premium:—

	Bid.	Offered.
Anglo-French 5% (Oct 15, 1920)	97 9-16	97¾
United Kingdom 5½% (Nov. 1, 1919) ..	99⅞	100
United Kingdom 5½% (Nov. 1, 1921) ..	98¾	99
United Kingdom 5½% (Feb. 1, 1937) ..	99⅝	99¾
Canadian Pacific 6% (Mar. 2, 1924) ..	101	101⅜
City Paris 6% (Oct. 15, 1921)	97⅝	99
Dominion Canada 5% (Aug. 1, 1919) ...	99⅞	100
Russian Govt Ext 5½% (Dec. 1, 1921)	57	59
Russian Govt Ext 6½% (July 10, 1919)	66	68

Dealers report an excess of demand over the supply of municipal bonds. Several industrial issues, on the other hand, are now on the market, and it is expected that a large volume of issues of all classes will take place soon in order to clear the way for the next Dominion of Canada loan, which is expected to be made in the fall.

The following is a list of debentures offered for sale, of which particulars appear in this or previous issues of *The Monetary Times*:—

Borrower.	Amount.	Rate %.	Maturity.	Tenders close.
Barton Township, Ont. ....$	55,000	5½	20-years	May 31
Renfrew County, Ont.	32,000	6	5 & 10-instal.	June 2
County of Ontario	10,000	5½	10-instal.	June 4
Alta. School Dist...	21,000	7	Various	June 5
Vermilion, Alta. ..	6,000	7	20-instal.	June 7

Binbrook Township, Ont.—The township will issue debentures to the amount of $14,000, bearing interest at 5¾ per cent., and payable in 10 instalments. The money will be used for the erection of a soldiers' memorial hall.

Halifax, N.S.—The option given last November to Eastern Securities Co., Ltd., on $430,000 has been exercised by the company and the necessary legislation authorizing the issue has just been granted by the government. Bonds to the amount of $133,500 were purchased last November by the Eastern Securities Co. at 100.77 and interest, for immediate delivery. The option for the above-mentioned balance for delivery on legislation was at 101.63 and interest, or approximately a 5⅞ per cent. basis. The bonds are 6 per cent. bonds and run for a period of 34 years.

Levis, Que.—At its last meeting, the city council adopted on second reading, a by-law in regard to the issuance of bonds to the amount of $85,900. This issue has been authorized to meet the cost of administration. This amount of $85,900, will be payable in twenty years, and will bear interest at the rate of 5½ per cent., which will be payable semi-annually, on February 1st and August 1st each year, at the office of the Banque National, Levis, or the Bank of Montreal. The bonds will be issued in two denominations, one of $100 and the other of $500. To cover the payment of those interests, a special tax will be imposed in accordance with the valuation roll.

Kentville, N.S.—The Dominion Securities Corporation, Toronto, has been awarded an issue of $10,500 5½ per cent. 15-year sewerage extension bonds at 101.03. The following is a list of tenders:—

Dominion Securities Corporation	101.03
J. C. Mackintosh and Co.	99.61
W. F. Mahon and Co.	99.29
F. B. McCurdy and Co.	99.20
National City Co., Ltd.	99.07
Sterling Securities, Ltd.	98.77
Nova Scotia Trust Co.	98.52
Standard Bond Corporation	98.25
Brent, Noxon and Co.	98.20
Maritime Trust Co.	98.00

Saskatoon, Sask.—Commissioner Yorath has submitted to the council the copy of a letter sent to the provincial treasurer regarding the payment of interest on the outstanding balance due to the provincial government in respect to the 25th Street bridge. As the original arrangement made by the ex-mayor in the early part of last year whereby the city was to settle the outstanding account—i.e., $74,304.70, by handing to the government debentures upon a 6½ per cent. basis, did not materialize owing to the city being able to sell its debentures on a 6 per cent. basis, the city has not up to the present paid any interest between the 1st day of July, 1918, the date upon which the debentures were to be handed to the government, and the date upon which the actual cash was paid—i.e., April 17th, 1919. The provincial treasurer has now intimated that he will accept interest at 5 per cent. ($2,551.65) between the above dates, instead of 6½ per cent. ($3,637.14). The commissioner recommended that this interest be paid. This was agreed upon.

SELLING MUNICIPAL BONDS

THE connecting link between the borrowing municipality and the bond buyers of Canada, as well as those in the United States that are specifically interested in Canadian Securities of this class, either as individual or institutional buyers, is

The Canada Standard Loan Company
520 McIntyre Block, Winnipeg

Guelph, Ont.—Tenders will be received up till June 13th, for the purchase of $[illegible] public school 5½ per cent., 30-instalment debentures, and $50,000 5½ per cent., 15-year [illegible] debentures.

Sherbrooke, Que.—Municipal electors and ratepayers have approved the building of a fire station, and paving the streets of the city. The by-law to borrow $542,500 by debenture issues for the above improvements has been adopted by the council.

Edmonton, Alta.—The city has been given a line of credit for $[illegible] at the Imperial Bank of Canada. Authorization of this has come through the head office of the bank. The city council some time ago passed a by-law providing for the borrowing of $1,500,000, so that the amount granted by the bank is considerably in excess of that. City officials point out that although they have an extended line of credit, the whole amount will not be required this year.

Tofield and St. Albert, Alta.—The towns of Tofield and St. Albert are defendants in two actions which have just been filed against them in the supreme court by George E. Amyot and M. A. Kerr, respectively. In the case of Tofield the plaintiff alleges that debentures and coupons issued by the defendant town have been presented for payment and been refused. The sum of $2,658.13 is claimed. The claim against St. Albert is for $1,284, being the amount of a debenture coupon not yet paid.

Parry Sound, Ont.—*The Monetary Times* is advised by J. [illegible], clerk-treasurer, that the ratepayers will vote upon the by-law on June 2nd, deciding on the expenditure of $165,500 upon a new electric light and power plant in accordance with plans and specifications of Messrs. P. H. and C. H. Mitchell, engineers, Toronto. Debentures will be issued in two series, one of $150,000, and one of $15,500 and will be for thirty years at 6 per cent. Coupons attached for semi-annual interest, instalment plan. The second will likely be on the market, should the by-law pass, as soon thereafter as the necessary formalities can be complied with.

Timely Suggestions for the

REINVESTMENT OF INTEREST AND DIVIDEND

PAYABLE

JUNE FIRST

For those desiring long term bonds at attractive yields, ***we recommend the following:***

		%	Due	Yield
$10[illegible],000	United Kingdom of Great Britain and Ireland......	5½	1937	5.20
100,000	Province of Saskatchewan	5	1939	5.25
100,000	Gov't. of Newfoundland	5½	1939	5.30

MUNICIPAL FINANCE

Heavy Tax Arrears in West—Public Utility Deficits—Some Tax Rates Down

Outremont, Que.—Outremont tenants will have to pay 1½ per cent. [illegible] tax as last year. The council at a meeting this week decided without dissent, to collect it for the ensuing year.

Sudbury, Ont.—The balance sheet at the close of the financial year ended December [illegible]th, 1918, shows capital assets totalling $[illegible], being an excess of $239,001 over capital liabilities. Assets on current account are $223,667, or slightly more than current liabilities.

Burnaby District, B.C.—The financial statement for the year ended December 31st, 1918 shows that arrears of taxes total $[illegible], extending back to the year 1911 inclusive. The receipts for the year amounted to $1,050,225, including loans to the amount of $477,071 and temporary loans to the amount of $[illegible].

Vancouver, B.C.—The city council has endorsed the principle of increasing the taxation on buildings from 25 per cent. of their value to 50 per cent. Mayor Gale has made an estimate of the changed system of taxation and stated the rate should be approximately 23 mills net. Had it been decided to raise the proposed sum upon the land and 25 per cent. of the value of buildings as last year, the rate would have been approximately 26½ mills net.

St. Thomas, Ont.—According to the latest statement of the city, the present debenture debt is $1,050,860 (exclusive of [illegible] of debentures of the street railway guaranteed by the city), and against which the city has on hand sinking funds to the amount of $21,698. The local improvement debt of the city is $144,022, as against which the city has on hand sinking funds to the amount of $16,211. The whole assessed property of the municipality, according to the last revised assessment roll, being for 1918, is the sum of $[illegible].

New Westminster, B.C.—The efforts of the council to meet the estimates and if possible to reduce the tax rate below [illegible] are blocked by the Canadian national assessment appeal. City Solicitor Martin informed the council that it was practically assured that judgment would be rendered against the city as the contention of the court was that the onus was on the city to prove that the assessment represented the actual value of the land. This decision will have a far reaching effect, not only in New Westminster but throughout the whole of British Columbia. In this city, where it was pointed out, the estimates have been pared down to the finest point, and where the suggested tax rate of 32 mills was based on the revenue to be secured on the present assessment, the blow will be a heavy one, as the assessment of the railway in this city alone is set at about $[illegible].

Calgary, Alta.—The annual statement for the financial year ended December 31st, 1918, shows that tax arrears amount to $4,000,434. The revenue and expenditure account shows a debit balance of $960,061, which will have to be provided for in the current year. The revenue account for 1918 was charged with a special levy carried to reserve of $172,008, amount written off doubtful taxes $15,000, and special levy re sinking fund $27,084. These items were, however, specifically levied for. The influenza epidemic was a cause for adverse balance to the amount of $42,314. The city utilities showed a net loss due to the increases in cost of labor and materials and in the case of street railway, a large reduction in traffic during the critical period of the influenza epidemic. The net results were as follows:—

	Loss.	Profit.
Electric light and power	$29,179	......
Street railway	7,118	......
Waterworks	......	$24,406
Market and weigh scales	6,704	......
Paving plant	19,835	......

The paving plant loss is partly offset by the transfer to net revenue account of $10,182, being the surplus of 1912 and 1913 up-keep reserves over what was required to cover guarantees.

The auditors point to the disparity in the sinking fund due to the large amount of uncollected taxes. The forthcoming tax sale should, however, result in a substantial reduction. The auditors also state that every known liability is fully provided for and that full reserve has been set aside to protect the levies of the next fifteen or sixteen years from charges not properly belonging thereto.

Saskatoon, Sask.—The current account of the city shows a surplus of $21,582, according to the auditor's report for the first three months of the year. The public utilities show the following profits after allowing for interest, sinking fund and depreciation:—

Electric light and power	$12,240
Waterworks	591
Street railway	58
Total profit	$12,889

The above result has been obtained without increasing rates for electric light and power or for water; in fact these rates are less now than before the war, in spite of the fact that wages and the price of material have increased considerably, the city council in January last granting a substantial increase in wages to the employees of all departments. The tax collections for the first four months of the year were $79,193, compared with $61,496 for the same period last year.

A delegation of the city council will wait on the local government board in Regina with regard to the proposed capital expenditures. This was decided upon at a council meeting, last week, when the city clerk read out the latest letter from the board in which they stated that it was impossible for them to leave Regina at the present time because of pressure of business. Alderman McConnell moved that the delegation consist of Mayor F. R. MacMillan, Commissioner C. J. Yorath, Alderman F. G. Lewin, chairman of the finance committee and Alderman G. W. Norman, chairman of the legislation and by-laws committee. This motion carried unanimously.

The following is a statement showing the amount of taxes and penalties collected for the first four months of this year compared with the same period last year: January 1st to April 30th—1918, $79,109.39; 1919, $102,333.68; increase, $23,224.29. The amount of arrears of taxes outstanding at the 30th of April, 1919, is $726,201.21, made up as follows:—

1912 arrears	$ 13,812.19
1913 arrears	57,486.99
1914 arrears	79,343.78
1915 arrears	77,846.25
1916 arrears	86,151.25
1917 arrears	115,531.60
1918 arrears	296,029.15
Total	$726,201.21

DEBENTURES FOR SALE

TOWN OF VERMILION

SALE OF DEBENTURES

Sealed tenders, endorsed "Tender for Debentures," will be received by the undersigned up to and including June 7th, 1919, for $6,000.00 debentures for extension to the Electric Light and Power System. These debentures bear interest at the rate of seven (7%) per cent., repayable in twenty equal annual payments of principal and interest. The highest or any tender not necessarily accepted. H. P. Long, Secretary-Treasurer, Town of Vermilion, Alberta.

INVESTMENTS AND THE MARKET

News and Notes of Active Companies—Their Financing, Operations, Developments, Extensions, Dividends and Future Plans

[illegible] has been exhibited on the stock [illegible] the last week, due largely to the uncer[illegible] The budget speech, and consequent [illegible] also awaited with considerable anxiety in [illegible] Several gains were nevertheless made.

On the Montreal exchange National Breweries rose from [illegible] 128, St. Lawrence Flour Mills from 65 [illegible] Laurentide from 116 to 223. Canada Steamships [illegible] ty around 51, and Brompton at [illegible] Bell Telephone shares, ex rights, are quoted at [illegible] In Toronto, Maple Leaf and Canada Steamships were [illegible] features, but general trading was light.

At a meeting of the Montreal Stock Exchange, held on May [illegible], it was decided to abolish the minimum price list. The removal will go into effect on Monday, June 2nd. It was decided at a meeting last January that the list should be [illegible] until the conclusion of peace negotiations. The delay in the latter, however, and the present condition of the market was considered as warranting the removal now.

Southern Canada Power Co., Ltd. The development undertaken by the company at Drummondville, Que., is completed, and the hydraulic and electrical equipment installed, and the company states that they will be turning on the current next month.

Alberta Flour Mills, Ltd.—This company, which was formed a short time ago, is now prepared to begin the season's work on the plants in Calgary, the directors having secured support from the investing public. Among the directors are George Lane, A. E. Cross, Wm. Pearce, D. E. Riley and Col. J. S. Dennis, who are all local men and familiar with the conditions of this industry. The location of the company on a point far west will enable it to ship economically by way of Vancouver. Calgary is served by the three transcontinental railroads, which place it in a direct line of communication, both east and west.

North American Pulp and Paper Co.—At the meeting of directors of North American Pulp and Paper Companies Trust, proposals were made for the reduction of the dividend on the preferred stock from 7 to 6 per cent., to increase the number of the company's preferred shares, and to propose the issuing of $5,500,000 collateral trust notes for the purpose of buying the present bonds outstanding of the companies not yet entirely controlled by the pulp company.

A meeting has been called for June 6th, at which the shareholders will be requested to vote on the above, as well as on the changing of the name of the company to the Chicoutimi Pulp and Power Co., and on a proposal to transfer the present stock to stock in the new company.

Eastern Theatres, Ltd.—An issue of 7 per cent., cumulative preferred shares of the company are being offered through several Toronto brokerage firms. These are being offered to the public at par in $100 shares and a bonus of one $[illegible] share of common stock is being given with each share of preferred.

Eastern Theatres, Ltd., is capitalized at $1,800,000, made up of $1,000,000 preferred and $800,000 common stock, of which $[illegible] preferred and the entire common is being issued at the present time. The directors of the company are W. J. Sheppard, of the Toronto Paper Co. and other corporations; A. Rogers, president Elias Rogers Co.; D. I. White, of Playfair and White, Midland; J. B. Tudhope, M.P., president Carriage Factories, Ltd.; J. P. Bickell and N. L. Nathanson, president and managing director, respectively, of Regent Theatres, Ltd., and Regal Films, Ltd.

The purpose of the stock issue is to secure funds to build a new Pantages Theatre, with an entrance on the east side of Yonge Street, between Dundas and Shuter. Pantages Theatres are operating in the principal centres of the United States and Western Canada.

Based on the earnings of the other Pantages Theatres now in operation, it is stated that net earnings of this new Yonge Street theatre should give a net surplus for the common stock of 17 per cent., or $135,000.

Dominion Foundries and Steel, Ltd.—Shareholders of the company have received cheques for an extra dividend of $10 per share, or 10 per cent., bonus on their stock. The company pays 8 per cent. regularly, and last July paid a similar bonus. The letter accompanying the cheque says:—

"We enclose a special distribution of ten dollars from business earnings on the common stock, payable to shareholders of record at the close of business, May 20th. Your company is engaged in a reconstruction programme which promises well when completed. We are also considering an employees' profit-sharing plan, to obtain the esprit de corps that existed with our employees under war conditions, either or both of which, in connection with our transition period earning capacity, may affect our regular dividend rates."

Dominion Textile Co.—Sales for the twelve months ended March 31st last aggregated $23,666,216, compared with $16,850,278 in the previous period, an increase of $6,815,937, or over 40 per cent., and with $13,375,750 in 1916-17, or nearly 77 per cent. Manufacturing profits for the year recently ended were $3,434,752, against $1,873,371 in 1917-18, an increase of $1,561,381, or in excess of 83 per cent., and substantially more than double those of the previous year. After all deductions, including $1,100,000 for war and income taxes, a newly-established pension fund and replacement reserve, there remained for common stock dividend distribution the sum of $1,559,888, or equal to 31.2 per cent., against 21.9 per cent. in 1917-18 and 15.6 per cent. the year before.

Computing the earnings on the common stock before deducting the unusual and heavy writing-off in the exhibit under review, the showing represents nearly 54 per cent. on the outstanding common stock of the company, standing at $5,000,000. After all deductions, including dividends, the year's surplus is shown at $1,159,888, as compared with $745,028 at the end of the previous year and $350,632 in 1916-17. Total surplus now stands at $3,349,083, or equal to over 23 per cent. of the combined common and preferred stock and bonds of the company outstanding.

A survey of the balance sheet shows that land, building, machinery and good-will account has been treated with a generous hand, the sum of $12,402,625, at which these items are carried, being less by almost $600,000 than at the end of the previous year. Raw cotton on hand is reduced by some $866,000, while manufactured stock and that in process of manufacture stands at about last year's level. Cash on hand, which in this year's statement includes bills receivable, is shown at $710,825, as compared with $17,178 a year ago. Accounts receivable, owing obviously to the sharp increase in the volume of business during the year, were $3,409,469, against $2,874,840 in the 1917-18 statement.

Following the issuance of the financial statement, notices were posted in all the mills of the Dominion Textile Co., announcing an all-round increase in the wages of the company's operatives of 10 per cent., and stating that the new schedule would be put into effect immediately. The increase, it was stated, would involve additional working costs of approximately $400,000, or precisely what owners of the common stock of the company received in dividends during the last fiscal year, which ended March 31st last. In addition to the unsolicited increase in pay, officials of the textile concern are engaged in working out the details of the new pension fund, which is shortly to be put into effect, provision having been made for its inauguration out of the profits of last year.

DIVIDENDS AND NOTICES

BANK OF MONTREAL

Notice is hereby given that a Dividend of Three per Cent. upon the paid-up Capital Stock of this Institution has been declared for the current quarter, payable on and after Monday, the Second Day of June next, to shareholders of record of 30th April, 1919.

By order of the Board.
C. E. NEILL,
General Manager.

Montreal, Que., April 15th, 1919.

TORONTO HYDRO-ELECTRIC REPORT

The eighth annual report of the Toronto Hydro-Electric System for the year ending December 31st, 1918, has just been issued, and shows that the operations for the year 1918 resulted in a gross income of $2,353,443. The cost of electric current and the expenses of operation and management, including repairs and maintenance, absorbed the sum of $1,485,613, leaving a surplus of income on operating account for 1918 of $867,830. The interest, depreciation and sinking funds for the year absorbed the sum of $846,163, which leaves the surplus net income at $21,666.

It is pointed out that at the close of slightly over seven complete years of operation the enterprise has fully paid its way and earned a surplus of $63,977. The system has earned sinking fund and funds for the redemption of serial debentures amounting, with accrued interest, to $857,177, and since the maintenance of the system's plant has been paid for out of revenue and replacements have been provided for by the establishment of a depreciation reserve, the surplus and sinking funds, together amounting to $921,155, constitute the net earnings of the enterprise, over and above all operating, interest and depreciation charges for the period under consideration. Power purchased from the Hydro-Electric Power Commission of Ontario during 1918 amounted to $824,251, as compared with $684,170 for the year 1917.

Total, $89,000. Loss about total.

CALGARY TREASURY NOTES TO $1,500,000

Bond dealers have received wires from the city treasurer of Calgary, asking for bids on a $1,500,000 6 per cent. 5-year issue of treasury notes up till June 9th, 1919.

The issue is for the purpose of expediting the clearing up of school board and Molsons Bank debt as follows: School board estimates of $780,000, the 1918 deficit to the board of $320,000, the balance of the Molson's bank loan to meet the Spitzer-Rorick loan, which now is $350,000, and other current obligations, including $120,000 to the street railway sinking fund.

The money is being borrowed against arrears of taxes, as specific security is required. Full particulars will be found elsewhere in this issue.

NEW $4,000,000 ISSUE OF ONTARIO BONDS

A new issue of $4,000,000 5 per cent. three-year province of Ontario gold bonds has been privately acquired by the National City Co. of New York, at the price of 100.25, which is on a basis of about 4.90 per cent.

The bonds are being offered in New York by the National City Co., Harris, Forbes and Co. and G. A. Stimson and Co., at 98¾ and interest, at which price they yield about 5.60 per cent. The latest reports received indicate that the issue is meeting with a very favorable reception.

In January last the National City Co. purchased $3,000,000 of the province of Ontario bonds, together with an additional $1,000,000 later. Also in April C. R. Clapp and Co. obtained another $3,000,000 issue. All of these bonds have been offered and mostly sold across the border.

Canada's Export Machinery

Comparison of Methods Adopted in United States and in Great Britain—Export Association Favored on this Continent—Export and Import Commission Houses of Great Britain—Government Credits Merely Temporary

BUSINESS sense, as well as wider public opinion in Canada, is turning to foreign trade, according to the Canadian Trade Commission. There is a growing belief, it is becoming widespread, in fact, that exports will be necessary for the maintenance of our prosperity. The idea has appealed to the working-man as much as to the merchant. This, says the Commission, is the most gratifying feature of its endeavor to put informative news before the public on these new trade conditions of our national life.

While placing the numerous sub-sections of orders secured under the Canadian credits accepted by European governments, the Commission has not ceased to keep before business men and workers of all grades how vital it is that these particular orders should not be regarded as the "be all and end all" in the Canadian attitude towards the markets of the world. Rightly viewed, they are only a beginning. They should not be looked upon as anything more than a war-created opportunity. In themselves they will not make for permanent trade, but they will open the door, and, metaphorically, open the minds of the people to possibilities. When the credits are exhausted, the reason for a continuance of foreign trade will remain as imperiously as ever. Throughout the allotment of these orders the idea has been steadily impressed that from the first, as organizations are built up—and there are already numerous trade groups formed into associations for co-operative export business—they should be arranged so as to expand when a "follow up" is required.

Unexpected success has attended the forming of these trade groups. Manufacturers of Canadian goods have displayed a strikingly prompt willingness to drop the old idea of cut-throat competition so far as the export field is concerned, and to take up instead the newer method, which war taught us was best, of co-operation to obtain foreign orders, and to leave it to the collective good sense of groups to subdivide them fairly. This is a great advance. It uproots in one essential the older idea. Yet the spirit will have to be given still greater expansion.

The size of European orders in prospect in the next few months is such that only by this non-competitive co-operation could they really be secured for the Dominion. Continuance in this will connote the building up of an export machinery on a scale which has hitherto not come within the scope of national consideration. What is this needed machinery for foreign trade? It consists in the establishment and perfection of a chain to link Canadian manufacturers and producers with foreign firms through the medium of specific exporting and importing houses for, in some cases, joint buying, and in others for joint selling. Few firms in any country can afford to establish foreign branches. The main mass of foreign trade must be done through some organized channel, and in a manner which conforms with the best usage of the world's long experience.

United States Methods

Very briefly it may be said that there are two methods of working, both of which, by a coincidence, are open to Canadian business men so far as British and colonial trade is concerned under the Empire preference, in a way in which they are most certainly not open even to their nearest American competitors. The first method, that generally adopted in the United States, is by the establishment of large export associations. It means really the building up of a direct overseas sales system. The drawback to this method, where only a limited number of manufacturers is concerned, and many divergent markets in different parts of the world have to be considered, is the relatively great initial expense. Yet it seems to appeal especially to the American pushfulness.

A writer in the "Exporters' Review," however, put the difficulty very shortly when he said:—

"A careful boiling down of all the papers written on the subject of American foreign trade and the optimistic predictions made for our export opportunities fail to show in the final crucible how the manufacturer could carry on a direct business in foreign climes and eliminate the credit risks and the responsibilities which have been a deterrent factor in the upbuilding of a large volume of overseas business. It is indeed strange that the position of the old-established and well-recognized export specialty—the export merchants—was entirely overlooked. It cannot be impressed too strongly upon the manufacturer that he must not look upon his export trade as though the present demand is an opportunity to exploit a temporary bonanza. This would be a very serious mistake. We should view the gradual development of this business as a means to an end, a permanently established foreign demand for goods."

British Method

The quotation brings one to the second, or British, method. It differs altogether from the so-called American system in that the manufacturer never enters into direct relationship with his ultimate customer abroad. It is the growth of centuries of foreign commerce, and has taken forms which may roughly be divided into two parts, though both shade into each other by numerous modifications of the two main systems. First, there are the large commission buying houses established in England receiving foreign "indents" from importers all over the world, which they distribute among British manufacturers for the best fulfilment of the particular class of goods required. They do not necessarily place a whole "indent" with one manufacturer, but split it up as convenience suits. The second sub-division is formed of the export commission houses and "merchant-shippers" who undertake the whole work of shipping British manufacturers' goods into a dozen different countries. Really they act in the same way as an export department of one [illegible] that they utilize their organization far more [illegible] because they operate for scores of manufacturers in an endless variety of goods in several countries. All of these British agencies, however, differ basically from the export section of an American manufacturers' organization for specific exporting in being absolutely independent of importer or of exporter, and free to take and place in the best markets at choice. They offer to manufacturers the tremendous advantage of relief from the financial responsibilities for any order placed with them under the "indents" they themselves receive from foreign customers.

No consideration of Canada's future overseas trade would be complete which omitted this exporting machinery that must be built up. It is none too soon to take up the commencement now—the building of the machine—when European orders coming in are flashing before the imagination of Canadians the golden possibilities in foreign fields. It is not the purpose of this article to discuss the relative merits of British and American systems, but to point out the opportuneness for careful and perhaps collective thought being given to preparing all things which the Canadian Trade Commission trusts will make our permanent export trade run smoothly.

CANADIAN PROVINCES WILL BORROW HEAVILY

Total Requirements This Year Probably $50,000,000—British Columbia and Ontario Have Largest Programs

ACCORDING to figures collected by *The Monetary Times*, Canadian provinces have to borrow about $50,000,000 this year to carry out programs which have been announced. Most of the borrowing is to be done by the four western provinces and Ontario. The plans of Quebec and the maritime provinces do not include any extensive borrowing for the current year and their total reuirements will probably not exceed $8,000,000 at the outside.

The following is the estimate in detail of the approximate amounts which will be required, based on the budget speeches and other announcements from the various provinces:—

Provinces.	Fiscal year ended.		Capital expenditure.
British Columbia.	March 31. 1920		$11,500,000
Alberta	Dec. 31, 1919		4,864,010
Saskatchewan .	April 30, 1920		6,728,300
Manitoba	Nov. 30, 1919		4,170,000
Ontario	Oct 31, 1919		13,218,720
Quebec	Jan. 30, 1920	about	8,000,000
New Brunswick .	Oct. 31, 1919		
Nova Scotia	Sept. 30, 1919		
P. E. I.	Dec. 31, 1919		
Total	....		$48,481,030

Considerable sums have already been borrowed by the provinces during the present current year. These loans up to the end of May total as follows:—

Provinces.	Amount.
British Columbia	$ 3,000,000
Alberta	1,000,000
Saskatchewan	3,000,000
Manitoba	3,080,000
Ontario	10,000,000
Quebec	1,625,000
New Brunswick	1,450,000
Total	$23,155,000

The following is the estimated revenue and expenditure for the provinces for the current or ensuing financial years ended:—

Provinces.	Year ending,	Estimated revenue.	Estimated expenditure.
British Columbia	March 31, 1920..	$10,209,960	$11,071,113
Alberta ...	Dec. 31, 1919....	9,362,470	9,343,309
Saskatchewan ..	April 30, 1920...	9,754,445	9,343,309
Manitoba	Nov. 30, 1919....	8,450,400	8,377,119
Ontario	Oct. 31, 1919....	18,408,428	13,213,906
Quebec	Jan. 30, 1920....	10,449,393	10,399,345
New Brunswick.	Oct. 31, 1919....	2,064,830	2,054,187
Nova Scotia ...	Sept. 30, 1919...	3,229,896	3,223,327
P. E. I.	Dec. 31, 1919....	528,166	527,423
Total	....	$72,457,988	$67,553,038

MOTOR UNION ENTERS CANADIAN FIELD

A Dominion license to write fire, automobile and accident insurance throughout Canada has been issued to the Motor Union Insurance Company, of London, England. This company was incorporated in 1906 under British laws with power to transact all classes of insurance business United Kingdom war bonds to the amount of £25,000, have been deposited to secure the Canadian license.. The financial statement of the company, as at December 24th, 1917, showed admitted assets of $7,820,796; liabilities consisted of unpaid calims $288,271, reserve of unexpired premiums $3,638,795, and other liabilities $1,542,102, a total of $5,469,168. This leaves an excess of assets of $2,351,627. The amount paid on capital stock is $977,375, leaving a surplus of $1,374,251. The premium income for the year 1917 was $7,503,418. These figures are translated from sterling at the current rate of exchange. The 1918 figures are not yet available here. The company's shares stand at a high premium.

The Motor Union will write automobile insurance here on independent lines; that is it will not follow the schedule adopted by the Canadian Automobile Underwriters Association which was recently formed in Ontario and Quebec. With the exception of the Motor Union, all the companies now doing this class of business here have become members of this association. The company's protection runs up to a maximum of $20,000; there is no allocation under sub-headings such as property damage and personal injury.

The company was founded in England in conjunction with the old time "Motor Union," which was an association of motorists from which the insurance company derived its name. The board of directors in England includes W. Rees Jeffreys, who is already known to many Canadians by reason of the active interest he has taken in the good roads movement. Another director is Laurence Phillips who is well-known in marine activity. With the Motor Union Insurance Company in England are three other companies, which, while separately incorporated, are under the same management; these are the United British Insurance Company, Limited, the British Commonwealth Insurance Company, Limited, and the Federated British Insurance Company, Limited.

The principal Canadian office is located at 59 Yonge Street, Toronto. The manager for Canada, Mr. Frederick Williams, received his first insurance training in the engineering department at the head office in London, England, of the Ocean Accident and Guarantee Corporation. A few years later he went to the Gresham Fire and Accident Insurance Company, Limited, to take charge of its automobile department. He joined the Motor Union in November, 1918. Mr. Williams is also well-known as a regular contributor to insurance journals in England.

Mr. S. G. Wright, formerly with the Employers Liability Assurance Corporation for four years, has joined the Motor Union. Previous to that he was for five years with the Guardian Accident Company and for six years with the London and Lancashire Guaranty and Accident Company. His experience has been principally in connection with the organization of agencies from coast to coast throughout Canada. A chief agent for the city of Toronto has also been appointed in the person of Mr. E. L. McLean, 54 Adelaide Street East.

CROP OUTLOOK IN ALBERTA

Seeding Now Complete—Outlook is Favorable—Lethbridge and Southern District—Edmonton Second

(Staff Correspondence.)

Edmonton, May 30, 1919.

CROP conditions in Alberta are favorable and the outlook from the farmers' point of view at the time of writing is good. Rains fell a short time ago and the recent dry spell has not seriously affected the crops so far.

Edmonton District

In this district and throughout northern Alberta good rains are needed at time of writing. Generally, however, the crops are in excellent shape. In discussing conditions as to loaning this spring, and the outlook generally, with *The Monetary Times'* representative, Mr. F. A. Beddard, local manager of the Huron and Erie Mortgage Corporation and the Canada Trust Co., at Edmonton, reports a steady demand for loans on improved farms in this province, also repayments are exceedingly good, notwithstanding the loss suffered last July by a freak frost, the like of which was not known by any of the old timers in the province.

It has become more apparent every year that the central and northern portions of the province are developing more into mixed farming. Large herds of stock last fall were moved from the southern to the northern portion of the province, on account of feed shortage, this benefiting the latter districts. Farm land values have also increased generally, and a steady demand exists.

Mr. Beddard has closely followed conditions in Alberta for nearly twenty years, having resided in and travelled the greater portion of the province, and he states never has the crops got away under so favorable conditions as this spring, due to late April and early May rains, and nearly everywhere the farmer has a smile on his face.

In conclusion, an optimistic feeling exists, that a gradual return to pre-war-time conditions has set in, and this is warranted by the large number of farm land sales at increased prices, and the large turnover in Edmonton city property this year.

Official Report for Province

According to a report recently issued by the Provincial Department of Agriculture, the spring survey of crop conditions and prospects is wholly favorable in the province. A rather slow and backward condition of weather at the close of March indicated delayed operations for seeding in April in central and northern Alberta, but this was broken by a prompt change to a week's real spring temperature in early April. The warmth made operations immediately possible, as there was less of cold saturation of land than usual on the heavy lands of the central part of the province, owing to light moisture last year and moderate snowfall last winter. There was no condition of lush moisture any place. When the warmth came, other conditions were favorable to active and uninterrupted seeding work.

In the southern part of the province it is commonly possible to get actively into seeding operations in March, and this was the case this year, but open land and open weather alone do not furnish the total of conditions favorable to the planting of seed. There was still a condition of scant moisture in the soil from last year's drought that did not promise any gain from quick planting, but rather slow and uneven germination if any. Snows and rains in April, however, gave an impetus to operations. There was enough moisture to put the land into condition for cultivation and at least for germinating grain. The result in seasonal conditions has been favorable to general seeding operations in good time. It is estimated that at the middle of May, 85 per cent. of the seeding for grain is completed, including practically all of the wheat and 75 per cent. of the oats. There will still be considerable land sown to oats for green feed.

Crop Area

Breaking in 1918 is estimated at about a million and a half acres. There were limitations to the breaking in the south. In places it was too dry to operate. On the other hand there was a large increase in farm power by the use of tractors and this extended to the more northerly sections of the province. One of the best uses of the tractor is the turning over of a wide furrow in brush land of sufficient depth to furnish a good [illegible] covering of soil, and the tractor has been made good use of to this end. The breaking of last year stands for a large increase in crop area this year. The use of tractors is being considerably increased this year. Twenty-two new tractors are working in the [illegible] neighborhood of Lacombe and a similar increase has taken place everywhere. There will be considerable seeding of oats for green feed on new breaking in the central and northern parts of the province this year.

The increase in crop acreage over the five years, 1914-1918 inclusive, was five million acres, or a doubling of the total area in 1914, and necessarily the expansion was not the addition of a million each year, but of much larger areas in the last couple of years of the five-year period. The impulse to production is not slackening with the termination of the war. Farmers are not looking for any very large reduction in grain prices before threshing time in 1920. They are now equipped to produce, and labor will be increased some with the return of the soldiers. A million and a half is a conservative estimate of the increase in acreage for 1919. This will consist of wheat in the south and oats in the centre and north chiefly, but rye will double and barley will be considerably increased also. Flax may be increased by the new breaking. The total increase will be 18 or 20 per cent. of last year's area. This is a normal increase in the conditions of available land, progress in the potentialities of new power and machinery, and better labor conditions.

The following table indicates generally the progress in acreage:—

	1918. Acres.	1919. Acres.
Wheat	3,892,489	4,293,000
Oats	2,651,548	3,500,000
Greenfeed	750,000	850,000
Barley	470,073	570,000
Rye	47,877	98,000
Mixed grains	27,989	40,000
Flax	95,920	100,000
	7,935,896	9,451,000

WHAT WAR COST WORLD'S NATIONS

In the semi-monthly letter of the Guaranty Trust Company of New York, some interesting comparisons are given regarding the cost of the war to the leading nations engaged, taken from a review by Representative Cordell Hull, of the Committee of Ways and Means. The following are the figures of the leading nations:—

Germany	$45,500,000,000
Great Britain	40,640,000,000
United States	30,205,000,000
France	23,400,000,000
Italy	16,000,000,000
Canada	2,000,000,000

According to Mr. Hull, exclusive of losses in property and materials, which will probably never be known, the war will cost about $200,000,000,000.

The British government will shortly commence the construction at a cost of several hundred thousand dollars of a helium plant near Lethbridge, Alta., on the main line of the Canadian Western Natural Gas Co. This is the result of experiments carried out for the British government by Prof. J. C. MacLennan.

PERSONAL NOTES

Mr. [illegible] H. Hood has resigned the office of city treasurer of Galt, to take effect June 30th.

Mr. R. T. Gilmour has been appointed manager of the [illegible] Bank of Canada, in Montreal, succeeding Mr. J. B. [illegible].

Mr. Lewis Roseman has been appointed district agent for Saskatoon, of the Travellers Insurance Company, of Hartford, Conn.

Major Henri K. Jordan has been appointed permanent secretary of the Chamber of Commerce recently organized at Brantford, Ontario.

Mr. Charles H. Godfrey has been appointed special auditor of the Grand Trunk Railway Company, succeeding the late Charles Percy.

Mr. Frank A. Vanderlip has resigned the presidency of the National City Bank, New York. He is succeeded by James A. Stillman, son of a former president.

Mr. Arthur G. Fenwick, who recently retired from the firm of Fenwick and Ryan, Montreal, has been admitted into partnership by Craig, Luther and Irvine, Montreal.

Lieut.-Col. W. H. Clark-Kennedy, V.C., formerly manager for Canada of the Standard Life Assurance Company, has returned to Montreal after an absence of four years overseas.

Mr. Alfred G. Dent, general manager of the Liverpool, London and Globe Insurance Company, and **Mr. A. Duncan Reid**, president of the Globe Indemnity Company, are in Canada at present.

Mr. W. B. Meikle, president of the British America and Western Assuranc Companies, of Toronto, sailed for England, on June 2nd, for a business trip. He will be away for a few weeks.

Mr. J. A. MacDonald, of Montreal, has gone to London, England, to enter the services of the Sterling Offices, Limited. He is a son of Mr. J. R. MacDonald, joint manager of the Mount Royal Assurance Company.

Mr. George W. Parks has been elected president and general manager of the Maxwell Motor Company of Canada, Limited, and the Chalmers Motor Company of Canada, Limited. Mr Parks has had a broad and extensive business experience. In his younger days he gained valuable training in the sales department of a New England manufacturing concern. Later on he was junior partner and subsequently owner of a manufacturing business in Rhode Island. Withdrawing from this business, he organized the George W. Parks Company—a manufacturing concern which enjoyed splendid business until the outbreak of the world war.

Lieut.-Col. Clarence A. Denison, chief accountant of the Standard Bank of Canada, retired from active banking work on the 1st of June. His retirement discloses a record almost unique in the history of Canadian banking, showing as it does, the holding of a post continuously and unbrokenly for the long period of forty-one years. In 1869, Col. Denison joined the staff of the City Bank of Montreal. This bank later united with the Royal Canadian Bank,the amalgamation being called the Consolidated Bank of Canada. In 1874 he entered the service of the St. Lawrence Bank which on the next year, 1875, assumed the name of the Standard Bank of Canada. Mr. John L. Brodie, formerly manager of the Royal Canadian Bank of Montreal, became cashier. In 1878, he was appointed chief accountant to the bank later united with the Royal Canadian Bank, the [illegible] of the Standard Bank of Canada, it had eight branches, with total assets of $1,730,000, and was paying a dividend of six per cent.; he is leaving it with one hundred and fifty-one branches and total assets of something over $83,000,000, and paying a dividend of 13 per cent. Col. Denison has always been in close touch with the customers and shareholders of the bank, particularly the latter, and they will learn with genuine regret of his severance from active affairs of the bank, although recognizing his right to a well-earned rest. To Col. Denison, himself, it must be a great source of satisfaction on his retirement to know that the work and the institution with which he has been associated, life long, have expanded and prospered.

OBITUARIES

Mr. Robert H. Davies, of 45 Foxbar Road, son of William Davies, founder of the William Davies Company, died on June 2nd, at Baltimore, Md.

Mr. George J. Pyke, one of Canada's oldest insurance men, died in Toronto, last week. He and the late G. F. C. Smith, entered the Liverpool and London and Globe Insurance Company together. Mr. Pyke rose to be assistant manager, and was afterwards general manager of the Stadacona Insurance Company. Leaving that company on its withdrawal from business in 1880, he was appointed general agent for the Quebec Insurance Company for Ontario, with residence in Toronto.

LONDON ASSURANCE CORPORATION

The London Assurance Corporation is one of the oldest companies in the world, and during its existence of almost two hundred years it has shown consistent progress. The balance sheet as at December 31st, 1918 is given elsewhere in this issue. Total assets, it will be observed, are $42,632,296, of which over $10,000,000 is invested in British government securities. In addition to the special funds for the different classes of business written, there is a general reserve fund of $3,750,000 and an investments depreciation account of $1,650,000. The paid-up capital is $3,741,375, and there is a balance of $986,358 at the credit of profit and loss.

During the year 1918 the life insurance funds were increased by about $700,000. Net premium income for the year on this account amounted to $1,336,680, and total income from all sources was over $2,000,000. Claims were $842,160. In the fire department the net premium income was $6,158,085, and losses, inclusive of all claims, were $2,651,415. The funds were increased from $4,500,000 to $5,000,000. The loss ratio was, therefore, 43.5 per cent., which is considerably less than it was in the two preceding years; the expense ratio, on the other hand, was slightly higher. In the marine department net premiums amounted to $6,067,755, and the losses paid and outstanding totalled $3,834,590. The balance at the credit of this fund was reduced from $6,750,000 to $6,500,000. In the accident department the claims paid and outstanding were $87,500, compared with net premium income of $281,500. Substantial amounts were transferred from each of these departments to profit and loss account, in which there was a balance of over $900,000 brought forward from last year, making a total in the account of $3,974,565. After paying dividends and providing for income and excess profits, taxes, investment depreciation and contingencies, the sum of $500,000 was transferred to general reserve, and the balance, $986,358, carried forward into profit and loss.

The London Assurance Corporation has been operating in Canada for nearly sixty years, during the past seventeen of which it has been under the joint management of Messrs. W. Kennedy and W. B. Colley, Montreal. Its Canadian business has been successful, its net cash premiums last year amounting to $382,194 an increase of almost $50,000. The loss ratio was 43.67 per cent., and the average for the six preceding years has been under 45 per cent.

THE COST OF LIVING COMMITTEE

THE Dominion Government has appointed a Special Committee of the House of Commons to investigate the cost of living. There is already a Cost of Living Commissioner who is an executive officer in the department of labor. The work of the Commons Committee will, according to the plans, be extensive and will include not only an investigation into the cost of essential commodities such as food stuffs, but of many other articles. The actual results attained cannot, of course, be very great as the causes which are responsible for the present scale of prices are beyond the control of the Canadian or any other individual government. The existence of this committee, however, and the publicity which will accompany its work, should be an important factor in impressing upon the public the fact that undue profits in Canada constitute an insignificant factor in retail prices. It is unfortunate that so much attention has been devoted to a few instances of large profits while the numerous companies which are in difficult financial circumstances are entirely overlooked.

The discussion which took place in the House of Commons on June 4th, in connection with the organization of this committee, indicates the wide range of causes which are held to be responsible for the present difficulty. George B. Nicholson, East Algoma, who was elected chairman, said that if the committee is to do anything to settle the unrest in the country because of the high cost of living, it would be necessary to get at the causes of present high prices, and let the people know what they are. The inquiry, Mr. Nicholson said, should be wide open and confined to definite lines. A. B. McCoig, Kent, asked if Mr. Nicholson meant that if the committee finds out the cause of the high cost of things it should take steps to bring about a change. Mr. Nicholson having replied in the affirmative, Mr. McCoig suggested the appearance before the committee of the sales agents of the International Harvester Company and the Advance-Rumley Company, of Winnipeg, to explain the sale of a number of tractors, which he said, where sold at higher prices than should have been asked in view of the fact that the government has been bringing tractors into the country, and at low cost, in order to encourage production.

H. H. Stevens, Centre Vancouver, after pointing out that it would be impossible for the inquiry to cover a wide range during the remaining days of the session, moved a resolution suggesting that the Boards of Trade in all the larger industrial centres of Canada should be asked to appoint a committee to supply the committee of inquiry with information relating to retail and wholesale prices. Mr Stevens thought the committee should devote particular attention to the matter of the spread of prices between the manufacturer and the consumer. Mr. Stevens' proposal met with considerable opposition on the score that the Boards of Trade would not act. E. W. Nesbitt (N. Oxford) expressed the opinion that the proper way to proceed was to send for the manufacturers, wholesalers and retailers to give evidence. Jas. Douglas, Strathcona, said the committee should be given power to bring in a report before the House prorogues, and a full report at the fall session if one is held. After further discussion, Mr. Stevens' resolution was adopted in the following form:—

"That, with a view to assisting this Committee, we request the Mayors of the following cities, viz.: Halifax, St John, Quebec, Montreal, Toronto, Hamilton, Fort William, Port Arthur, Winnipeg, Regina, Calgary, Edmonton, Vancouver and Victoria, to form a committee consisting of the presidents of the Boards of Trade, presidents of the Trades and Labor Councils, presidents of G.W.V.A., and two representatives of women's organizations, or such persons as the foregoing organizations may appoint.

"Such committees to ascertain the base cost to importer or manufacturer of following staple articles: boots and shoes, ordinary articles of clothing, meats and meat products of packing companies, fresh and cured, flour and cereals, coal, silk, and bread; also average rentals for residents of working classes; also average general rate of bank interest on commercial paper, also the ultimate retail prices charged in ordinary retail stores, to consumers, delivered, of such articles.

"That the above committee be asked to perform the above duties as an emergency public service, to assist the committee in its work.

"That the object is to find out the spread between the original producer of common articles of necessaries of life and the price charged the consumer. That these committees be asked to report as early as possible on these items, and to furnish subsequently such other information as they may desire."

UNEMPLOYMENT INSURANCE

IN Canada we are now going through the initial stages of what is undoubtedly a period of depression and falling prices. This condition is already accompanied by an increasing amount of unemployment which will probably be accentuated by the high wage scales being put into force. The unemployment of such periods is not confined to the transient class, but includes a considerable proportion of worthy cases. Insurance for the maintenance of the unemployed is a subject already of much interest.

Such insurance is not entirely new, but has already been tried in Great Britain and Germany. Dependence on charity is certainly not suited to our modern complex economic system, in which wage earners are gathered in great industrial centres. There is, after all, little difference between a municipal bread line and a system of allowances during a period of unemployment, except that the latter is more adequate and carries with it less of the stigma of disgrace. Such payments should not by any means equal what is popularly referred to as a "living wage," but should be merely a minimum subsistence allowance to cover a temporary period. A maximum time would also have to be fixed during which such allowances should be available for any individual.

The advantages of such a uniform system for a province or for the whole Dominion would be that such uniformity would prevent what commonly happens when a municipality, in order to relieve the local situation, undertakes expensive public works and attracts to it the unemployed from other centres, thus relieveing them of this burden. It would also offset the arguments frequently put forth that public works should be undertaken regardless of their economic value; in order to relieve this economic condition it might be cheaper to make such allowances in return for no services whatever than to pay wages amounting to several times the amount for works of little value.

On the other hand there are substantial objections to any such measure. The existence of such payments would in some degree remove the incentive to secure employment and remain employed. It is for this reason that any such payments would have to be a mere fraction of the ordinary earning power of the individual. On this phase, president Haley Fiske of the Metropolitan Life Insurance Company may be quoted as follows:—

"Any argument that such insurance puts a premium on wilful idleness can be met with restrictive provisions. It can be provided that a policyholder out of a job by his own volition, by having quit, cannot benefit. And payment may be deferred for a given time after a man does lose his job and restricted to a period within which he can reasonably find another. Of course, human nature being what it is, there is bound to be a certain amount of unfair advantage taken or attempted, just as we find some malingering in connection with health insurance. But that doesn't invalidate health insurance as a thoroughly good thing." Again the financial burden would be enormous, but in the end it might be more economical to meet such expenses out of current revenue than to add them to our debt without compensating assets.

Another difficult phase is the method of putting such a scheme into force. Unemployment insurance is not written by insurance companies because the losses are not sufficiently calculable, the personal element is too great, and the moral hazard is enormous. It would not seem to be feasible that the existing insurance organizations could be utilized for this purpose. The only alternative, then, is the state. Whether the premiums should be assessed on each individual or raised out of general taxation would be a critical point as, if raised out of general taxation, it would be distinctly a socialistic measure designed to maintain the poor at the expense of the rich.

GOVERNMENT CREDITS NOT APPROVED

THE message of Mr. Lloyd Harris, chairman of the Canadian Trade Commission in London, who is now visiting Canada, is that the initiative for securing foreign trade must rest with the manufacturers and commercial men of Canada. In addressing the Toronto Board of Trade on June 3rd, he said that financing must be arranged through the Canadian banks in co-operation with the exporters. Although credits to the amount of $125,000,000 have already been granted by the Dominion government, it is, according to a recent announcement of Sir Thomas White, not the intention to make any more advances of this kind. The function of the Canadian Trade Commission in London, said Mr. Harris, is not to secure orders but to advise manufacturers as to industrial conditions and possibilities in foreign countries. He urged that representatives be sent abroad who were not merely salesmen but should know also the technical details of the business. There are good opportunities for business in practically all lines in Great Britain and a considerable business could also be done with Greece, Roumania and Poland. The finances of France will not permit of substantial borrowings for the present, but Belgium may be in a position to do business within a year.

Municipal ownership of the local street railway system is being discussed in Montreal, but the supporters of the proposition are confronted with the figures showing the substantial deficits which have been occurring in connection with the operation of the civic car lines in Toronto. It should be remembered, however, that the civic lines in Toronto do not form a connected system but are mere stub lines serving certain suburban districts. The rates are, moreover, fixed below cost; the civic lines could be placed on a paying basis by an increase in rates which would not make the total cost of transportation from these suburbs greater than the cost of transportation over a single system in many cities on this continent. The argument against public ownership, to be derived from the experience of Toronto, is not that it can't pay, but that political influences will probably prevent it from paying.

CASUALTY ACTUARIAL AND STATISTICAL SOCIETY

The semi-annual meeting of the above society was held on May 23rd, in New York. Over fifty members were present. The address of the president, Mr. Joseph H. Woodward, was entitled "Insurance and Humane Behavior." He dealt with some of the psychological effects of insurance.

"Revision of Pennsylvania Compensation Rates," was discussed by two members from that state. G. F. Michelbacher, actuary of the National Workmen's Compensation Bureau, New York, read a paper on "Casualty Insurance for Automobile Owners." He predicted that automobile insurance will eventually overtake and exceed workmen's compensation insurance as a source of premium income. He discussed at some length the basic principles upon which rates should be calculated and the points of coverage, namely, public liability, property damage and collision.

Other papers were entitled, "Mortality From External Causes Among Industrial Policyholders of the Metropolitan Life, 1911-1916;" "The Essentials of Family Statistics;" "Comparison of Actual and Expected Losses as a Means of Loss Analysis."

During the year ended February 28th, the Toronto Bureau of Municipal Research published seventeen bulletins and booklets dealing with matters of civic government and finance. The bureau's expenditure slightly exceeded its revenue during the year.

INSURANCE CONVENTION AT QUEBEC

Mr. Fr[illegible] G. Dexter, of New York, was in Quebec last week making arrangements for the reception in Quebec on August 27th and 28th next for three hundred and fifty to four [illegible] delegates of the Mutual Life Insurance Co., of New York who will gather there in convention. This gathering will comprise the top-notch representatives of this company who have written anywhere from two hundred thousand upwards during the past year.

MERCHANTS BANK ANNUAL MEETING

At the annual meeting of the Merchants Bank of Canada held in Montreal on June 4th, the shareholders expressed satisfaction with the annual statement presented. This statement has already been reviewed in these columns. The president, Sir Montagu Allan, pointed out that the bank's clientele had subscribed $45,000,000 to the last Dominion war loan, of which only $4,000,000 was conversions. The balance, $41,000,000, represented withdrawals from the bank. In spite of this, however, deposits were now $25,000,000 higher than they were one year ago.

The general manager, Mr. D. C. Macarow, outlined the present economic position of Canada and said he could see no reason why we should not be optimistic. He pointed out the advantages to be secured by having an export trade and a good mercantile marine. He also referred to the recent formation of the Bankers' Trust Co., which is now in operation and is an important adjunct to the business of the bank. The retiring directors were elected for the ensuing year.

Authorization was also given to increase the capital stock of the bank from $10,000,000 to $15,000,000 by the creation of 50,000 new shares with a par value of $100 each. The president explained that there is no intention of issuing the stock for the present ,but that the directors thought it in the best interests of the bank to make such provision in advance of possible or probable requirements.

GOVERNMENT EMPLOYMENT SERVICE

Owing to the strike situation in Winnipeg, the reports from the Manitoba Employment Offices for the week ending May 17th, were not received by the Employment Bureau of the Department of Labor at Ottawa. Seventy-four offices in the remaining eight provinces, however, reported that they had referred 4,672 persons to positions during the week and had received notification that 4,452 of these had secured regular employment. In addition 340 casual jobs were supplied. This represents a slight improvement over the previous week when the Employment Service in these eight provinces reported 4,429 regular and 399 casual placements. The total placements in the nine provinces for the week ending May 10th, was 4,737 regular and 591 casual.

Of the regular placements for the week ending May 17th, 2,152 were soldiers and 334 were women.

Prince Edward Island reported 80 placements for the week, an increase of 39 over the preceding week; 147 were reported by Nova Scotia, an increase of 19; 218 by New Brunswick, an increase of 27; 436 by Quebec, an increase of 26; 1734 by Ontario, a decrease of 85; 510 by Saskatchewan, an increase of 5; 813 by Alberta, an increase of 37; and 514 by British Columbia, a decrease of 35.

During the week 6,744 applicants were registered and [illegible] vacancies were notified by employers. At the end of the week 5,176 applicants were reported unplaced and 5,295 vacancies remained unfilled. Of the unfilled vacancies 2,079 were for farm laborers and 1,252 were for women workers. These two classes account for 62.9 per cent. of the total unfilled vacancies. On the other hand only 497 or 11.2 per cent. of the placements were for farm laborers, and only 334 or 7.5 per cent were for women workers.

HOWARD SMITH PAPER MILLS, LTD.

The issue of $800,000 first mortgage 15-year six per cent. bonds of Howard Smith Paper Mills Company, previously referred to in these columns, has been purchased jointly by Nesbitt Thomson and Company and A. E. Ames and Company, who are making a public offering. The Howard Smith Paper Company has two mills, the Beauharnois and the Crabtree, both located in Quebec, and at the present time turns out about 79,000 pounds of high grade ledger and writing paper daily. The preferred and common stocks are listed on the Montreal Stock Exchange. The issue is being offered at 93 and interest, yielding 6¾ per cent. Full particulars are given elsewhere in this issue.

The success of Howard Smith Paper Mills Limited, illustrates the progress of writing paper manufacturers in the past few years. Raw material is available in abundance and Canada's water powers supply the necessary power at the cheapest rates.

FLAX SPINNERS, LTD., BOND ISSUE

An issue of $150,000 of seven per cent. first mortgage 15 year bonds of Flax Spinners, Limited, is being put on the market by Graham, Sanson and Company, Toronto. The bonds are dated April 1st, 1919, are due April 1st, 1934, and are in $500 and $1,000 denominations. The selling price is 102.35 and interest, yielding 6¾ per cent.

Flax Spinners, Limited, was recently formed as a subsidiary to Dominion Linens, Limited, which owns all the stock.

The plant of each company is located at Guelph, Ont., and the output of the spinning company is to be sold to Dominion Linens, Limited. The latter company guarantees the present bond issue.

WEEKLY BANK CLEARINGS

ONTARIO'S METALLIFEROUS PRODUCTION

Output of Copper, Nickel, Cobalt and Lead Increased—Prices and Values Fall Off

RETURNS received by the Ontario Bureau of Mines for the three months ended March 31st, 1919, are tabulated below. For purposes of comparison the quantities and values are given for the corresponding period in 1918:—

Summary of Metalliferous Production. First Quarter of 1919.

	Quantity.	
	1918.	1919.
Gold (ounces)	113,387	98,188
Silver (ounces)	4,114,856	3,105,002
Copper, blister (lbs.)	......	1,724,631
*Copper in matte (tons)	4,727	2,674
†Nickel in matte (tons)	9,677	5,610
Iron ore exported (tons)	501	4,840
‡Iron, pig (tons)	17,404	14,170
Cobalt, metallic (lbs.)	37,545	13,594
Cobalt oxide (lbs.)	81,760	127,954
Nickel oxide (lbs.)	......	5,070
Nickel, metallic (lbs.)	44,154	1,830,569
Other nickel and Cobalt compounds (lbs.)	143,381	31,370
Lead, pig (lbs.)	60,283	567,716
Molybdenite, concentrates (lbs.)	17,410	......

	Value.	
	1918.	1919.
Gold	$ 2,265,521	$ 2,026,536
Silver	3,740,843	3,152,700
Copper, blister	......	270,493
*Copper in matte	1,748,990	588,280
†Nickel in matte	5,806,200	2,692,800
Iron ore exported	2,638	41,118
‡Iron, pig	461,940	399,963
Cobalt, metallic	75,625	20,889
Cobalt oxide	130,486	186,036
Nickel oxide	......	1,421
Nickel metallic	17,662	756,062
Other nickel and Cobalt compounds	18,386	11,497
Lead, pig	5,066	34,684
Molybdenite, concentrates	24,548	......
Total	$14,297,905	$10,182,479

The value of the mineral output of the province for the first quarter of the year reflects the after effects of the war. Nickel and copper production show a marked decline both in quantity and value. The situation, however, is expected to improve gradually. Silver production has decreased by over one million ounces, but the effect in valuation is not so great owing to the present high price of the metal. Cobalt and nickel oxides, metallic nickel and lead show an increase in value over the 1918 figures. Fuller explanations are offered under the separate headings.

Gold

Although the gold output shows a decrease of 24,104 ounces as compared with the first quarter of 1918, the outlook is such that a substantial increase may be expected for the full year. With the Dome mill now in operation at Porcupine and the Kirkland Lake and Tough-Oakes mills at Kirkland Lake, an improved showing is anticipated for the half-year report. A great deal of interest is being shown in the gold fields of northern Ontario, and much prospecting and development of new properties is going on. During the period, with the exception of a few days at the end of March, only two mills were operating at Porcupine, namely the Hollinger and McIntyre. At Kirkland Lake the Lake Shore and Teck-Hughes were the only mills at work. For the quarter 206,603 tons of ore were milled as compared with 262,577 tons in 1918. Of the total 94.5 per cent. was milled at Porcupine. In addition, 18,620 ounces of silver worth $18,677 were recovered from gold ores.

Silver

Silver from Cobalt and outlying silver camps was marketed to the extent of 3,080,104 ounces. In addition 24,878 ounces were recovered from the refining of gold ores and nickel-copper matte. Mines producing over one-quarter million ounces are given in order: Nipissing, Mining Corporation of Canada, Kerr Lake, McKinley-Darragh-Savage. Of these Nipissing marketed over one million ounces. Some very rich ore running over 8,000 ounces to the ton has been taken from the Foster mine, under lease to Messrs. Campbell and Fairbairn. The price of the metal remained stationary at $1.01⅛ during the three months, although since May 5th export restrictions have been removed by the Federal Reserve Board of the United States, and the price has advanced.

Southern Ontario refineries treated 1,257 tons of ore and concentrates, and 919 tons of residues, recovering therefrom 1,354,441 ounces of silver in addition to the Cobalt and nickel compounds as enumerated in the table. Although 170,478 lbs. of metallic nickel were produced only 16,284 lbs. were marketed.

The market for stellite, used for high-speed cutting tools, has fallen off since the war ended. New uses, however, are being found and a market developed for this product, which is an alloy of the metal Cobalt.

Nickel-Copper

There were 229,822 tons of nickel-copper ore raised and 226,954 tons smelted, as compared with 354,689 and 325,386 tons, respectively, for the first quarter of 1918. The cessation of hostilities immediately resulted in a decreased nickel demand, and the period of reconstruction has not yet provided a market sufficiently large to absorb the war basis output. In consequence, there has been a great curtailment in production both by the International and Mond companies. The prices also have dropped appreciably, notably in the case of copper. Out of a total output of 12,529 tons of Bessemer matte, 2,960 tons were refined at the Port Colborne plant of the International Nickel Co. of Canada, the products being metallic nickel, blister copper, silver and gold. The last two mentioned are present in small proportion. Heretofore, the only metallic nickel recovered in Ontario was the small quantity obtained by the several refineries which treat the silver-cobalt-nickel ores of Cobalt. Since the Port Colborne commenced operations in July of last year, metallic nickel has been produced within the province from nickel-copper ores.

Iron Ore and Pig Iron

Iron ore shipments include 4,840 short tons from Moose Mountain, Ltd., and the Poe Mining Co. to points outside the province, while 27,536 tons from the Magpie Mine were shipped to Sault Ste. Marie for domestic consumption.

Iron ore smelted in the period by six companies operating ten blast furnaces was 362,656 tons, of which 332,479 tons were imported from the United States. The total output of pig iron was 170,325 tons, valued at $4,807,614. Only the proportion of pig iron produced from Ontario ore is included in the table—namely, 8.32 per cent. of the total. Steel produced by the Algoma Steel Corporation and the Steel Co. of Canada totalled 194,505 tons, worth $5,912,459. In addition there was an output at the Sault of 11,631 tons of spiegel and 107,635 tons of coke.

---

*Copper in matte was valued at 18½ cents and nickel at 30 cents per pound in 1918. For 1919 the values have been placed at 11 and 24 cents per pound, respectively.

†Including briquettes. Total shipments of iron ore to both foreign and domestic points in 1919 were 32,376 tons valued at $146,741.

‡Total output of pig iron was 170,325 tons worth $4,807,614. Figures in the table represent proportional product from Ontario ore.

AN ALLIANCE FOR LIFE

Many of the large Corporations and Business Houses who bank exclusively with this institution, have done so since their beginning. Their banking connection is for life—yet the only bonds that bind them to this bank are the ties of service, progressiveness, promptness and sound advice.

320 Branches in Canada, extending from the Atlantic to the Pacific

New York Agency: 63 and 65 Wall Street

Bankers in Great Britain: The London Joint City & Midland Bank, Limited; The Royal Bank of Scotland

37

A new producer of pig iron this year is the Parry Sound Iron Co., Ltd., also the Midland Iron and Steel Co., Ltd., which started operations in the fall of 1918.

Molybdenite and Lead

As a result of decreased demand for molybdenum and a marked decline in price, it has not been profitable to operate molybdenite mines since the close of the war.

The entire production of pig lead comes from the mine and smelter operated at Galetta by the James Robertson Estate.

EDMONTON-DUNVEGAN RAILWAY TO BORROW

The Edmonton, Dunvegan and British Columbia Railway wants to borrow $3,000,000 in connection with development of Peace River Railway enterprise. Negotiations with the Dominion government are in progress relative to taking over the enterprise by federal system, but nothing definite has been announced. The company will ask further assistance from the Alberta government, failing direct aid from Ottawa.

The province already has guaranteed the company's bond issues and has made a direct loan to the company. The guarantees are $7,000,000 at 4 per cent. and approximately $2,7[illegible].000 at 4½ per cent. The loan is for $2,000,000 at 5 per cent. The yearly charges are less than half a million dollars, which someone must pay or there is a default, first, by the company, and second, by the province. If the company does not sell out to the Dominion and cannot pay the bond interest, Alberta must.

Western advices are that $3,000,000 will provide the funds for the required development of the road.

FRASER VALLEY MUNICIPALITIES UNITED

At a special meeting, held in the Westminster Board of Trade rooms last week, where representatives from various Fraser River district municipalities were represented, a new organization, to be known as the Affiliated Boards of Trade of Fraser Valley, B.C., was launched. The object of this organization is to further the industrial development on the banks of the Fraser River, the meeting being called by the New Westminster Board of Trade.

The following officers were unanimously elected: President, Mayor Gray, New Westminster; vice-president, Reeve Sanderson, Burnaby; secretary, H. E. Chamberlain, South Vancouver. It is proposed at a later date to inaugurate a real, live publicity campaign in connection with this organization, also a committee to draft a constitution and by-laws has been selected as follows: Messrs. Sanderson, Holloway, Gray and Chamberlain.

Messrs. R. A. Daly and Co., Toronto, have moved their offices from the Bank of Nova Scotia building to the Bank of Toronto building, King and Bay Streets.

Marine Clerk Wanted for Insurance Company

GOOD opening for Experienced MALE MARINE INSURANCE CLERK in insurance office. Give full particulars as to age, experience, salary expected, etc. Applications will be treated in strictest confidence.

Apply Box 199, The Monetary Times, Toronto.

AMERICAN INSTITUTE OF ACTUARIES

The 11th annual meeting of the American Institute of Actuaries commenced in St. Louis on June 5th. The following papers presented at last year's meeting are being discussed:—

(1) Mr. Mead's paper, "Mortality Among Women," discussion led by Messrs. Marshall and Bowerman; (2) Mr. Washburn's paper, "Fluctuating Currency," discussion led by Messrs. Stein and Higdon; (3) Mr. Coler's paper, "Fraternal Benefit Societies," discussion led by Messrs. Nitchie and Buttolph; (4) Mr. Green's paper, "Actuarial Aspects Workmen's Compensation," discussion led by Messrs. Vineberg and Morris; (5) Mr. Buttolph's paper, "Note on Liability to Death from Accident," discussion led by Messrs. Phelps and Webb.

The principal subject under discussion is the new table of mortality and whether it should be made the basis of premiums and reserves. This discussion is being led by Mr. Arthur Hunter, who was chairman of the general committee, and by D. J. Arnold, secretary and actuary of the Illinois Life Insurance Co., who was chairman of the American Institute of Actuaries. The following subjects are also being informally discussed and any other actuarial subjects which may be introduced:—

What should be the ratio of the net and gross amounts assumed by a company on a single life? Modification of commissions to agents on policies reinsured for amounts in excess of the company's limit. Revision of the terms used in companies' statements in order to more clearly define the terms and prevent misunderstandings of the public in reference to the true nature of the funds. What affirmative action is necessary in order to terminate a policy which, by its terms, becomes void or voidable by virtue of the insured's own act? Adequate reserves under a double indemnity provision. Mortality from after effects of influenza. Effect of influenza sequelæ on disability rates. Scope and advantages of a course of instruction on life insurance in American colleges and universities.

CONTROLLING BANK CREDITS

The checking up of bank advances is a branch of the business which has caused probably more difficulty in the United States than in Canada and various methods have been adopted in different cities there to handle this work. The system used in San Francisco is somewhat unusual in so far as it uses the credit interchange bureau of the local chapter of the Credit Men's Association. Describing the method in a recent letter to *The Monetary Times*, Mr. J. H. Sandborn, vice-president of the American National Bank of San Francisco, says:—

"This organization has a service under which applications for information are made by its various members, a boy collecting each day the requests from the various members, which are then classified as to the line of business, then mimeographed and sent out on a list twice a day. A member on receiving a list gives, by use of a code arrangement, his experience in handling the account, and the information contained in the replies after being assembled is issued to those who indicate they have dealings with the firm, and, in a bare way, gives such data as is obtainable showing the present condition of the party inquired about.

"Where a bank desires such a report, it can file its regular inquiry, or may go to the secretary of the association, who will have one of his assistants make a special confidential inquiry of every bank with whom the party may deal.

"As a matter of fact, we feel, owing to the friendship existing between various local banks, that we can get as good a reply direct as by inquiring through the bureau, and as a matter of act the value of the reports received lies chiefly in the general credit standing of the party in the trade."

"WITH BILL OF LADING ATTACHED"

Refusal of Canadian Bank to Pay Draft When Terms Not Complied With is Upheld by Supreme Court

By M. L. Hayward, B.C.L.

THE above expression is a common one in commercial transactions, and in the case of the Pioneer Bank vs. the Canadian Bank of Commerce, the Supreme Court of Canada was called upon to interpret the term.

In this case, one, Hicks, the agent of the "Mutual Orange Distributors," sold one, J. J. McCabe, of Toronto, two cars of oranges, and asked McCabe to give a bank guarantee that the drafts for the oranges would be paid. McCabe, the buyer, then had the Canadian Bank of Commerce send the following wire to the Pioneer Bank at Porterville, California:—

"We guarantee payment of drafts on J. J. McCabe, 'with bills of lading attached,' not exceeding $1,629.70, covering two cars of oranges."

Acting on this guarantee, the Pioneer Bank cashed a draft drawn by Hicks on McCabe for $1,629.70 and forwarded the draft to the Bank of Commerce with bills of lading for the two cars of oranges attached. These bills of lading, however, showed that the oranges were consigned by the "Mutual Orange Distributors" to themselves and not to McCabe, and the following notation appeared on the bills.—

"Note on way bill. Permit inspection without bill of lading. Deliver without bill of lading on order of Mutual Orange Distributors."

McCabe, when the oranges arrived in Toronto, refused to take delivery or to pay the draft, and the Pioneer Bank sued the Bank of Commerce on the guarantee contained in the telegram quoted above.

Terms Not Complied With

The Supreme Court of Canada held that the Bank of Commerce was not liable on the guarantee, as the Pioneer Bank had not complied with the terms of the telegram, inasmuch as the bills of lading did not protect the Bank of Commerce, but left the cars under the entire control of the "Mutual Orange Distributors,'" who were the shippers, thereby depriving the Bank of Commerce of its claim against McCabe or the railway company.

The following paragraphs from the judgment of Judge Anglin show the grounds on which the Court proceeded as in deciding as it did.

The sole question in this case is whether the bills of lading (so called) attached to the draft discounted by the Pioneer Bank were in compliance with the terms upon which the Bank of Commerce guaranteed payment of the draft. I agree with the learned judges of the Appellate Division that, in guaranteeing "payment of drafts on J. J. McCabe with bills of lading attached," the guarantors were stipulating for documents to be attached to the draft which would exclusively entitle them or their customer McCabe (whom they knew and were prepared to trust) to delivery of the consignment from the carrier. The bills of lading, in fact, attached to the draft made the vendors, the Mutual Orange Distributors, consignees, and each on its face also bore this note:—

"Deliver without bill of lading on written order of Mutual Orange Distributors' agent." The waybills also carried the same note. The effect of these documents according to their terms, was to leave the consignment under the control and subject to the order of the vendors, the Mutual Orange Distributors, and, if it had been delivered to them or upon their order, or that of their agent, the carrier would [illegible] have had a complete answer to any claim by the Bank of Commerce. In other words, the effect of the bills of lading was that (if liable on its guarantee) the bank would have been compelled to trust for its security upon the [illegible] responsibility of the Mutual Orange Distributors and not to that of its own customer or of the carrier, for which it had stipulated.

Admittedly the bill of lading sent did not, as it could not, prevent the goods being dealt with (and lawfully dealt with so far as the carrier is concerned) without the bank's consent; and therefore, in my opinion, this was not such a bill of lading as the Canadian bank had a right to receive before being bound by their guaranty.

It may be that, by some means or device, McCabe could have got the goods from the carrier on their arrival at destination. It may be that, if sued for the price by the vendors, McCabe would have no defence to the action. But it does not follow that there was compliance with the terms on which the Bank of Commerce agreed to assume the liability of a guarantor. Those terms were that from the moment that liability should arise—i.e., from the time at which the draft should be discounted by the Pioneer Bank, the guarantor should have, through the bill of lading attached to the draft, such security as would be afforded it by goods held by the carrier subject to delivery only to itself or its customer McCabe. In my opinion the Canadian Bank of Commerce did not receive the consideration for which it stipulated as a term of guaranteeing the draft on McCabe, and on that short ground its defence should prevail.

GOOD YEAR FOR MONTREAL HARBOR

The annual report of the Harbor Commissioners of Montreal for the year 1918, which has just been published, shows that many shipping records were made during that period. The trade and commerce of the port was second only to that of New York, out of the seven leading ports on the Atlantic coast. The value of imports was $214,285,029, of exports, $534,876,677, a total of $749,761,706. Receipts on revenue account were $2,104,191.48, an increase of $253,544.55 over the previous year. The cost of operation, maintenance, interest, etc., was $2,026,542, an increase over the previous year of $129,148, leaving a balance to the credit of revenue account for the year of $77,649. The interest charges, which amount to $903,585, show an increase of $10,833.32 on new loans, due to the continued carrying out of works of improvement.

There was received from the Dominion government on loan $380,000 on account of capital expenditure for works of improvement, and $300,000 to retire public debentures, which matured July 5th, 1918.

The disbursements on capital account in 1918 were $271,239.31. The debenture debt of the corporation on December 31st, 1918, was $27,222,000, of which $26,485,000 is due to the government and $737,000 to the public.

Cognizance is taken in the report of the completion of the New York State barge canal as being a considerable factor in the diversion of Canadian products through United States ports, and to offset this American advantage the commissioners suggest a simultaneous development of all the canal systems to Montreal.

SWIFT CURRENT TO VOTE ON GAS FRANCHISE

On June 16th the citizens of Swift Current, Sask., will vote on the acceptance or rejection of a twenty-year gas franchise to be given by the city to the Western Canada Gas and Fuel Co., which concern is now negotiating with Regina and Moose Jaw for a similar franchise.

The company is to pipe the gas into the city, lay its own distribution system in the city, and sell gas at approximately 35 cents per 1,000 feet, or, in any event, not higher than the price to be paid in other parts of the province covered by the same scheme. The city, on its side, is to give permission for the laying of the pipes within the corporate limits, and is giving an exclusive franchise to this company for twenty years. The agreement was accepted by the council.

IRRIGATION STRENGTHENS FARMER'S CREDIT

Greater Certainty of Harvest Assures Banker of Ability of Borrower to Repay—Ultimately Profitable Scheme

"THE development and extension of irrigation in the Lethbridge district will be of great benefit to the effect of stabilizing business and make it easier for the farmer to finance his operations," said Mr. K. D. Johnson, manager of the Molsons Bank, Lethbridge, recently.

"Under ordinary circumstances, a crop planted on non-irrigated land is no basis for credit until the season has so far advanced that it can be seen that the crop will mature without further moisture.

"On the other hand, a crop planted on properly irrigated land becomes a factor in determining a man's financial position almost as soon as it appears above the ground. If the land is properly irrigated, the farmer is then sure of getting a crop. This condition should enable him to obtain, early in the season, credit from his bank, which, otherwise, might be withheld until later on.

"Many other strong reasons can be advanced in favor of the Lethbridge irrigation projects. In years when food is scarce and prices abnormally high, as at present, the farmer who has some irrigated land should, if provident and farseeing, have enough feed on hand to carry on his spring work and not be forced to pay out much-needed money for products which it is his own business to produce. A farmer who owns non-irrigated land can take on no better form of crop insurance than by buying or leasing some irrigated land. If he crops an equal quantity of both, in case of drought he is assured a 50 per cent. crop on the total acreage, and his season's efforts are not a total loss. Where the farmer has not the means to purchase irrigated land he can usually lease some, and should do so where convenient and possible.

"The years 1915 and 1916 proved beyond doubt the great productivity of the soil in the Lethbridge district. The enormous yield of wheat in those years (as high as 60 and 70 bushels per acre being obtained) has shown what results can be obtained by getting sufficient moisture on the land in the crop season. That this can be done by irrigation has also been proven; and the cost of obtaining irrigation should not be a factor in determining its desirability. Its benefits are so great that the cost is nothing when compared to the lasting results to be obtained in years to come. Money used for the purpose of bringing water on to the land is the best investment a farmer can make. True, it may take some years before the dividends show very large, but it is sure, and infinitely better than any of the "Quicker Returns—Big Profit" schemes, such as oil and mining stocks, in which so much good money has been sunk of late years. We in the West have been too prone to jump at schemes to get rich quick, and the time has now come when we must get down to legitimate business and be patient and content to get behind solid and well-planned enterprises, which, although not paying big at the start, are safe, and based on something that will increase in value and profit as time goes on. The old saying, "Slow and sure wins the race," is applicable here, and, by getting down to solid, sure work, we shall all be saved the griefs and troubles caused by the "hit-and-miss, all-or-nothing" methods of the past."

NOVA SCOTIA FIRE INSURANCE LEGISLATION

The new revenue bill which has been passed by the Nova Scotia legislature includes a clause increasing the taxation of fire insurance companies doing business in the province from 1 per cent. to 1¾ per cent. of premium income. Legislation has also been passed to tax fire insurance agents according to a scale varying from $2 per annum in country districts to $10 per annum in cities. Life insurance agents have been taxed for some years past.

THE TORONTO "BUSINESS TAX"

Transfer of Bank Business Held to be Similar to Removal of a Person from Municipality

THE case of the city of Toronto vs. Quebec Bank, decided by Judge Masten of the Ontario Supreme Court, raised a rather interesting point in reference to the so called "business tax" on banks, and similar institutions, under section 10 of the Ontario Assessment Act, which section reads as follows:—

"Irrespective of any assessment of land under this act, every person occupying or using land for the purpose of any business mentioned, shall be assessed for a sum to be called the 'business assessment' to be computed by reference to the assessed value of the land so occupied or used by him," and among the classes of business liable to taxation under the act the section specifies, "every person carrying on the business of a bank or banker."

The Quebec Bank carried on business in the city of Toronto up to and including the year 1916, so that it was liable to the "business assessment" tax, but before the end of the year 1916, the Quebec Bank sold its assets in the city of Toronto to the Royal Bank of Canada, and ceased to do business in that city.

The Ontario Assessment Act, however, after providing for making the assessment, contains a provision that the assessment for any year may be adopted by the municipal council in the following year, as the assessment on which the rate of taxation for the following year shall be assessed and levied; and the taxes for such following year shall in such cases be fixed and levied on such assessment of the preceding year.

As the Quebec Bank was carrying on business in Toronto in the year 1916, it was assessed for that year as provided by the Assessment Act, and, acting under the provision quoted above, the city of Toronto adopted the 1916 assessment as the basis for the 1917 tax, and levied the "business assessment" tax upon the Quebec Bank for the year 1917. The bank resisted payment on the ground that it had paid all rates, taxes and assessments in the city of Toronto up to the end of the year 1916, and that, as it had not carried on any business in Toronto in 1917, it was not, therefore, liable to the 1917 "business assessment" tax.

Held to be Same as Person

This argument sounded very reasonable, but, notwithstanding, Judge Masten held that the bank was liable for the 1917 tax, basing his decision on the fact that the Interpretation Act of Ontario provides that " 'person' shall include a body corporate or politic," and that the Ontario Assessment Act also provides that "every person assessed in respect of business or income shall be liable for any rate which may be levied upon such assessment notwithstanding the death or removal from the municipality of the person assessed," and on the strength of these provisions the judge held that the word "person" would include a bank, and that when the Quebec Bank transferred its assets to the Royal Bank and went out of business, the Quebec Bank was in the same position as a "person removed from the municipality," so that the Quebec Bank was still liable for the tax.

"On behalf of the bank it is argued that it does not come within the terms of the above enactment," said the judge in delivering judgment, "because it is alleged that it is not a person who has moved from the municipality, but that it has gone out of business entirely. In my view, this contention cannot be sound. The Quebec Bank was admittedly in business in the city of Toronto during the year 1916, and was not there in the year 1917. It must, therefore, have removed from the municipality; and the word 'person' includes the corporation. I am therefore of opinion that the case is governed by the provisions of the Ontario Assessment Act, as above quoted, and that the bank is liable."

The Alberta branch of the Retail Merchants' Association of Canada held a convention in Medicine Hat on June 3rd, 4th and 5th.

MAY FIRE LOSSES

Small Increase for the Month—Large Decrease for the Year

The Monetary Times' estimate of Canada's fire losses during May, 1919, is $1,785,030, compared with $1,080,070 in April, and $3,570,014 in May, 1918. The following is the estimate of the April fire losses:—

Fires exceeding $10,000	$1,479,500
Small fires reported	72,700
Estimate of unreported fires	232,830
Total	$1,785,030

The Monetary Times' record of the past three years and this year to date shows the following monthly losses:—

Month.	1916.	1917.	1918.	1919.
January	$ 1,649,217	$ 1,918,660	$ 2,688,556	$ 3,915,290
February	3,275,600	2,009,953	2,243,762	1,091,834
March	1,406,501	2,050,650	1,682,286	2,154,095
April	1,460,437	1,317,714	3,240,187	1,080,070
May	1,850,205	1,163,110	3,570,014	1,785,030
June	494,557	1,184,627	3,080,982	....
July	3,039,634	1,101,734	3,369,684	....
August	1,057,109	1,230,183	3,110,445	....
September	981,703	1,301,700	917,286	....
October	1,077,815	704,605	5,119,145	....
November	923,235	959,049	1,059,580	....
December	3,271,496	5,144,100	1,733,917	....
Totals	$20,487,509	$20,086,085	$31,815,844	$10,025,319

The following is a list of fires in May at which the loss amounted to $10,000 and over:—

Erindale, Ont., May 5, store of John Barker, $10,000.

Melville, Sask., May 1, Saskatchewan Co-operative Creamery, $12,000.

Winnipeg, Man., May 2, warehouse of Thos. Kelly and Sons, $150,000.

Aberdeen, B.C., May 9, four thousand-ton twin-screw wooden hull, with adjoining ways, sheds and docks, $300,000.

Cobalt, Ont., May 13, twenty buildings in South Porcupine, $17,000.

Halifax, N.S., May 18, Salvation Army Barracks, $15,000.

Lakefield, Ont., May 20, residence of Arthur Payne, $10,000.

Millidgeville, N.B., May 16, four houses and shed belonging to E. L. Jewett estate, $15,000.

Weston, Ont., May 21, building of Reliable Bedding Co., $20,000.

Windsor, Ont., May 13, Tweedale's drug store, $50,000.

Kentville, Ont., May 9, buildings of Advertiser Printing Co., Green Lantern Restaurant and Stickler Photo Studio, $70,000.

Toronto, Ont., May 9, life-saving station at Eastern Gap, $[illegible]1,000.

Calgary, Alta., May 14, building owned by W. R. Hull, $[illegible],000.

Collingwood, Ont., May 25, building of Imperial Steel and Wire Co., $200,000.

Edmonton, Alta., May 19, livery stable owned by Mrs. W. M. Armstrong, $15,000; and buildings in the Thomas Allen Block, $15,000.

Lac la Biche, Alta., May 19, property in town of Lac la Biche, $200,000.

St. Jacques de L'Achigan, Que., May 15, building of Durg's Canadian Tobacco Factory, Ltd., $150,000.

Hamilton, Ont., May 30th, general store of Touchman and Company, $15,000.

Swift Current, Sask., May 28th, power house, $60,000.

Fredericton, N.B., May 30, double tenant house on Court House Square, owned by Fred. B. Edgecombe, $10,000.

Destroyed or Damaged

Among the structures damaged or destroyed last month were:— Residences, 16; barns, 7; mine building, 1; barracks, 1; business buildings, 31; trimmings pile; life saving station, 1; theatres, 1; farm buildings, 1; store, 1; frame buildings, 2; church, 1; elevators, 4; laundry building, 1; warehouse, 1; hotel, 1; bake shop, 1; freight cars, 1; livery stable, 1; wooden hull, 1; high school, 1; shed, 1; car, 1; drug store, 1; clubhouse, 1.

Among the causes reported last month were:—Explosion in chemical room, 1; striking a match over gasoline tank, 1; short circuit in electric equipment, 1; spontaneous combustion, 1; careless throwing of lighted match, 1; friction from a lathe, 1; lightning, 1; cigarette thrown upon waste paper in telephone booth, 1; combustion of photographic chemicals, 1; spark from burning building, 1.

Decrease in Fatalities

The following is a list of fires at which fatalities occurred last month:—

Kingston, Ont., May 4—Trapped in burning house	1
Ingersoll, Ont., May 7—Clothes caught fire from gas stove	1
Lindsay, Ont., May 10—Fire from match	1
Sherbrooke, Que., May 13—Fire from pile of burning rubbish	1
Regina, Sask., May 15—Fire from match	1
Prince Rupert, B.C., May 16—Clothes caught fire from oil stove	1
Cargil, Ont., May 16—Fire from match	1
Toronto, Ont., May 21—Fire from matches	1
Sherbrooke, Que., May 25—Overturned lamp	5
Calgary, Alta., May 25—Clothes ignited from cook stove.	1
Huntingdon Township, Ont., May 28—Coal oil	1
Total	15

NEW MONTREAL FINANCIAL PARTNERSHIP

A new financial partnership in Montreal between J. R. Ryan, of the Montreal Stock Exchange firm, J. R. Ryan & Co., J. O. Hastings, and C. B. Grier, has been formed. Business is now being carried on under the name of Ryan, Grier & Hastings. Mr. Ryan will continue to occupy his seat on the Montreal Exchange, and will represent the new firm there.

ORDERS PLACED AGAINST FOREIGN CREDITS

Orders to the amount of nearly $16,000,000 have already been placed in Canada under the credits recently advanced, according to a statement which has just been issued by the Canadian Trade Commission, Ottawa. Roumanian orders comprise over $15,000,000 of this, and the balance was made up of Belgian orders to the amount of about $750,000. The classification is as follows:—

Against Roumanian credit—Binders and parts, $670,995, all placed in Ontario; binder twine, $940,996, placed in Quebec, $59,640, in Ontario, $881,356; edged tools, $136,743, all Ontario; wheat, $187,000; dairy utensils, $12,790, all in Ontario; paints and oils, $189,845, placed in Quebec, $182,095, in Ontario $7,750; cottons, $2,624,512, placed in Quebec, $2,180,262, Ontario, $444,250; woolen goods, $4,750,526, placed in Quebec, $196,530, Ontario, $4,216,442, Nova Scotia, $306,744, New Brunswick, $30,809; shirts and overalls, $1,672,316, placed in Quebec, $688,707, Ontario, $646,293, Manitoba, $93,212, Alberta, $36,566, British Columbia, $7,536; ready-made suits, $3,453,611, placed in Quebec, $2,430,557, Ontario, $1,023,254; bags, $361,625, placed in Quebec, $272,125, Ontario, $89,500; seaming twine, $1,262, all Quebec.

Against Belgian credit—Boots, $250,000, all in Ontario; woolen goods, $508,332, placed in Quebec, $33,129, Ontario, $387,000, Nova Scotia, $44,722, and New Brunswick, $43,481

POST-OFFICE SAVINGS BANKS

The figures given below, showing the condition of the post-office savings banks as at the end of February, 1919, show a reduction in balance at the credit of depositors of about $600,000. Withdrawals, it will be observed, greatly exceeded deposits. During the month of January there was practically no change in the total on deposit.

Dr.	FEBRUARY, 1919		Cr.
	$ cts		$ cts
Balance in hands of the Minister of Finance on 31st Jan. 1919	41,370,405.23	Withdrawals during the month	1,115,317.33

RIO DE JANEIRO BONDS OVERSUBSCRIBED

The city of Rio de Janeiro issue of $10,000,000 6 per cent. serial external bonds, which was being offered by a syndicate, including Imbrie & Co., New York; Equitable Trust Co., New York, and the Merchants Bank of Canada, has been heavily over-subscribed.

A transfer on the New York Stock Exchange for $90,000 was announced last week. It was the highest price paid for a seat on the exchange since 1910. Another seat was also sold for $89,000.

VICTORY LIBERTY LOAN

The United States Victory Liberty loan, subscriptions for which recently closed, was over-subscribed by about $1,500,000,000. The amount asked for was $4,500,000,000.

AIRCRAFT INSURANCE

Rapid developments have taken place during the past few weeks in aircraft insurance. Competition between British and American companies has been keen. Much business was written at a recent convention held in Atlantic City. Among the American organizations which have been active in this field is the Aero Protective Association, which is being reinsured by the Queen Insurance Co. for fire and by the Travellers' for accident and liability lines.

A combination of British companies is doing this class of business under the name of the Aircraft Insurance Association. The manager of this association, Mr. Horace Barber, is about to visit the United States for the purpose of appointing a representative there. Lloyds may also enter the American field in a similar manner.

OPPOSES PUBLIC OWNERSHIP OF RAILWAYS

On May 31st the Quebec Board of Trade passed the following resolution:—

"That the president be requested to write the Right Hon. Sir Robert Borden, Prime Minister, stating that, while quite understanding that urgent reasons compelled the government to take over and operate the National Transcontinental Railway and the Canadian Northern Railway, the Quebec Board of Trade would respectfully suggest that it would not be wise for the government to take over and assume the indebtedness of any other railway, at least until two or three years' trial of the roads they are now operating shall have proved whether this can be done with advantage and without increasing the already very heavy financial burdens of the country. An opportunity to ascertain this, by a little delay, would seem prudent in view of the enormous losses sustained by the government of the United States in operating the railways of that country, even with increased rates, and in view of our own experience with the Intercolonial."

UPWARD MOVEMENT OVERDONE

Spencer, Trask and Co., of New York, in their market letter of May 29th advise caution in the purchase of securities just now. They say:—

"On the whole, the several factors now operating to create so much bullish enthusiasm all over the country have a better basis than is usual in such cases. At the same time, we feel that the notes of warning which are being sounded in responsible quarters should be heeded, as the pace at which the market has been moving almost uninterruptedly for the last four months has been fast, and in many cases the advance appears to have discounted all that is favorable in the immediate future. In saying this, we do not wish to appear as believing that the market has reached its highest levels, but we do feel that the time has come when prudence cannot be cast to the winds, and that, on the contrary, a good deal of discretion should be exercised in future commitments, and those stocks favored whose values are of a well-recognized order."

The Ontario government has decided to proceed with its work on provincial highways instead of letting the work by contract. It was found that the tenders which were received had been based on present high prices and that the letting of contracts for a considerable period on this basis might work out unsatisfactorily to the government.

Finance Minister's Budget Speech

War Levy on Imports Partially Removed—Income Tax Revised Upwards—Business Profits Tax Renewed—Reduction in Duties on Agricultural Implements—Canada's Debt Will be Two Billon

ON Thursday afternoon, June 5th, Sir Thomas White gave his eighth annual Budget speech in the House of Commons. No radical changes are proposed, and at the same time an attempt is evidently made to conciliate the various sections which have been urging drastic reform. The Minister was faced with the necessity of securing more revenue than ever before, and any reduction in the amount obtained from one source would mean a compensating increase in the amount obtained by some other means. The special war tax on imports of 5 and of 7½ per cent. is only partly removed, but special concessions are made to the farmers in the way of a reduction in the duties on agricultural implements. As was expected, the income tax is substantially increased.

The Minister said:—

"This motion affords me the opportunity of presenting the Budget for the consideration of the House. It is usual in such presentation to deal with the important topics of the financial position of the Dominion, the condition of our trade, domestic and foreign, the state of our revenues and expenditures for the past, and, so far as can be estimated, for the current year, and to submit the fiscal measures which the government deems essential, having regard to the situation disclosed.

"This is the general course along which my remarks of to-day will proceed, but in view of the special circumstances in which Canada, in common with the rest of the world, finds herself, I hope I may be pardoned if I dwell upon the various subjects which I have mentioned at somewhat greater length and in more detail than has been my custom in previous Budgets which I have had the honor to present to Parliament.

"The war is over, and all nations are engaged in counting the cost, estimating the condition in which their finance and trade have been left after the fiery tempest which has passed over the world, and devising ways and means to repair the ruin which has been wrought.

"It seems to me that what the House and the people of Canada will first desire to learn from the Budget speech will be what has been the cost of the war to Canada, what is our present financial position, what it will be when demobilization has taken place and our war expenditure is completely at an end, and what are the additional annual charges which must be met as the result of the war.

"To these topics I shall first address myself. The fiscal year of the Dominion closes on March 31st. According to our system, some time is required for the completion of the services and bringing into account of all items attributable to the year closed on that date, but a fairly accurate forecast may be given of what the completed accounts will reveal.

Total War Cost to Canada

"With regard to the cost of the war to the Dominion, the books of the Finance Department show as of March 31st last a total principal war expenditure of $1,327,273,848. The portions incurred in respect of the several years during the continuance of the war are as follows:—

1914-15	$ 60,750,475
1915-16	166,197,755
1916-17	306,488,814
1917-18	343,836,801
1918-19	450,000,000

"For the same fiscal period, namely, from April 1st, 1914, to March 31st, 1919, the total expenditure upon ordinary account, that is to say, the current outlays of the Dominion in respect of its various services, aggregated $832,-[illegible]. The expenditure upon capital and other accounts, for which, by the practise of all our governments, provisions might properly be made by borrowing, and for which assets of equivalent value were created for the permanent benefit of the people of Canada, amounted during the five years in question to $180,277,873.

"Leaving capital expenditure aside, and applying the surplus available from our revenues over and above the amount required to meet current outlays, it will appear that we have met the principal cost of the war from taxation to a total aggregate amount of $275,943,977. If we take into account the amount contributed during the five years for interest upon war debt and for pension charges, the total paid from revenue on account of the war to March 31st, 1919, is $438,293,248.

"Now let us approach the subject from another angle. Aside from the cost of the war and how that cost was met, the vital question before us to-day is—what is the amount of the total net national debt of Canada, and how does it compare with the net debt at the end of the fiscal year immediately preceding the war?

"On March 31st, 1914, the net national debt was $335,996,850. On March 31st, 1919, the net national debt was $1,584,000,000. There remains to be considered what further increase in the national debt will be made during the present fiscal year, which will end on March 31st, 1920.

"The war, so far as actual fighting is concerned, was terminated by the armistice of November 11th last; but the expenditures connected with the maintenance of the Canadian Corps in Continental Europe, their gradual return, first to England and then to Canada, their demobilization here, and the provision made by the government by way of war gratuities to enable members of the Canadian Expeditionary Force to bridge over the period of their reabsorption into civil life, have still continued, and will continue over the greater part of the year.

"In reality, the present year is, so far as expenditure is concerned, a war year. It is impossible to estimate accurately what our demobilization expenditure for 1919-20 will be, but we may be sure that it will not be materially less than $300,000,000.

"There is a further important item of our war expenditure which must be taken into account, but which at present it is not possible to estimate with accuracy. I mean the additional cost to Canada of our share of the increased expenditure for ammunition at the front from September 1st, 1917, to the close of the war.

National Debt

"Assuming that we shall not be able, in view of the magnitude of our reconstruction programme, to pay any substantial part of our demobilization expenditure from revenue, we may calculate that if no further outlays are necessary on what I may call the principal of our war expenditure, the total net debt of Canada will stand at not less than $1,950,000,000. This contrasts with $335,996,850, the net debt of Canada at the end of the fiscal year 1914. The increase during the five-year war period is thus shown in round figures at $1,614,000,000.

"This, then, is the financial position, so far as relates to the national debt. While the amount is large, and averages over $220 per head of the population of Canada, it will be remembered that Canada was in the war from the first day, and that, by comparison with the present net national debts of European governments, including Great Britain, who were similarly participants in the conflict during its entire length, our position, having regard to relation of debt to number of population and to national resources, must be regarded as distinctly more favorable.

"I do not in the least desire to minimize the gravity of so great a debt as now confronts us on the threshold of the new era upon which we are entering. It will constitute a burden upon the people of Canada for generations to come. Fighting for the principles for which we stood, we could not, and did not, count the money cost, which is really the least part of our sacrifices in the war. The realization that, at the greatest crisis in all history, when the fate of world freedom was trembling in the scale of destiny, this gallant country of eight million people put its all to the hazard in the mightiest of conflicts for the cause of truth and justice, will be lofty inspiration to greater effort, which will enable Canada to carry and ultimately extinguish the heavy obligation entailed by the war.

"What portion of this indebtedness and of the obligations we have incurred with respect to pensions and other services arising out of the war we shall be able, under the peace settlement, to obtain by way of indemnity from Germany and her allies, I am unable to say, but it would be imprudent to treat expectation in this regard as an asset upon which we may with certainty depend. It is better to face our debt and other war liabilities as they stand, and assume that we must be prepared to bear their full burden by our own strength and from our own resources.

"In considering the subject of our national debt, an important aspect, from the viewpoint of its bearing upon our financial standing and credit, is whether it is owed to our own people or abroad. While national debt—no matter where owed, is debt, it makes a great difference to national strength whether it is held within the country itself, that is to say, whether the people regarded in the aggregate owe it to individual members of the community holding their own government's securities, or whether it is owed to citizens of other nations. From the national standpoint, a public debt owed to a nation's own people is not nearly so serious an obligation as if owed abroad. The interest paid upon it is disbursed at home and remains part of the national resources. When the principal is paid there is a transfer of wealth from the government to its own citizens, which still remains an asset of the community viewed as a national unit. But if the debt is held abroad every interest and principal payment diminishes the resources of the debtor nation and increases those of the creditor nation. In this respect, and bearing especially in mind the fact that before the war Canada's borrowing for federal, provincial, municipal and business purposes was principally in Britain and the United States, and not in Canada, the situation as to our national debt may be regarded with satisfaction.

Three-Quarters Held in Canada

"In round figures, the total outstanding securities of the Dominion Government are held as follows:—

"In Great Britain, $362,700,000.

"In the United States, $150,873,000.

"In Canada, $1,510,000,000."

Sir Thomas went on to say that a gratifying feature of our finance is that the majority of our securities constitute long-date obligations, and after giving details of all outstanding war certificates, debenture stocks and loans, he proceeded:—

"From this statement the House will see how necessary it was to issue long-date securities, even at war rates of interest. If we had to face the maturity of so vast a principal amount as is represented by our war borrowings in Canada within a period of five or ten years after the war, I may frankly say that the solution of such a problem would tax to the utmost the resources of any minister of finance. But with the various maturities spread over so long a period of years ample time is afforded to adopt whatever measures may be needed to meet the redemption of each loan as it matures.

"On account of this being, as respects expenditure, a war year, we shall have to float at least one further loan in Canada for purposes connected with the war and demobilization. Any necessary external financing to meet loans maturing outside Canada will receive timely attention.

"As the aggregate of our war issues exceeds our net war expenditure, it is to be pointed out that during the war we were enabled to make advances to Great Britain for her purchases in Canada to a greater extent than we availed ourselves of advances from the Imperial Government to meet our war expenditure in England and at the front. The result is that there is owing to us by the Imperial Government a balance, after making the necessary set-offs, of about two hundred and thirty million dollars. This is subject to reduction by the unascertained amount which we shall pay in respect of increased charges for maintenance at the front since September 1st, 1917. An inquiry is now being made for the purpose of adjusting this charge.

"A comparison with the note issues of Great Britain and the other allies, including the United States, which was less than two years in the war, is such as to cause satisfaction to Canada with respect to the post-war condition of our currency."

"The policy will be to gradually restore our note issue to the statutory condition, which requires us to hold in gold 25 per cent. up to fifty million dollars of note issues, and dollar for dollar for any further issue. This can be done by buying gold on the one hand, or, on the other, by retiring the outstanding notes from time to time from the proceeds of loans or from revenues. It will be a long time before the currency inflation of the world will be abated.

"The figures which I have given show the increase in the national debt of Canada due to the war. Interest must, of course, be paid annually upon this debt, and I have had a careful estimate made as to the yearly burden which this will entail. Assuming the total debt of Canada on March 31, 1920, to be $1,950,000,000, the estimated annual interest charge will be approximately $115,000,000. This compares with $12,893,501, which was the interest charge upon the national debt as of the fiscal year ended March 31, 1914. But the added annual burden due to the war does not rest there. There is the further responsibility for pensions to our soldiers and their dependants. For the past fiscal year the amount paid on this account was $17,160,000. For the present fiscal year it may reach $30,000,000.

"For a generation or more to come we may look forward to providing, say, $35,000,000 to $40,000,000 per annum for pensions. In addition, there will be the annual expense for maintenance of hospitals, convalescent homes and other services established for the aid and comfort of our soldiers. No national expenditures will, I am sure, be more gladly borne than these by the people of Canada, who will never fail to appreciate the sacrifices made on their behalf by those who fought for Canada in the great war.

Resources

"Having indicated the extent of the financial burden which the war has imposed upon us, it seems advisable to pause to inquire how that burden is to be met. What are the resources upon which Canada must depend to carry this huge national debt, and the annual charge for pensions and other services which I have mentioned? We are to-day a prosperous community of high average productivity. I am not prepared to say that even without extraordinary effort we should not be able to merely carry along the extra financial burden imposed by the war if its magnitude must not be minimized; and it is for us to consider and put into effect such policies as may be appropriate to counteract the disadvantage under which we shall labor in this regard and to insure the continued prosperity of our people, notwithstanding this great national handicap upon their exertions. In this connection we should undoubtedly have in mind the gradual extinction over a long course of years of the debt by a sinking fund, provision to be put into effect as soon as possible after the conclusion of the present year. With this I do not intend to deal further for the present.

"What are our resources, actual and potential, from which we can meet the interest, pensions and other war charges and gradually extinguish our indebtedness due to the war?

"We have a country of almost unlimited natural assets, vast stretches of cultivable lands, magnificent forests, regions abounding in mineral wealth, and fisheries the most valuable in the world. We have a highly intelligent, energetic, enterprising people of great stability of character and ardent aspiration for national and individual success. To develop our natural resources there is required the application of enterprise, capital and labor. To sell our products we require markets, domestic and foreign.

"Let us for a moment consider some of the policies which are essential for the realization of the development I have outlined. Our ability to meet and retire our war obligations will depend upon our power to increase our production of natural and manufactured commodities and to economize nationally so as to bring about each year substantial increase in domestic wealth and savings and a more favorable balance in our international trade. In other words, the motto for the future, as it was for the war, must be 'Produce and Save.'"

As evidencing what can be done by Canada in the way of national saving, Sir Thomas quoted figures showing that deposits in Canadian banks have increased from $998,191,367 on March 31, 1915, to $1,604,649,031 on March 31, 1919, remarking that there should also be taken into consideration the subscription by the Canadian people to the war loans floated in Canada, and paid for by withdrawal of their deposits in our chartered banks and other financial institutions.

He continued: "To greatly increase our production we need more population, and particularly that class which will engage in our basic industries. Our immigration policy is therefore of prime importance. We must fill up our vacant cultivable lands. In the past we have not been sufficiently selective in our immigration. We are so amending our laws as to insure that the destinies of this country will always be controlled by those who may be depended upon as loyal and patriotic citizens of Canada, ready at all times to take up arms in her defence, no matter from what source aggression may come.

"As a great food-producing country, Canada is bound always to enjoy agricultural prosperity. It must be many years before Europe is able to recover agriculturally from the effects of the war. In the meantime the hungry millions must be fed, and it would seem certain that Canada's agriculture will not lack for profitable markets for all it can produce.

"The yearly exportable surplus of the Dominion's grain and foodstuffs should go far toward insuring most favorable trade balances for the future. For the reconstruction work in Europe our raw materials and their products must also be in demand. Every effort must be made to develop and expand our export trade in manufactured articles, as well as the immediate products of our fields, forests and mines. The more highly finished the commodity, the greater the price which it will bring to the Dominion. Our policy should be directed to insuring, so far as practicable, the completion within Canada, in Canadian shops and mills, of manufacturing processes, in order that we may obtain the benefit of the greater value of finished products as compared with that of raw materials or partly manufactured articles.

"No doubt we shall be subject in this to the keenest international competition, and to succeed we shall require to avail ourselves of every assistance which can be legitimately afforded by the government in obtaining information respecting, and access to, foreign markets, as well as transportation and financial facilities.

"One most important asset which we possess as a result of the war is the increased capability of industrial production, which was turned during the war to such remarkable purposes in the manufacture of munitions and other materials. This higher capability among all classes should prove of the greatest value in enabling us to deal with our after-war problems and burdens.

"As illustrating the vast strides made by our foreign trade during the war, the following statistical information is submitted:—

Trade Balance Reversed

"In 1913 the balance of trade against us was $300,000,000. In 1914 our total international trade was $1,073,000,000, of which $618,000,000 was in imports and $455,000,000 in exports. For 1918 the total was $2,550,000,000, of which $962,000,000 was imports and $1,586,000,000 exports. For 1919 the unrevised figures show a total of $2,160,000,000, of which $916,000,000 was imports and $1,253,000,000 exports. It will thus appear that from an adverse balance of $300,000,000 in 1913 and of $160,000,000 in 1914, we had attained a favorable balance of over $600,000,000 in 1918, and of $340,000,000 for 1919. At the end of the five-year period, from 1914 to 1919, our total trade had doubled, while for the year 1918, which marked the highest point, it aggregated two and one-half times the trade of 1914.

"It must be kept in mind respecting these figures that the higher prices of our grain, foodstuffs and other exports, and of the goods which we imported, is a most important factor for consideration, and further, that as our exports for 1918 and 1919, the estimated amount of ammunition, explosives and other war materials aggregated $418,000,000 and $260,000,000, respectively. The cessation of the manufacture of these articles and any fall in the price of commodities generally are bound to make serious changes in our trade aggregates unless offset by increased production."

After placing before the House detailed statistics of our trade with the United Kingdom and the United States, the Minister of Finance proceeded:—

"Having dealt with the financial and commercial position of the Dominion, I now proceed to the consideration of the important problem of our estimated expenditure for the present fiscal year 1919-20, and the fiscal proposals which the government has to make in connection therewith.

Fiscal Year Just Ended

"It will be advantageous in assisting us to reach a conclusion with respect to these matters if I first briefly review the result of the last fiscal year which ended on March 31st, 1919. During that year the expenditure of the Dominion upon account of the ordinary services of the government amounted to $240,000,000. The outlay upon capital account aggregated $22,000,000. For war the total expenditure for the year is estimated at $450,000,000. On the other side of the account we estimate a total revenue for the year 1918-19 of $310,000,000. As emphasizing the importance of this figure, I may point out that for the fiscal year before the war the total revenue was $163,174,394. For the fiscal year which ended on March 31st, 1909, the revenue was only $85,093,404. Of this total of $310,000,000, $147,000,000 was received from customs, $30,000,000 from excise, $21,000,000 from postoffice, $33,000,000 from taxation under the Business Profits War Tax Act, $10,000,000 from the Income War Tax Act, $14,000,000 from other war taxation, and $55,000,000 from other miscellaneous sources, including $38,000,000 from railways.

"If we follow the practise which has been hitherto adopted in treating as surplus the amount of revenue received in excess of the ordinary expenditure it will appear that for the past fiscal year the government had a surplus of $70,000,000, which was devoted to war expenditure. If, on the other hand, we first appropriated our revenue to the payment of both ordinary and capital expenditure, the surplus which was used for war expenditure was $48,000,000.

"I have already stated the estimated war expenditure for the past year to have been $450,000,000. Of this expenditure, therefore, $48,000,000 was paid out of revenue after meeting all other outlays on the part of the government, including capital expenditure.

"In connection with our expenditures during the past year and generally throughout the period of the war, I may observe, with respect to both ordinary and capital outlays, that they have been kept well in hand, and that the increased

6% First Mortgage Fifteen-Year Sinking Fund Gold Bonds

Dated June 1st, 1919 Due June 1st, 1934

Principal and half-yearly interest (1st June and December), payable in Gold at the Royal Bank of Canada, Montreal and Toronto, and at the Agency of the Royal Bank of Canada in New York City. Coupon Bonds. Principal may be registered.

Denominations: $100, $500 and $1,000

Redeemable as a whole or in part on June 1st, 1921, or on any interest date thereafter on three months' notice, at 105, and accrued interest.

Trustee: Montreal Trust Company, Montreal and Toronto

Subject to Legal Opinion: Messrs. Brown, Montgomery & McMichael, Montreal.

1. *These bonds are a first mortgage on assets totalling over $2,300,000,* or about 3 times the bond issue.
2. *The average net earnings for the past three years amount to $161,074,* or about 3¼ times the bond interest.
3. *Net earnings for year ending Dec. 31st, 1918, amount to $197,116,* over 4 times the bond interest.
4. *Net earnings for the year 1919 are estimated at $300,000,* or over 6 times the bond interest.

Price: 93 and interest, yielding 6¾%

Full descriptive circular on request.

expenditure under this heading is attributed principally to charges upon our debt and pensions.

Estimates for Current Year

"I now proceed to estimate the revenue and outlay of the present year. Main estimates totalling $437,000,000 have been laid before the House with supplementary estimates still to be brought down. Embraced in these estimates are certain considerable amounts representing investments. I refer particularly to the estimate of $25,000,000 appropriated for the purpose of soldiers' land settlement, [illegible] loan to Canadian Northern Railway Company, [illegible] for railway equipment purposes, and $25,000,000 to be advanced by way of loans to the several provincial governments for promoting better housing conditions. The estimate for expenditure on ordinary account for the coming year is $270,000,000. Of this the sum of $102,000,000 represents interest on the national debt. This figure contrasts with $12,893,000, representing interest charges upon the national debt before the war. It includes also the sum of $30,000,000 for estimated pension expenditure for the year. It is these two items of interest and pensions which will particularly constitute the burden of the war upon the taxpayers of the country for a great many years to come; until, in fact, the national debt is materially reduced and pensions gradually run their course. The estimated expenditure on capital account for the year we place at $50,000,000.

"This is a war year, and it is necessary also to add the estimated expenditure which has been and will be incurred on account of demobilization. This will aggregate the large sum of $300,000,000, including $92,000,000 for war gratuity. The entire estimated expenditure, therefore, of the year on ordinary account, capital account and for demobilization, will reach the large total of $620,000,000.

"Assuming that we maintained, without change, existing fiscal legislation, and that the yield of the various services would be upon the same basis as for 1918-19, our estimate of revenue for the present year would be as follows:—

Customs	$145,000,000
Excise	30,000,000
Postoffice	18,000,000
Business profits war tax	35,000,000
Income tax	20,000,000
Other war taxation	14,000,000
Miscellaneous sources	18,000,000
Total	$280,000,000

"In this estimate we have, owing to the change to be made, commencing with this year, in the mode of financial administration of the Intercolonial and other government railways, omitted $30,000,000 of revenue from that source. That revenue will henceforth be received by the Canadian National Railways Company, and applied directly against its working expenditures. In our estimate of ordinary expenditure for the year we have allowed for a corresponding reduction.

"While, from the statement which I have just made, it will appear that our total estimated expenditure, ordinary and capital accounts and for demobilization, will amount to $620,000,000, our estimated revenue on the present basis will reach only $280,000,000. Putting it another way, our revenue would enable us to pay only our ordinary expenditure, and leave a small amount to be applied to other purposes.

Policy of Taxation

"The question which now arises is what shall be our policy in the matter of taxation for the present year? It is a year of great industrial instability and business uncertainty. If the war were still continuing it would be necessary to recommend heavily increased taxation in order that we might pay a substantial portion of the principal of our war expenditure. If it were not for special circumstances arising out of this transitional period from war to peace that course should be adopted, notwithstanding the ending of the war, because we shall have this year so heavy a volume of what is really war expenditure, that is to say, our outlay for demobilization and all that it involves. We must, however, bear specially in mind the anxieties and burdens of the general public at a time of dislocation, unrest and high prices, and endeavor to wisely bridge over this troubled period by giving such measure of relief as may be practicable, having regard to the heavy financial obligations devolving upon us and our national credit in the eyes of the outside world.

"The cost of living in Canada has, in common with all other countries, gradually increased during the war, and is causing hardship to a large portion of our population, especially those of limited means and slender incomes. I am of opinion that for this transitional period we are justified in adopting the policy of meeting only our ordinary expenditure and borrowing for our capital and demobilization expenditure. In considering the question of reductions and increases in indirect taxation, most careful attention must be given to their effect upon established industry and the employment of operatives dependent upon its success for the maintenance of themselves and their families, and upon the domestic trade and commerce which it supports. Having fully considered all aspects of the subject, the government submits the following proposals:—

"Under the Customs Tariff Revenue Act, 1915, a British preferential tariff rate of 5 per cent. and an intermediate and general tariff rate of 7½ per cent. were imposed upon, with certain exceptions, all imported goods.

"We propose to wholly repeal this British tariff rate of five per cent. Further, we propose to partially repeal tho intermediate and general tariff rate of seven and one-half per cent. by making it no longer applicable to the following classes of articles: Foodstuffs, linen and cotton clothing, woollen clothing, boots and shoes, fur caps and fur clothing, hats, caps, hoods and bonnets, gloves and mitts, collars and cuffs, hides, skins, leather, harness and saddlery, agricultural implements, petroleum oils, mining machinery, and bituminous coal."

"So much for the reductions from the tariff rates established by the Customs Tariff War Revenue Act, 1915. We have now certain other reductions and modifications to propose in respect of the ordinary tariff rates. The resolutions presented in this regard will provide for a reduction of five cents per pound in the British preferential, intermediate and general tariff rates on roasted or ground coffee, and three cents per pound under the British preferential tariff on British-grown teas. This latter reduction gives a substantial Empire preference where no preference at present exists. We shall provide for the free importation into Canada of wheat, wheat flour and potatoes from countries which do not impose a customs duty on such articles grown or produced in Canada. We shall also provide for an alteration in the rates on soda ash from 5 per cent. under the British preferential tariff and 7½ per cent. under the general tariff to one-fifth of a cent a pound under the British preferential tariff and three-tenths of a cent per pound under the general tariff. We shall provide, further, for specific instead of ad valorem rates of duty upon pig lead, zinc, spelter and copper ingots. On certain products made from these materials there will be an increase in duties.

The total estimated loss in revenue Sir Thomas placed at $17,000,000, and, owing to estimated reduction in the total volume of imports, due to diminished purchasing power during the current year, and probable decline in prices as well, he said the expectation was there would be a total loss in customs revenue for the present fiscal year of at least $25,000,000. To partially offset this loss and close the gap of the deficit of $15,000,000 between revenue and current expenditure, a heavy increase in income taxation was proposed.

Agricultural Implements

"I come now to the consideration of agricultural implements. I have stated that we propose to take off the customs war revenue duties. But for an arrangement we have been able to make for the equalization of Canadian freight rates with those enjoyed by American competitors of our industries engaged in the manufacture of these implements, it would not have been practicable to make any reductions in the ordinary tariff schedule covering these articles. Under the ordinary tariff, rates of duty upon manufactured products are closely related to duties upon raw material, coal, machinery and other equipment used in their manufacture, and any reduction, except upon an occasion of general revision, when the tariff as a whole can be dealt with, would necessarily lead to most serious consequences. Desirous as we were of providing for as low a duty as might be practicable upon these implements of agricultural production, so essential to Canada at this time, the problem before us was how to make it possible to reduce the ordinary tariff rates. The business of manufacturing agricultural implements is almost wholly confined to eastern Canada. So far as concerns their great market in the West, Canadian firms and companies engaged in this industry have been handicapped, as against their American competitors, by higher freight rates. The freights charged by Canadian railway companies upon shipments from eastern points to Winnipeg, Brandon, Regina, Saskatoon, Calgary, Edmonton and other western points have been higher than the rates from Chicago to the same points. This has been caused by the fact that the manufacturing centres of the eastern provinces are separated by great distances from the consuming and distributing centres of the west. The American manufacturer of agricultural implements is not only closer to the American consumer and American distributing points, but he is also nearer to the western distributing points of Canada.

"In view of these circumstances it appeared to us that we should seek assistance in freight reduction to enable us to reduce the ordinary tariff upon these implements. The plan was not free of difficulty. In so far as railway rates, as such, are concerned, the railway rates in Canada, although recently raised, are certainly not more than sufficient to make a carrying return on the value of the properties used for transportation. Indeed, having regard to railway investment, railway returns, owing to the very great increases in the cost of operation, may well be described as low; in view of this it is, of course, impossible to expect a reduction in railway rates to be ordered by the Railway Commission.

"As a rate-making proposition reductions at the present time are impossible. We have, however, approached the railway companies with a view of overcoming the difficulty of distance to the greatest extent possible, and of doing so without unduly injuring railway revenues and credits. At the present time railways, which are the largest consumers of bituminous coal, pay a war duty of 7½ per cent. on the value of the imported commodity. As this duty is in addition to the specific tax upon this coal a heavy resultant charge has been thrown upon the operating railways, whose fuel costs, in view of the advanced price of coal alone, have been greatly increased.

"The proposal which we made to the rail carriers was that they should reduce their rates from the eastern manufacturing point of production of agricultural implements—Montreal, and east of the Great Lakes, to Prairie points—to the rates charged by the American lines with shorter mileages, from Chicago to the similar western destinations, stating that if the railway companies could see their way to do this they would be assisted to the extent that relief would be afforded them by the abolition of the 7½ per cent. war duty on bituminous coal.

"In the first instance, the railway companies claimed that, in view of their financial obligations, it was entirely impossible for them to sacrifice any revenue whatever, but that their existing revenues were, as a matter of fact, insufficient.

"The question, however, was not allowed to stand, but other representations were made to the companies, such as the national necessity of making farming operations in the west more profitable, of increasing the population of the west, and the resultant interest that the companies themselves would have from the traffic which a larger and more prosperous population would afford, and also the fact that

THE ROYAL BANK OF CANADA

FRANCE

THE Agency of The Royal Bank of Canada in Paris is now open for business at 28 Rue du Quatre-September.

Banking business with France of every description is solicited through the Branches of the Bank.

Messrs. J. G. Beaty & Co., members of the New York Stock Exchange, beg to announce that Mr. George H. Ross, formerly Manager of the Bank of Ottawa, Toronto, has been admitted as a partner.

JOHN G. BEATY
EDWIN M. FRIEDLANDER

Toronto, June 6th, 1919.

[illegible] would render more saleable the railway lands [illegible] in the west, an argument which [illegible] force to the Canadian Pacific Railway [illegible], perhaps, as much interest in the [illegible] prosperity of the west as any other [illegible] have.

Freight Rate Reductions

"I am very glad to be able to say that the railway companies have recognized the large overlying national interest, and have consented to put in tariffs as asked. The new tariffs will give the Chicago rate on agricultural implements from producing centres in the east, west of Montreal and east of the Great Lakes, to prairie points, for car-lot movements, loaded to a minimum of 24,000 pounds. This reduction is a substantial concession made by the railways, as the following statement of present rates will indicate:—

Movement from	Mileage.	Rate.
Toronto to Winnipeg	1,233	$0.82½
Chicago to Winnipeg	876	0.67½
Toronto to Brandon	1,366	0.95
Chicago to Brandon	931	0.80
Toronto to Portage la Prairie	1,288	0.87½
Chicago to Portage la Prairie	873	0.72½
Toronto to Regina	1,590	1.12½
Chicago to Regina	1,069	1.02½
Toronto to Yorkton	1,512	1.06½
Chicago to Yorkton	1,143	0.96½
Toronto to Moose Jaw	1,631	1.17½
Chicago to Moose Jaw	1,141	1.07½
Toronto to Saskatoon	1,713	1.22½
Chicago to Saskatoon	1,241	1.12½
Toronto to Swift Current	1,742	1.24
Chicago to Swift Current	1,222	1.14
Toronto to Medicine Hat	1,889	1.35
Chicago to Medicine Hat	1,369	1.25
Toronto to Lethbridge	1,990	1.41½
Chicago to Lethbridge	1,481	1.31½
Toronto to Calgary	2,056	1.49
Chicago to Calgary	1,536	1.37½

"The rates to Edmonton are the same from both points as those to Calgary. The reduction will be appreciated when it is recognized that, for example, to Regina, the Canadian haul of 1,590 miles equalizes the haul from American territory of 1,069 miles, while to Medicine Hat the Canadian movement is 520 miles longer than the American movement, although the rate will become the same.

"It must also be borne in mind that although, as the above schedule indicates, the rates for equivalent distances in the United States are higher than in Canada, notwithstanding a greater density and diversity of traffic, combined with a lower fuel cost, the United States operations, as indicated by the reports made by the United States Railroad Administration, are now being carried on at an operating loss.

"The companies made these concessions then, not on any rate basis, nor for any railway advantage, and without regard to rates on other articles or railway returns or necessities, but simply to meet a situation of national importance. The companies state that their action thus taken must not in any way be regarded as a measure for profitable transportation, and that it is absolutely impossible that railway revenues can be further affected by any rate reductions on any other commodities.

Income Taxes

"We propose that all corporations shall pay 10 per cent. on their net income in excess of $2,000. Shareholders shall be given credit for the normal tax to which they are liable upon dividends received from companies subject to this taxation.

"In the case of individuals we propose that the normal rate of 4 per cent. shall be levied upon all income exceeding $1,000, but not exceeding $6,000 in the case of unmarried persons and widows or widowers without dependent children, and upon all income exceeding $2,000 but not exceeding $6,000 in the case of all other persons. We propose a normal tax of 8 per cent. upon all income exceeding $6,000. We propose that the surtax shall commence from $5,000 instead of from $6,000 as at present, and shall increase by graduation, applying firstly to incomes between $5,000 and $6,000, and to every $2,000 between $6,000 and $100,000. Upon incomes in excess of $100,000 materially increased rates are levied. The following compilation shows in detail what is proposed:—

Income.	Surtax.
From $5,000 to $6,000	1%
From $6,000 to $8,000	2%
From $8,000 to $10,000	3%
From $10,000 to $12,000	4%
From $12,000 to $14,000	5%
From $14,000 to $16,000	6%
From $16,000 to $18,000	7%
From $18,000 to $20,000	8%
From $20,000 to $22,000	9%
From $22,000 to $24,000	10%
From $24,000 to $26,000	11%
From $26,000 to $28,000	12%
From $28,000 to $30,000	13%
From $30,000 to $32,000	14%
From $32,000 to $34,000	15%
From $34,000 to $36,000	16%
From $36,000 to $38,000	17%
From $38,000 to $40,000	18%
From $40,000 to $42,000	19%
From $42,000 to $44,000	20%
From $44,000 to $46,000	21%
From $46,000 to $48,000	22%
From $48,000 to $50,000	23%
From $50,000 to $52,000	24%
From $52,000 to $54,000	25%
From $54,000 to $56,000	26%
From $56,000 to $58,000	27%
From $58,000 to $60,000	28%
From $60,000 to $62,000	29%
From $62,000 to $64,000	30%
From $64,000 to $66,000	31%
From $66,000 to $68,000	32%
From $68,000 to $70,000	33%
From $70,000 to $72,000	34%
From $72,000 to $74,000	35%
From $74,000 to $76,000	36%
From $76,000 to $78,000	37%
From $78,000 to $80,000	38%
From $80,000 to $82,000	39%
From $82,000 to $84,000	40%
From $84,000 to $86,000	41%
From $86,000 to $88,000	42%
From $88,000 to $90,000	43%
From $90,000 to $92,000	44%
From $92,000 to $94,000	45%
From $94,000 to $96,000	46%
From $96,000 to $98,000	47%
From $98,000 to $100,000	48%
From $100,000 to $150,000	52%
From $150,000 to $200,000	56%
From $200,000 to $300,000	60%
From $300,000 to $500,000	63%
From $500,000 to $1,000,000	64%
From $1,000,000 up	65%

"Several amendments which the administration of the Income Tax Act has shown to be desirable will be submitted. The question of double taxation has given considerable difficulty. In view of the time which would be required to make international agreements respecting the matter, we have thought it advisable to take the lead and provide for a deduction from the sum payable by a resident of Canada under our income tax legislation of the amount paid by him elsewhere in the British Empire upon income thence derived.

W. KENNEDY,
W. B. COLLEY, *Joint Managers*

The Merchants Bank of Canada

Proceedings of the Fifty-Sixth Annual Meeting of Shareholders on June 4th, 1919

The Fifty-sixth Annual Meeting of the Shareholders of the Merchants Bank of Canada was held Wednesday, June 4th, in the Board Room at the Bank's Head Office at Montreal. The meeting was called to order at 12 o'clock noon.

On motion of Mr. K. W. Blackwell, the President, Sir H. Montagu Allan, was asked to take the chair.

Mr. J. M. Kilbourn was appointed Secretary of the meeting, and read the notice calling the meeting.

The minutes of the last annual meeting were taken as read.

The President, Sir H. Montagu Allan, then presented the Annual Report as follows:—

THE ANNUAL REPORT.

I beg to submit on behalf of the Directors the Fifty-sixth Annual Statement of The Merchants Bank of Canada as at the close of business on the evening of the 30th April, 1919, together with a Statement of the Profits covering the relative period.

Notwithstanding ever-mounting operating costs, the net profits resulting from the year's business were $1,383,569.40, being an increase over last year of $146,888.44, a showing which, I believe, you will regard with satisfaction.

During the past year your Directors felt warranted in distributing an extra dividend of 1 per cent. and in placing the stock upon an 11 per cent. basis. No doubt their action in this respect will have your entire approval.

The financial position of the Bank as reflected in detail in the Balance Sheet before you, will meet, I am sure, with your full approbation.

Another Victory Loan last autumn was generously subscribed to by the Bank's clientele throughout the country, their total subscriptions reaching the very large sum of $45,810,400, of which but $4,333,800 was made up of conversions from previous issues. This left a net amount of $41,476,600 paid in cash through the six months' period, and yet, despite this heavy withdrawal, our deposits for the year show the gratifying increase in total of $24,780,330, or 21.85 per cent. over last year's figures, the Savings Department receiving $15,958,008 of this gain.

Commercial Discounts have also grown apace, having increased $19,680,410 during the year, indicating that the earning power of the Bank has been well maintained and that we are, to the common good, lending our full support to the agricultural and other producing industries of the country. For, it may in truth be said, this important increase is made up of advances in one way and another towards assisting essentially productive industries throughout the Dominion.

An issue of $1,400,000 of new stock has been made, but as the allotment was to Shareholders of record at 30th April, the matter will fall for reference more appropriately at next year's meeting. Suffice it to say in the meantime that the new allotments are being satisfactorily taken up—a large proportion, indeed, having already been paid for in full in advance of the instalment dates.

Since the signing of the Armistice on the 11th November last, we have opened numerous Branches and Sub-Branches at points carefully selected during the long period (ending with the Armistice), in which all the Banks maintained a strict embargo against branch extensions. These new fields of endeavor and profit are, in practically every case, realizing our expectations, and while the relative initial expense is not inconsiderable, we have every reason to believe we shall be rewarded by amply profitable results in due course.

You will, I am sure, join with your Directors in extending to the members of the staff, one and all, a word of cordial appreciation for their loyal and efficient services, to which the measure of progress the Bank has enjoyed is in no small degree attributable.

During the course of the year death removed our esteemed colleague, Mr. Andrew A. Allan, and in his untimely end the Bank has suffered a heavy loss, deeply deplored by all connected with the institution. He was a man of sound judgment and high principles, whose advice was at all times as valued as he personally was esteemed and respected.

The vacant seat upon the Directorate has been filled by the appointment of Mr. Lorne C. Webster, a large shareholder in the Bank, and a man of wide business experience, connected with many important commercial enterprises.

All the various offices of the Bank have been inspected during the past twelve months.

The Auditors' Certificate is appended.

All of which is respectfully submitted.

H. MONTAGU ALLAN,
President.

THE FINANCIAL STATEMENT

Statement of the Result of the Business of the Bank for the Year Ended 30th April, 1919.

The Net Profits of the year, after payment of charges, rebate on discounts, interest on deposits, and making full provision for bad and doubtful debts, have amounted to		$1,383,569.40
The balance brought forward from 30th April, 1918, was		437,973.92
Making a total of		$1,821,543.32
This has been disposed of as follows:—		
Dividend No. 124, at the rate of 10 per cent. per annum	$175,000.00	
Dividend No. 125, at the rate of 10 per cent. per annum	175,000.00	
Bonus 1 per cent. paid 6th January, 1919	70,000.00

REPORT OF THE AUDITORS TO THE SHAREHOLDERS OF THE MERCHANTS BANK OF CANADA.

In accordance with the provisions of Sub-Sections 19 and 20 of Section 56 of the Bank Act, we report to the shareholders as follows:—

We have examined the above Balance Sheet with the Books of Account and other records at the Chief Office of the Bank and with the signed returns from the Branches and Agencies, and have checked the cash and verified the securities of the Bank at the Chief Office against the entries in regard thereto in the books of the Bank at 30th April, 1919, and at a different time during the year, and found them to agree with such entries. We also attended at some of the Branches during the year and checked the cash and verified the securities held at the dates of our attendances and found them to agree with the entries in regard thereto in the books of the Bank.

We have obtained all the information and explanations we have required. In our opinion, the transactions of the Bank which have come under our notice have been within the powers of the Bank, and the above Balance Sheet is properly drawn up so as to exhibit a true and correct view of the state of the Bank's affairs, according to the best of our information and the explanations given to us, and as shown by the books of the Bank.

VIVIAN HARCOURT, }
GORDON TANSLEY, } Auditors.
(of the firm of Deloitte, Plender, Griffiths & Co.)
Montreal, 23rd May, 1919.

THE GENERAL MANAGER'S ADDRESS.

The General Manager, Mr. D. C. Macarow, in addressing the meeting, said:—

MR. MACAROW:—In the first place I would like to express, speaking on behalf of the Executive Officers of the Bank, indeed on behalf of the staff at large, our pleasure at having Sir Montagu Allan again amongst us and to extend to him our most cordial welcome.

In the mighty work overseas now happily satisfactorily and, let us hope, permanently concluded, Sir Montagu has, indeed, borne his share and it must be a proud thought to him, as it is a gratifying reflection to us, that in connection with that great work, his is a record of high and patriotic duty manfully embraced and efficiently carried through. (Applause.)

My words, Sir Montagu, but express feelings sincerely entertained. Your welcome is one of unaffected cordiality.

The moment is opportune, I am sure you will agree, and I gladly take advantage of it, to pay a tribute to the Vice-President, Mr. Blackwell, who has filled the chair throughout the President's absence with such a measure of outstanding capacity. From the rich storehouse of his wide, varied and practical business experience, he has given with an unstinted hand, and it is no empty conventionality to say that the measure of progress the Bank has enjoyed during his incumbency is due in no small degree to the benefit of his sound advice and the inspiration of his constructive courage. Withal, his courteous and considerate demeanor to everyone has made his a figure around the Executive Offices of the Bank as welcome as it is honored and respected. (Applause.)

After the concise yet comprehensive references and explanations made by the President in his address, which you have just heard, any attempt on my part at amplification with respect to the out-turn of the year's operations in the matter of profits and to the general financial statement would, indeed, be superfluous and time-wasting.

I will, therefore, content myself by saying that I hope the situation as reflected by the figures given will be satisfactory to all and measure up in full degree to the expectations and wishes of everyone interested in the Bank's progress.

Last year you may remember, I said that you might entertain with full confidence the comfortable assurance that the whole asset column represented dollar for dollar in actual value. I take pleasure in repeating that assurance this year—and with double emphasis.

May I be permitted to add a few brief and sketchy words of a general character and interest?

It is with feelings of intense relief that we now find ourselves gradually moving into peace times, leaving behind us that stressful period so darkened by the war's depressing shadows and under the dread pall of which we had become accustomed to live and to view things. But in this transition period we cannot fail to realize that with the readjustment come many difficult problems, financial and otherwise, to face and solve. This, however, is a country of well-nigh boundless potentialities and we can, I think, whatever be the perplexities of the moment, view the ultimate future with every measure of confidence.

Of the spirit and virility of the Canadian people, we have had abundant illustration during the past few years. That spirit has carried us through the difficulties of the war period; that spirit, I know, will enable us to meet the no less difficult and complex questions by which we are now confronted. Sanity and co-operative effort are all that are needed. Let reason reign.

Reference was made last year to the paramount necessity of keeping the wheels of industry uninterruptedly moving, and to the major importance, with that end in view, of developing along broad lines our export trade, to which, indeed, we must look in large measure for the carrying and eventual liquidation of our war indebtedness.

Much has been done during the twelve months in preparation for realizing upon the exportable surplus of this country's raw materials, foodstuffs and manufactures, but as the development of a broad foreign trade is not a matter of a single year or even decade, it is to be hoped that having set our hand to the task the efforts already put forth will continue to be pushed forward with vigor and resourcefulness.

Canada's magnificent achievements during the war period have made this Dominion known the world over, presenting to us opportunities awaiting only development at our hands along far-sighted and progressive lines.

In this connection it may be pertinently added that a solidly-established mercantile marine of our own is of the [illegible] mercantile marine of our own is of the greatest national importance, if not indeed an absolute essential if we are to succeed in any large and permanent way in the world trade. That this country will in course of time have its own ships in which to carry its own products to the markets of the world is a consummation devoutly to be wished and courageously striven for.

Without in any way attempting to touch upon matters having, perhaps, a more or less political aspect, may I be permitted to draw attention to the question of Imperial Preference and to express the keen feeling of interest and expectation which we all must experience at the mother country's first step in the development of this far-reaching and all-important policy. Imperial preference and Inter-Imperial trade arrangements, will, I hope, and do verily believe, be the livest kind of issues by the time we again meet for the purpose of submitting and discussing another year's business.

You will be interested in knowing that according to our reports the condition of Canada's greatest industry, agriculture, is this year rich in promise, especially in the Western Provinces, where the crops have seldom, if ever before, got away to a better start.

We recently organized and put in motion the Bankers' Trust Company, which will operate to some extent as an auxiliary to the Bank. Such Companies, well managed, are excellent, both as conservers of old and creators of new business for the Bank with which they are associated, and we expect our Company, which opened its doors on the 1st of May, will prove a strong, conservative and useful ally. The want of such an affiliated Company has been felt in an increasing degree for some years past.

Just one further word as to that all-important asset which the Balance Sheet does not reveal—the staff: I cannot too strongly endorse the words of appreciation so fittingly expressed by the President, and I have no hesitation in saying that in point of loyalty and efficiency the staff of this Bank is second to none.

For a long period prior to the signing of the Armistice and during demobilization thereafter, the staff of the Bank was reduced, indeed, to a veritable "thin red line," but while numerically weak, the spirit was there in full strength, and we were enabled as a result to conserve and develop our business in the notably satisfactory manner reflected by the comparative figures shown. (Applause.)

So much for that section of the staff, who, for one reason or another, were rendered ineligible for military service. Their's is a record which we recognize with appreciation and view with pride.

As to those who joined the colors, you will be interested in knowing that from a staff of 1,300 odd at the outbreak of war, enlistments numbered no less than 823, or roughly 63 per cent. of the whole, which must very nearly represent 100 per cent. of the eligibles. (Applause.)

Of those splendid young men, 73 made the supreme sacrifice, 57 were wounded, some more than once, and many received high decorations for valor and efficiency.

To the memory of those whose bodies sanctify the soil of France and Flanders, we can but offer the highest tribute of reverential respect.

To those incapacitated through wounds and otherwise, we are gladly endeavoring to render such assistance as lies within our power.

And to those eligible for re-entering the service of the Bank we are finding positions upon a scale of remuneration which provides against their suffering any hardship in a monetary sense by reason of having joined the colors. In other words, we are giving to each and every man the same salary as when he left, plus such increases as would have followed in the ordinary course had he remained.

To put it in a word, Gentlemen, we are proud of our staff, one and all, and I am sure you will agree with me that we have every reason to be proud of them. (Applause.)

On motion of Mr. D. Kinghorn, seconded by Mr. W. B. Blackader, Messrs. Vivian Harcourt and Gordon Tansley, of Deloitte, Plender, Griffiths and Co., were reappointed Auditors of the Bank.

INCREASE IN CAPITAL STOCK.

It was moved by the President, seconded by the Vice-President—"That the Capital Stock of the Bank be, and is hereby increased from ten million dollars ($10,000,000) to fifteen million dollars ($15,000,000) by the creation of fifty thousand (50,000) new shares of the par value of one hundred dollars ($100.00) each."

It was explained by the President that there is no intention of issuing this Capital in the near future, but that it was thought possible to make timely provision well in advance of possible or probable requirements.

The resolution was unanimously adopted.

On motion of Mr. R. Campbell Nelles, seconded by Mr. A. Haig Sims, Messrs. John Patterson and Arthur Browning were, by unanimous vote, appointed scrutineers, and instructed to cast one ballot for the election of the following persons as Directors:—Sir H. Montagu Allan, Mr. K. W. Blackwell, Mr. Thomas Long, Mr. F. Orr-Lewis, Hon. C. C. Ballantyne, Mr. A. J. Dawes, Mr. F. Howard Wilson, Mr. Farquhar Robertson, Mr. Geo. L. Cains, Mr. Alfred B. Evans, Mr. E. F. Hebden, Mr. T. Ahearn, Lt.-Col. Jas. R. Moodie, Mr. Lorne C. Webster.

The ballot having been cast, the directors, as named, were declared elected.

THE PRESIDENT.—"Before we adjourn I would like to say a few words. As you know, I have been overseas four years. During that time there has been a change in the General Managership of the Bank. I have not hitherto had opportunity of saying anything to the Shareholders with regard to our new General Manager.

"I do not wish to say too much about him because the result of his work has been so good that to express my opinion of it might be regarded as unduly flattering, and I may pertinently add that, in so far as I can ascertain, he has the full support of a loyal and efficient staff. As President of the Bank, I may say that his work has given me and the Directors every satisfaction and confidence for the future of the Bank, and I am sure that you will all agree with me that in Mr. Macarow we have found a very efficient man as General Manager." (Applause.)

On motion of Messrs. John Patterson and S. M. Baylis, a vote of thanks was tendered the General Manager and Staff, which was briefly acknowledged by Mr. Macarow, who said that while he fully appreciated the kind, over-kind, references to himself, it was not affectation on his part to disclaim any measure of special credit for the progress shown; rather was it due to co-operative effort all along the line, extending from the Chairman of the Board to the junior clerk in the smallest office. The benefit of that intensive co-operation was recognized and acknowledged by none more than by himself.

MR. CAMPBELL NELLES—"Before we adjourn I would like to express the welcome of the Shareholders to the President, Sir H. Montagu Allan, on his return after four years' absence overseas. We all know why he was away, and we know of his splendid services in connection with the war, and we are all delighted to see him back in his old position at the head of this Bank." (Applause.)

This concluded the business of the meeting, which then adjourned.

At a subsequent special meeting of the Directors, Sir H. Montagu Allan was re-elected President, and Mr. K. W. Blackwell, Vice-President.

APRIL FIRE LOSSES REDUCED

The report of the Ontario fire marshal for the month of April shows a substantial reduction in losses and the figures for the year so far are less than for the preceding year. For the first four months of 1919, as compared with 1918, there is a decrease in the number of fires of 726, while the monetary loss shows a total decrease of some $2,509,213. The statistical table for the four months is as follows:—

	1919.	1918.
Number of fires	3,034	3,760
Total loss	$2,674,008	$5,183,221
Insurance loss	2,019,600	4,011,808
Not covered by insurance ..	654,408	1,171,413

For the month of April this year there were 808 fires throughout the province, causing a total loss of $644,935, the insurance loss being $493,255, and the loss not covered by insurance $151,680. In April of 1918 there were 979 fires with a total loss of $1,799,347, an insurance loss of $1,444,310 and a loss not covered by insurance of $359,937.

The Royal Bank announces that its Paris, France, office is now open for business at 28 Rue du Quatre-Septembre. Mr. Wm. Warren is manager, and Mr. N. G. Hart, late of the New York agency, is assistant.

NIGHT RATES

The hours during which reduced long-distance telephone rates are in effect are as follows: From 8.30 p.m. to 11.30 p.m., 60 per cent. of day rate. From 11.30 p.m. to 6 a.m,, 40 per cent of day rate.

Night rates for Long Distance Services are based on Standard Time.

FINANCE MINISTER'S BUDGET SPEECH

(Continued from page 30B)

We shall also provide for a similar deduction in respect of income derived from a foreign country extending similar exemption upon income derived from Canadian sources.

Business Profits Tax

"As this is a war year, so far as public expenditures are concerned, and it is most desirable that we should maintain, so far as possible, our revenues, the Business Profits War Tax Act will be renewed for the current calendar year so as to make it apply to accounting periods ending on or before December 31st, 1919. The rates of the Business Profits War Tax Act which we are thus extending are as follows:—

"Businesses having a capital of $25,000 and over, but less than $50,000, profits in excess of 10 per cent. to be taxable —i.e., 25 per cent. thereof.

"Businesses having a capital of $50,000 and over (exemption for incorporated companies, 7 per cent.; other than incorporated companies, 10 per cent.); profits in excess of exemptions, but not exceeding 15 per cent., rate of taxation, 25 per cent.; profits from 15 per cent. to 20 per cent., inclusive, rate of taxation, 50 per cent.; profits in excess of 20 per cent., rate of taxation, 75 per cent.

"In connection with both income and business profits taxation, I feel I should again call the attention of the House to certain considerations to which regard should, I think, be had in the general national interest. Canada is a country inviting immigration for settlement, and capital and business enterprise for investment and development. We must be careful that our taxation of income and profits is not such as to place a barrier against either. In some provinces of Canada there are at present three sets of income taxes: municipal, provincial and federal. The result in these provinces is exceedingly heavy taxation upon individuals and business enterprise. Our business profits taxation, unless repealed as soon as war conditions terminate, must have an adverse influence upon the investment of money in business enterprise in Canada. At present there is widespread tendency throughout the world to severely tax profits. Within bounds such a policy is not open to criticism, but carried beyond a reasonable point it can only defeat its purpose with consequences detrimental to capital, labor and the community as a whole.

Tariff Revision Next Year

"Having laid before the House the fiscal proposals which we have to make at this time, I feel the occasion opportune to make a statement respecting the important subject of general tariff revision.

"The sound policy in this regard and the one which has been followed by all administrations in Canada is that, at certain periods, separated by intervals of eight or ten years, there should be a deliberate reconsideration and revision of the entire tariff schedules.

"Such general revision, becomes necessary in the national interest from time to time in order to adjust the tariff to the changed conditions which have arisen. In the intervals between general revisions the policy has been to make as few changes as possible, in order that the business of the country which adapted itself to existing tariff conditions may not be disturbed by sudden and unexpected change, which always makes for uncertainty and lack of confidence. In 1897 there was a general tariff revision such as I have mentioned. In 1904, there was a revision of duties relating to a limited list of commodities, embracing silk, glass and woollen goods, and provision was made for a general so-called dumping duty. This was not a general but a partial tariff revision. In 1907 there was a general revision, and in 1911 there was a partial revision. Had the war not occurred there would have been a general revision in 1916, or at the latest in 1917. The world-wide disturbance and unsettlement caused by the war and the organization of all production and business generally upon a war basis rendered such general revision out of the question for the time being. For the purpose of increasing the revenues of the Dominion and enabling us to defray in part our heavy war expenditure, special war duties of 7½ per cent. and five per cent. were in 1915 added to the general and British preferential tariff rates respectively upon, with certain exceptions, all imports. The revenue received from this special war tariff has been as follows:—

1915-16	$25,256,787.89
1916-17	37,830,427.39
1917-18	45,018,562.27
1918-19	44,726,091.67

When it is considered that for this year we are budgeting to raise barely the amount of our current expenditure and shall be obliged to borrow for our capital and demobilization expenditure, it will be seen how necessary it is to maintain in greater part at least this war tax upon imports.

"It would not be practicable at this time to make a sound general revision of the tariff. International trade is most unsettled, still hampered by war restrictions and prohibitions and by exchange conditions, which are and may long continue to be subject to violent fluctuations. Prices are unstable and labor conditions, internationally speaking, most uncertain. Until peace is restored and the world is upon a more stable basis with respect to capital, labor, prices, markets and exchange, the tariff cannot be revised intelligently.

"It is my hope that within a year conditions will have become so stabilized as to permit of a general revision of the tariff, which is long, but owing to the war, unavoidably overdue. Preceding such such revision there should be a thorough inquiry conducted by the Minister of Finance and two or more of his colleagues representing the different geographical sections of Canada. Such inquiry should afford all interests, agricultural, industrial, fishing, lumbering, mining, commercial and financial, producers and consumers alike, an opportunity of expressing their views and opinions and urging their particular needs and requirements. The result of such inquiry should be a body of information which will enable the government to effect a general revision of the tariff fair to all parts of the community and effectually promoting the national welfare of Canada. This inquiry should proceed with its work just as soon as conditions are sufficiently stabilized to permit. My own view is that it might well be commenced about autumn of this year.

"Before closing my remarks I feel that I should make some general observations as to economic conditions prevailing in Canada to-day. An outstanding feature of the business situation is the fact that a great part of our business activity is due to the continued heavy expenditure of public money. The policy of the government for the so-called reconstruction period of transition from a war to peace basis, as illustrated in its program with respect to shipbuilding, better housing, railway betterments and extensions, public works, and other national undertakings, together with its contribution of war gratuities to soldiers and the creation of credits for the promotion of our external trade with Britian and other European countries, is a vital factor in maintaining our commerce, domestic and foreign, keeping the wheels of Canadian industry turning and affording employment to hundreds of thousands of our people. The funds from which these activities and credits are financed, and which aggregate many hundreds of millions of dollars, are borrowed money. This being a war year, a year of dislocation and of readjustment, of business and industrial uncertainty, of general unrest and of high prices for the necessities of life, of demobilization and of reabsorption into civil life and occupation of our army, the government is undoubtedly justified in the policy which it has adopted. To have pursued a timid or hestitating course with respect to making provision so far as possible for employment and for the promotion through public finance of our export trade in agricultural and manufactured products would have invited most serious conditions throughout Canada. During the unsettled period following the war, governments must do many things outside their function in ordinary times, which private enterprise, through lack of resources or from apprehension as to the risk involved, is not able or willing to undertake.

"It must, however, be pointed out that the continuation of such a policy is subject to strict limitation and that we must look forward and prepare for a time when the artificial support of employment and public financing of trade must be greatly reduced or discontinued, and the industry and business of the country be re-established upon the normal basis of peace conditions. The sooner this can be accomplished the better it will be for the community as a whole.

"In the meantime while the government is, through the instrumentality of the public credit and otherwise, using every endeavor to alleviate conditions which have inevitably arisen out of the war, and overcome the effects of the sudden cessation of the activities which it created, it is the clear duty of all citizens to earnestly co-operate with the government and with one another to the end that with the exercise of patience, good will and high patriotic spirit, we may tide over successfully this most trying and critical period in the national life of the Dominion."

SHIPMENT OF $50,000,000 IN GOLD TO STATES

Great Britain has resumed shipments of gold to the United States from Canada. About $50,000,000 was reported on June 3rd to be on the way to New York, the first large shipment of gold to this country for account of the British government since the early months of 1917. The movement in progress at that time, aggregating in excess of $1,000,000,000, was brought to a close with the entrance of the United States into the war.

WESTMINSTER TRUST COMPANY

The annual meeting of the Westminster Trust Co., Ltd., was held in New Westminster on May 27th. It was decided to pay a dividend of 4 per cent. for the past year, which has been the most successful the company has had since 1911. The financial statement showed an increase of revenue of 30 per cent. over the fiscal year ending in 1918, and it has been possible to reduce the liabilities to the extent of $45,000.

Mr. T. J. Trapp, who has been president of the company since 1910, was re-elected to that position, and Mr. L. A. Lewis and Dr. A. J. Holmes were elected vice-presidents. Mr. Lewis has been on the board of directors since 1911. Mr. E. A. Riddell was appointed general manager and secretary-treasurer.

This issue of *The Monetary Times* has been slightly delayed in order that the budget speech of the Minister of Finance might be fully treated.

MILLIONS IN DAIRY PRODUCE

The British Ministry of food, having finally decided that the purchase and export of Canadian cheese for the season of 1919, will be left to a private enterprise, the Dairy Produce Commission will automatically go out of business.

The following statement shows the quantity of each produce purchased, with the value of each for the season of 1917 and 1918:

	1918—1919	
	Quantities	Values
Cheese (lbs.)	[illegible]	$[illegible]
Butter (lbs.)	[illegible]	1,500,394
Cond. milk (cases)	[illegible]	[illegible]
Eggs (cases)	[illegible]	[illegible]
Totals		[illegible]

All the commissioners served without any remuneration, and the total cost of the commission amounted to $20,000 in 1917, or a fraction less than one-sixteenth of one per cent. In 1918, the total expenses were $[illegible], or one-seventeenth of one per cent. A sum equal to one third of the expenses in 1918 was collected from the milk condensing companies for short weights in the condensed milk purchased. The administrative work of the commission has been performed almost entirely by James Alexander, of Montreal.

CONDENSED ADVERTISEMENTS

"Positions Wanted," 2c. per word; all other condensed advertisements, 4c. per word. Minimum charge for any condensed advertisement, 50c. per insertion. All condensed advertisements must conform to usual style. Condensed advertisements, on account of the very low rates charged for them, are payable in advance. 50 per cent extra if charged.

WANTED.—A good experienced financial man to take charge of office staff in Bond and Debenture Brokerage house in Toronto. One with experience in the bond business preferred. Apply, with references, stating salary required and full particulars of experience, etc., to Box 201, *The Monetary Times*, Toronto.

INSPECTOR WANTED.—Fire insurance inspector for Ontario. Previous road experience not essential if intelligent and willing. Unmarried man preferred. State insurance experience, age and salary expected. Box 193, *The Monetary Times*, Toronto.

WANTED by strong British office thoroughly competent inspector for Province of Ontario. Man with provincial experience and connections preferred. Applications strictly confidential. State present employer, age and salary expected. Box 195, *The Monetary Times*, Toronto.

DEBENTURES FOR SALE

TOWN OF VERMILION

SALE OF DEBENTURES

Sealed tenders, endorsed "Tender for Debentures," will be received by the undersigned up to and including June 7th, 1919, for $6,000.00 debentures for extension to the Electric Light and Power System. These debentures bear interest at the rate of seven (7%) per cent., repayable in twenty equal annual payments of principal and interest. The highest or any tender not necessarily accepted. H. P. Long, Secretary-Treasurer, Town of Vermilion, Alberta.

CITY OF ST. CATHARINES

$100,000 SERIAL DEBENTURES

Sealed Tenders, endorsed "Tender for City of St. Catharines Debentures," will be received by the undersigned until

8 p.m., Friday, 13th June, 1919,

for the purchase of $100,000 debentures issued for Public School purposes, due June 1st, in each year, as follows:—

Payable.	Amount.	Payable.	Amount.
1920	$5,000.	1930	$5,000.
1921	5,000.	1931	5,000.
1922	5,000.	1932	5,000.
1923	5,000.	1933	5,000.
1924	5,000.	1934	5,000.
1925	5,000.	1935	5,000.
1926	5,000.	1936	5,000.
1927	5,000.	1937	5,000.
1928	5,000.	1938	5,000.
1929	5,000.	1939	5,000.

The debentures will be issued in coupon form, bearing date June 1st, 1919, and in denominations of $1,000.

They are payable both as to principal and interest at Imperial Bank of Canada, Toronto, and carry interest at the rate of 5½% per annum, payable half-yearly on the 1st of June and December.

Tenders will be received for "all or none."

The right is reserved to reject any or all proposals.

Statement giving full information will be furnished on application.

STUART K. WATT, City Treasurer.

City Hall, St. Catharines, Ont., June 4th, 1919.

As an illustration of what can be done in a small city in the way of selling life insurance, the record of the Sun Life in Brantford for the month of May is interesting. The manager there, Mr. Thomas Henry, alone paid for 61 applications, totalling $359,000, while his sub-agents placed 67 applications for $92,500, making for the month 128 applications for $451,500.

ALBERTA WILL ASSIST MUNICIPALITIES

Commission Has been Appointed Under Authorization of Act Passed at Recent Session of Legislature—Bondholders to be Consulted

THE Alberta government has appointed Chief Justice Harvey, Justice Beck and Justice Hyndman as commissioners under the act to Ameliorate the Financial Conditions of Municipalities, passed at the recent session of the legislature. The act specified that one or more such commissioners could be appointed. The commissioners need not act as a body, as the duties may be divided among them. The powers given by the act are as follows:—

"1. At the request of any municipality to investigate the financial affairs of the municipality with the view of ascertaining its various liabilities and the debentures or other securities or acknowledgments issued therefor and outstanding and the terms and conditions and periods of payment thereof, the sources and securities for the payment thereof by way of sinking funds, special assessments, general assessments or otherwise and in consultation with such representatives of the debenture holders and other creditors of the municipality interested therein as may after the commissioner or commissioners shall have issued such notice with reference to the same, as the commissioner or commissioners may deem sufficient, appear before him or them, and of any class or classes of ratepayers whom the commissioner or commissioners may think it proper should be represented, to make such recommendation in respect thereof as the commissioner or commissioners shall deem expedient and in particular to recommend a scheme in respect of any liability or liabilities of the municipality whereby, after the commissioner or commissioners have fully considered the just and equitable claims of the debenture holders and other creditors affected and of every class of ratepayers, the liability for proximate or immediate payment or of payment within a fixed period of the principal or of any part or parts thereof may be extended in whole or in part and the liability for the accumulation in the future of moneys to form a sinking fund for the payment of principal money may be postponed, reduced or annulled in whole or in part or whereby debentures payable in equal payments of blended principal and interest may be converted into debentures having the principal or balance of principal payable at the end of a term with interest periodically in the meantime or whereby any liabilities may be consolidated and new debentures or other securities on the same or other terms may be issued in lieu of any existing debentures or other securities or whereby any debentures or other securities may be renewed in whole or in part;

Taxpayers Considered

"2. As to any municipality other than a city at the request of any owner or other person interested in any tract of land lying within a municipality which has been subdivided into lots or blocks and upon hearing a representative of the municipality and whether or not any question involved has been adjudicated upon by any court or other tribunal and whether or not any assessment or taxation thereof is legally effective, to investigate the basis of assessment and taxation, the fair value of the tract, having regard to the value of lands in the neighborhood, the expenditure of moneys by the municipality for the benefit of the tract in question, the profits and losses of the owner and other persons interested in the tract in question, and giving special attention to whether the said tract has against the expressed desire of the then owner been taken into or made part of the municipality, and such other matters as the commissioner or commissioners shall think of service in making a recommendation and to recommend a reduction of the amount of the arrears standing against such tract or any part thereof and the fixing of a time or times for the payment of the amount or the reduced amount of such arrears by instalments or otherwise, and the fixing of the rate or rates of interest to be paid thereon before maturity and after default and in the event of the municipality having borrowed money or incurred liabilities upon the credit of or having regard to the existence of such arrears to recommend the issue of debentures for raising the amount or any part of the amount required to repay such moneys or discharge such liabilities payable upon such terms and conditions, at such rates of interest and at such periods and having the payment thereof secured or provided for by such methods as the commissioner or commissioners may think proper;

"3. As to any municipality other than a city at the request of owners of land representing not less than one-half of the assessed value of the land lying in any area whether the land is or is not subdivided into lots or blocks which can be particularly defined and described as an area having characteristics distinct from those of the residue of the lands lying within the municipality and appearing to the commissioner or commissioners to call for exceptional or restrictive methods of assessment or taxation, to investigate the basis of assessment and taxation and recommend a system rate and method of assessment and taxation of the lands comprised in such area for such period as to the commissioner or commissioners shall appear just.

Arrears of Taxes

"4. As to any municipality other than a city where there are taxes in arrears as to subdivided lands, and notwithstanding the fact that certain or any questions of fact or law, with reference to any such arrears of taxes, have been adjudicated upon by any court or tribunal, and notwithstanding that certain of such subdivided lands have been forfeited or sold to the municipality, and notwithstanding that the municipality has gone through a form of sale of any such lands so forfeited, or sold, which it has been unable effectively to carry out, and whether any assessment has been legally made or not, and notwithstanding any Statute or Ordinance to the contrary, the commissioner or commissioners shall have the right and power, upon such notice as they may deem advisable, to the officers of the municipality, and to any or all such ratepayers, to determine that any or all such taxes so in arrears may be reduced, and what amount or percentage of such taxes in arrear should be paid, and to determine and fix a limited time in which each ratepayer should pay the amount so determined, to be due and payable by him to the municipality as to each parcel or lot of land, and shall have the further right and power in case the amount as to any parcel or lot is not paid within the time so limited, by order or otherwise, to transfer the title, subject to any and all encumbrances, in the said lot or parcel, to the municipality and to issue such document by way of transfer as may be deemed advisable to the municipality, and said document may constitute a transfer of all parcels and lots in said municipality as to which the amount due and owing as so determined has not been paid, and the municipality may duly register such document or documents of transfer in the proper land titles office, upon payment of a fee of fifty cents, as to each document of transfer. As to any parcel or lot in any such subdivided area as to which the taxes have been paid, the commissioner or commissioners may determine the value or price at which the municipality by purchase ought to secure title to the same, and in case the owner refuses to sell and transfer the title to the municipality, at such price, the commissioner or commissioners shall have power to order that the municipality may acquire title to any such parcel or lot, upon its transferring to the said ratepayer any other parcel or lot of land in the municipality of at least equal value, in which case and upon such transfer having been made the commissioner or commissioners shall issue to the municipality the necessary document of transfer. The commissioner or commissioners shall have power to cancel all such subdivisions including streets, lanes and public squares, and shall have power to execute all documents necessary for registration purposes and otherwise to carry out and make effective any order he or they may deem requisite in the premises.

Every recommendation of the commissioner or commissioners shall become effective and binding upon the municipality and upon all persons interested therein or affected thereby upon the same being approved by the Lieutenant-Governor-in-Council and thereupon the municipality and all such other parties respectively shall be compellable to carry out and give effect to such recommendations and the municipality is hereby authorized, empowered and required to issue any debentures or other securities or acknowledgments and to do any other thing the issue or doing of which is so recommended and that without any further or other authority and the same shall be valid, binding and effective notwithstanding any statutory requirements, restriction or limitation which might be applicable thereto but for this provision."

BANK BRANCH NOTES

The following is a list of branches of Canadian banks recently opened:—

Nipawin, Sask.	Canadian Bank of Commerce.
Chicoutimi, Que.	Bank of Montreal.
Toronto, Ont. (Runnymede and Bloor)	Dominion Bank.
Galt, Ont.	Bank of Nova Scotia.
Toronto, Ont. (Danforth and Greenwood)	Bank of Nova Scotia.
Western Bay, Nfld.	Bank of Nova Scotia.
Hawkestone, Ont.	Sterling Bank of Canada.
*Hatzic, B.C.	Canadian Bank of Commerce.
*Matsqui, B.C.	Canadian Bank of Commerce.

*Sub-agencies to Mission City.

Mr. A. T. L. Williamson, formerly of the Bank of Ottawa, Vancouver, has been appointed manager of the Bank of Nova Scotia at Queen and McCaul Streets, Toronto.

Mr. R. M. Hammond has been appointed manager of the new branch of the Sterling Bank of Canada, opened at Hawkestone, Ontario.

The following staff appointments have been announced by the Royal Bank of Canada:—B. C. Stone to be manager of Toronto, Cedarvale branch; R. M. Wilson, manager of Toronto, Gerrard and Jones branch; A. J. Kelly, manager at Iroquois Falls; J. L. Gauthier, manager of Quebec, St. Sauveur branch; P. J. Clarkin, manager, Harbour Buffett, Nfld.

CANADIAN REALTY BOND ISSUE

An issue of $3,000,000 thirty-year serial 6 per cent. gold bonds of the Canadian Realty Corporation, Ltd., has been sold privately to A. E. Ames and Co., of Toronto. The bonds are dated June 1st, 1919, and mature half-yearly until 1949. The company has a fully paid-up capital of $1,000,000, and was incorporated in April, 1911, with a Dominion charter. It is a holding concern for the real estate of the Union Bank of Canada, which owns practically all of the capital stock. The assets pledged for the security of this issue include business property in over 125 places in Canada. These properties are all leased to the Union Bank and are occupied by it. They are valued at over $5,000,000.

COBALT ORE SHIPMENTS

The following is a statement of the shipments of ore, in pounds, from Cobalt for the week ending May 30th, 1919:—

McKinley-Darragh, 86,034; O'Brien Mine, 65,000; Buffalo Mine, 264,880. Total, 415,914.

The total since January 1st is 9,077,275 pounds, or [illegible] tons.

MUNICIPAL FINANCE

Edmonton Tax Payments—South Vancouver Collections—Regina Utilities' Results

Toronto, Ont.—The general assessment of the city is still growing rapidly, and although all the rolls from the wards are not yet completed, it is probable that there will be a gross increase equal to that of last year.

Gravenhurst, Ont.—A by-law has been passed giving a free site for a new station and freight shed, and to grant the Grand Trunk Railway a fixed assessment of $14,000 for municipal purposes for ten years.

Brantford, Ont.—That the burden of frontage tax be lessened as much as possible Mayor MacBride would have a wheel tax placed on all vehicles, the tax to be collected by the municipalities and spent within the municipality where this money is raised on good roads. The proposal will be submitted to the Ontario Municipal Association convention.

Windsor, Ont.—A half a million dollars increase in the income assessment in two years in Windsor is the prediction of Assessment Commissioner Black. Last year the income assessment was increased a quarter of a million bringing it to $639,175. He expects another quarter of a million again this year according to the returns that have been made.

St. Thomas, Ont.—The barns, track equipment, power lines and other material in this city belonging to the defunct London and Lake Erie Traction Company, have been offered to the city, no price being stipulated, although $30,000 has been suggested as a reasonable bid. The company estimates its holdings to have cost over $60,000, and state that they could not be duplicated to-day for less than $75,000. The Street Railway Committee of the City Council dealt with the offer last week, but decided that the city was not in a financial position to take advantage of it.

Vancouver, B.C.—The civic tax rate has been struck at 24 mills net or 26.66 mills gross, the same as last year. But there is a considerable difference this year for the taxes will be levied on 100 per cent. of the land assessment and 50 per cent. of the building assessment. Last year but 25 per cent. of the building assessment was taxed. The expenses of the city have increased considerably over last year, but had it not been for the long sustained efforts of the council to reduce the tentative expenses, the rate would have been much higher. As it was, the controllable expenditures were reduced by approximately $250,000, or 20 per cent. of the total.

Calgary, Alta.—The inclusion of $251,000 in the estimates for 1919 for hospital purposes, or approximately 3½ mills in the tax rate, is now under consideration by the commissioners in the preparation of the 1919 estimates. Under the amended legislation the city has the right to tax to any amount through general taxation for hospital purposes. The section of the act as it was in force last year is now wide-open, stipulating: "That the city may levy annually on all rateable property, real, personal and income on the assessment rolls of the city sufficient to pay for the maintenance and operation of all hospitals operated or managed by the city." Last year, through the city's inability through the charter to levy more than one mill for hospital purposes, only one mill, or $83,000, was levied, while the hospital asked for $103,000. The deficit has accordingly been carried over, as well as other additional expenses.

Halifax, N.S.—The city tax rate on land has been sworn by Assessor McManus as $5.42 per $100. The rate on improvements is fixed by law at $1.75. The total will be equal to about $2.85 as under the old system.

The estimated requirements by the board of control were $1,235,336.26, to which there was added by legislation $55,981.46, making a grand total of $1,291,317.72 required. The land value was found to be $11,793,775, and at the rate an-

ESTABLISHED 1841
Dominion Bank Building, Toronto, Canada

[illegible] per $100, is expected to yield $639,222.60. The land tax requirement is arrived at thus:—

Improvements	$639,782.94	@ 1.75
[illegible] tax	128,808.90	@ 1%
House tax	49,404.45	@ ¼ 1%
Bank and company licenses	39,550.00	
	$653,546.20	
School rebate	1,400.00	
	$639,171.43	

Under the old system the rate would have been $2.85—city, $1.89½; school, 90 cents; county, 5½ cents.

Regina, Sask.—In the first four months of the year the city electric light department has accumulated a surplus of $21,290, or approximately $6,000 more than the estimated surplus for the entire year, which was expected to be $15,290 when the estimates were drafted.

While the electric light department is making such an excellent financial showing, the deficit of the street railway is dwindling as compared with last year. The loss on the operation of the street cars at the end of April was $9,150. The net result of the big surplus of the light department, coupled with a surplus of $1,082 on the operation of the waterworks, gives the combined utilities the handsome profit of $13,220 for the first four months of 1919. In addition to the balance referred to, the utilities statement is credited with a further $6,858, representing loans to the street railway sinking fund from property. The city's general revenue and expenditure account shows a surplus of $36,626 for the first four months of the year, this figure including the surplus from the utilities account. In. other words, departmental expenditures for the period are ahead of the estimates some $16,600. The total expenditure for the period is $281,900, as compared with a total estimated expenditure for the year of $908,650.

Edmonton, Alta.—For the first time in a period of eight years the city has a cash balance in bank. This condition of affairs is due to the adoption of a special provision in an amendment to the city charter permitting the prepayment of current taxes in advance of the mill rate being fixed and statutory notices issued, under the inducement of a liberal discount not exceeding 10 per cent. The arrangement has resulted in the collection to date of approximately $1,000,000 of the current year's taxes so that the overdraft on the Imperial Bank has not only been extinguished, but leaves a credit balance of over $115,000. It is aimed on the part of the city to so allocate the assessment and taxation time table that earlier collection of taxes than has been the custom in previous years will be ensured. It is an axiom that a city has no revenue other than that derived from taxation, and unless there are funds on hand, borrowing from the bank becomes necessary to meet current expenditures until such time as taxes can be collected.

Under the city charter it is now arranged that in future the assessment for the ensuing year shall be completed not later than the 31st day of October, and that all appeals against the assessment shall be disposed of by the city commissioners by 31st December, while appeals coming before council must be determined by 20th January following. The roll is to be adopted by council and certified by the assessor on or before 31st January, appeals are to be determined by the District Court on or before the 15th day of March, and the tax roll is to be prepared not later than the 1st day of May. By means of this procedure taxes will be collectible in future at a much earlier date than in previous years, so that the city will be financed without resorting unduly to loans from the bank, and consequently interest charges will be reduced.

For the present year the special discount allowed by the city council was 10 per cent. on taxes prepaid up to 15th May, 9 per cent. to 15th June, and this percentage is proportionately reduced on the expiry of each succeeding month to the 15th December, after which current taxes are payable [illegible]

South Vancouver, B.C.—The following are the collections made for the eight months of 1918, and also the first four months of 1919, which made up the first year under Commissioner Gillespie, compared with those of the same periods of the previous year:—

1918-1919.	
May 1st to December 31st, 1918..........	$643,503
January 1st to April 30th, 1919	151,394
Total for year	$794,897

1917-1918.	
May 1st to December 31st, 1917	$538,973
January 1st to April 30th, 1918	127,421
Total for year	$666,395

It will be noticed from the above that $77,129 has been paid in in taxes for the first four months of this year, as against $55,317 for last year when the council had charge. This shows a gain of almost 40 per cent. The departmental collections, outside of water, are very much the same from year to year. It is expected that the total collections this year will reach over $900,000, and there are some hopes that they will reach one million dollars, as it is believed that a great many of the arrears will be paid up. It is thought that 80 per cent. of the current year's taxes will be paid, and at least $300,000 of the arrears. Should this be so, the municipality would be put in a very much improved position financially.

NEW INCORPORATIONS

British Wrecking and Salvaging Co., Ltd.—New Rubber Company in Montreal

The following is a list of companies incorporated during the past week, with authorized capital and names of provisional directors:—

Sarnia, Ont.—J. Cardinal, Ltd., $50,000; O. Cardinal, A. W. Patenaude, J. Cardinal.

Ottawa, Ont.—Spardon Electrical Products Co., Ltd., $50,000; L. E. White, R. J. Sims, A. E. Honeywell.

London, Ont.—Daly Grange Teas, Ltd., $250,000; G. S. Grange, E. W. Grange, H. A. Grange. Wendell Holmes, Ltd., $40,000; A. J. Sneath, M. G. Keenan, F. M. Thomson.

Montreal, Que.—British Wrecking & Salvaging Co., Ltd., $2,000,000; R. T. Heneker, H. N. Chauvin, H. E. Walker. Donald Shipping Co., Ltd., $30,000; L. P. Crepeau, S. H. R. Bush, B. Robinson. Canadian Waist Co,. Ltd., $50,000; I. Ballon, A. W. Muhlstock, L. Tannenbaum. Mount Royal Rubber Co., Ltd., $500,000; D. L. McGibbon, T. H. Rieder, S. J. LeHuray. William Notman & Sons, Ltd., $100,000; C. F. Notman, L. Macfarlane, W. B. Scott.

Toronto, Ont.—Auto Tire Exchange, Ltd., $49,000; W. H. Beatty, I. McIvor, M. E. Green. Beaver-Truck Builders, Ltd., $250,000; R. W. Hart, E. Fitzsimmons, C. H. C. Leggott. Canada Oil Gas Heaters, Ltd., $500,000; M. P. van der Voort, M. H. Gillam, M. C. van der Voort, Canadian Ceramics, Ltd., $40,000; W. A. Brock, E. C. Clubine, J. S. McLaughlin. Canadian Mining & Development Co., Ltd., $200,000; A. M. Beverley, T. Hayes, D. G. Meyer. The Knox Manufacturing Co., Ltd., $100,000; J. A. Knox, L. Knox, T. E. Knowlton. Bubrik Products, Ltd., $100,000; J. Campbell, W. J. McCoy, W. Graham. Sales, Limited, $100,000; H. W. Purver, L. M. Heal, F. Wise. Authors, Cox and Hanger, Ltd., $200,000; T. A. Rowan, V. H. Hattin, W. McCann. Ely Hosiery & Underwear Co., Ltd., $40,000; E. F. Ely, W. H. Ker, G. A. Sebeck.

Current bank loans in Canada at the end of April were $1,107,986,523, or about $10,000,000 less than at the end of March. The figure of $1,070,985,080, given on page 32 of *The Monetary Times* last week, was a misprint.

WHY MUTUAL POLICIES ARE EASY TO SELL

First—Because of the co-operative and democratic principle on which the company is founded. The Mutual Life Assurance Company of Canada is a company consisting of policyholders, maintained by policyholders, exclusively for policyholders.

Second—Because the purpose for which the company was established is now generally understood, the company since its establishment in 1869 has consistently followed one aim—that of furnishing the largest amount of protection for the least possible outlay.

Third—Because the company's day-by-day activities advertise it: The Mutual of Canada since its organization has paid to policyholders or their beneficiaries or holds as a trust to guarantee future payments, over sixty millions of dollars.

BALANCING DEBTS BY LIFE INSURANCE

Do you ever think of Life Insurance as a means of counterbalancing unavoidable debt?

There are bushels of ways in which debt may creep upon a man, unavoidably almost, legitimate debt in many cases.

He may undertake to purchase a home, secure credit to extend his business. Ill health may hamper and swallow his savings. Crops may fail and business losses occur.

All manner of calls tug at a man's purse strings, and do their best to make the domestic balance sheet a poor exhibit.

But Life Insurance will restore the balance.

CAPABLE MEN
Can Always Be
WELL PLACED

Much desirable territory is ready for Agents who can deliver policies in satisfactory volume. Inquiries about localities will have careful attention.

Union Mutual Life Insurance Co.

Portland, Maine

Address: ALBERT E. AWDE, Supt. of Agencies.

VANCOUVER

The Dominion Government is planning the expenditure of $5,000,000 on the development of Vancouver Harbor during 1918.

Industrial Sites immediately adjacent to the section covered by this development are available on long lease at reasonable rentals.

Every site is connected by industrial trackage with Canadian and U.S. transcontinentals. The majority afford water frontage for deep sea traffic.

The location is within 9 blocks of Vancouver's retail district—gives full advantage of all public utilities—water supply—sewerage—gas—electric light and power.

Bona fide enquiries from intending manufacturers will receive careful attention and confidential report. State definite points on which information is desired. Address

J. R. DAVISON, City Industrial Commissioner
402 Pender St. West, Vancouver, B.C.

The Cost of Smoking

Do you know that the cost of your two or three cigars—say a quarter a day—will maintain about $4,000 of life assurance for a man between 25 and 30?

You can afford to smoke, sure! But you can also afford an Imperial Life Policy to provide for your wife and little ones should death call you suddenly. For particulars write to

GOVERNMENT AND MUNICIPAL BONDS

Government Issues Unchanged—Municipal Bonds Bring Good Prices by Tender

Government issues continue about the same as last week, Russian external issues being somewhat weaker. The following quotations of active issues are in New York funds:—

	Bid.	Offered.
Anglo-French 5% (Oct. 15, 1920) ..	97 7/16	97 9/16
United Kingdom 5½% (Nov. 1, 1919) .	99 7/8	100
United Kingdom 5½% (Nov. 1, 1921) ..	98 7/8	99 1/8
United Kingdom 5½% (Feb. 1, 1937) ..	99 1/2	99 3/4
Canadian Pacific 6% (Mar. 2, 1924) ..	101	101 1/4
City Paris 6% (Oct. 15, 1921)	97 5/8	98
Dominion Canada 5% (Aug. 1, 1919) ...	99 13/16	99 15/16
Russian Govt. Ext 5½% (Dec. 1, 1921)	53	56
Russian Govt Ext 6½% (July 10, 1919)	62	64

The following is a list of debentures offered for sale, of which particulars appear in this or previous issues of *The Monetary Times*:—

Borrower	Amount.	Rate %.	Maturity.	Tenders close.
Vermilion, Alta ..	$ 6,000	7	20-instal.	June 7
Halifax County, N.S.	28,500	5½	10-years	June 9
Calgary, Alta	1,500,000	6	5-years	June 9
Guelph, Ont. ...	118,000	5½	15 & 30-instal.	June 13
St Catharines, Ont.	100,000	5½	20-years (serials)	June 13
East Whitby Township, Ont. ..	61,000	5½	25 & 30-instal.	July 7
Montreal, Que.	624,000	4½	40-years	July 3

Pembroke, Ont.—The sum of $32,000 will be raised by the city by debenture issue for public improvements.

Niagara Falls, Ont.—A by-law to raise $18,000 for the extension of the hydro system in the city has been passed.

Walkerville, Ont.—Debentures to the amount of $30,000 will be issued to cover the cost of repaving several streets.

Stratford, Ont.—At the next election ratepayers will vote on the by-law to borrow $75,000 for the re-surfacing of the asphalt block pavement in the city.

Parry Sound, Ont.—Ratepayers have approved a by-law to borrow $150,000 to rebuild and enlarge the town electric light and power plant, and to build a steel bridge across the Seguin River.

Port Coquitlam, B.C.—An issue of $30,000 of debentures secured on arrears of taxes and to be applied for the general purposes of the municipality, has been sold to the National Bond Corporation, Ltd.

St. Catharines, Ont.—Sealed tenders will be received up till June 13th, for the purchase of $100,000 5½ per cent. debentures, maturing $5,000 annually for twenty years. Stuart K. Walt, city treasurer. (See notice elsewhere in this issue).

Regina, Sask.—The exhibition association is selling debentures to the value of $25,000, to raise money for the addition to the grand stand. The debentures bear 7 per cent. interest, are in denominations of $100, and payable in five annual instalments. According to the latest reports received nearly all the issue was sold.

East Whitby Township, Ont.—Sealed tenders will be received up till July 7th, for the purchase of $16,000 5½ per cent. 25-instalment debentures of No. 1 school district, and $[illegible] 5½ per cent. 30-instalment debentures of school district No. 2. Separate tenders must be submitted for both issues. Wm. Purvis, clerk, Columbus, Ont.

Montreal, Que.—Sealed tenders will be received up till July 3rd, for the purchase of $624,000 gold bonds, dated May 1st, 1914, due May 1st, 1954, bearing interest at the rate of 4½ per cent. per annum. Principal and interest payable in Montreal or New York. These bonds are a part of a loan for $7[illegible] the issue of which was authorized by the Board of Commissioners in May, 1914, and of which only $106,000 was delivered. The loan is authorized by an act of the Legislature of the Province of Quebec.

Calgary, Alta.—Capital expenditure, involving an outlay of approximately $1,000,000, has been sanctioned by the City Council. This plan provides for the construction of the extensions to the gravity system at a cost of $272,316; the sewage disposal plant, $350,000; the sewage extensions up Centre St., $28,439; Killarney extension, $16,000; paving from Fourth Ave. to the bridge on Centre St., $40,506; paving to Mission Bridge, from twenty-sixth Ave. and Fourth St., $1,741; and a children's shelter on the Riverside Boulevard, $60,000.

Peterborough, Ont.—The time fixed for the issuance of Hunter Street bridge debentures expires on July 3rd, and at a recent meeting of the Finance Committee it was recommended that the date be extended for two years. City Treasurer Adams reported that applications to the amount of $100,000 had been received for the $19,000 lot of municipal debentures recently advertised for sale. There were no small $100 offers. Mr. Adams stated that if a satisfactory offer was not received the city would advertise for outside bids.

County of Ontario, Ont.—Messrs. A. E. Ames & Co., were the successful tenderers for a block of $10,000 5½ per cent. 10-instalment debentures, at a price of 100.87. The following is a partial list of tenders:—

A. E. Ames & Co.	100.83
MacNeill, Graham & Co.	100.73
A. Jarvis & Co.	100.70
Brent, Noxon & Co.	100.70
Sterling Bank	100.70
G. A. Stimson & Co.	100.63
C. H. Burgess & Co.	100.54
Wood, Gundy & Co.	100.39
R. C. Matthews & Co.	100.30
Ralph M. Bird & Co.	100.27
W. L. McKinnon & Co.	100.20
C. R. Clapp & Co.	100.10

Renfrew County, Ont.—Messrs. A. E. Ames & Co. have been awarded two parcels of bonds comprising $16,000 6 per cent. 5-instalment, and $16,000 6 per cent. in 10-instalments. The price paid was 102.35, which is on a basis of about 5⅝ per cent. The following is a list of tenders:—

A. E. Ames & Co.	102.35
A. Jarvis & Co.	102.11
Brent, Noxon & Co.	102.06
Canada Bond Corporation	102.015
W. L. McKinnon & Co.	101.966
MacNeill, Graham & Co.	101.92
Wood, Gundy & Co.	101.91
National City Co., Ltd.	101.80
G. A. Stimson & Co.	101.76
Ralph M. Bird & Co.	101.70
R. C. Matthews & Co.	101.66
Bank of Ottawa	100.939

Point Grey, B.C.—Two blocks of debentures have been awarded to the amount of $114,500. These are for the erection of a school house in that municipality. The first block was of $82,500 5½ per cent. debentures due August 1st, 1959, and as these bonds are not dated and deliverable until August 1st of the present year, there was consequently an element of speculation in the preparation of the figures submitted. The question of what the bonds are likely to be worth two months from now had to be taken into account. The second block was of $32,000 5 per cent. debentures, due August 1st, 1953, and is part of an issue previously authorized and sold. Messrs. A. E. Ames & Co., were the successful tenderers. The following are some of the bids:—

	5½'s	5's
A. E. Ames & Co.	94.22	87.08
Wood, Gundy & Co.	91.45	85.84
R. C. Matthews & Co.	91.50	84.68
B.-Am. Trust Co.	91.74	84.24

Other figures submitted were by Messrs. Stimson & Co., at 89.01, and Messrs. Brent, Noxon & Co., at 89.576, but these are average prices for the two blocks.

John Stark & Co.	100.51

Offers of over 102 were received from Bankers Bond Co., C. H. Burgess & Co., Æmilius Jarvis & Co., and the Canada Bond Corp., for the bonds payable at the end of 20 years, but as the by-law calls for the bonds in 20 annual instalments these were ruled out of order.

CLIFTON HOTEL ISSUE

The Clifton Hotel Co., Niagara Falls, Ont., is issuing $[illegible]0,000 7 per cent. second mortgage sinking fund bonds, with a bonus of 50 per cent. stock. Mr. Geo. H. O'Neill, general manager of the King Edward Hotel, Toronto, reports to *The Monetary Times* that subscription will now be received at the company's office, Toronto.

LOEW'S THEATRES ISSUE

The shareholders of the Toronto Loew's Theatres, Limited, at a special meeting, held on June 2nd, confirmed the authorized issue of $1,500,000 6 per cent. 15-year serial bonds, dated June 1st, 1919, of which $500,000 will be issued at the present moment for the purpose of paying for the property and building a theatre at Bloor and Yonge Streets. These bonds will be secured by the property just purchased as well as that of the Toronto Loew's Theatres Company. In fifteen years the Toronto Loew's Theatres, Limited, will own the new property outright—a property that is expected to earn from the outset upwards of $125,000 annually.

MONEY MARKETS

Messrs. Glazebrook and Cronyn, exchange and bond brokers, Toronto, report the following exchange rates to *The Monetary Times*:—

	Buyers.	Sellers.	Counter.

MAY BOND SALES

Small Decrease for the Month—Municipalities Receive Good Prices for Issues

MUNICIPAL bond sales in May totalled $1,268,101, compared with $1,749,202 in April, and $4,751,142 in May a year ago. The following is a summary of municipal bond sales by provinces:—

Ontario	$ 550,351
Manitoba	40,000
Alberta	35,000
Saskatchewan	272,750
British Columbia	30,000
Nova Scotia	340,000
Total municipal	$1,268,101

Tenders were called up till May 28th for an issue of $132,000 bonds of Shawinigan Falls, Que., and till May 30th for an issue of $40,000 Carleton county, Ont., bonds, but the award was delayed for a few days, so that the total of $172,000 cannot be included in the May sales.

Provincial bonds were sold to the amount of $5,500,000, the chief feature for the month being the $4,000,000 Ontario issue, which was offered in the United States with success. The $1,000,000 New Brunswick issue has not yet been offered, but when it is, it is expected across the line.

The most important event in the industrial market during the month was the Mattagami Pulp and Paper Co. issue of $2,000,000, which has been offered by the Royal Securities Corporation with success, making the fourth issue of that kind this year, all of which have gone well.

The houses offering the Howard Smith Paper Mills issue of $800,000 report that the bonds are meeting with a favorable reception, and that little difficulty is expected in disposing of the entire lot.

The total bond sales for May amounted to $9,568,101, compared with the April figure of $9,749,202. The following is a summary of all bond sales for last month:—

Provincial	$5,500,000
Municipal	1,268,101
Corporation	2,800,000
Total	$9,568,101

Bank loans to municipalities show their usual seasonal increase during the early months of the year, as some assistance of this kind is necessary until the taxes begin to come in. As will be seen from the figures given below, however, the loans at the end of April were almost $8,000,000 less than at the end of April last year. The seasonal increase has been approximately the same, namely, $15,000,000.

	1916.	1917.	1918.	1919.
January	$32,015,371	$24,487,272	$40,015,466	$32,640,198
February	35,149,915	26,121,324	43,535,628	36,830,183
March	38,649,462	29,877,911	50,652,061	41,993,305
April	44,371,050	35,931,996	55,685,350	47,911,199
May	43,924,036	39,700,191	57,728,226	....
June	46,773,032	42,757,673	58,000,424	....
July	42,385,096	43,989,207	56,589,173	....
August	39,882,811	43,940,176	56,662,931	....
September	38,708,745	42,721,563	47,977,472	....
October	37,613,530	41,204,781	46,275,106	....

The United States as a Market For Canadian Bonds

Prior to its entrance into the war the United States was fast becoming the principal market for Canadian Provincial and Municipal Bonds, having in recent years replaced England in this particular. A healthy appetite and a sound respect for such securities was much in evidence among American investors in 1913, 1914 and 1915.

The war is hardly over and yet bond dealers in New York and other cities of the States who formerly handled "Canadians" are already beginning to deal in bonds issued by Cities and Provinces of the Dominion.

There is little doubt but that the United States will quickly resume its former position with respect to Canadian financing operations. Hence, it behooves the borrowing Province, City or Town to present its borrowing problems to the investment bankers in New York, Boston, Philadelphia, Chicago, etc.

THE BOND BUYER is recognized as "The Authority on Municipal Bonds." It is the logical medium through which Bond Dealers, Banks or Municipal Officials may reach every active buyer of Municipal Securities. That is why it carries more official advertisements of State and Municipal Bond Offerings than all other U. S. financial papers combined.

A specimen copy will be sent gratis upon application

THE BOND BUYER

INVESTMENTS AND THE MARKET

Pacific Burt Profits are Lowest—Montreal Light, Heat and Power—Ames Holden McCready Changes

Consolidated Mining and Smelting Co.—The Department of Labor has been informed at Victoria that the company at Trail [illegible] been closed down indefinitely. More than 1,000 men are out of work. It was stated by the management that the smelter had closed owing to lack of markets.

Cape Breton Electric Co., Ltd.—The annual statement of the company for the year ended March 31st last shows gross earnings at $[illegible], compared with $476,976 for the previous period, an increase of $56,867. After deducting $[illegible] for operating expenses and taxes and $63,574 for interest charges, the balance for reserves, replacements and dividends stood at $66,823.

Canadian Cottons, Ltd.—The company, which has a large plant at Milltown, N.B., is planning a diversion of the St. Croix River at that point and the establishment of a large power station. The plans of the company involve an expenditure of over half a million dollars. Canadian Cottons, Ltd., has two large mills at St. John, the York and Cornwall. These have been very busy throughout the war and are still operating actively.

Dominion Textile Co.—The annual meeting of the company was held last week, and the retiring board of directors was re-elected. At a later meeting the board of officers were reappointed for the ensuing year. The board now stands as follows: Sir Charles Gordon, G.B.E., president; Sir Herbert S. Holt, vice-president; J. P. Black, John Baillie, C. R. Hosmer, F. G. Daniels, W. A. Black. J. H. Webb was appointed secretary-treasurer, and J. A. Fish assistant secretary-treasurer

Dominion Steel Corporation.—The first meeting of the special committee appointed by the Dominion Steel Corporation and by the Nova Scotia Steel and Coal Co. to consider the submarine coal areas met in Montreal on June 4th. The Dominion Steel Corporation was represented by J. H. Plummer, formerly president; Hector McInnis, K.C., and William McMaster. The Nova Scotia Steel and Coal Co. was represented by D. H. McDougall, president; Thomas Cantley, chairman of the board of directors, and W. D. Ross, vice-president.

Nipissing Mining Co.—The company has declared a dividend of 5 per cent., together with a bonus of 5 per cent., payable July 21st to shareholders of record June 30th. The company is capitalized at about $6,000,000, and the July disbursement will amount to about $600,000. Nipissing went on a dividend-paying basis on July 20th, 1906, since which time a total of $19,140,000 has been paid. In doing this the company has mined considerably over 50,000,000 ounces of silver. The recent developments on vein 109, taken together with the 6,000,000 ounce ore reserve with which the current year was begun, would appear to convey reasonable assurance that the disbursement of dividends at the present rate will continue for a good many years.

Mexican Northern Power Co.—Bondholders of the company are being called to meet at the Montreal Trust Co.'s office, Toronto, on Monday, June 16th, the holders of the 6 per cent. prior lien bonds to meet at 11 and the 5 per cent. first mortgage bonds to meet at noon. They will be asked to approve of a plan for the sale of the company to a new company, called the Northern Mexican Power and Development Co., the holders of the 6 per cent prior lien bonds, some $1,[illegible] of which have apparently been sold, receiving $[illegible] fully-paid 7 per cent. preferred stock in settlement of their claims, getting $150 in preference stock for every $100 of bonds so held, the holders of the $10,000,000 5 per cent. first mortgage bonds taking $10,000,000 in common stock in the new company in exchange for their bonds.

Ames-Holden-McCready, Ltd.—At a meeting of the company on May 30th, Mr. T. H. Reider was elected president, replacing D. Lorne McGibbon, who becomes chairman of the board. The action was in line with expectations following Mr. Reider's resignation as president and general manager of the Canadian Consolidated Rubber Co. some weeks ago, and his advent in an active capacity to the shoe manufacturing enterprise.

Following the same meeting, it was announced that a dividend of 1¾ per cent. had been declared on the preferred shares of the company, payable July 2nd to holders of record June 12th next. Whether this distribution was in part liquidation of the deferred dividend obligations of the concern, which were discontinued in the quarter ended September, 1914, is not stated in the official announcement, but the resumption of the disbursements to preferred shareholders is taken to mean that the shares have been again placed on a regular dividend basis, and that back payments will be made from time to time as conditions warrant.

Pacific-Burt Co., Ltd.—According to the annual report of the company, just mailed to shareholders, profits for the year ended March 31st last were lower. Last year's profits were $83,743, compared with $101,551 the year before. The balance brought forward a year ago was $38,026, compared with $65,174 the previous year, and the amount carried forward this year is $29,654. Out of the total sum at credit of profit and loss account, $16,025 was transferred to real estate and plant reserve, $5,037 reserve for taxes, and the usual sum of $58,500 went in dividends, 7 per cent. on preferred and 2 per cent. on common. There was also the sum of $12,552 written off patents.

"The company's operations during most of the year," says President S. J. Moore, "were carried on under war conditions. The results, however, compare favorably with the experience of the industry generally. The outlook for the ensuing year is good." The reserve for real estate and plant now amounts to $70,000, and the amount written off against patents reduces that account to $210,000.

International Nickel Co.—The company reports for the year ended March 31st, 1919, earnings of all properties after expenses, maintenance, etc., of $11,186,305, compared with $15,791,485 in the preceding year, and a surplus, after dividends of $1,204,414, against $2,065,004 in the previous year. The income account compares as follows:—

	1919-18.	1918-17.
Earnings, all properties	$11,186,305	$15,791,485
Other income	25,216	390,015
Total income	$11,211,521	$16,181,500
Administration expenses	750,335	610,023
Balance	$10,461,186	$15,571,477
Estimated taxes	2,214,027	3,590,836
Balance	$ 8,247,159	$11,980,641
Depreciation of plants	1,337,644	984,000
Mineral exhaustion	971,885	955,515
Foreign cos. not included	15,000	11,138
Total deductions	$ 2,324,529	$ 1,850,653
Profits	$ 5,922,630	$10,129,988
Preferred dividends	534,756	534,756
Common dividends	4,183,460	7,530,228
Total dividends	$ 4,718,216	$ 8,064,984
Surplus	$ 1,204,414	$ 2,065,004

DIVIDENDS AND NOTICES

PENMANS, LIMITED

DIVIDEND NOTICE

Notice is hereby given that the following dividends have been declared this day for the quarter ending July 31st, 1919. One and one-half per cent. (1½%) on the Preferred Stock, payable on the 1st day of August, to shareholders of record of the 21st day of July, 1919, and One and three-quarters per cent. (1¾%) on the Common Stock, payable on the 15th day of August, to shareholders of record of the 5th day of August, 1919.

By order of the Board.
C. B. ROBINSON,
Secretary-Treasurer.

Montreal, Que., May 28, 1919.

DOMINION TEXTILE COMPANY, LIMITED

NOTICE OF DIVIDEND

A dividend of two per cent. (2%) on the Common Stock of the Dominion Textile Company, Limited, has been declared for the quarter ending 30th June, 1919, payable July 2nd to shareholders of record June 11th, 1919.

By order of the Board.
JAS. H. WEBB,
Secretary-Treasurer.

Montreal, 14th May, 1919.

DIVIDEND NOTICE

CANADIAN GENERAL ELECTRIC CO., LIMITED

COMMON STOCK DIVIDEND No. 80

Notice is hereby given that a quarterly dividend of two per cent. for the three months ending the thirtieth day of June, 1919, being at the rate of eight per cent. per annum has been declared on the Common Stock of the Company.

The above dividend is payable on and after the first day of July, 1919, to Shareholders of record at the close of business on the fourteenth day of June, 1919.

By order of the Board.
J. J. ASHWORTH,
Toronto, May 31st, 1919. Secretary.

THE CANADIAN CROCKER-WHEELER CO., LIMITED

DIVIDEND NOTICE

The Directors of the Canadian Crocker-Wheeler Company, Limited, have declared a One and Three-Quarters per cent. (1¾%) dividend on the preferred stock of the Company for the three months ending June 30th, 1919, to shareholders of record, June 20th, 1919. Also a dividend of One and Three-Quarters per cent. (1¾%) on the common stock of the Company for the three months ending June 30th, 1919, to shareholders of record, June 20th, 1919.

The stock books will be closed from the 20th to the 30th of June, both days inclusive.

Cheques will be mailed to shareholders on June 30th, 1919.

By order of the Board.
L. R. GRIMSHAW,
Secretary-Treasurer.

St. Catharines, June 2nd, 1919.

DOMINION TELEGRAPH COMPANY

The Annual General Meeting of the Shareholders will be held at the Company's head office, Standard Bank Building, 15 King Street West, Toronto, on Wednesday, July 9th, 1919, at [illegible]

By order,
FREDERIC ROPER,
Secretary and Treasurer.

June 4th, 1919.

BARCELONA TRACTION, LIGHT & POWER CO., LTD.

(Incorporated Under the Laws of the Dominion of Canada.)

5½% First Mortgage 50-Year Bonds.

Notice is hereby given that in accordance with the re-organization scheme approved at the meeting of the holders of the above bonds, held on the 19th December, 1918, 1% will be paid at any of the undermentioned banks on and after the 2nd June, 1919, in full discharge of the half-year's interest on the above bonds, due on the 1st June, 1919, against surrender of Coupon No. 15.

London, Bank of Scotland; Brussels, Banque de Paris et des Pays-Bas, Banque de Bruxelles, Banque d'Outremer, Societe Francaise de Banque et de Depots, Nagelmackers Fils et Cie, Caisse Generale de Reports et de Depots; Paris, Societe Generale; Toronto, Canadian Bank of Commerce.

Coupons of the face value of £0: 10: 0 will, accordingly, entitle holders to receive £0: 4: 0 in London, Frs. 5.03 in Paris and Brussels, or 97c. in Toronto, Canada; and coupons of the face value of £2: 10: 0 will entitle holders to receive £1: 0: 0 in London, Frs. 25.16 in Paris and Brussels, or $4.86 2/3 in Toronto, Canada. The above payments are subject to income tax, if payable.

Form of Listing and Declaration of Ownership can be obtained from the above banks.

Dated this 31st day of May, 1919.

For BARCELONA TRACTION, LIGHT & POWER COMPANY, LIMITED,
R. H. MERRY,
Secretary

BARCELONA TRACTION, LIGHT & POWER CO., LTD.

(Incorporated Under the Laws of the Dominion of Canada.)

To the Holders of the
7% Prior Lien "A" Bonds.

Notice is hereby given that the Coupon Number 8, in respect of the interest due and payable on the 1st of June, 1919, on the 7% Prior Lien "A" Bonds of the Company will be paid on and after the 2nd June, 1919, at the Bank of Scotland, 30 Bishopsgate, London, England, and at their Agents, at The Canadian Bank of Commerce, 23 King St. West, Toronto, and at The Agency of The Canadian Bank of Commerce, 16 Exchange Place, New York.

Dated this 29th day of May, 1919.

For BARCELONA TRACTION, LIGHT & POWER COMPANY, LIMITED.
R. H. MERRY,
Secretary.

(For other Dividends and Notices see page 36.)

[illegible] Oil Co., Ltd.—The annual meeting is [illegible] England, on June [illegible] to vote may do so by depositing [illegible] Trust Co. of New York not [illegible]

P. Lyall and Sons Construction Co.—Net earnings of the [illegible] for the year ended March 31st, 1919, were $1,314,-[illegible] compared with $1,491,082 for the previous year, a [illegible] of only $176,500, or less than 12 per cent., despite the cessation last November of munitions manufacturing, on which the chief energies of the enterprise were concentrated.

After all deductions, including amortization of plant, bond interest, sinking fund requirements, preferred dividends, an allowance of $250,000 for restoration reserve and [illegible] for special reserve, there remained for application to common stock dividend availability the sum of $254,236, against $2[illegible]1,750 in 1917-18, or 14.5 per cent., as compared with [illegible] per cent last year. The increased earnings ratio is due largely to the fact that in the previous year $894,638 was allowed for amortization of plant and equipment, as compared with $198,839 in 1918-19, the entire outlay in each case presumably having been provided for to date. After deductions, including the payment of dividends on the common stock for a full year at the rate of 8 per cent. per annum, there remained a balance of $114,236 to carry forward to surplus, against $161,750, the total now standing at $402,001.

The balance sheet shows a continued improvement in working capital, current assets of $2,745,887 contrasting with approximately half that sum in current liabilities, leaving the working capital of the company nearly $1,500,000, against some $767,000 a year ago. The increase is due largely to one in excess of $1,700,000 in open accounts receivable, which stand at the substantial total of $2,533,415, as compared with [illegible] in the previous statement. This is due to the fact that, following the signing of the armistice, all orders received for American munitions were cancelled, and under the terms of the contract with the United States government the latter bears the full cost of all construction work and equipment, as well as for any uncompleted work and supplies on hand necessary for the completion of the munitions. Cash, actually on hand, is shown at $174,781, an increase of $63,595, but inventories, owing to the cessation of the manufacture of war materials, stands over $430,000 lower than a year ago at [illegible].

Montreal Light, Heat and Power Consolidated.—The annual statement of the company, presented at the annual meeting on June 5th, shows a net income, after charges and depreciation, for the twelve months ended April 30th last of [illegible], an increase of $16,458 over the 1917-18 period, or equal to a per annum rate of 5.6 per cent. on the outstanding stock of the company, corresponding identically to the earnings ratio of the previous year, and to 5.2 per cent. in the broken period of nine months with which the consolidation commenced its career.

Computing the earnings before the deduction for depreciation and renewal reserve, amounting to $943,927, the rate was 7.1 per cent. in the 1918-19 period, against a shade higher, 7.2 per cent., in the previous twelve months.

Gross revenue last year amounted to $10,939,272, an increase over the previous one of $548,588, but heavier expenses owing largely to the increased costs of labor and materials more than made up for the growth in revenue, expenses and taxes being $589,623 higher at $5,357,492. After all deductions, including the payment of the 4 per cent. dividends on the $64,126,100 capital stock of the company outstanding, there remained a surplus on the year's operations of [illegible], or moderately in excess of that shown in the report of a year ago. This, added to the previous surplus, brings the total surplus up to $2,608,204.

The financial position of the company is characteristically strong, cash on hand standing at $2,219,988, or nearly [illegible] in excess of that shown in the 1917-18 statement. Subsidiary bonds in treasury, in addition to the stronger cash position, increased some [illegible]60,000 in the year, and now stand at $3,526,250. Current assets grew from $8,521,030 at the end of the previous year to $8,938,919 on April 30th last, the increase being accompanied by a contraction of some $600,000 in current liabilities, adding over $1,000,000 to the consolidation's working capital, which is shown at $6,242,052, against $5,213,223 last year.

RECENT FIRES

Chapleau, Ont.—May 25—The general store of Pellon and McMeekin at Hazel was destroyed. Estimated loss, $17,000.

Crossfield, Alta.—May 28—A large barn, owned by C. Haven, was destroyed. The barn contained animals, hay and implements, which were all destroyed. Estimated loss, $2,000.

Fredericton, N.B.—May 30—A double-tenant house on Court House Square, owned by Fred B. Edgecombe, was destroyed. Cause, children playing with matches. Estimated loss, $10,000.

Hamilton, Ont.—May 30—The general store of Touchman and Co. on Ottawa Street was damaged. Estimated loss, $15,000. Nos. 404, 406 and 408 Ottawa Street were also destroyed. No. 408, belonging to E. B. Mealley, drug store, was damaged to the extent of $4,500.

June 4—Building occupied by the Canada Iron Foundries Co. and owned by the Grand Trunk Railway was destroyed. Estimated loss, $12,000.

Merritt, B.C.—May 27—The large lumber mill of the Nicola Pine Lumber Co., Ltd., at Canford Mill was destroyed. Millions of feet of finished lumber was burnt. Some adjoining houses were damaged. No estimate of the damage has yet been made.

North Bay, Ont.—June 1—Two buildings on Maple Street were destroyed. Estimated loss, $5,000.

Oromocto, N.B.—May 30—Barn and contents belonging to N. Clowes Hallett was destroyed. Estimated loss, $3,000, partially covered by insurance. The large barn belonging to ex-Sheriff Holden and contents was destroyed. Flames jumped to the residence of Mrs. Stanley Clowes and the three large barns in the rear, which were completely destroyed. Estimated loss, $8,000.

Ottawa, Ont.—June 1—Private garage, 137 Flora Street, owned by C. Robertson, was destroyed. Estimated loss, $1,000.

Prince Albert, Sask.—Bush fires have been raging in Northern Saskatchewan for the past two weeks, doing considerable damage to timber and buildings in the smaller municipalities. The fires have been most disastrous in the vicinity of Prince Albert and Paddockwood. Bridges have been destroyed, crippling transportation temporarily, and settlers on the outskirts of the towns and villages have suffered heavily. No definite information as to the extent of the damage has been received yet.

St. John, N.B.—May 25—The home of S. J. Winslow, Hartley Road, Chipman, was destroyed.

May 31—The barn of Clowes Hallett, Douglas, York, was destroyed. Estimated loss, $3,500.

Swift Current, Sask.—May 28—City power house was destroyed. Estimated loss, $60,000.

Toronto, Ont.—June 4—Building of the Ault-Wiborg Ink Co., 325 Symington Avenue, was damaged. Cause, overflowing oil vat. Estimated loss, $250.

Vancouver, B.C.—May 26—Eight Japanese houses at Steveston were destroyed.

Weston, Ont.—June 4—Building and sheds at 832 Weston Road were damaged. Estimated loss, $5,000.

Messrs. Beausoleil Limited, financial agents and investment brokers, have moved their offices from room 707, 263 St. James Street, to the ground floor of 112 St. James Street, Montreal.

Canadian Manufacturers Annual Convention

Geographical Divisions to Be Organized—Increase in Membership Fees—Retiring President Scores Revolutionaries — T. P. Howard is New President — Further Efforts to Increase Membership—Tariff Must Be Maintained For National Benefit

THE 48th annual convention of the Canadian Manufacturers' Association was held in Toronto on June 10th, 11th, and 12th. The attendance was over 400, as a special effort had been made by the executive to secure a good representation in view of the important points to be discussed at the present time.

Reports were presented by the general manager, treasurer, executive committee, insurance committee, legislation committee, transportation committee, membership committee and the tariff committee. The president, Mr. W. J. Bulman, of Winnipeg, dealt at length with labor difficulties in his annual review. Other features of the convention were an address by Mr. Lloyd Harris on export trade, moving pictures illustrating industrial prices and the national campaign against fire waste, and a trip over Toronto harbor at the invitation of the Toronto Harbor Commission.

The report of the executive committee gave a comprehensive review of the activities of the association during the year as follows:—

"During the past year your committee have been confronted with unexpected financial problems, which taxed the resources of the association, and, in dealing with these problems, it was assumed that their first duty was to provide service to the association.

"Your committee report a gross deficit this year of $13,520.44, representing the difference between the total expenditures for the year, amounting to $97,987.96, and the total income from membership fees, amounting to $84,467.52. This gross deficit is reduced by the profits from "Industrial Canada," amounting to $8,636.62, the interest on investments of $3,132.02, and the sale of the "Canadian Trade Index," $189.46, making a total of $11,958.10, and leaving net deficit for the year of $1,562.34.

"Commencing early this year, the association was placed under an obligation to provide for increased expenditures, covering additions to the staff and other general expenses incurred by enlarging the staff. These alterations consisted chiefly of the opening of an Ottawa office, appointment of a general secretary, a manager of the trade sections department, an assistant in the transportation department, extra stenographic help, and an increase of postage, stationery and travelling charges. While we did not feel the full effect of this additional expenditure in last year's business, the increase was sufficient to account for a loss of $1,562.34. Fortunately it was not necessary to dispose of any of the association's securities last year, so the balance in the investment account remains the same as in the previous year. But early this year your committee saw that if the usefulness of the association was not to be seriously curtailed, it would be necessary to secure more revenue through an increase in the membership fees. A schedule of proposed increases, totalling $43,365 per annum, was prepared and submitted to the membership committee on February 17th. This committee considered the schedule, and reported to the executive committee that if the need for revenue was apparent, the apportionment of the fees seemed to be fair and reasonable. The executive committee gave the matter further consideration on February 27th. As they felt it would be advisable to have the opinion of members from various communities, a special committee of sixteen was appointed, consisting of members drawn from Toronto, Hamilton, Montreal, Winnipeg, Guelph, Peterborough, London, Woodstock and Kingston. This committee considered the schedule and made alterations which had the effect of making a further increase of $9,455, making a total proposed increase of $52,820. The amount of this increase is subject to reduction, as allowance must be made for loss of revenue due to arrears and resignations. The report of the special committee was adopted unanimously and forwarded to the executive committee for consideration. It was endorsed by the executive committee on March 27th, approved by the executive council on the same date, and directed to be forwarded to the annual meeting for final decision. Your committee have gone into the stages in the proceedings to show that the proposal to increase the fees was given the most careful consideration before being submitted to this meeting.

New Membership Fees

"The following shows the new schedule recommended for adoption by council at the annual meeting, and the schedule now in operation:

Firms.	No. of employees.	Present fee.	Proposed fee.	Increase in revenue.
405......	Addtl. Rep.	$10.00	$10.00	None.
480....	Up to 9	10.00	15.00	$2,400
950......	10 to 29	15.00	25.00	9,500
683......	30 to 59	20.00	35.00	10,245
348....	60 to 99	35.00	50.00	5,220
240....	100 to 149	50.00	75.00	6,000
179..	150 to 299	75.00	120.00	8,055
77..	300 to 499	100.00	150.00	3,850
45	500 to 999	150.00	200.00	2,250
11....	1,000 to 1,999	200.00	300.00	1,100
21......	Over 2,000	200.00	400.00	4,200
				$52,820

Yearly revenue from membership fees under proposed increased schedule $137,414
Yearly revenue from membership fees at present 84,594

Proposed increase .... $ 52,820

"In dealing with the proposed increases, we may consider the fees charged by associations of manufacturers similar to our own. The British Federation of Industries, which includes practically all the important manufacturing industries in the United Kingdom, exacts a single uniform fee from its [illegible] of $[illegible] per annum. The National Association of Manufacturers of the United States, a body which corresponds largely to our own, charges a single uniform fee of $[illegible] per annum, and the same fee is charged by the Illinois Association of Manufacturers, which includes the city of Chicago. Moreover, the American associations make extra charges for special services. According to the present schedule, the average fee paid per member of the Canadian Manufacturers' Association is $23 per annum. Under the proposed schedule, the average annual fee per member would be $[illegible]. Your committee believe that, while our average fee is low in comparison with these other associations, we could not afford to follow their example and adopt a single uniform fee, owing to the almost inevitable loss of membership which such a decision on your part would create. Twenty-six per cent. of our members employ fewer than 10 people, and pay only $10 per annum in fees; 28 per cent. employ fewer than 30 people, paying only $15 per annum; and 20 per cent. employ fewer than 60 people, paying $20 per annum. Consequently, as 74 per cent. of our total membership pay not more than $20 in annual fees, and as many of them would probably resign if asked to pay a uniform fee, which would vary from twice to four times their present fee, we have no option but to retain our principle of grading fees according to the number of employees engaged.

"The association is now beginning a period of intensive organization. During the past seventeen years a framework has been created from coast to coast, with branches covering all the provinces; now this framework needs a certain amount of enlargement and consolidation in order to achieve its maximum effectiveness.

"Your committee feel that the association is being constantly hampered by lack of revenue, and that the services rendered by the various departments and branches could be greatly increased by the judicious expenditure of additional funds. It is believed that there is a fairly general feeling throughout the membership, that our fees have never been commensurate with the importance of the association or with the value of the service rendered.

"Your committee decided to publish the 'Canadian Trade Index' this summer, in an edition of at least 8,500 copies, for distribution among the purchasing departments in Canada and abroad. Arrangements have been made with the Dominion government to take at least 1,000 copies for foreign distribution. Copies sent abroad will contain sections printed in French, Spanish and possibly Italian. The suggestion has been made to your committee that the value of the 'Canadian Trade Index' is so highly appreciated that it would be advisable on the part of the association to arrange that it should be published annually. While the financial difficulties at present are such that your committee do not care to recommend annual publication, the suggestion is worthy of future consideration.

Proposed Formation of Divisions

"A proposal will be submitted to you at the last business session to sanction the grouping of the association for administrative purposes into five divisions, namely: The Maritime Division, consisting of the maritime provinces; the Quebec Division, consisting of the province of Quebec; the Ontario Division, consisting of the province of Ontario; the Prairie Division, consisting of the provinces of Manitoba, Saskatchewan and Alberta; and the Pacific Division, consisting of the province of British Columbia. The formation of branches within the territory covered by such divisions should be encouraged. There is no doubt that the formation of branches in all the chief industrial cities will do much, not only to increase the membership of the association, but also to stimulate thought on industrial matters.

"Your committee accepted an invitation from the Canadian Council of Agriculture to hold a joint conference of farmers and manufacturers in Winnipeg during October or November, 1919. Tentative arrangements were made, but these were cancelled on receipt of a telegram from the Canadian Council of Agriculture suggesting abandonment of the proposed conference in Winnipeg, pending the visit of western agricultural representatives to eastern Canada.

"At its meeting on November 26th, 1918, your committee received with great regret the resignation of Mr. G. M. Murray, who has been in the employ of the association since 1904. Mr. Murray stated that, while sorry to leave the Association, he had an excellent opportunity to engage in private business, and wished to take advantage of it. The resignation was accepted, but Mr. Murray was induced to remain with the association until the close of the parliamentary session at Ottawa, where he was placed in charge of the new office of the association. Mr. J. E. Walsh was appointed successor to Mr. Murray, but your committee decided to change the title of the chief executive adviser to 'general manager.' The general manager will continue to exercise special supervision over the transportation department.

"Your committee has given much attention during the year to the problems connected with industrial relations. The principles of the labor war policy, formulated by the Minister of Labor, were favorably considered and approval was recommended in so far as these principles were applicable to industrial conditions. When the Labor Board of Appeal was created, two representatives of the manufacturers were appointed, and continued to act until the board was abolished by the government, when the special conditions arising out of the war were altered, and it was considered that the work of the board had been completed.

"In February last the various branches were asked to encourage the formation of joint standing committees of employers and employees in the manufacturing towns and cities throughout Canada. Action was taken in many localities, and there is no doubt that many difficulties were solved and many grievances settled by common discussion.

"When the Royal Commission on Industrial Relations was appointed, council decided that the association would make no official statement on a subject possessing so many ramifications, but the suggestion was made to local members in territory adjacent to the points where sittings were to be held, that they should appear before the commission and express their personal views. These suggestions were carried out, with the result that manufacturers have appeared at all the sittings and have given evidence that, in addition to recording valuable information, demonstrates the great amount of thought and energy devoted to this subject by employers throughout Canada.

"Your committee made special efforts to ensure that the Committee on Nominations and Resolutions, of which all your committee are ex-officio members, should give particular attention to the necessity for ensuring that nominations for officers and members of committees should not only provide territorial representation, but should also secure manufacturers who are in a position to give time and thought to the duties of their respective offices. To this end three notices were sent out to the members of the Nominations and Resolutions Committee, in addition to the general notice to all members.

The Tariff and Trade

"Mr. W. P. Hughes, secretary of the Montreal branch, represented the association at the fair held at Lyons, France. and also gave assistance to members who exhibited their products. The following were among the exhibitors: Great Britain, the United States, Australia, France, and the Canadian section, consisting of exhibits of the Canadian government, products of fifty-five Canadian manufacturing firms, the Canadian Pacific Railway, and the Canadian Government Railways. Of the Canadian industrial exhibits, 38 were from Ontario firms, 14 from Quebec, 2 from Nova Scotia, and 1 from New Brunswick.

"It is generally admitted that the Canadian exhibit did much to advertise Canada and Canadian products in Europe, while Canadians who attended the fair obtained information which will be valuable in conducting export trade.

"The lower tariff and free trade movement received special consideration. Your committee discussed the question at regular and special meetings, submitted proposals to council and took any action which was considered necessary to assist in maintaining fiscal stability in Canada.

"The advisability of supporting a proposal to send an exhibition train containing exhibits of Canadian products to

Europe was considered at several consecutive meetings. Objections raised were the import restrictions now imposed by European countries, and the varying gauges of railways. It was decided, however, that the plan had so much to recommend it as an advertisement for Canada, that it should be referred to the annual meeting, when the personal advice of Mr. Lloyd Harris, chairman of the Canadian Mission in London, would be available.

"A proposal to support the despatch to China and Japan of a trade commission, consisting of one representative from each of the boards of trade of Montreal, Toronto, Hamilton, Winnipeg and Vancouver, and one representative from the association, was referred to the boards of trade mentioned for their consideration, but action is deferred pending receipt of the boards' decisions.

"The appointment of three new standing committees, namely: 'Industrial Relations,' 'Publishing,' and 'Commercial Intelligence,' is recommended, and the necessary notices of motion to amend the by-laws have been made accordingly.

Proposals Endorsed

"During the year, on the recommendation of your committee, the executive council endorsed, among others, the following proposals:—The removal of war-time restrictions from business; the establishment of a central bureau for scientific research; the provision of facilities to encourage technical education and industrial training; the attempt of the Dominion government to encourage the building of small houses; the work of the Canadian Engineering Standards Association; the establishment of government employment offices; the continuation of daylight saving legislation; the proposal of the Canadian Association of Stationary Engineers to secure a higher standard of technical efficiency for stationary engineers.

"At the November meeting of the council, it was moved that a special general meeting be called to consider the advisability of moving the head office of the association to Ottawa. An amendment, which directed that an office be opened in Ottawa immediately, and that the question of transferring the head office from Toronto to Ottawa be referred to the next annual general meeting, was carried."

President's Address

Mr. Bulman, the president, said in part:—

"If this country is to retain confidence in organized labor, the trades and labor unions will have to denounce any of their members who hold and preach seditious doctrines that are repugnant to the common sense of the Canadian people. Private property is not going to be eliminated. Revolutionaries cannot convince a million farmers in Canada that they should hand their farms over to anybody. They cannot persuade some hundreds of thousands of Canadians who own small shops that they should relinquish possession. They cannot convince other hundreds of thousands who have accounts in the banks that their savings should be put into a common purse. They cannot convince some millions in Canada, many of them wage-earners, who own or are paying for their houses, that these houses should be given to Soviets, as they were in Russia, for the purpose of billeting the chosen friends of the Soviets. They cannot convince the owners of factories, whether individuals or stockholders, that their rights under the law are an illusion. They cannot convince any loyal citizen who has acquired property by industry and thrift that he is not entitled to the free use and possession of it.

More Production Needed

"In the discussions about the high cost of living there is a tendency to forget the historical fact that great wars are succeeded by great scarcity, which often approaches famine. During four and a half years the energies of the civilized world have been devoted to destruction. Food and all kinds of material have been wasted in stupendous quantities. Production has been restricted through diversion of effort. The result is a world scarcity. Articles are dear now because they are scarce, and they will be dear until they become plentiful again. Other minor factors contribute, but this is the chief explanation of the high cost of living.

"Therefore our only salvation is not in doing less work, but in doing more work. The war has increased our debt. We have fewer hands to do the work that is necessary to provide for our wants and to pay our debts. Our forests can only be converted into lumber, then into money, and then into food and clothing, through the efforts of all connected with the lumber industry. The ore in the mines is useless until it is in a merchantable condition. The farm is fruitless until it is tilled and reaped. We have great stores of raw material, but they are valueless without work, and work must be defined in the broadest sense, the work of brains, the work of capital, and the work of hands.

"The grievances of the wage-earners who are not destructive revolutionaries may be concentrated into three demands:—

"(1) They want a shorter working day.

"(2) They want more pay for the shorter period of work than they now receive for the longer period.

"(3) They want to share in the control of industry.

"What is the average day's work for all the people of Canada, both men and women? The farmers, for example, work about twelve hours a day in summer, and at least ten hours a day in winter, six and part of the seventh day; the retail storekeepers average at least ten hours a day, and the housework done by women occupies their time probably ten or twelve hours each day. Few employers escape with less than ten or twelve hours.

"As for the control of industry, the expression 'self government of industry' is misleading. The direction of industry has little parallel with the government of a country. The government has complete control over its citizens; it has the power of life and death, the right to give or take away property. Industry has no such control over its employees. Nearly all the heads of Canadian industries were once workmen themselves. They have risen to their present positions by ability, perseverance and thrift. The most difficult thing to get to-day is managing ability. The directors of Canadian industries are not trying to keep men down, they are trying to fit them to assume the responsibilities of management. They are eager to find ability, to reward it, and to place it in responsible positions where it will share in the control of industry. The purchase of stock is open to employees in many industrial companies, and employees have the same opportunities as other men who have succeeded, to save and invest their money. I think the executive council and this annual meeting firmly believe that all industrial employees and all other wage-earners are entitled to and should have as short hours and as high wages as the rights of all other citizens and the competition of other nations permit them to enjoy.

"The past year has marked the revival of the agitation for lower tariffs and reciprocity and freer trade. The association, which has always supported the policy of adequate protection for Canadian industry and agriculture, maintained that position, and urged upon the government and the public the danger of departing from the national policy when the country is being readjusted from a war to a peace basis, when it is necessary to find employment for the army and for the war workers, and when nearly every other country in the world is either retaining or increasing the protection given to its own industries. It is interesting to note that the economic history of the Western United States is being repeated in Western Canada. Successive agrarian movements in these Western States agitated to secure free trade and wider markets, but when great industries located in the west and built up large cities these agitations subsided. It is inevitable that a similar change will take place in Western Canada.

"Canada has never had a high tariff. The fact that our imports have always greatly exceeded our exports, except in the abnormal conditions of war times, supports this statement. For years the United States, for example, has sold us from 50 to 100 per cent. more than we have sold to them. Moreover, their sales to us have been largely finished pro-

[illegible] while our sales to them have been largely raw material.

"We want to retain in Canada our own citizens, to provide them with employment at fair wages, to build up a diversified nation, to develop our raw materials and our natural resources through the efforts of Canadians, and to secure the rewards of industrial enterprise for Canadians. Canada is one of the few countries of the world possessing all natural resources in a largely undeveloped state, and, consequently, the eyes of the world are turning enviously to this country, and if we do not take proper precautions we shall lose the added value which would be created by completing manufacturing processes in this country. We do not wish our heritage to pass into alien hands.

"This association believes that we need a tariff revision in Canada. The tariff has not been revised since 1907, and there never has been a scientific and thorough revision of the tariff in this country. The conditions of industry should be thoroughly investigated and analysed by a competent body, say a tariff commission, acting in an advisory capacity to parliament, and this commission should consist of properly qualified men, rather than representatives from any particular class. If seven men were appointed, for example, we think that they should be men who have made a thorough study, or are capable of making a thorough study, of tariffs generally, and of Canadian tariffs particularly. We believe that the underlying principle which should govern the theory and practice of this commission, or similar body, should be to determine what tariff is best suited to this country.

"The Imperial policy of preferential tariffs, which has been announced by Great Britain, marks a new period in Canadian history. It signifies closer trade relations between the various parts of the British Empire. It means that a great effort is being made by the various British peoples, who gained common respect for one another during the tremendous struggles of the war, to co-operate in building up Imperial trade. Canada is the pathway from Great Britain to the East, and one link in the chain which encircles the earth binding together the various nations of the Empire.

"The executive committee believe that the following principles should be developed: First, greater centralization of the executive powers to deal with policies and the chief problems of administration; second, the decentralization of details and the relegation of local matters to the communities which they affect. It is hoped in this way to secure rapid and competent action on matters which have a national application, and also to see that matters which have a provincial or local application do not fail to receive proper attention.

"A great experiment is being tried now in the government ownership of railways. While this association in annual convention at Winnipeg in 1917 declared against the public ownership of railways, and even suggested that further aid should be given to certain railways under proper supervision, so that their identity might be continued, the fact must not be forgotten that the construction of these railways was duly authorized by the people at large and would not have been built without such endorsation. However, as the government has been compelled to take over the Canadian Northern Railway and to operate the Grand Trunk Pacific under a receivership, the experiment must proceed, and the government is to be congratulated on the effort which is being made through legislation to keep the operation of these railways free from politics.

"It may be necessary for the government to take over the Grand Trunk Railway, but the extension of the principle of government ownership to the Canadian Pacific Railway would prevent competition, and, by overloading the government, would endanger the success of the whole undertaking."

The report of the membership committee urged that individual members make an effort to bring in manufacturers who are still outside the association. It is estimated that there are fifteen hundred in Canada who are eligible.

According to the report of the tariff committee the three most important subjects dealt with by it during the year were the demand of the grain growers for an immediate and substantial lowering of the customs tariff, the adoption throughout the empire of tariff preferences on empire products, and the war trade embargoes of the Dominion of Canada and other countries.

The report of the legislation committee discussed among other matters the decision which was handed down in May by the Supreme Court of Canada supporting the province of Manitoba and Saskatchewan as regards their Companies Acts. Reference is also made to the bankruptcy bill, workmen's compensation, the Ontario insurance investigation and uniformity of commercial law.

The transportation committee's report discusses the present railway situation in Canada, the importance of adequate shipping facilities, freight classification and freight rates, and express and telephone charges.

The new officers elected were: President, T. P. Howard, president of the Phœnix Bridge and Iron Works, Montreal; J. S. McKinnon, of S. F. McKinnon and Co., Toronto, first vice-president; Mr. W. S. Fisher, of New Brunswick, second vice-president; and a representative executive committee.

Important changes were made in the constitution and by-laws of the association. There will in future be a number of vice-presidents and the association is also to be organized into divisions, branches and trade sections. The divisions consist of Ontario, Quebec, the prairie division (comprising Manitoba, Saskatchewan and Alberta), the maritime division and the Pacific division.

A number of important resolutions were also passed at the meeting.

The convention concluded by a dinner on the evening of June 12th, at which addresses were given by Alderman Ramsden, of Toronto, Mr. Lloyd Harris, chairman of the Canadian Commission in London, W. C. Good, president of the United Farmers of Ontario, George B. Nicholson, M.P., chairman of the Cost of Living Committee of the House of Commons, and by M. A. Brown, mayor of Medicine Hat and chairman of the Alberta Industrial Development Commission.

MONEY MARKETS

Messrs. Glazebrook and Cronyn, exchange and bond brokers, Toronto, report the following exchange rates to *The Monetary Times*:—

	Buyers.	Sellers.	Counter.
N.Y. funds	2 27-32 pm	2 29-32 pm	....

THE BUDGET SPEECH

THE Minister of Finance has unquestionably brought down another successful budget. The first comments were to the effect that it was generally satisfactory. Since then much citicism has been made, but this could be expected, regardless of what proposals were made. The manufacturers are undoubtedly pleased, and in view of the fact that the special war levy on imports only is to be done away with, and even here there are a few exceptions, characterizes the proposals as distinctly protective. Any other policy at the present time would be disastrous to our large industrial centres where manufacturing concerns are faced with the problem of reconciling falling prices and narrowing markets, with the extensive demands of labor. The general subject of the tariff is to be shelved for a few weeks at least, although some action may be expected along the lines of a thorough investigation into all phases of the subject.

The increases in the income tax were anticipated. This is one source of revenue which is not confined to any one class of citizen, and there is no single organization to offer aggressive opposition. The farmers look to this source to replace the revenue now received from customs duties.

The debate on the budget speech promises to be a long one, as about fifty members have signified their intention of taking part in the discussion. The range of subjects is a wide one, which in itself indicates that there is nothing radically wrong with the minister's proposals.

Probably the most notable event connected with the speech was the following motion by A. R. McMaster, member for Brome:—

"That all the words after the word 'that' be left out, and the following inserted therefor: 'The proposals of the Finance Minister are unsatisfactory. They offer no curb against extravagance. They utterly fail to take any adequate steps to relieve the present high cost of living. They give no definite promise of tariff revision downwards.

"'That to relieve the present situation the tariff should be so framed as to free the food of the people and the machinery used in the development of the natural resources of Canada, together with the raw materials entering into the manufacture thereof.

"'To take off, or substantially reduce, as speedily as may be expedient and just to all interested, the duties upon all other necessaries of life.

"'Also the reciprocal offer of trade with the United States should be accepted and a general downward revision of the tariff undertaken forthwith in conformity with the principle herein enunciated.'"

Mr. McMaster began his criticism of the budget by congratulating the Minister of Finance "on the clarity of his statement if not on its completeness." Sir Thomas had the courage to tell the people not to count too much on the indemnities we might get from our foes. He himself did not expect that governmental claims would receive many cents on the dollar. Mr. McMaster's first charge against the finance minister was negligence and tardiness in bringing down his budget. This was not a question of the mere convenience of members of parliament, the delay caused financial stagnation in the country. Men in business and manufacturing life did not know where they were and had to conduct their business from hand to mouth.

Mr. McMaster also protested strongly against the payment by the government of $10,000,000 for the C.N.R. stock, which a government commission had declared to be pure water. This transaction he described as a profligate bargain, accentuated by the fact that Canada was at war and that her debts were consequently growing rapidly. Mr. McMaster contended that Canada would have to shoulder $400,000,000 of debt as a result of taking over the road. The Minister of Finance, said Mr. McMaster, had announced amid loud applause that approximately three-quarters of Canada's debt was held at home. He granted that there was a certain advantage about owing money in Canada rather than abroad, but this advantage was largely nullified by the fact that government bonds held in Canada were not subject to income tax. The people of Canada would have to pay the interest on these bonds, and those persons who held them would not pay their share.

DOMINION INDUSTRIAL COMMISSION

THE Royal Commission on Industrial Relations, which was appointed some weeks ago by the Dominion government, has now completed its sittings in important cities throughout Canada, and the report is expected shortly. The work was limited to the relation of employer and employee, and what is looked for is some constructive solution of the difficulties which continually arise regarding wages and the hours and conditions of work. The commission was under the chairmanship of Justice Mathers, of Manitoba, and included representatives of labor and of capital.

The members of the commission had an unparalleled opportunity to secure suggestions as to the methods of avoiding the difficulties, and representatives of some of the largest firms in Canada and of some of the leading labor organizations gave evidence before it. The members, however, could not fail to be impressed with the fact that the evidence was of a very conflicting nature, and the same thing is apparent to anyone who has followed the reports. It was conflicting, both as to the cause of the peculiar difficulties of the present time and as to possible solutions. Two or three points stand forth, however, as being generally accepted throughout the Dominion. In the first place, labor unions have taken an aggressive stand for substantial shorter hours of work and indefinitely increasing remuneration and other reforms in the way of insurance against unemployment and old-age pensions. The view is unfortunately prevalent in some quarters that there is no limit to measures of this kind, apart from the opposition of employers. Such is not the case in fact, as there is only the amount produced available for distribution, and any tendency to forcibly reduce the return on capital will prevent further investments, and will drive away such capital already invested as can be easily transferred.

A second conclusion which may be drawn from the evidence is that it is ignorance of actual conditions which has caused a large part of the difficulty. The undue publicity given to certain cases of large profits, for instance, has not been offset by a proper setting forth of the large number of industries which have not been successful, and also of the number which have secured no more than reasonable returns. The report of the Cost of Living Department on the milling industry is an instance of this kind. Here it was found that a price sufficiently high to maintain an adequate volume of production enabled certain manufacturers operating under unusually favorable conditions to obtain large profits. The only way to make such enterprises contribute a portion of their gains for the public welfare is by taxation, and even here some reward must be left for success.

The necessity for provision for depreciation is also not sufficiently realized. In most industries at the present time there is always the possibility that some equipment may have to be scrapped at any time, and proper reserves for this purpose are essential. In addition to provision for the ordinary wearing out of equipment, the unusually high prices prevailing have also made it necessary that reserves be set aside to counterbalance probable losses on materials in hand.

While many radical views were expressed, there was no general support of revolutionary activity. Property-owners still constitute too large a portion of the Canadian population to permit of the success of activities of this kind. The results of the general strike in Winnipeg, which is now practically disorganized, illustrate this, and the other sympathetic strikes declared in western cities have failed.

COMPULSORY HEALTH INSURANCE OPPOSED

THE agitation for a system of state and provincial health insurance which has emanated largely from organizations interested in public health, is meeting with strong opposition from several quarters. At a recent meeting in New York of the Social Insurance Department of the National Civic Federation, the president, Mr. Warren S. Stone, stated that labor organizations were opposed to it. Mr. Stone is Grand Chief of the International Brotherhood of Locomotive Engineers. The reasons attributed are the system of espionage that accompanies it, compulsory medical examinations, and lack of freedom in choosing physicians. He expressed the belief that such a system would destroy the initiative of the industrial worker, which is so necessary to successful development.

Among the alternative suggestions for consideration made at the above meeting were: the prevention of unnecessary illness through education of the public concerning health matters, through the assistance of ministers, employers, government agencies, public health nurses and moving pictures; securing an actual record of absenteeism due to sickness as a basis of correct estimates upon cost of health insurance; providing for payment of wages or financial benefits during illness, better medical care, greater efficiency in state health departments; improving and developing all voluntary methods of insurance including trade union funds, fraternals, employers' establishment funds and those of industrial insurance companies; creation of health schools throughout the union, whereby health officers and others might receive instruction upon public health matters.

Attention was called to the failure of the system of compulsory insurance in England and Germany and the Federation was urged to send a second commission to England, representative of all American elements concerned, to bring back facts for the information of legislators and employers now confused by misleading propaganda disseminated by the group of social reformers which has undertaken to promote compulsory health legislation.

Exception was taken to the statement widely circulated that sickness is one cause of poverty. It was urged that the problem is economic and that the workman should be put upon his own feet and permitted to purchase his medical attendance in his own American way. In support of this contention, while agreeing with the idea that the period of illness is the one when the worker needs the most and receives the least financially, the result of a first hand investigation in England was cited to show the utter fallacy of collective or group medical service, and that in England it is a sham and disgrace, thus proving the necessity of keeping in this country individual relations between the doctor and the patient.

It was pointed out that the campaign for health insurance in New York State, Ohio and elsewhere is built upon gross misstatements of fact and delusions; also that to put compulsory sickness insurance and practically pauper medical service upon the American workingman will cause universal dissatisfaction and injure the public health. The representatives of labor emphatically claimed that the only way is to have sickness insurance voluntary in every respect and that no workman should be forced into such an association.

It is possible that the Lacombe and Blindman Valley Railway of Alberta will be sold to the Canadian Pacific.

CANADIAN NATIONAL RAILWAY CONSTRUCTION

The construction of new lines to a length of about 340 miles has been announced by the Canadian National Railways. The new lines are mostly in Saskatchewan and consist principally of the following:—

The Amaranth extension, 35 miles, on the west side of Lake Manitoba; Melfort, northeasterly line, 30 miles, in Saskatchewan; Humboldt-Melfort line, Saskatchewan, 32 miles; Eslin, southeasterly, 35 miles, in the Lake country, Sask.; Oliver-St. Paul de Metis, 22 miles, Alberta; Peebles, southerly towards Lampman, Sask., 20 miles; Hanna-Medicine Hat, Alta., 72 miles; Acadia Valley line, 25 miles, from a point a little southeast of Alsask, Sask., running westerly into Alberta; Swift Current extension, 27 miles; Duck Lake extension, Sask., southwest from Dumblane, 22 miles; Turtleford extension, 2 miles. This is the extension of the line North Battleford to Turtleford.

PERSONAL NOTES

Mr. Stanley J. R. Remnant, a barrister of Vancouver, has been appointed by the British Columbia government to the position of secretary to the public utilities board in the province.

Mr. A. H. Whitlow has been appointed manager of a new branch of the Huron and Erie Mortgage Corporation in London, Ont. Until recently Mr. Whitlow was manager of a [illegible] branch in London.

Mr. A. L. Dawe, of the Canadian Pulp and Paper Association, has been selected as the industry's representative to go to London, England, to co-operate with the Canadian Trade Commission.

Mr. J. Sandeman Allen, marine manager of the Phoenix Assurance Company of England, and allied companies, who has been visiting the United States, was at the head office for Canada, Montreal, last week.

Mr. George W. Allan, K.C., M.P., Winnipeg, has been elected to the directorate of the Canada Permanent Mortgage Corporation and of the Canada Permanent Trust Company, taking the place of the late W. D. Matthews.

Mr. A. E. Dyment, of Toronto, has been elected vice-president and chairman of the board of directors of the Canadian General Electric Company, Limited, to fill the vacancy caused by the death of Mr. W. D. Matthews.

Mr. George H. Ross, for the past four years manager of the main Toronto branch of the Bank of Ottawa, has been admitted to partnership in the firm of J. G. Beaty and Company, Toronto, member of the New York Stock Exchange and the Chicago Board of Trade.

Mr. A. W. McLennan, who has been manager of the Canada Bond Corporation for some time, has resigned from that company to enter the firm of R. A. Daly and Company, bond dealers, Toronto. Mr. McLennan has been engaged in the bond business in Canada for the last ten years, and during that time has travelled extensively in Canada and the United States in the interest of the firms with which he has been associated. The principals of the firm of R. A. Daly and Company are now R. A. Daly, A. W. McLennan, and A. H. C. Beairsto.

Lt.-Col. C. A. Denison,

Who has retired from the Standard Bank of Canada

Mr. Hugh A. Allan has been elected to the directorate of the Royal Trust Company, to fill the vacancy caused by the death of Sir H. Montagu Allan.

Mr. James Carruthers, Montreal, and **M. J. Haney**, Toronto, president of the Home Bank of Canada, have been elected directors of the Canadian Locomotive Company, to fill the vacancies caused by the deaths of the late president, J. J. Harty, and Hon. H. W. Richardson.

TRUST COMPANY RELINQUISHES TRUST POWERS

The request of the British-American Trust Co. for the relinquishment of its trust powers has been granted by Mr. Justice Murphy. The company has had very little trust business, and has been generally unwilling to increase this phase of its activities, restricting itself to realty agency and brokerage business. The company has applied for change of name to British-American Bond Corporation, but could not be granted this change nor its withdrawal from under the British Columbia Trust Companies Act until its trust powers had been abrogated.

INCOME TAX RETURNS

According to a statement given in the House of Commons on June 11th, there are 31,310 persons who paid an income tax up to April 30th, 1919, the total raised being $6,445,349. By classes the returns were as follows:—

Income.	Number.	Amount.
Under $6,000	23,907	$1,028,747
$6,000-$10,000	4,497	860,912
$10,000-$20,000	2,055	1,158,107
$20,000-$30,000	461	700,216
$30,000-$50,000	241	821,659
$50,000-$100,000	125	881,153
Over $100,000	24	994,552
	31,310	$6,445,349

WEEKLY BANK CLEARINGS

The following are the bank clearings for the week ended June 5th, compared with the corresponding week last year:—

	Week ended June 5, '19.	Week ended June 7, '18.		Changes.
Montreal	$118,334,704	$ 86,498,796	+	$31,835,908

LAND TRANSFER REFORM

Part of an Address Before the Convention of the Dominion Mortgage and Investments Association

By G. H. Muirhead,
Deputy Master of Titles, Toronto

THE chief difficulty in considering a question of so wide a range is not so much in finding something to say as in deciding what must be left unsaid, and so touch only matters of practical and present day interest, always remembering that "brevity is the soul of wit," and never more so than in a convention such as this.

I hardly think I would have undertaken the task at all had not Mr. J. C. Scott, Master of Titles, produced from his files, a copy of the proceedings of a public meeting held in Toronto on February 12th, 1890, under the auspices of the Canadian Land Law Amendment Association at which addresses were delivered by Mr. Geo. S. Holmested, the late Mr. J. Herbert Mason and others, upon the very subject which is before us to-day, and if I quote more or less largely from that pamphlet, my only excuse, and a very valid one, is, that these gentlemen have put into better language and in a much clearer way than I, without their aid, could have done, the ideas which come first to mind when we approach the consideration of Land Transfer Reform.

It is interesting, but scarcely necessary to call to mind the absurdities and anomalies of the Law of Real property as it existed in England in early times, and how the incidents of the Feudal System became so deeply rooted that only after long years, centuries in fact, of persistent struggle, was anything like certainty evolved and common sense, even to a limited extent, began to prevail over the mass of empty forms and fictions and technicalities which had so long held sway, so that a man could at length feel himself to be actually the owner of a parcel of land and able to dispose thereof, as he might choose, at first only by deed in his lifetime, and subsequently by Last Will and Testament.

And we all have seen those voluminous and awe-inspiring "Indentures" which were in common use up to the middle of the 19th century, the production of a system of artificial conveyancing which thrived at the expense of a long suffering people and in which the chief avenue to fame was the coining from the Latin, French and various other sources, of new and hairsplitting words and phrases that became the delight of special pleaders and the dismay of many a bench of judges.

But we are living in happier days (at least we like to think we are) when the rule of reason and common sense is given wider play and scope, and the tendency of courts and legislatures is to brush aside technicality and insist that the common, everyday business of the transfer of land shall be effected in a manner not too difficult to be understood, even by non-professional people, and the title to land guarded and made secure by a system in which doubt and uncertainty are reduced to a minimum.

If one had time to do so, it would not be out of the way to note a few of the more radical changes which have been introduced within the last fifty years, many of them during the long term of Sir Oliver Mowat's attorney generalship; one might recall the wonderful advantages of the Short Forms Acts, whereby a few plain and simple clauses were made to do the work of intricate and long drawn out paragraphs; the concise definitions and interpretations of various legal words and phrases laid down in the Conveyancing Act; the Devolution of Estates Act, whereby land was invested with many of the attributes of personal property and so became more readily disposable in the hands of executors and administrators of deceased owners; and the latest and most exhaustive consolidation of the Ontario statutes, particularly those relating to dower and inheritance and the property of married women, has been a great help in the right direction.

It may be mentioned, too, that a very helpful piece of legislation is that whereby in a simple and informal way the opinion of a High Court Judge may be obtained on the construction of a will and he is empowered to make an order binding on the parties. The material shortening of the period, on the expiration of which a good title may be acquired by virtue of the statute of limitations, has likewise been of great value in making titles more secure from attack, and there have been likewise many beneficial amendments to the Registry Act.

But this paper will be expected to deal more particularly with the workings of the Land Titles Act and the advantages claimed for it over the old established registry office system, for whatever the form and method of the conveyance of land, the main thing is to be certain that it has accomplished what was intended of it, and has actually conferred a good and valid and incontestible title upon a purchaser. As you all know, under the registry office system, you have to depend upon the certificate of the solicitor employed to examine the title, who may be a man of greater or less skill and experience, and when you come to sell, you very likely will find your purchaser's solicitor is able to discover some kink in the chain that your own adviser has overlooked or thought unimportant, or a document may have been lost or misplaced. Only lawyers know how much anxiety and misgiving some extremely zealous and persistent investigator is able to provide for his professional brethren, and if a parcel of land changes hands six times in a year, then six times in a year will the same routine be followed back to the Crown, all at so much per hour (and likely to be increased in accordance with the high cost of living) probably by six different solicitors, and after all this the last purchaser has even yet no safe and sufficient guarantee that everything is in shipshape.

Under the Land Titles Act, if a defect had not been observed at the outset by the Master of Titles, but became apparent afterwards, it could still be remedied, so long as the original applicant remained the registered owner of the land, but if the land had been transferred to an innocent purchaser a valid claim would arise against the assurance fund.

Remedies of Land Titles Act

Mr. Holmested goes on to say—"Now let us see what the Land Titles Act is intended to do—but first, I may tell you what it does not do. It does not pretend merely to record the fact that a deed or instrument has been made; and it does not permit instruments to be recorded as instruments affecting the title, which are in fact of no more legal effect than mere waste paper, as we have seen that our present system of registry does. What the Land Titles System aims at doing, and actually does, is to record the title, that is, the legal effect of all instruments affecting the land. In order to bring property under this system it is necessary that the title of the person claiming to be first registered as owner should be investigated by a public officer, and ample opportunity given by public notice to all surrounding and adjacent owners to assert any claim to the contrary; the title having been proved to his satisfaction, it is then registered—not the string of deeds under which the owner claims, but the fact that the person who has thus established his title is the owner of the property; and if his title is subject to any qualifications, mortgages or otherwise, these are also specially stated in the register. This is known as an "absolute" title.

But there are cases where a difficulty may arise in making out a perfectly good title, and even these may be registered under the Land Titles system. In such cases when a good prima facie title is shown, the person appearing to be the owner may be registered in this modified way, viz., so that the title up to its first registration in the Land Titles office would not be guaranteed and any person dealing with a title so registered would have to satisfy himself as to the goodness of the title of the person first registered, but all subsequent transactions would be under the Land Titles System, and would be guaranteed. By this means the chain of title which it would be necessary to investigate would stop at the first registration, and in process of time such title would be capable of being fully registered without much expense. This is known as a "qualified" title.

If you want, therefore, to ascertain the state of a title registered under the Land Titles System, you go to the

AN ALLIANCE FOR LIFE

Many of the large Corporations and Business Houses who bank exclusively with this institution, have done so since their beginning.

Their banking connection is for life—yet the only bonds that bind them to this bank are the ties of service, progressiveness, promptness and sound advice.

320 Branches in Canada, extending from the Atlantic to the Pacific

New York Agency: 63 and 65 Wall Street

Bankers in Great Britain: The London Joint City & Midland Bank, Limited; The Royal Bank of Scotland

office, and instead of having to search through a long list of deeds, as under our present registry system, you are shown a book, on one or more pages of which is set out distinctly who is the present owner and what charges, if any, affect his title; and you have all the information in a narrow compass which it is necessary for you to know in order safely to deal with the person claiming to be the owner, without the necessity of going into any antiquarian researches, as to who owned the property thirty or forty years ago and how it has devolved from hand to hand ever since. Moreover, in dealing with property registered under the Land Titles System you run no risks as to the title, the risk and responsibility of determining the legal effect of instruments affecting the title is taken off your shoulders by the public officer, because no devolution of the title can be recorded until he is first satisfied of the legal validity and sufficiency of the instrument by which it is effected, and even should he by chance make a mistake, persons who would otherwise suffer are guaranteed compensation for any loss occasioned by the mistake. The results of the Land Titles System, therefore, are certainty of title, expedition in showing title, and the avoidance of the great expense attending the investigation of titles under the old system and a guarantee against loss arising through mistakes."

Advantages of New System

Mr. Mason at that meeting summed up the objections usually met with regarding the general substitution of the new system for the old under five headings, which seem still to cover the ground, so I will take the liberty of referring to them briefly in order. First: that the new system will reduce the income and emoluments of the present registrars. This it was felt should not have much weight for, as a matter of fact, in most cases, the registrars would be made Local Masters of Titles in their particular districts and, anyway, a matter of general public concern should not be retarded by reason of some immediate disadvantage to individual interests. Out of fourteen Local Masters of Titles at present all but four are also registrars of deeds.

The second objection mentioned was that it takes from the legal profession a portion of their business. After all these years of experience in the city of Toronto, it can hardly be said that the validity of this objection has been made apparent. Professional services are necessary in bringing existing titles under the Act, and as a matter of actual practice, only a very small portion of the work of the office is done by others than members of the legal profession, the great majority of whom apparently are very much alive to, and in full sympathy with, the overwhelming advantages of the Land Titles System.

The third objection was, that it tends to centralize the business of conveyancing, but this can be dismissed without comment for it is well-known that in practice no difference exists between business which must be carried on in the registry office and that which belongs to a land titles office. Almost all the work of the land titles office is done by personal attendance at the office, by solicitors or their clerks, and only a very small proportion is carried on by mail.

The fourth objection was, that it involves considerable expense to present holders of property. It is true, that at the outset, it may seem quite an expensive matter to bring a parcel of land under the Land Titles Act, such expenses having to cover an exhaustive investigation of the title, the cost of public advertising, and the contribution to the assurance fund provided by the Act. There has been some controversy as to this latter item, the percentage which should be paid into the assurance fund, but, apparently, no one has been greatly dissatisfied, at least to the extent of agitating for a reduction of the rate.

Perhaps the fifth objection is the one entitled to the most weight in trying to discover why municipalities and the province at large have not availed themselves of the beneficial provisions of the Land Titles Act. It is a fact that it certainly does require an expenditure of a considerable amount of public money in providing fire-proof offices, the payment of salaries to new officials, the providing of the necessary outfit of books and other requirements, but it was then submitted by Mr. Mason, and it is still submitted by those who are advocates of the land titles system, that the initial expense is very soon overcome by the saving which is effected in so many ways under the new system, and by a consideration of the pre-eminent advantages which are to be gained therefrom.

The advantages of the Land Titles System are probably most apparent in those cases, and they have become very many in Toronto in recent years, where large tracts of land are subdivided into small lots for building purposes. We have now on file in the land titles office alone, more than 400 plans, and on many of them several hundred lots appear.

One speaker at the 1890 meeting expressed the hope that a new era in the history of the transfer of land in this province was then beginning. What progress is being made in the extension of the Land Titles System throughout the province? In new Ontario, it is bound to keep pace with the opening up of the country, for all newly patented lands since 1887 go automatically under that system, the old registry offices having to do only with land patented before that time.

To show what facilities have been provided in the northern part of the province, it may be mentioned that land titles offices are now established in Bracebridge, Fort Frances, Fort William, Gore Bay, Haileybury, Kenora, North Bay, Parry Sound, Port Arthur, Sault Ste. Marie and Sudbury. In the other parts of Ontario, outside of Toronto, it must be admitted that no great headway has been made, the only offices opened being those at Ottawa, St. Thomas and Whitby, and the business done in the last two places is small.

No steps have been taken to introduce the act into other counties and very little is as yet known of the system outside Toronto and new Ontario. A lawyer from another city in conversation recently, seemed to be under the impression that special legislation was required to bring it into force in a city or county, whereas the machinery for doing so is plain and simple.

In closing, a few statistics may be given, for figures are always interesting to members of a Mortgage and Investments Association. According to Mr. Scott's statement submitted at the 1890 meeting, the total registrations in 1889 were 4,679. Following that year there was a long period when the real estate market was depressed and it was not until 1906 and 1907, that the office again reached the level of 1889. The highest number recorded in one year was in 1913, when the total was 11,728. In 1915-16-17, they had fallen off, by reason of the war, to about one-half that number in each of these years. To compare the volume of business in the Toronto registry office with that of the land titles office, I have taken the year 1916, as I had not at hand the inspector's report of a later date. In that year 1916, the two registry offices of east and west Toronto, reached a total of 29,094 instruments, while the land titles total for the same period was 5,017. I may say, however, that the volume of business is now steadily on the upward trend again, one special feature we have noticed being the unusually large number of mortgages being paid off and discharged within the last few months.

Regarding the assurance fund, the figures make a most creditable showing. The total receipts have reached the large sum of $184,015.08 while the disbursements for indemnities to claimants and costs of defending unsuccessful raids upon the treasury come only to $3,397.64. It is hoped that before many years, the assurance fund will have reached such a satisfactory total that the annual interest on the same will probably be a sufficient guarantee fund against possible losses and thus enable the government of the province, with safety, to reduce materially the rate levied for the assurance fund.

It is expected that the Imperial Bank will erect a large building at the northwest corner of King and Yonge Streets, Toronto.

Should the Roads be Taken Over?

Part of an Address Before the Associated Boards of Trade of British Columbia—Grounds for Public Ownership not Established

By E. W. BEATTY, President, C.P.R.

"I FEEL that I need no apology for speaking very briefly on a matter which is engrossing the attention of most serious thinking Canadians, and that is what is to be the ultimate disposition of our rails, and under what auspices or method of administration are they to be managed. The possession by the Canadian Pacific of a system involving 13,770 miles in Canada, of which 8,750 miles are west of the great lakes, gives in itself a reason why its officers should have some knowledge and some views on the subject, and if they are of any value those that have an equal voice in the final determination of the question are certainly entitled to the benefit of them.

"I have an additional reason for mentioning this subject in that a great deal of misapprehension seems to exist in some quarters as to just what the problem is. We have private ownership of some railways and we have public ownership of others, both existing in the country now. The fact that the country has been compelled through the financial failure of some systems to take them over in order to prevent them from falling into utter desuetude is one thing, but that is quite a different problem from the question of a permanent policy of government owned and government managed railways. I do not know that the government could have done anything else than they did do, but I do feel that neither the government nor the people of this country are yet in a position to determine finally what the future of all these systems shall be.

"I think it is unfortunate that fuller discussion of this subject has not obtained in Canada up to now. It is true it occupies certain space in the newspapers, and has been discussed in parliament, but always with the unsatisfactory result that the advocates of the different methods of administration are considered prejudiced. If a public man speaks we shrug our shoulders and say it is politics; if a railway man speaks, he is said to be prejudiced by his railway association. Not all the men who go to Ottawa are governed absolutely and exclusively by political considerations, and the railway man can still be a railway man and be a good citizen of Canada with an honest desire to see the transportation future of his country assured.

"Government ownership in theory has much to recommend it. It has been said by a very able member of the government that the advisability of it increases as you approach a state of monopoly, and that is probably true, whether government management of our systems is feasible or even possible. Until it is determined I should conclude it would be well for the government and the people to withhold their final judgment. Among the advocates of this system are many men who are sincerely and honestly convinced that in the last analysis it will be for the benefit of the people of this country, and that is the only angle from which the question can be viewed.

Experience of United States

"It is unfortunate, however, that most of these men have not intimate personal knowledge of the administration of these large enterprises and the wish for success is father to the thought that success will result. We have recently had the benefit of the results of similar experiments in Great Britain and the United States, and while I am quite prepared to admit that the abnormal conditions under which the systems had to be operated during the war makes the lessons to be drawn from this method of administration not entirely conclusive, I am strongly of the view that there is nothing in these results which gives confidence or justifies the hope that we would avoid the disaster they have experienced, and that the difficulties which, at least, contributed to their failure would be absent from the administration of Canadian railways under like auspices.

"You will recall that the American system broke down when put to the test. They broke down physically and financially. Both could, I think, have been avoided, or, at least, minimized had a little broader view of the needs of the American railways been taken by American tribunals in the last five years prior to the entry of the United States into the war. What was subsequently done, was done in an attempt to meet a highly emergent situation, and with an intent that the cost whatever it might be, of mistake or failure, should be borne in the interest of the principles for which the allied nations were contending in this war. The result is described as a debacle, the deficits have been enormous and the efficiency and character of the service lessened to an alarming degree. The United States people were, however, fortunate that their experience was crowded into a comparatively short time, and they were enabled to learn the lesson it taught without protracted experiments.

"As a result of this experience and that which they had through the operation of cables, telegraphs and telephones, I think it may be safely said that the last vestige of desire for government operation of these utilities has departed from the majority of the American people. In fact those actually entrusted by the government with the administration of the properties have admitted the unwisdom of the continuance of the system. The Postmaster-General has agreed to return of the the cables and the telegraph lines, the President of the United States has directed the return of the railroads. The Director-General of the railroads, Mr. Walter D. Hines, who has been connected with the railroad administration from the beginning, first as Assistant Director-General, and latterly as Director-General, expresses his views as follows: 'I want to tell you that in my judgment, based on a very careful study of this subject since the federal control began, the best interests of the country will be promoted, not through permanent government control, but through the return of the railroads to private management. I believe the American public wants competition in service, and private initiative is, I think, of the utmost importance in order to get satisfactory public service.'

"Mr. E. N. Hurley, chairman of the United States Shipping Board, states that it is his belief that combinations between government and business are almost as dangerous as combinations between church and state. The results in the United States will be available to this country. They will be of use to us in determining what our policy will be, because the evils of government administration if present in one country, will be difficult to avoid in the other.

"It may be said that my own views are prejudiced and they are to the extent that they are the result of eighteen years' intimate association with the workings of one railway company, and an appreciation from the inside of what factors contributed to its efficiency and success. It is a long and arduous work to hammer together an efficient organization which must be so wide-spread in its activities, and so widely separated as to locality as the organization of a trans-continental railway. It has been in existence almost thirty-eight years, and the organization has been built up painfully and slowly. It has now reached an efficiency in all ranks which I should hope it would be easier to maintain, but it could not be developed, nor can it be maintained without the enterprise, resourcefulness, loyalty, initiative and esprit of the officers and men of the company. There is something which gives rise to this spirit which comes from within the organization itself, and I would need be assured not only that independent non-political administration is possible, but that it would provoke this spirit, before I would cast a vote for a permanent policy of government ownership and

[illegible]. When I speak of government ownership and [illegible] I do so because interference in the latter is the necessary consequence of the establishment of the former. It is not possible in my opinion to divorce the responsibility for operation from those upon whom rests the responsibility for the results. In theory it may seem reasonable, but in practice I am quite convinced it will be found impossible to prevent those who vote the money for these enterprises to [illegible] themselves entirely from the administration of the properties for which they are responsible.

No Success in Past

"In the determination of this question I know of no consideration less important than that of political expediency. It is particularly a question of national economics, and what system will give the best and cheapest service to the people of this country. The crux of the whole thing lies in this, i.e., the ability of the government to carry on enterprises such as this with the same competency and efficiency as private owners. I am not attempting to persuade you to my views; they are not unalterable, but I have not yet found anyone who could adduce evidence of the success of a government operated system in former days, or in other countries where similar conditions prevail, and before we adopt a similar policy which will saddle us with the principles of public ownership and operation of our systems, we should, I think, be very sure of our ground. The question cannot be determined in accordance with the wishes and views of financiers, stockholders, politicians, or any one set of men; it must be determined on the one ground by balancing its advantages with its disadvantages, which is in the best interests of Canada.

"In order to reach a decision, the most careful consideration and analysis of results here and in other countries is necessary. With knowledge and experience, we can determine it, without it we will add to our railway mistakes. That we have made serious blunders is evident, but we are all responsible. We built railways in wrong places, and at wrong times, but these mistakes, serious as their consequences have been, would be minor compared to the mistake if we adopted a wrong principle for their administration, and add the continuing and pyramiding of losses which would result from extending these wrong principles to a largely extended system.

"I am a great believer in this country, and I believe that our difficulties, economically and commercially speaking, will be solved. Some of these difficulties appear serious, and they are, and in expressing hope in confidence, I do not with the idea of minimizing the danger of the situation. I am convinced, however, that the difficulties are not insuperable, nor should they be entirely unexpected. It is the most natural thing, and quite in accordance with the precedent of history, that following such a terrible four years' world eruption, there should now arise, both nationally and individually, conditions, which it will take extraordinary measures to meet. Last summer, the railways of the country were threatened with very serious labor troubles; wage adjustments were made and rates were raised, but the individual difficulties due to unrest did not entirely disappear. The railways, in conjunction with the government and the labor unions, adopted a course quite without precedent in the history of Canada. Their heads sat round a table, discussed the best methods to adopt, and in the end constitute what is known as 'Railway Board of Adjustment No. 1,' composed of six representatives of the labor unions and six railway executives. The board was empowered to adjust and make binding upon the parties concerned all disputes arising between railway employees and the railway companies. In the event of failure to agree, there was provision for calling in an outside and independent referee, who would have the casting vote. Whether or not it was because the number this gentleman would bear was No. 13, I cannot say, but thirty-two main disputes, in some cases involving half a dozen other differences, each one of which might have precipitated a strike, have been determined by this board, and in no case has there been an absence of agreement, and in no case have either the executives or the men complained that substantial justice was not done. Now the reason for the extraordinary success of the tribunal, which was formed to exist during the period of the war only, but which I hope will continue long after peace has been declared, is this: it was composed of men determined to see that right was done; men who respected their colleagues on the board and themselves; men who were actuated by the spirit of adjustment. In no case has the board ever forgotten its judicial attitude, nor has there been any evidence of feeling on either side in the course of its deliberations.

"It is not for me to suggest what measures would be appropriate for industries, but I can assure you that the workings of the Canadian Board of Adjustment No. 1 can be looked to with great satisfaction, and I should think, with some advantage by all those who have to deal with the existing labor problems.

"You are all aware of the high scale of wages now existing in this country and of the prevailing unrest. As representing a company whose operating expenses increased by $31,000,000 in the short period of two years, I have some experience of the manner in which these rapidly increasing costs affect large enterprises. We are all disposed to attribute these things to the high cost of living, but few, if any, of us know what is responsible for it, or what the ingredients in it are. It has recently been announced by the Minister of Labor that the government have quietly made investigations, and will be able shortly to make an announcement of the results of them, and undoubtedly that is the first step to be taken, because if these costs are improper costs, we should know where the unfairness rests, if they are otherwise, we must take means to insure our ability to meet these higher standards of living. Here, again, it is the actual facts, which will enable the people to decide what should be done and whether our highly increased wages are due to reasons which could be avoided, or whether they are inevitable.

"It has been announced that conventions are to be held in the coming summer for the purpose of developing the natural resources of the western provinces, the establishment of industries there in order that they may be more self-contained, this is as it should be. We need immigrants, principally of the agricultural class, and we need to know and interest others in the local possibilities of Western Canada. Most of us believe that they are almost limitless, but we must interest capital in order that these resources may be developed and industries maintained in the development of the whole country."

WORKMEN'S COMPENSATION IN ONTARIO

The report of the operation of the Workmen's Compensation Act in Ontario for 1918, has just been issued. During the year $3,514,648 was awarded for compensation, or $11,600 a day, and $369,346 for medical aid, or $1,219 a day, the number of cheques issued per day being 248 for compensation and 139 for medical aid. Payment was made for 40,930 accidents, 382 of these being death cases, 2,549 causing some degree of permanent disability, 25,446 causing only temporary disability, and 12,553 involving only medical aid. It is estimated that over 500,000 workmen are covered by the provisions of the act.

As the disability in serious accidents often continues into and sometimes beyond the following year, complete statistics can only be given for the prior year. These show that about 75 per cent. of the injured workmen were British subjects and 25 per cent. foreign, 6½ per cent. being Austrians, 6 per cent. Italians, 5½ per cent. Russians, and 2½ per cent. citizens of the United States. The average weekly wage of injured workmen was $19.06, and the average age 34.07 years. The total time loss from accidents during the year was 565,526 days; the average length of temporary disability was 21 days. Machinery caused about 32 per cent. of all the accidents; the handling or moving of objects, 28 per cent., and falls of the workmen, 10 per cent.

The Montreal Trust Co. will shortly move its Toronto office from the present location to more commodious quarters at 61 Yonge Street.

Royal Commission on Industrial Relations

THREE sessions of the Royal Commission on Industrial Relations were held in Montreal, on May 29, 30 and 31. The evidence received was fairly representative of all phases of the question. Among those heard was H. M. Lamb, secretary of the Canadian Mining Institute. "Our institute has gone on record," he said, "that in its belief the industrial problem is an educational problem. The two are interlocked. We must do something to educate the people with a view to having them realize their responsibility of citizenship. We feel that in order to make a success of the Whitley scheme, or any kindred scheme, in this country, the people should be educated to a higher sense of their responsibility.

"The whole difficulty here would be one of money. In order to get the money we would have to get something from the Dominion government. The government has already given large sums for technical education in this country, and to our minds technical education is of secondary importance to the education to which we refer."

The chairman pointed out that this matter of education to a higher sense of citizenship would be taken up in September at Winnipeg when a convention for that purpose would be held in the western city metropolis.

Mr. Lamb said that the greatest brake on the wheels of production in the industrial world to-day was the reluctance and antagonism of the workmen. This mental attitude arose from the suspicions that they were being exploited in the interest of capitalists, and from the accumulating ill-will due to an economic system that does not properly regard the rights of human personality, and that leaves the workers a constant prey to the grinding uncertainty which arises from being to a great extent a helpless and voiceless unit in a vast organization which they either do not understand or wholly misunderstand. This is why a practical grounding in the fundamental facts and principles of economics and ethics must become an essential part of any comprehensive scheme looking to a final solution of this greatest of present social problems. The ground work of such education must be laid in the schools, but the superstructure will be built by the intelligence, experience acquired, and the added responsibilities borne by the workers, arising from their new place and outlook in a democratically organized industry. This complete change no sane man would expect to bring about to-morrow or next year. But the change in the organization can be made more quickly and, if made, it will go far towards meeting present difficulties.

A. L. Smith, president of the Notre Dame de Grace Civic Improvement League, discussed the relative rewards of labor and of capital. There must, he said, be a scientific appraising of the capital invested in industrial corporations, removing all traces of watered stock. "Workers to-day understand thoroughly the meaning of watered stock, and quite rightly refuse to pay a dividend upon it, while their own families are short of the real necessities of life. Until the custom is entirely removed by legislation, co-operation between capital and labor is scientifically impossible. You may say 6 per cent. would be rather a small dividend. I say if 4 per cent. is sufficient interest on the small saving of the people, certainly 6 per cent. is sufficient for the owners of millions. The risk of great losses, that capital owing to strikes, lockouts, overstocking, etc., run at the present time, under this system would be entirely removed. Of course, this also applies to labor. With the stock jobbery and the various methods at present in vogue for the exploitation of labor removed, including unreasonably large salaries, labor would take a new heart, get in on the ground floor, so to speak, knowing that he was getting all of his product less 6 per cent. on investment and cost of management."

In conclusion Mr. Smith put forward four suggestions which he asked the commission to recommend to the government: (1) Remove all watered stock from industrial corporations; (2) pay dividends of 6 per cent. on the actual investment, management to be equally divided between labor and capital; (3) raise revenue by a very steep graded income and an inheritance tax; (4) all the balance on land values, removing absolutely all kinds of taxes and licenses on the products of labor.

Views of Montreal Labor

J. F. Foster, president of the local Trades and Labor Council, in a statement to the commission, said:—

"It is assumed that many of our difficulties—industrial and economic—arise from the want of confidence in the present government, the lack of modern labor laws and of legislative measures protecting the working classes and the people at large from the encroachments and exploitation of food profiteers, trusts and capitalists. This situation is still aggravated by frequent misunderstandings and differences between capital and labor. The entire situation has become serious owing to the fact that at this date no comprehensive constructive and practical plans for reconstruction have been put into effect. Out of this state of affairs, disorder and confusion has arisen, accounting for the national unrest and present business stagnation.

"The detailed causes are as follows:—

"1. The workers are not properly represented in the governing body. We find fault with the fact that the great majority of the legislators are lawyers who know little of practical manufacturing and less about the conditions under which the working class are required to live.

"2. The growing conviction that the present government is largely controlled by the agricultural vote of the west. As a consequence, no real effort, seeking the control of food prices has been made.

"3. The situation is accentuated by procrastination of the government in the program of repatriation and the civil re-establishment of the soldiers.

"4. The failure of the government to formulate comprehensive and practical plans on the reconstruction issue.

"5. The dissatisfaction of the people, arising out of the question of the non-taxable bonds, which, to a great measure, has shifted the indebtedness of the country and its future obligations upon the backs of the working people.

"6. The suppression of free speech, free press, right of assembly and other restrictions, through orders-in-council, are directly responsible for the strong feeling of resentment.

"7. The failure of the government to relieve unemployment through comprehensive and constructive plans of public works, and its inertia in developing the shipbuilding program.

"8. The establishment of elaborate credit systems throughout the Dominion among farmers, wholesalers and retailers has created excessive interest charges which multiply the burdens not only of the consumer, but of all concerned.

"9. The refusal of a large number of employers to recognize and deal with labor organizations, and their opposition to collective bargaining.

"10. Lack of a system by means of which a minimum wage may be established in accordance with the cost of living, and for the reduction of hours of labor to suit production. Opposition to collective bargaining has retarded progress in this direction.

"11. The continuous depreciation of the purchasing power of the dollar and the ever present bogey of unemployment can be designated as among the fundamental causes of unrest.

"12. Uncertainty of fiscal policy, which has depressed business and caused unemployment."

Employers' Evidence

Jospeph Quintal, president of the Montreal Chamber of Commerce, appeared along with a delegation representing Montreal manufacturers. Conditions of work and wages in Canada were already good, he said, and further reform would have the effect of stimulating immigration and thus defeat

[illegible] Shortening of hours would reduce export production at a time when more export was needed.

[illegible], representing about 300 Montreal manufacturers, who had joined for the purpose of expressing their views before the commission, presented the following recommendations:

1. That any scheme of industrial councils depending on locally organized employers and employees was inapplicable to many Canadian industries, owing to decentralization and diverse conditions, but that various schemes existed in Great Britain which might with advantage be partially applied to Canada.

2. Recognizing the need for better relations between employers and employees, they suggested that the Royal Commission recommend to the government the establishment by every employer of a system within his plant for bettering such relations by friendly and intimate discussion; that where such discussion proved inadequate to settle difficulties, district courts of appeal be formed for either side, whose decisions should be final, such courts to be composed of two representatives of each side and a Judge of the Superior Court; that a national industrial board be established, whose functions should be advisory to the district courts in matters of national importance.

3. That as this would provide adequate means for settling all industrial disputes and automatically end the necessity for strikes or lockouts which were detrimental to the whole community, legislation should be enacted making these illegal.

4. That in order to make a continuous survey of industrial conditions, the government from time to time send out questionnaires to employers to secure data for such survey, and the same with labor unions, each to be held responsible for the accuracy of their reports. To make this effective it was submitted that all labor organizations should be incorporated.

5. The committee was unalterably opposed to strikes amongst federal, provincial or civic employees, especially those engaged in protection of life, health and property, which would create intolerable conditions, while recommending arrangements for hearing and redressing any grievances.

Maritime Provinces

A session of the commission, which was held in Moncton, N.B., on June 2nd, was characterized by lack of interest on the part of both employees and employers. Four labor representatives and three manufacturers appeared before the commission. Conditions were described as being satisfactory. There was no opposition to organization of labor and no strike troubles.

In St. John, N.B., on June 3rd, the principal complaint was against the conditions of labor on government contracts at the Courtenay Bay docks. The local labor council was represented by its secretary. It was alleged that large numbers of aliens were employed at this and at other work in the city, and that wages as low as 25 cents per hour were paid. The following recommendations were made by the council: All foreigners should be dismissed from public works and returned soldiers and citizens employed; the eight-hour day should be made the law throughout Canada; a federal minimum wage law should be introduced for male and female labor; an old-age pension should be established; better housing should be provided for the people and slum life should be done away with; all subsidies to steamship lines should be abolished, and an embargo placed on the export of food products until such a time as living became normal in Canada; foreigners should be barred from entry into Canada except those taking up farms and signing an agreement to continue at this work.

At the meeting in Halifax, on June 4th, the witnesses included J. E. McClurg, manager of the Halifax Shipyards. He contended that the employee did not do as much in a day now as he did five years ago. His company is contemplating the expenditure of $500.000 in a housing scheme for its employees. F. B. Bligh, ex-mayor of Halifax, said that too much stress was being laid on the building up of an export trade.

In Sydney, N.S., on June 6th, the president of the Nova Scotia branch of the United Mine Workers of America said that ultimately the miners hoped to get a six-hour day in addition to a substantial increase in wages. He also complained of unfairness on the part of mine operators, who frequently maintained that profits did not warrant additional expense, and at the same time dividends were being paid. Evidence was also given by David Rees, organizer of the United Mine Workers of America and vice-president of the Trades and Labor Congress; Alfred J. Tonge, manager of the Dominion Coal Co., and W. F. Way, representing the Trades and Labor Council of Sydney Mines, N.S.

The final meeting was held in Quebec on Monday, June 9th. The members will remain there and prepare their report, which is expected by the government in the course of a few days.

BANKS IN THE BOND BUSINESS

The Home Bank of Canada has just completed the organization of a bond department under the management of Mr. W. R. Fleming, formerly secretary of the Bond Dealers' Association. It is the intention, Mr. Fleming says, to deal in government and municipal bonds and tenders have already been entered for a number of municipal issues.

Other banks which operate active bond departments are the Imperial Bank and the Sterling Bank. The banks have a good opportunity to sell bonds in those towns in which their managers are located and, on the other hand, the handling of business of this kind may bring accounts of municipalities.

RADICAL TAX PROPOSALS

A conference of secretaries of grain growers' associations in Manitoba was held in Winnipeg a few days ago. Public finance was the principal subject under discussion. G. F. Chipman gave an address on the taxation projects advanced in the farmers' platform. It was owing to the pressure of the farmers, he said, that the income tax had been put through, though it was weakly administered. The inheritance tax and the tax on unimproved land values was discussed by Mr. Chipman. The fallacy of the argument that the latter tax would discriminate against the farmers was shown, he said, in the relative value of land in the city of Winnipeg and in the country. The tariff tax was vastly heavier on the farmers than on city people, he said, because as well as buying their food and clothing they had to buy their implements of industry. The present inheritance tax was light, and he advocated the Dominion government levying an inheritance tax on top of the provincial tax. History proved, he said, that it was not good for the development of civilization for huge fortunes to be amassed by individuals.

J. R. Murray, in speaking on "The Reason Why of the Farmers' Platform," declared that farmers to-day were more affected by the conditions of Canadian political life than by various abuses which the association had remedied. Politics defined as the science of the government had been more a science of grab, he said, but there was no reason that this should continue. The high protective tariff represented the few benefiting at the expense of the many. The merging of big companies and forming of combines and the consequent killing of competition had, when aided by the protective tariff, greatly raised prices, he said. The products of the Dominion Canners Co., the Canada Cement Co., the Canada Consolidated Rubber Co., were sold in competition with American goods on which freight rates and a high tariff had to be paid.

The present strike illustrates the need of a new policy, Mr. Murray said. The unrest in Canada was widespread and was not confined to the people who labored with their hands. The unrest should be recognized. Instead of getting after the profiteer or the cold storage man, said the speaker, the people should get after the protective tariff. Prices should be fixed not on the basis of consumption, but on the power of the people to pay.

NEW ISSUE

We Offer the Unsold Balance of

$875,000.00

Clarke Brothers, Limited

(Incorporated under the Companies Act of the Dominion of Canada)

7% FIRST MORTGAGE BONDS

Dated 1st April, 1919 **Due 1st April, 1921 to 1930**

Interest Payable 1st April and 1st October at Royal Bank of Canada, Toronto, Ont. Montreal, P.Q., Bear River, N.S., or New York, U.S.A.

Principal Payable at Montreal Trust Co., Halifax, N.S., and Royal Bank of Canada, New York.

Denominations: $500

Bankers: The Royal Bank of Canada. Trustees: Montreal Trust Co.

CAPITALIZATION

	Authorized.	Outstanding
7% First Mortgage Bonds	$1,000,000	$ 875,000
Common Stock	1,500,000	1,500,000

This issue of 7% First Mortgage Bonds is secured by a Mortgage to Trustee for Bondholders covering all present and future real estate of the Company and as a floating charge on all assets, present and future, of the Company.

Purpose of Issue

To erect on the property of the firm of Clarke Brothers, Limited, of Bear River, Nova Scotia, a Sulphate Pulp Mill of thirty tons per day capacity, an additional Saw Mill of thirty thousand feet per day capacity, to enlarge the capacity of the Hardwood Mills already in operation, and install large Ship Repair Blocks and Dry Dock.

Established Business

Clarke Brothers have an established business of over forty years' standing, which includes the manufacture of spruce and pine lumber, sashes and doors, and wood finish and hardwood products of various kinds.

Property

The Company owns in fee simple 40,000 acres of timber and pulpwood lands and sufficient water power for all manufacturing purposes. The Company has also available at low cost not less than 10,000,000 cords of wood suitable for the purposes of its mill. The pulp mill will be the only one in Canada located on tide water open the year round.

Freedom From Taxation

The Municipality of the County of Annapolis, in which the new mills will be erected, has made provision whereby in case improvements exceed $200,000 in value, the assessment on the property shall not during thirty years exceed 5% on the value of the improvements.

Valuation

A conservative estimate of the value of the Company's properties and new plant is $2,400,000, nearly three times the present outstanding bonds.

Earnings

The average net earnings of the Company for the last five years are sufficient to pay the interest on these bonds, and the estimated earnings based on pre-war profits and on a very conservative basis, would be $272,000.

Title

The Organization of the Company and all legal proceedings relating to the issuance of the bonds and the title to the properties have been passed upon by Mr. Alexander Fasken of Messrs. Fasken, Robertson, Chadwick & Sedgewick of Toronto.

NEW YORK STATE INSURANCE FUND

William B. Ellison, of New York, comments as follows on the recent report on the New York State insurance fund:—

"The very recent report by Commissioner Jeremiah F. Connor, appointed to investigate the management and affairs of the State Industrial Commission in relation to the State Insurance Fund is certainly illuminating, and it goes far to prove that more or less flatulent socialistic reforms result inevitably in the financial detriment of the state.

"Mr. Connor concludes his report with the recommendation 'that the whole State Insurance Fund be investigated from start to finish by a competent actuarial accountant'; and I am of the opinion personally that had he gone further and recommended that the whole scheme be thereupon abrogated and legislated out of existence he would have served a still more useful purpose than he has served by simply recommending an investigation.

"It may be useless, and probably is, to renew the arguments against this plan of insurance, and the even then apparent probabilities that it would become the medium of a scandal and of serious loss to the state. Mr. Connor's report supports the material arguments against the creation of the fund in the first instance, and if an investigation be made by competent, disinterested and fearless investigators, the fallacy of the whole scheme will be made apparent. We had no more reason to expect successful insurance through governmental agencies than we had through governmental control of the railroads, telegraph and telephone companies, and the last mentioned have demonstrated the futility of governmental operation.

"Almost every community in the United States and in Canada that allowed itself to be launched into a scheme of governmental ownership and operation is now looking backward and wondering how it was ever seduced into adopting schemes so apparently fallacious, and, as they have since found, atrociously expensive."

CLARKE BROTHERS, LIMITED, BOND ISSUE

An issue of $875,000 first mortgage 7 per cent. bonds of Clarke Brothers, Ltd., is being offered for sale by a syndicate composed of Graham, Sanson and Co., John Starke and Co. and T. S. G. Pepler and Co., all of Toronto. The bonds are dated April 1st, 1919, and are due from 1921 to 1930. The price is 100 and interest, with a bonus of 20 per cent. in common stock.

Clarke Brothers have been established for a long time in the manufacture of lumber and lumber products in Nova Scotia. The present money is required for the erection of a new sulphite mill on the company's property at Bear River, Nova Scotia, and for other constructional purposes. The company's assets include 40,000 acres of timber lands. An assessment arrangement favorable to the company is in effect with the county of Annapolis, in which the property is located. Capitalization consists of $1,500,000 of common stock outstanding and the present bond issue.

INCREASED EMPLOYMENT IN SOME TRADES

For the week ending May 24th the Employment Service of the Department of Labor received returns from 2,253 employers of labor in Ontario and Quebec. During that week these firms had increased their labor force by 942 persons, or 30 per cent., making a total of 305,451 employees on May 24th. During the last week in May these same firms anticipated making a further net increase in their pay-rolls of 1,042 persons, or 34 per cent.

A preliminary report has been compiled for the week ending May 31st. The 2,040 firms whose returns were tabulated for this preliminary report had a total labor force on May 31st of 281,015 persons. This is an increase of 427, or 15 per cent., during the week. During the week ending June 7th these same employers expected to make a further net addition of 2,105 persons, or 75 per cent.

The increases during the first week of June were anticipated in twelve out of seventeen industrial groups, but chiefly in lumbering, food, drink and tobacco; pulp, paper and printing; railroad construction; railroad operation, and miscellaneous occupations. All of these groups, except lumbering, had shown substantial increases during the previous week.

RAILROAD EARNINGS

The following are the earnings of Canada's transcontinental railways for May, compared with last year:—

Canadian Pacific Railway

	1919.	1918.	Inc. or dec.
May 7	$2,856,000	$3,033,000	— $177,000
May 14	2,959,000	3,109,000	— 150,000
May 21	2,957,000	2,847,000	+ 110,000
May 31	4,505,000	4,035,000	+ 470,000
Total	$13,277,000	$13,024,000	+$253,000

Grand Trunk Railway

May 7	$1,130,352	$1,069,998	+ $ 60,354
May 14	1,181,138	1,118,634	+ 62,504
May 21	1,214,465	1,167,270	+ 47,195
May 31	1,746,105	1,507,723	+ 238,382
Total	$ 5,272,060	$ 4,863,625	+$408,435

Canadian National Railways

May 7	$1,543,413	$1,393,791	+ $149,622
May 14	1,727,076	1,463,167	+ 263,909
May 21	1,770,271	1,543,062	+ 227,209
May 31	2,477,484	2,180,725	+ 296,759
Total	$ 7,518,244	$ 6,580,745	+$937,499

Insist on a CANADIAN Bond Paper

For Your Stock Certificates

No man is justified in buying a foreign made article when a Canadian made product of equal quality is obtainable at the same or a lower price.

This applies especially to PAPER, for Canada is one of the greatest manufacturers of paper in the world.

No finer paper could be desired for Stock Certificates than is made right here in Canada. It has the weight, the surface, the crackle, the feel and the CHARACTER.

For Your Ledgers

For your ledgers, too, a great variety of eminently suitable papers is at your command, without sending money out of the country. You want preference as a CANADIAN producer. We all do. It is a vital factor in Reconstruction.

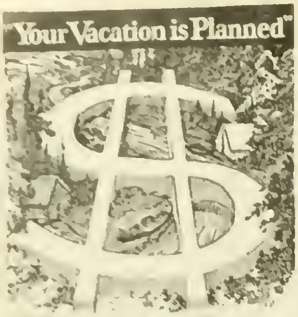
Give the word that all papers—Bond, Stationery, Booklet—used on your firm's work must be strictly Canadian.

CANADIAN PULP & PAPER ASSOCIATION

Look for this mark on the wrapper of every package of paper you buy.

Write for booklet "Some Facts About the Pulp and Paper Industry of Canada"

Canadian Pulp and Paper Association, 304 Shaughnessy Bldg., Montreal.



The dollars you've saved

WHATEVER the sum you wish to spend, there's a Planned Vacation just within that sum that represents perfect holidays. Yes, perfect holidays, care-free and untroubled. Before you leave you'll know just what it will cost—and what you're going to get. Yours is the pleasant task of choosing favorite recreations, and then finding what you seek.

"9 Ideal Vacations"

By its varied land and sea-scapes, with the haunting beauty of its mountains, woods and streams, Canada calls the vacationist! Nature in her flight around the world, dropped her rarest jewels in the Canadian Rockies, Matapedia Valley, La Bale de Chaleur, Gaspe, Cape Breton, and along the ocean shore of Nova Scotia.

A Vacation Planned to Meet Your Needs—Choose

Health and strength renew themselves in the invigorating atmosphere of Muskoka, St. John River Valley, Prince Edward Island. Fishing, Camping and Hunting woo the sportsman to the open at Jasper Park, Eastern Manitoba, Rainy Lakes, Minaki, Nipigon, Nagogami, New Ontario, the Laurentides, Quebec, New Brunswick, Nova Scotia. History is animate in the quaint environs of Montreal, Quebec and Halifax. If you have only a few days, spend them joyously, at Muskoka, or the Maritime Provinces. Or, wishing to combine business with pleasure, visit Canada, where you "hear" opportunity grow.

DOMINION CROP OUTLOOK

May Weather Retarded Growth in East—More Rain Needed in West

THE following telegrams on crop conditions have been received by the Dominion Bureau of Statistics:—

Charlottetown, P.E.I.—May temperature normal; fine weather prevailed last week. Seeding general on the 18th. Seventy-five per cent. grain and 25 per cent. potatoes planted at close of month. Hay prospects good.

Fredericton, N.B.—May cold and generally dry, facilitating seeding. Grain all seeded and potatoes mostly planted in Upper St. John Valley. More precipitation in eastern section of province, preventing seeding. Grass looks well, and fall rye at Experimental Farm is three feet high and heading. Fall wheat also looking well. Live stock all on pasture at end of month.

Ste. Anne de la Pocatiere, Que.—Spring backward in eastern Quebec. May rather cool and wet; first tillage on 8th. Seeding hardly possible before 15th; became general by 20th. Only 30 per cent. grain and potatoes in ground to date. Meadows wintered well; clover very promising. Fruit trees wintered well. Leaves opening.

Lennoxville, Que.—An average acreage has been sown to grain this season, with smaller percentage of wheat than last two years, but an increase in other grains and forage crops. Seeding practically completed with the exception of swedes and beans. Clover wintered very well and promises good crops.

Cap Rouge, Que.—Season late; seeding operations delayed. At beginning of June no corn or roots and not more than half of the grain is sown. Prospects good for hay, pasture and fruit.

Brandon, Man.—May started cool, with some showers, but last half very hot and dry. Wheat seeding completed normal time. Coarse grains in by end of month. Crop got good start; was injured somewhat by heat, but would recover quickly if rain came. Some damage by cut-worms and grasshoppers reported.

Morden, Man.—Grain crops and grasses looking well, but other crops poor. Latter part of May exceptionally dry and temperatures ranging from 95 to 100. Soil moisture very good.

Regina, Sask.—Seeding practically completed. High winds have done very little damage. Hardly any reseeding necessary. Crops in excellent condition and making rapid growth. Sufficient moisture at present, although rain would be beneficial, especially in north and north-western parts of province, where very little rain has fallen this year. All live stock reported in good condition; some cattle reported lost in bush fires in northern part of province.

Indian Head, Sask.—All crops growing and looking well. Hot weather and high winds damaged some districts. Rain needed. Some localities report damage from cut-worms and grasshoppers. Crops further advanced than usual.

Scott, Sask.—Weather unusually warm for May. Winds have damaged crops in some sections. Sufficient warmth and moisture for unusually prompt germination and good crop growth. Early grain crops covering ground.

Lethbridge, Alta.—Rainfall for May one inch less than normal. Crop generally in need of moisture, but rain of eight inches last few days of month improved conditions. Crop prospects in southern Alberta about 100 per cent., but copious June rains required on account of the scanty reserve of moisture in subsoil.

Lacombe, Alta.—Heavy snowfall early in May delayed spring work ten days. Warm, windy weather followed. Cutworms did small amount of damage. Rain and snow last of May supplied needed moisture. Wheat and 60 per cent. of oats up. Area unchanged. Crop prospects splendid.

Agassiz, B.C.—May, cool, damp, cloudy, resulting in very late spring; less than a third the sunshine for May of last year. Precipitation, 4.71 inches; slightly more than average. Hay and pastures excellent and early. Other crops, especially cereals, corn and roots, late.

SMALL LOSSES FROM RODDED BUILDINGS

Loss of Buildings so Protected is Practically Negligible—Few Statistics Available for Canada

THE increasing use of lightning rods and their permanent economy is illustrated in a bulletin recently published by the Manitoba Department of Agriculture and Immigration, entitled "Protection from Lightning." "Perhaps the strongest proof," says the bulletin, "from the practical standpoint is that supplied from statistics of the losses suffered upon property that was unprotected, compared with what resulted in the case of wired or robbed buildings.

"In Manitoba and the western provinces, practically no statistics are available on this subject, but in the older provinces, and especially in some of the states of the American Union, very interesting and decisive figures have been gathered. Next to the individual owner, the insurance companies are closest in touch with losses sustained through lightning, and, naturally enough, it is through these companies that reliable information has been obtained.

"In many of the states there are insurance companies operating that will accept risks on rodded buildings only, and the wiring must also receive the approval of their own inspector. Many companies, on the other hand, insure both rodded and unrodded buildings. The Farmers' Mutual Lightning Protected Insurance Company of Michigan, insures only rodded buildings passed by their own inspector, and during their business from 1909 to 1912, inclusive, they state that their company had paid the small sum of $32 only, for damage done to buildings by lightning, although they took a total risk of $55,172,075 in the four year's business. Even this trifling loss, they claim, was due to defects in the wiring not detected at the time of inspection. This, in itself, is very strong proof in favor of wiring.

"The Patrons' Mutual Fire Insurance Co., of Michigan, takes risks on both rodded and unrodded buildings, and their secretary states that, in the same four years' business, amounting to $59,567,272, they paid, for damage done by lightning, claims amounting to $32,268.78, which is slightly over 1,000 times as much as the other company paid on wired buildings. He also states that in eleven years' business the company has received only three small claims for damages on rodded buildings, the remaining lightning damage being due to unrodded buildings comprising 80 per cent. of their risks. Calculating on the same amount of risk taken by each company, the one on rodded and the other on unrodded buildings, it simply means this: That for every $1 damage done to properly rodded buildings, there was $1,168 damage done to unrodded ones. Stating it in another way, it showed an efficiency of 99.91 per cent. for wiring.

"In Iowa, over fifty companies keeping this data report that about 50 per cent. of all their risks are on wired buildings, and in eight years' business they paid on an average $10.15 per company per year, lightning damage on rodded buildings, while on the unrodded ones, the damage claims paid on account of loss by lightning amounted to $775.1[illegible] per company per year. In other words, there was a saving of $75 out of an expected loss of $76, or an efficiency of 98.7 per cent. for rodding, even where some defective rodding was doubtless included, as there was no inspection.

"In Ontario no statistics are yet available covering any extended number of years, but some facts have been obtained for recent years, and in the course of another decade some valuable information will be available. Enough has already been collected to show the same general result, in favor of protecting buildings by wiring. The facts collected in regard to insurance risks covering the years 1912 and 1913 go to show that an efficiency of 94½ per cent. and 92 per cent. respectively, was the record for rodded buildings, as shown by the companies who actually furnished reliable figures on the subject. In Manitoba, the manager of one of the most successful mutual companies—viz., the Portage Farmers' Mutual Insurance Co., states that they have never yet paid a cent. of claims for damage by lightning to buildings that were rodded, while their records show that during the years 1911-1915 inclusive they paid $57,567.09 damage from lightning to unrodded buildings.

"The following data in regard to damages caused by lightning covering a five-year period have been obtained from the reports of the state fire marshals, where such were available. Unfortunately, only a few of the state fire marshals have, up to the present, collected statistics under the heading of rodded and unrodded buildings, but where such has been done the figures are very significant. The state fire marshals, without exception, are very emphatic in their support of the principle of rodding buildings, and the following statement, quoted from the Minnesota report, expresses the general views held by these officers. In this report the state fire marshal says: "Lightning rods, if properly installed, afford practically absolute protection from losses from this source. I know of no case, either in Minnesota or elsewhere, where a building properly equipped with lightning rods has been destroyed by fire from lightning. Rods of good material and properly grounded are not expensive, and their use on dwellings, barns, churches and other buildings should be extended.' "

A similar evidence is given in a letter from Prof. Day to the Mutual Fire Underwriters' Association of Saskatchewan. "As a comprehensive conclusion from our investigations," says Mr. Day, "we have found that if all the buildings in rural Ontario were rodded, more than 95 per cent. of the annual damage to buildings by lightning would be prevented. The method by which this conclusion was arrived at was as follows: In 1912 18 insurance companies in Ontario kept special records for us. From their reports we learned that out of every 7,000 unrodded buildings insured by them 37 were struck by lightning, while in every 7,000 rodded ones only 2 were struck by lightning. The rods prevented damage in 35 cases out of an expectancy of 37, showing an efficiency of 94.7 per cent. Since that we have determined the efficiency for the years 1913, 1914 and 1915. The results for the four years are as follows:—

Year.	Efficiency of rods.
1912	94.7
1913	92.0
1914	99.8
1915	99.9
Average for four years	97.2

"To apply these figures: The report of the superintendent of insurance shows that in 1912 the insurance paid on losses caused by lightning was $262,282. No doubt the actual loss exceeded the insurance by perhaps one-third or one-half. If so, the actual loss was $350,000 or over; 94.7 per cent. of this equals $331,450, which represents the saving that would have been effected that year if all the buildings had been rodded.

"In 1913 the insurance paid on lightning losses to buildings was $305,104, which means a total loss of $400,000 or more; 92 per cent. of this shows a saving of $368,000 if the buildings had been rodded. Similar computations might be made for other years if lightning losses were at hand.

"Investigations along similar lines in Iowa have shown an efficiency of 98.7 per cent. for rods in that State, based on the report of 55 mutual companies, each year for eight years.

"In Michigan the efficiency of lightning rods has been shown to be from 98 to 99 per cent. In this State many companies keep their rodded and unrodded risks in two separate classes, and assess each for its own losses. I have before me the reports of eight of these companies for the years 1913, 1914 and 1915, and find: In unrodded class the average assessment per $1,000 risk, $3.15; in rodded class the average assessment per $1,000 risk, $2.28. The only possible cause for the difference is the rods on the buildings."

The Imperial government has announced that an investigation board is to be appointed for the purpose of reviewing questions of maritime transport throughout the empire. Canada is to be represented on this board by Sir George Perley.

DOMINION STEEL EARNINGS DECREASED

Net earnings of the Dominion Steel Corporation for the year ended March 31st last, after deducting all operating expenses, repairs and maintenance and business profits tax, amounted to $8,[illegible], as compared with $11,030,122 in the previous period. After all deductions, including interest on bonds and the regular dividends on the preferred shares, net profits on the year's operations amounted to $5,470,468, against $7,-[illegible] in 1918 and $8,221,165 in 1917. Earnings were at the rate of 17 per cent. on the outstanding common stock of the Corporation, against 23.7 per cent. in 1918 and 9.4 per cent. in 1916.

After deducting the disbursements to holders of the common shares from the net profits for the year, there remained to be added to the previous balance of profit and loss account the sum of $3,705,904, bringing the total up to $17,-459,251. From this balance there was deducted as a reserve for contingencies, including government taxes for the corporation's fiscal year, the sum of $1,000,000, while $8,500,-000 was transferred to a new general reserve fund, which is shown in the balance sheet exhibit at $11,500,000, the new reserve including the item of $3,000,000 shown in last year's statement as "Special Reserve."

The working capital of the corporation, standing at in excess of $14,000,000, while some $3,700,000 less than that of a year ago, is, nevertheless, a comfortable one for a period like the present. In the assets section of the balance sheet, outstanding changes from a year ago include an increase of nearly $7,000,000 in cost of properties, indicating that the corporation has made some considerable extensions and betterments during the year under review. Inventories at $9,-314,602 are higher by approximately $1,500,000 than at the end of the 1918 period, while investments in war loans show a reduction by over $2,000,000. Cash on hand was some $1,-[illegible] less, but the contraction in this respect and in the value of war loans held is probably closely associated with the increase in properties account, of which note has been taken.

The liabilities show a new item, viz., $2,125,693 under the heading, "other accounts payable, including liabilities on construction, and government taxes for 1918," but otherwise the changes in this part of the year's exhibit, beyond the establishment of the new general reserve, already referred to, are of little significance.

The balance sheets of the past two years compare as follows:—

Assets.

	1919.	1918.
Properties	$75,509,711	$68,533,446
Trustees	142,432	135,544
Inventories	9,314,602	7,853,503
Accounts receivable	5,039,479	5,335,886
War loans	1,540,101	3,617,307
Dominion Employ. balance	174,932	....
Cash	3,603,542	4,278,508
Defer. charges	585,811	493,914
Totals	$95,910,612	$90,248,111

Liabilities.

	1919.	1918.
Funded debt	$21,064,097	$21,206,777
Accounts payable	2,702,237	2,563,827
Const. liab. and taxes	2,125,693	....
Accrued interest	235,925	241,297
Dividends	568,965	576,221
Reserves	2,656,742	1,808,129
Common stock	32,097,700	32,097,700
Preferred stock	7,000,000	7,000,000
Preferred subsidiary	8,000,000	8,000,000
Reserve	11,500,000	3,000,000
Surplus	7,959,251	13,754,157
Totals	$95,910,612	$90,248,111

In his report to the shareholders, the president, Mr. Mark Workman, said:—"During the period which has elapsed since April 1st, 1915, the total expenditure upon construction and for the acquisition of new properties was approximately $11,500,000, and as the whole of this amount was provided from earnings, your directors have thought it well to set apart an equivalent portion of the surplus of the corporation as a general reserve. For this purpose $8,500,000 has been transferred from profit and loss account, together with $3,-000,000 from special reserve brought forward from last year. The balance remaining at credit of profit and loss account is $7,959,251.

"The net additions during the year to cost of properties amounted to $8,092,087. The chief expenditures were upon the property of the Dominion Iron & Steel, and principally in respect to its mine at Wabana, its coke ovens and ship plate mill.

"Some time after the close of the company's fiscal year, the minister of marine intimated that it would be necessary to consider some alteration in the arrangements existing between the government and the Steel Company in respect to ship plates, and that work upon the mill should be suspended while the matter was under consideration. Work was accordingly stopped, but although some preliminary discussions have followed, nothing definite has been proposed. Your directors are assured that, whatever may be the ultimate decision of the government, it will not result in any loss to the company. Consequent upon these large expenditures, there has been a decrease of $1,412,548 in current and working assets. There is also an increase of $2,251,474 in accounts payable, chiefly due to the inclusion of contractors' accounts for work in progress, payment of which is not due, and of the estimated liability of the corporation for federal and provincial taxes.

"Funded and mortgage debts have been decreased by the sum of $376,680, chiefly by the retirement of bonds through the operation of their respective sinking funds."

ALBERTA INDUSTRIAL CONGRESS

An industrial congress is to be held in Alberta during the week of August 11th-16th. It is being arranged under the auspices of the Alberta Industrial Development Association, an organization recently formed under the auspices of the provincial government. Part of the program of the congress will be a two-day convention at Calgary on August 13-14th, and an official visit to Edmonton. Invitations are being extended, both individually and generally, to manufacturers and all others interested in the development of Canadian industry. The president of the association is M. A. Brown, mayor of Medicine Hat. The manager is John M. McGreevy, of Calgary. Among those who are expected to be present and to address the congress are: E. W. Beatty, president of the C.P.R.; Sir Edmund Walker, president of the Canadian Bank of Commerce; Thomas Findley, president of the Massey-Harris Co.; Col. J. S. Dennis, chairman of the Canadian Siberian Trade Commission and head of the C.P.R. Immigration Department; D. B. Hanna, president of the Canadian National Railways; W. B. Lannigan, general traffic manager, C.P.R.; Sir Douglas Cameron, president, Maple Leaf Milling Co.; Hedley Shaw, general manager, Maple Leaf Milling Co.; and a number of prominent men from the United States.

CANADA MAY PLACE CONTRACT WITH UNITED STATES STEEL

The Hon. C. C. Ballantyne and Vice-President Perley, of the United States Steel Corp., had an interview last week at Ottawa, the outcome of which may prove to be favorable to the American company. It is understood that failing a satisfactory outcome of negotiations between the government and the Dominion Steel Company for a modification of the contract for the steel plates for shipbuilding, an arrangement may be made with the United States Steel to furnish the supply from Ojibway.

APRIL INDEX NUMBER UP

The index number of commodity prices, prepared by the Department of Labor, fell regularly from November, 1918, to March, 1919, inclusive. For April, however, it is 279.6, an advance of two points compared with March. The prices by classes of commodities are shown below. The increases in the price of grains and meat are evidently responsible for the change during the month of April. It will be noticed that the prices of building materials, iron and steel, etc., have fallen off substantially:—

DEPARTMENT OF LABOUR FIGURES	No. of Commodities	Index Numbers		
		*April 1919	*Mar. 1919	*April 1918
I GRAINS AND FODDERS				
Grains, Ontario	6	309.0	281.9	438.9

COBALT ORE SHIPMENTS

The following is a statement of the shipments of ore, in pounds, from Cobalt, for the week ending June 6th, 1919:—

Beaver Mine, 60,000; O'Brien Mine, 64,000; Mining Corporation of Canada, 65,508; Dominion Reduction Co., 84,000; Buffalo Mine, 159,725; Tretheway Mine, 129,460; total, 562,773.

The total since January 1st is 9,640,028 pounds, or 4,820 tons.

SAGUENAY PULP AND PAPER COMPANY

A new company has been formed with head office in Montreal, under the name of the Saguenay Pulp and Paper Company. The organization was approved by a special meeting of the shareholders of the North American Pulp and Paper companies held on June 6th. The shareholders also authorized it to make an issue of $5,500,000 six per cent. serial gold bonds for the purpose of purchasing from the North American Pulp and Paper Companies and the Chicoutimi Pulp Company $1,500,000 first mortgage bonds of the latter company and $300,000 similar bonds of the Saguenay Power and Light Company; to purchase from the Saguenay Securities Company $1,170,000 first mortgage bonds of the Chicoutimi Pulp Company, and $1,200,000 of the Saguenay Power Company; to pay the debts of Chicoutimi Pulp Company and its subsidiaries and the cost of completing the Pont Arnaud plant. The shareholders also approved the transferring of preferred shares of Chicoutimi Company into a like number of shares of Saguenay Pulp Company, the reduction of the dividend from seven to six per cent. and an increase in the number of preferred shares to even the disbursement.

The new company elected directors for the next two years as follows: E. C. Pratt, general manager of Molson's Bank; R. F. Hammond, of Craig, Becker, New York; Louis Chable, vice-president American Paper Exports Company, New York; J. T. Steele, Buffalo; Hon. E. L. Beique, vice-president Banque d'Hochelaga; Hon. J. M. Wilson; Hon. N. Garneau; Joseph Quintal, president Chambre de Commerce, and J. E. A. Dubuc. At the end of two years directors will be elected annually.

The new company will possess water powers of 200,000 horse-power, of which its subsidiaries are now using about 30,000. The pulp mill at Chicoutimi has a present output of 110,000 tons annually of mechanical pulp and the Ha Ha Bay mills are producing 30,000 tons of sulphite pulp, and when the extensions to the plant are complete out of expenditures from the proceeds of the new bond issue, the total output of the company will be 170,000 tons of pulp per annum, the largest in the world. At the present time the Laurentide Company, the second largest pulp producers, has an annual output of 87,000 mechanical and 50,000 sulphite, a total of 137,000 tons. The Riordon Company produces 90,000 tons annually of bleached sulphite.

During the past year the company's operations left profits amounting to $850,000, the actual figures not being available until the annual meeting. The president of the company states that the total output for the coming year has been sold in England at a price exceeding last year's, besides which the English buyers have guaranteed to supply the ocean tonnage for the transportation of the entire output. It is estimated that profits run somewhat in excess of $1,250,000.

The new bond issue is being underwritten by bond-houses, including Versailles Vidriciare, Boulais, Ltée., Rene T. Leclerc, Credit Canadien, Provincial Securities, Limited, Quebec, Beausoleil, Ltd., L. G. Beaubien and Company, McQuaig Brothers and Company, and subscriptions will be receivable at all branches of the Molson's Bank. The bonds will be offered at par.

NEW RUBBER CONCERN

The Ames-Holden Tire Co., Ltd., is about to establish a plant in Kitchener, Ont., according to an announcement of T. H. Rieder, president of Ames-Holden-McCready, Ltd. The tire company is a new concern, which will have a capitalization of $2,000,000 of stock and $1,000,000 of bonds. According to present plans the board of directors will include all the directors of the parent company, the Ames-Holden-McCready Co., Ltd., and in addition will include two or three prominent industrial men of Kitchener. Mr. Rieder says he regards Kitchener as the centre of the rubber industry of Canada.

SECURITY ABOVE ALL

Whether with the intention of taking out insurance or associating yourself as representative with some company, you first look for security.

The figures for 1918 emphasize the unexcelled financial position of the North American Life. After a year of War and Pestilence, the Company emerges stronger than ever meriting its motto, "Solid as the Continent."

Business in Force -	*over*	*$70,900,000*
Assets - - - -	"	*18,100,000*
Net Surplus - - -	"	*2,750 000*

North American Life Assurance Company
"SOLID AS THE CONTINENT"
HEAD OFFICE - TORONTO

WHY MUTUAL POLICIES ARE EASY TO SELL

First—Because of the co-operative and democratic principle on which the company is founded: The Mutual Life Assurance Company of Canada is a company consisting of policyholders, maintained by policyholders, exclusively for policyholders.

Second—Because the purpose for which the company was established is now generally understood: the company since its establishment in 1869 has consistently followed one aim—that of furnishing the largest amount of protection for the least possible outlay.

Third—Because the company's day-by-day activities advertise it: The Mutual of Canada since its organization has paid to policyholders or their beneficiaries or holds as a trust to guarantee future payments, over sixty millions of dollars.

"BE A MUTUALIST!"

BALANCING DEBTS BY LIFE INSURANCE

Do you ever think of Life Insurance as a means of counterbalancing unavoidable debt?

There are bushels of ways in which debt may creep upon a man, unavoidably almost, legitimate debt in many cases.

He may undertake to purchase a home, secure credit to extend his business. Ill health may hamper and swallow his savings. Crops may fail and business losses occur.

All manner of calls tug at a man's purse strings, and do their best to make the domestic balance sheet a poor exhibit.

But Life Insurance will restore the balance.

THE GREAT-WEST LIFE ASSURANCE COMPANY

POST OFFICE SAVINGS BANKS

During the month of March withdrawals from the post office savings banks exceeded deposits by about $250,000. Owing to the fact, however, that one year's interest was added on March 31st, amounting to over $1,100,000, the balance at the end of the month is greater than at the beginning by about $900,000. The figures are given below:—

Dr	MARCH, 1919		Cr.
Balance in hands of the Minister of Finance on 28th Feb 1919..	$ cts. 40,738,913.68	Withdrawals during the month..........	$ cts 1,212,329.46
Deposits in the Post Office Savings Bank during month.......	953,229.28		
Transfers from Dominion Government Savings Bank during month:—			
Principal.........			
Interest accrued from 1st April to date of transfer..			
Deposits transferred from the Post Office Savings Bank of the United Kingdom to the Post Office Savings Bank of Canada	48,305.43		
Interest accrued on Depositors accounts and made principal on 31st March, 1919 (estimate)	1,107,014.28		
Interest allowed to Depositors oo accouots closed during month......	19,827.05	Balance at the credit of Deoositors' accounts on 31st March 1919.........	41,654,960.26
	42,867,289.72		42,867,289.72

On June 9th a notice appeared on the door of Finn and Manseau, brokers, Montreal, stating that a demand for abandonment had been made upon the partnership, and the office was consequently closed.

Marceau, F. G. King, E. D. Marceau. St. Paul Steamship Co., Ltd., $50,000; E. M. McDougall, L. G. Bell, S. C. Demers. Huron Steamship Co., Ltd., $50,000; E. M. McDougall, L. G. Bell, S. C. Demers.

BANK BRANCH NOTES

The Bank of Montreal has recently opened a branch at St. Lambert, Que..

Mr. J. S. Hiam, superintendent of branches of the Union Bank of Canada, arrived in Toronto from Winnipeg last week, and will stay for a month.

The Union Bank of Canada is holding a series of conventions of branch managers of important centres throughout the west. The first meeting is being held to-day, June 13th, at Calgary, and shortly following one will be held at Regina.

Following an illness extending over several months, Mr. William P. Hunt, former manager of the Montreal branch of the Bank of Nova Scotia, died on June 4th.

The Dominion Bank has purchased a site at the corner of Bay and Queen Streets, and a building will be erected this summer for banking business only.

DIVIDENDS AND NOTICES

PENMANS, LIMITED

By Order of the Board.

A. D. LANGMUIR, General Manager.

Toronto, June 6th, 1919.

(For other Dividends and Notices see page 47.)

GOVERNMENT AND MUNICIPAL BONDS

Calgary Notes Sold in United States—Much Industrial Financing Being Arranged

ONE of the notable features of the bond market at present is the number of industrial issues being arranged. These have been mostly of a good quality, and have met with success. The rapid advance in the prices of government and municipal issues has stimulated the demand for good industrials. Among the recent offerings of this kind have been $2,000,000 of Mattagami Pulp and Paper Co. 7 per cent. convertible debenture stock, which has been over-subscribed; Clifton Hotel Co. $350,000 second mortgage bonds, offered direct by the United Hotels Co.; $450,000 6 per cent bonds, secured by a first mortgage on the Dandurand building, Montreal, offered by Credit Canada, Ltd., and the Clarke Brothers bonds, offered elsewhere in this issue.

The following quotations of active government bonds are supplied by the National City Co., Ltd., and are in New York funds:—

	Bid.	Offered.
Anglo-French 5% (Oct. 15, 1920)	97½	97⅝
United Kingdom 5½% (Nov. 1, 1919) ..	99 13/16	99 15/16
United Kingdom 5½% (Nov. 1, 1921)	98⅞	99
United Kingdom 5½% (Feb. 1, 1937) ..	99¾	100
Canadian Pacific 6% (Mar. 2, 1924)	101	101⅜
City Paris 6% (Oct. 15, 1921)	97¾	98
Dominion Canada 5% (Aug. 1, 1919) ..	99 13/16	99 15/16
Russian Govt., Ext. 5½% (Dec. 1, 1921)	50	53
Russian Govt., Ext. 6½% (July 10, 1919)	59	61

The following is a list of debentures offered for sale, of which particulars appear in this or previous issues of *The Monetary Times*:—

Borrower.	Amount.	Rate %.	Maturity.	Tenders close.
Miniota, Man.	$ 3,500	5½	20-years	June 16
Miniota, Man.	30,000	5½	30-instal.	June 16
Kentville, N.S.	50,000	5½	30-years	June 19
Montreal, Que.	624,000	4½	40-years	July 3
East Whitby Township, Ont.	61,000	5½	25 & 30-instal.	July 7

Vermilion, Alta.—Messrs. C. H. Burgess and Co. have purchased a block of $6,000 7 per cent. 20-instalment debentures.

Lethbridge, Alta.—Messrs. A. Jarvis and Co., Toronto, have purchased an issue of $126,000 5-year 6 per cent. bonds of the city.

Dorion, Que.—The town has sold to Beausoleil, Ltd., its issue of $66,500 5½ per cent. 25-year serial bonds at 97.92 and interest.

Regina, Sask.—A by-law will be voted on on June 30th to authorize the expenditure of $139,000 for the construction of a new school.

Regina, Sask.—Practically all the $25,000 7 per cent. 5-instalment debentures of the Exhibition Association have been disposed of.

Kentville, N.S.—Tenders will be received up till June 19th, 1919, for the purchase of $50,000 5½ per cent. 30-year street paving debentures. J. Carroll, town clerk. (See notice elsewhere in this issue.)

Stellarton, N.B.—The Eastern Securities Co., Ltd., W. F. Mahon and Co. and J. C. Mackintosh and Co. recently purchased an issue of $108,000 6 per cent. 20 and 25-year debentures. The issue has been completely disposed of at par.

Ingersoll, Ont.—A by-law has been passed by the ratepayers to loan $10,000 to the Royal Broom Co. for the erection of a new factory building. Another by-law was also passed, authorizing the issue of $10,000 10-instalment debentures for payment of a new market building and other local improvements.

Miniota, Man.—Sealed tenders will be received up till June 16th, 1919, for the purchase of $30,000 5½ per cent. 30-instalment debentures, issued for the purpose of constructing good roads. Tenders will also be received for $3,500 5½ per cent. 20-year telephone debentures. Both issues are guaranteed by the government of Manitoba. W. E. Warren, secretary-treasurer. (See notice elsewhere in this issue.)

Calgary, Alta.—Messrs. Spitzer, Rorick and Co., Toledo, Ohio, have purchased an issue of $1,500,000 6 per cent. 5-year treasury notes at 100.80. There were seven bids in all, the second highest being that of A. Jarvis and Co., Toronto, at 100.60. At the meeting of the city council of Calgary there was some suggestion that the loan might be increased to the original figure of $2,000,000, but this idea was finally abandoned.

Nova Scotia.—The province is calling for tenders on $1,000,000 or $1,200,000 5 per cent. debentures, exempt from all taxes, up till June 23rd, 1919. Tenders will be received on three different lots as follows:—Ten-year debentures for $1,000,000 or $1,200,000, 15-year debentures for $1,000,000 or $1,200,000, 20-year debentures for $1,000,000 or $1,200,000. A sinking fund sufficient to retire the issue at maturity is provided for.

Tilbury East, Ont.—Messrs. R. C. Matthews and Co. have purchased an issue of $11,274.40 6½ per cent. five-instalment debentures at 102.40. The following is a list of tenders:—

R. C. Matthews and Co.	102.40
Wood, Gundy and Co.	102.15
C. H. Burgess and Co.	102.11
G. A. Stimson and Co.	102.04
MacNeill, Graham and Co.	101.77
Canada Bond Corporation	101.53
W. L. McKinnon and Co.	101.53

Alberta School Districts.—Ten blocks of school district debentures amounting to $21,000 and bearing interest at 7 per cent., have been awarded as follows: Block No. 1, Rurals, 15-years—Sawyer S.D., $1,500; Good Luck S.D., $2,000; Baptiste Lake S.D., $1,500—$5,000. Awarded to Brent, Noxon and Co., Toronto, at 103.60. Block No. 2, Rural, 10-years—Peell Coulee S.D., $2,000. Awarded to Canada Landed and National Investment Co., Winnipeg, at 103.275. Block No. 3, Rurals, 10-years—Berry Creek S.D., $2,500; Gold Creek S.D., $2,000—$4,500. Awarded to Brent, Noxon and Co., Toronto, at 102.80. Block No. 4, Rurals, 10-years—Youngville S.D., $800; Tulliby Lake S.D., $1,500—$2,300. Awarded to Brent, Noxon and Co., Toronto, at 102.60. Block No. 5, Rurals, 10-years—North Beaverlodge S.D., $700; Wenger's Heights S.D., $400—$1,100. Awarded to Manufacturers Life Insurance Co., Toronto. (North Beaverlodge, 101.271; Wenger's Heights, 102.271.) Block No. 6, Rurals, 7-years—Deer Lodge S.D., $700; Wolia S.D., $700—$1,400. Awarded to W. L. McKinnon and Co., Regina, at 102.26. Block No. 7, Rurals, 6-years—Lone Star S.D., $600; Greenridge S.D., $600—$1,200. Awarded to W. L. McKinnon and Co., Regina at 102. Block No. 8, Consolidated S.D., 5-years—Donalda Con. S.D., $1,500. Awarded to Canada Landed and National Investment Co., Winnipeg, at 102. Block No. 9, Village S.D., for assessment purposes, 10-years—Bindloss S.D., $1,000. Awarded to W. L. McKinnon and Co., Regina, at 103.03. Block No. 10, Town S.D., 10-years—Castor S.D., $1,000. Awarded to Huron and Erie Mortgage Corp., London, at 103.02.

Edmonton, Alta.—Approval of an issue of $5,000,000 of city debentures against tax arrears has been made by the Board of Public Utility Commissioners. This will allow the city council to take advantage of the Arrears of Taxes Act, passed at the last session of the provincial House, whereby tax delinquents may obtain a spread of ten years on their overdue taxes.

The city will only sell $3,500,000 of these debentures at the outset, it being stipulated by the board that when the time comes to sell the remaining $1,500,000 an application should be made again to the commissioners.

There is at present $3,369,000 of outstanding short-term debentures. As there is $300,000 against them in the sinking

[illegible] the amount is reduced by that sum. It is proposed by the city to pay off these short-term loans and make a new issue for ten years. It was explained by Alderman Martin that the extra $500,000 on the $3,500,000 the city wanted permission to sell now would be required to meet tax sale redemptions provided for under the Act. Mayor Clarke contended that the city should be allowed to make an issue to cover all the tax arrears, which amount to $6,000,000. He asserted the present proposal relief for those who had not paid taxes, but dissimilar treatment for those who had. If the city was allowed to sell to the full, or near the full, amount of the arrears there would be a surplus that could be used towards needed expenditures on public works and other similar undertakings in the city.

Chairman Carpenter pointed out that one question that necessarily arose was, What were the arrears worth, their face value or not? At the same time, the chairman said the board would be largely governed by the success of the scheme. They were now prepared to consent to the sale of the $3,500,000. If it did not work out satisfactorily, there would not be further permission.

Village of Embro, Ont.—Tenders will be received up till June [illegible], 1919, for the purchase of $7,500 6 per cent. 20-year hydro debentures. E. J. Cody, treasurer.

Norwich Township South, Ont.—Messrs. G. A. Stimson and Co., Toronto, have purchased $8,000 6 per cent. 20-instalment debentures, for erecting a building for the Treadright Shoe Co.

Messrs. W. A. Dyment and Co., bond dealers, Royal Bank Building, Toronto, have admitted as partner Mr. Andrew L. Anderson. The company in future will be known as Dyment, Anderson and Co.

SALE OF TIMBER BERTHS

Tenders will be received by the undersigned up to and including Wednesday, the 16th day of July next, for the right to cut the timber of various descriptions on the Townships of Groves and St. Louis in the District of Sudbury.

Terms and conditions of the sale containing full particulars, and maps showing the position of the Berths offered for sale, may be obtained upon application to the undersigned, or from Mr. Charles Henderson, Crown Timber Agent, Sudbury.

G. H. FERGUSON,
Minister of Lands, Forests and Mines.

Toronto, June 11th, 1919.

CLIFTON HOTEL BONDS OFFERED

The Monetary Times has learned that the Clifton Hotel Co.'s issue of $350,000 second mortgage sinking fund bonds, of which mention was made in these columns last week, is being offered to shareholders of the United Hotel Co. privately. Mr. Frank A. Dudley, president of the United Hotels Co., states that an offer has been received from a banking institution for any unsold balance which may remain.

DANDURAND BUILDING COMPANY BONDS

An issue of $450,000 6 per cent. 8-year first mortgage sinking fund gold bonds is being offered by Messrs Credit Canada, Ltée., in denominations of $100 at par and accrued interest. Principal and interest are payable at the Bank of Hochelaga in Montreal and Quebec, and National Park Bank, New York. In the statement issued the net earnings available for bond interest is shown at $41,715, and the value of property estimated at $775,000.

LOEWS ISSUE SOON TO BE OFFERED

The issue of $500,000 Marcus Loew's Theatres, Ltd., first mortgage gold bonds, payable, principal and interest in Toronto, Montreal and New York, will be offered shortly to the public. These bonds bear 6 per cent., and mature serially from June 1, 1921 to 1934, inclusive, and will be offered on 6¼ per cent. basis.

The Toronto General Trusts Corporation is acting as trustee for the bondholders, and the legality has been passed upon by Messrs. Tilley, Johnston, Thomson and Parminter.

NOVA SCOTIA TRAMWAYS TO ISSUE NOTES

On June 24th a special meeting of shareholders of the Nova Scotia Tramways and Power Co., will take place at Halifax to authorize an issue of $2,000,000 of 3-year notes, of which $1,000,000 will be issued as soon as authorized by the Public Utilities Commission of Nova Scotia. Consent of the preferred shareholders is also necessary and vote will be taken following the meeting of the common shareholders.

The active managements of the properties is undertaken by Stone and Webster, of Boston, and the proceeds of the note issue will be used for improvements, repairs and new equipment. At the moment the first mortgage 5 per cent. bonds cannot be sold advantageously.

At a recent meeting of the Montreal Stock Exchange it was decided to increase the brokerage rate on all business transacted for New York houses from ⅛ to ¼ per cent., which is the same rate as applies to dealings with the general public.

Calgary and Winnipeg Tax Rates Will Be Up—Middlesex County May Issue Notes

Ingersoll, Ont.—The council has set the tax rate for the present year at 30 mills.

Devon, N.B.—The assessment of the town has been completed for the current year and stands at $15,350 .

Toronto, Ont.—Up till June 6th, the last day for securing the discount on the first instalment of taxes, the amount of $[illegible]0,000 was collected. The first instalment totals $5,-[illegible],000.

Perth County, Ont.—The county council has reduced the tax rate to 2¼ mills. The by-law this year calls for the raising of $7[illegible],202, as compared with $202,301 on the same fixed assessment of $32,533,800.

Frontenac County, Ont.—The county council has fixed the tax rate for the year at 9½ mills. The recommendation of the Finance Committee, that the assessment of the county municipalities be the same as last year, viz., $6,921,500, was adopted.

New Westminster, B.C.—The city council has passed the estimates and set the tax rate at 32 mills. The rate of 32 mills will leave a margin of about $2,000 to go on. The estimated expenditure is a little over $747,000. Revenue from sources other than taxes is about $342,000, and the 32 mill rate will bring in $407,668.

Windsor, Ont.—That the surplus earnings of Windsor Hydro-Electric Commission, amounting to approximately $3,-[illegible], will not be turned over to the city, has been declared by James Shepherd, Chairman of the Commission. Instead of the $[illegible] going into the city treasury, thereby benefiting ratepayers who are not customers of the Commission, the money will be used to reduce lighting and power rates, Commissioner Shepherd said.

Middlesex County, Ont.—The recommendation of the finance committee of the county council that the tax rate amount to 6 49-75 mills for the ensuing year, has been adopted, with the following various township rates, proposed according to the estimates:—

Current rate 5¾ mills, producing	$225,358.31
Debenture rate for Middlesex proper, 17-20 mills	28,956.41
Debenture rate for all of Middlesex	2,090.28
Township overdrafts on county roads, 1918	8,597.52
Total levy, 6 49-75 mills	$265,002.52

It was recommended by the committee that Warden Currie and County Treasurer Robson be authorized to borrow the sum of $120,000 on the credit of the county in 30 notes of $4,000 each, and that a by-law be passed confirming it.

Calgary, Alta.—It is expected that Calgary's mill rate for 1919 will be considerably over 31, which was the rate for 1918. Just how much higher it will go it is not yet possible to say, but the 1919 estimates which are just about completed for presentation to the council show several items of increase over those of last year. The school board estimates are higher than before, the hospital figures, while not as high as called for a few days ago, show a marked increase over last year, being practically doubled. Increases in wages alone are in the neighborhood of $300,000, while the increased costs of materials in all departments naturally will add its quota to the amount of revenue necessary. The levy is being made on an increased assessment over last year, the 1919 figure being $77,043,010, or $1,494,892 over last year. On that assessment every item of expenditure amounting to $7[illegible],000 means an additional mill in the tax rate.

Regina, Sask.—In view of the expensive improvements which have been made by the city to provide facilities for the Canadian Pacific Railway, the city commissioners propose to approach the railway corporation in an endeavor to secure their permission to assess the company with a proportion of the cost, not only of improvements which have already been provided, but also for future undertakings.

The city commissioners state that C.P.R. property in the city has been benefited to the extent of at least $25,000 by improvements constructed by the municipal corporation. The railway company has been exempt in the past from any share of the cost of these undertakings, and under present conditions it is felt it would be somewhat of a hardship to the ratepayers to construct any new works for the C.P.R. without some arrangement under which a proportion of the cost would be shouldered by the company.

Winnipeg, Man.—The finance committee is now working on the 1919 budget. Last year the budget totalled $5,994,202, while in 1917 it was $5,226,578. This year with large increases in wages and very little reduction in any of the essentials which comprise the budget, the expectation is that the figure will go well above $6,000,000. Last year the tax rate was 20 mills; this year it will likely run to between 22 and 23 mills, besides the water district rate, which last year was 3.68 cents, and which is expected to be higher this year. The opening session showed that increased wages will be the main cause of a record year in civic expenditure. The fire department wants over $600,000, due mainly to the inauguration of the two platoon system, involving the engagement of 75 to 80 new men. All grades in the department have been given a substantial increase in wages. Last year the department cost $400,000. The police department cost $400,-000 last year. This year it will cost over half a million. The council hopes to save $10,000 by the amalgamation of the assessment and tax collection departments this year.

COST OF LIVING COMMITTEE STARTS WORK

Owing to Nearness of Close of Session Inquiry Will be General—Witnesses Already Heard

WHEN the Cost of Living Committee of the House of Commons, which was appointed a few days ago by the government, commenced its inquiries, an effort was made to extend the investigation to the prices of some specific commodities. The chairman, Mr. George Nicholson, however, took the stand that not much could be accomplished if the committee undertook to inquire into special matters, and thought it was their duty to ascertain as quickly as possible the reason for the wide spread between the cost of producing goods and the cost to the consumer. Mr. A. N. McCoig, of Kent County, Ontario, had urged that the prices charged for farm tractors should be investigated and that certain sales agents should be summoned before the committee.

The first witness called by the committee was Dr. R. J. McFall, cost of living commissioner, who gave detailed information regarding the steps which have been taken under the War Measures Act, including the order-in-council authorizing municipalities to make inquiries. One of the most complete inquiries, he said, had been conducted by the city of Winnipeg. He expressed the view that the fear of publicity was, in many cases, an important factor in keeping down prices. He also referred to his recent investigation of the bakers and retail merchants of Halifax as a result of which he found that a combination existed and he recommended that action be taken by the department of justice. Dr. McFall also made a statement with reference to coal prices. Ottawa and Vancouver are the only cities in which coal merchants buy direct from the mines. Winnipeg coal dealers, he said, paid sixty cents to a middleman and they themselves have a profit of $2,50, so that the total spread is $3.10.

Mr. W. F. O'Connor, K.C., former cost of living commissioner, also appeared as a witness. He said that he thought a court should be established with a lawyer or judge as its chairman under the jurisdiction of which all matters referring to the cost of living should be placed. This court should have power to issue orders and to compel obedience. When asked if he thought cold storage operators had been using their facilities to unduly inflate prices, he stated that in his opinion the owners of such plants merely use them to make as good a profit as possible. In the aggregate, he said, loss of foodstuffs in cold storage is small.

On Tuesday an inquiry was made into the packing industry and representatives of several packers were asked to appear.

The United States as a Market For Canadian Bonds

Prior to its entrance into the war, the United States was fast becoming the principal market for Canadian Provincial and Municipal bonds, having in recent years replaced England in this particular. A healthy appetite and a sound respect for such securities was much in evidence among American investors in 1914, 1915 and 1916.

The war is hardly over and yet bond dealers in New York and other cities in the States who formerly handled "Canadians," are already beginning to deal in bonds issued by Cities and Provinces in the Dominion.

There is little doubt but that the United States will quickly resume its former position with respect to Canadian financing operations. Hence, it behooves the borrowing Province, City or Town to present its borrowing problems to the investment bankers in New York, Boston, Philadelphia, Chicago, etc.

THE BOND BUYER is recognized as "The Authority on Municipal Bonds." It is the logical medium through which Bond Dealers, Banks or Municipal Officials may reach every active buyer of Municipal Securities. That is why it carries more official advertisements of State and Municipal Bond Offerings than all other U. S. financial papers combined.

A specimen copy will be sent gratis upon application

INVESTMENTS AND THE MARKET

New General Motors Works at Oshawa — Canadian Converters' Profits Good

Canadian Consolidated Rubber Co., Ltd.—At a meeting of the company last week two new directors were added to the board. They were Sir Chas. B. Gordon, prominent in [illegible] and financial circles in Montreal and Canada, and Lieut.-Col. Herbert Molson, M.C., another prominent business and financial man.

The board of directors of the Canadian Consolidated Rubber Co., Ltd., as now constituted, comprises: Sir Mortimer B. Davis, Sir Chas. B. Gordon, K.O.B.E., Lieut.-Col. Herbert Molson, M.C., E. W. Nesbitt, M.P., J. B. Waddell, Victor E. Mitchell, K.C., W. A. Eden, R. E. Jamieson, A. D. Thornton, H. Weller, Col. S. P. Colt, C. B. Seger, H. E. Sawyer, J. N. Gunn, F. S. Williams.

British Forgings Co.—Official announcement has been received of the purchase of the company's plant at Ashbridge's Bay, Toronto, by Baldwins, a large British steel manufacturing firm. No announcement has yet been made of the purchase price or of the extent of the operations to be carried on by the new owners.

Before the armistice was signed the British Forgings Co.'s plant was one of the largest munition plants in Canada, but since last fall, when orders were received to cease operations, the plant has been idle. The plant is stored with hundreds of thousands of 9.2 and 6-inch shells, belonging to the Imperial Munitions Board and the United States government, but as yet it has not been disclosed whether or not these munitions are included in the sale of the works.

The plant, when operating at full capacity, employs about [illegible],000 hands, and will be a great asset to Toronto as a permanent industry.

Canadian Converters Co.—Earnings of the company for the past fiscal year amounted to $257,324, being the highest in the company's history, an increase of $39,435 over the 1917-18 period. After setting aside the sum of $30,000 for war tax and bad debts, and after deducting bond interest, depreciation allowance, the balance amounted to $176,384. Among the items in the profits of the company are included $2,7[illegible] interest on Victory bonds, against $572 the previous year.

Owing to the fact that the war tax for 1917 was in excess of the amount provided for in the 1918 statement by nearly $20,000, an adjustment was made in the balance of profit and loss carried forward into last year's statement, which, with the addition of $89,709 carried forward last year, now stands at $44[illegible].

Reserve for depreciation was increased by some $27,000 during the year, being shown as $184,730. A survey of the balance sheet discloses continued improvement in the company's financial position, working capital at $795,112 standing at $4[illegible],279 in excess of that of last year, and almost $116,000 over that of the year before.

General Motors of Canada, Ltd.—The company has just announced part of its extension at Oshawa. It was announced some time ago that the General Motors Co. was erecting a large plant at Walkerville, Ont., where motors, transmissions and all heavy parts of motor cars used in Oshawa assembling plants will be manufactured. These operations are going ahead very rapidly, and the two units now well under way are [illegible] feet by 160 feet. For the time being, motors, transmissions, etc., for McLaughlin cars, Chevrolet cars and trucks and Oldsmobile cars and trucks will be made in Walkerville. But without delay, castings, motors and transmissions for Samson tractors and G.M.C. trucks will also be turned out.

In Oshawa, where McLaughlin and Chevrolet cars are now made, tremendous alterations and extensions are planned, and an entirely new plant, 400 feet by 80 feet, four-story, will be erected to assemble Oldsmobiles and trucks. It is planned to have this building finished to enable them to start production this fall.

In addition to this plant, it has been decided to erect a central shipping building, 200 feet by 80 feet, with a capacity of fifty-six freight cars under roof, so that inclement weather will not handicap loading operations. In conjunction with this central shipping station there will be a large storage building with a capacity of 1,000 cars. This building will be 400 feet by 80 feet, four stories. The third building to be erected is a large central enamelling plant, equipped with the most modern facilities for efficiency and mammoth production. This building will be 300 feet by 80 feet, three stories.

About 1,600 employees have been added to the plant at Oshawa, which is another sign of the company's extension and intention of further expansion.

Grand Trunk Railway Co.—During the year 1918 the company was just able to meet operating expenses and fixed charges; nothing was paid to shareholders. A comparative statement of the financial results is given below. The preliminary figures given in *The Monetary Times* of April 18th should have been pounds rather than dollars.

	1917.	1918.
Gross receipts	£9,957,110	£12,655,224

"Positions Wanted," 2c. per word; all other condensed advertisements, 4c. per word. Minimum charge for any condensed advertisement 50c per insertion. All condensed advertisements must conform to usual style. Condensed advertisements, on account of the very low rates charged for them, are payable in advance. 50 per cent extra if charged.

WANTED

By old-established and thoroughly reliable Financial, Real Estate and Insurance Company, having intimate knowledge of values and conditions, agency for mortgage or loan company operating, or proposing to operate, in Vancouver and district. First class references and recommendations supplied. Box 203, *The Monetary Times*, Toronto.

WANTED by strong British office thoroughly competent inspector for Province of Ontario. Man with provincial experience and connections preferred. Applications strictly confidential. State present employer, age and salary expected. Box 195, *The Monetary Times*, Toronto.

[illegible] paid 100 cents on the dollar were held out by W. E. Hodges the liquidator. It appeared to hinge, however, on the successful culmination of negotiations with Balfour, Guthrie and Co., by which the latter company would finance the operations of the canneries for this year. A committee of creditors was appointed to act with the liquidator, and, if they deemed it advisable, to enter into an agreement with Balfour, Guthrie and Co. along the lines suggested or along other lines, subject to ratification by the creditors.

The conditions upon which Balfour, Guthrie and Co. would undertake to finance the operations this year included the admission of the validity of the debentures they held, as well as the fact that $120,000 was admitted to be due and owing thereon; that the validity of the agreement of January 11th regarding the payment of $200,000 in fish be admitted; that only the Great Northern and Port Renfrew canneries be operated, and in a manner approved of by them, with a manager in charge approved by them; that the sum to be advanced should not exceed $150,000, with interest at 7 per cent., to be secured as a first charge; that Balfour, Guthrie should act as selling agents for the pack at the usual commission, and that Mr. Sherman should take no part in the operation of the canneries. Another condition was that, if the canneries were operated at a loss this year, the whole assets shall be offered for sale by public auction.

It was pointed out that, in the event of the failure of the negotiations, Balfour, Guthrie and Co. would press on with the receivership which they had been granted, and which would give them control of the assets, and that litigation in respect to that and the other questions involved would mean great expense.

ADDITIONAL INFORMATION CONCERNING FIRES ALREADY REPORTED

Edmonton, Alta.—May 19—The following properties were destroyed by fire on May 19th: Livery barn owned by W. R. Armstrong. Estimated loss, $4,500. Insurance, $5,000. The companies concerned are: The Phœnix of Hartford, $2,000; Insurance Co. of North America, $2,000; Hartford Fire, $1,000. Building owned by Wainwright and Jackson. Estimated loss, $3,800. Insurance, $4,800, as follows: Atlas, $1,900; Aetna, $1,100; Phœnix of Hartford, $300; Nova Scotia, $1,500. Mr. W. F. Cameron's loss amounted to $1,025, which was covered by insurance. W. Hooson's office was damaged to the amount of $300, which was covered by insurance. Belgian Investment Corporation office building was damaged. Estimated loss, $2,000. Insurance, Mercantile, $2,000.

Lac la Biche, Alta.—May 19—The town of Lac la Biche was partially destroyed. The property damage is estimated at $87,000. The amount of insurance carried is $37,220, as follows: Great North, $6,270; St. Lawrence, $12,850; British Crown, $2,000; Boston, $4,500; Protector, $4,200; Aetna, $1,600; North American, $1,400; Dominion of Canada, $800; Union of Canada, $1,000; Pacific Coast, $1,000; Century, $1,000.

A large automobile concern will, it is expected, be established at Sarnia, Ontario, with American capital.

Profits of the Maple Leaf Milling Co. for the year ended March 31st, 1919, were $929,105, compared with $1,021,266 in 1918, and $738,644 the previous year.

Canadian Chamber of Commerce Proposed

National Organization Discussed Both in East and West —Recent Conference of Boards of Trade in Calgary Favorable—Work of Similar Organization in United States

FOR some time past the possibility and the desirability of forming a business association of national extent in Canada has been discussed both in the eastern and western provinces. A thorough discussion of the subject took place at a meeting in Calgary some months ago of representatives of various western boards of trade. The constitution of an organization patterned after similar bodies in Great Britain and the United States was carefully considered. The Winnipeg Board of Trade was then requested to initiate correspondence with eastern boards of trade to secure their views. Favorable responses were almost in every case received. In view of its pivotal position in Canada, Winnipeg is excellently suited to take a lead in a movement of this kind.

Such an organization might have a beneficial effect in removing some of the misunderstanding which now prevails between industrial interests in the east and west. It would stimulate and develop a viewpoint that would be national both as regards geography and industry.

It is the intention of the Winnipeg Board of Trade, as soon as reports should be received from all sections, to call a meeting of all commercial and business organizations in the Dominion, representative business men, railroad officials and members of the government. Possibly the call for this centralized conference may be issued in the name of the premier or acting premier, as was done in the United States by ex-president Taft, when he called together the organization meeting of the Chamber of Commerce of the United States in February, 1912.

U.S. Chamber of Commerce

In view of the great similarity in industrial organizations between this country and the United States, it is certain that much could be gained by an examination of the resolutions achieved in the latter country.

Purpose of the Organization

The fundamental aims of the United States Chamber of Commerce are given in article one of the by-laws as follows:—

"This association shall be known and designated as the Chamber of Commerce of the United States of America. It is formed for the purpose of encouraging trade and commercial intercourse between the States, the Territories, and insular possessions of the United States of America and with foreign nations, and of promoting co-operation between chambers of commerce, boards of trade and other commercial and manufacturers' organizations of the United States, increasing their efficiency and extending their usefulness. It is intended to secure co-operative action in advancing the common equity in business usages and laws and proper consideration and concentration of opinion and questions affecting the financial, commercial, civic and industrial interests of the country at large."

As an indication of the lines of activity to be pursued this year by the United States organization, the following resolutions, passed at the seventh annual session in St. Louis, may be quoted:—

"We recommend consideration of revision of all federal laws dealing with business conditions, to the end that by proper readjustment of their provisions and of the functions of federal agencies, industry and commerce in the United States may clearly know at all times their powers, rights, limitations and obligations.

"Our government should scrupulously refrain from entering any of the fields of transportation, communication, industry and commerce, or any phase of business when it can be successfully undertaken and conducted by private enterprise. Any tendency of government to enter such fields should be carefully weighed in the light of its possible effect upon the very genius of our institutions.

"The stimulation and development of the nation's international trade is vital to the country's prosperity and the solution of its economic and industrial problems. The members of this chamber, all business, agricultural and industrial associations and organizations, should direct the attention of their members to the importance of this subject and the necessity for encouragement and support of all measures which will facilitate and enlarge American trade with other countries, extend American banking and insurance to accompany and supplement the foreign enterprises of American commerce, and provide adequate cable and wireless facilities.

"The position of the United States as a creditor nation tends to stimulate American investment abroad. It is desirable that every possible encouragement be given such investment, as an essential factor in the development of American foreign trade. Legitimate American investment abroad is entitled to the same measure of protection in the countries where made that is given by this government to foreign investments in the United States. The United States should enunciate and enforce a firm policy for the protection of American citizens and legitimate American enterprises and investments in foreign lands.

"The interests of the public require an immediate resumption of construction activities in order that the housing and other construction needs of the nation, necessarily deferred by the war, may be provided and that labor may find ample employment. The Federal government, especially the railroad administration and the treasury department, as well as state, county and municipal authorities, should proceed with public work wherever possible.

"The government should promptly return to their respective owners the telegraph and telephone properties now being operated by the government, and congress is urged to enact such legislation as will permit, by voluntary agreement and under proper federal consent and regulation, any consolidaof companies or joint utilization of facilities that may be found to be of economic advantage and in the public interest.

"While the utilization of natural resources, the development of industries and extension of commerce depends upon adequate transportation, existing facilities are inadequate to meet the increasing needs of the nation. We urge that the government speedily complete river improvement projects already authorized and that congress provide for a comprehensive system of waterways with co-ordination of the services of waterways and railways.

"Congress should create a federal highway commission, independent of present departments of the government, composed of members from the different geographical sections of the country, to perform all executive functions of the Federal government pertaining to highways, including those relating to existing appropriations in aid of state construction. Such a commission should act in co-ordination with any federal agency that may have functions of articulating rail, trolley, water and highway transportation. Congress should make substantial appropriations for the construction and maintenance of a national highway system to serve the need for the maintenance of interstate travel and traffic. The commission should report to congress a plan for continued aid for state construction of highways in the period beyond 1921, to which time the provisions of existing federal-aid laws extend."

TO GET INDUSTRY FOR ISLAND

An Industrial Promotion Committee has been formed in Charlottetown, P.E.I., for the purpose of stimulating the industrial life of the island. The membership of the committee includes the Council of the Board of Trade, the City Council, the Rotary Club, the Retail Merchants' Association and the Great War Veterans' Association. There are a number of sub-committees, including the Investigation Committee, whose duty will be to investigate and report on interesting industries and the prospects for new enterprises, and a Recommendation Committee which will receive in confidence the financial report of any enterprise wishing to extend its field of operation, or of any new industry. A Publicity Committee is planning a suitable campaign to assist in the work.

DOLLAR CANNOT BE STABILIZED

Speaking before the Vancouver Board of Trade recently, Professor T. H. Boggs, of the University of British Columbia, stated that the dollar could not be stabilized under normal conditions of international trade. He was not referring, he said, to dollar exchange, rates for which always varied, even in this country, in accordance with the volume of trade eastward and westward.

Dealing also with high prices, he urged that a vigorous government investigation be carried out. Profiteering had, he said, been a factor in making the cost of living high. Other causes were waste and extravagance; trades unionism and restricted output; cold storages, inefficiency and the tariff. The fundamental reason and the most important single reason for the rapid increase of prices since 1896 has been, said Prof. Boggs, the change in the volume of the money credit. The deposit currency on this continent, had enormously increased. Speaking about gold, he said that the price of gold never changed but its value did. The price of gold had always been $18.60 an ounce for nine-tenths fine. The weight of the gold dollar had been fixed at 25 and 8-10 grains, but not the value. The solution advanced and endorsed by prominent financiers and others all over the world was to remove gold from circulation and to issue gold certificates for the gold brought to the mint. As prices increased, more gold would be demanded by the mint and vice versa.

CROP OUTLOOK IN WEST

A detailed crop report covering the territories served by the western lines of Canadian National Railways has been received at the head office of the company here, and is generally optimistic in character. This detailed report is divided into three districts, central, prairie and western. The first and last report generally favorable conditions, sufficient moisture and rapid growth with good prospects. The prairie district, in quite a number of cases, indicates a need of rain. Subsequent advices to the company show that heavy rains have fallen over a large part of the area, and the prairie district therefore should be making normal progress at the present time. Out of 245 places reporting along the C.N.R., 127 report the wheat thriving, with weather and other conditions good and prospects bright.

The following summary of conditions in Manitoba has been issued by the Provincial Department of Agriculture, under date of June 9th:—

"Manitoba crops, on the whole, are well advanced and promising. The splendid amount of moisture in the ground at the beginning of May, combined with the general warmth of that month, caused rapid growth. The heat during the last ten days of May was almost unprecedented for the time of year, but very few complaints as to any bad effects have been made. In a few spots slight frosts fell at the beginning of June, but no serious damage occurred. Cutworms are at work in some places, and in the extreme south-western part of Manitoba there are grasshoppers. Damage through soil drifting by wind has not been great, and very little reseeding, if any, has been necessary. At present there is a general need of rain, though the crop is still going ahead on the supply of moisture in the soil. Pastures have been good and animals are thriving. The acreage sown to various crops seems to be about the same as last year. Some correspondents complain that the Winnipeg strike has interfered with farmers getting supplies and machinery needed to carry their work forward, and it is known that the dairy, livestock, wool and egg trades have been harmed by the same cause. Farm labor generally is scarce and wages high, being about $60 to $65 per month and board."

Our Winnipeg correspondent writes that since the above official report was prepared, good rains have fallen, and the outlook is improved.

An official report issued by the Saskatchewan Department of Agriculture on June 17th, states that rain was fairly general all over the province last week. In the south-eastern districts, the grasshoppers have done a great amount of damage, but it is thought the situation is now under control. Reports from south of Moose Jaw, Outlook and Eyebrow indicate serious damage from the same pest.

The recent rains will be helpful in reducing the damage. In the south-western and central districts crops are reported as the best since 1915, no damage of any kind being reported. In the central and northern districts, the rain would appear to have come just in time to save the crops from being destroyed from wind or drought. The cut worms have done some damage in nearly all parts, but it is too early to form an estimate. To summarize the situation, it would seem that the crops are much further ahead than at the same period last year and prospects are generally favorable to crop of at least equal to last year and in parts better than they have been for some years.

Very few of the Winnipeg strikers receive strike pay and considerable difficulty has naturally been encountered in meeting financial obligations. Rental agents have been trying to decide upon a uniform course of action; if heavy arrears are allowed to pile up it is felt that they can never be collected. Rents for May are not paid in many cases, and June will soon be over. All the strikers' available cash is required to meet the more immediate requirements of food, etc. Many Victory bonds are being sold, sometimes at sacrifice prices through ignorance of market values. The banks and reputable dealers are however, paying market prices.

WEALTH OF BELGIUM

Mr. Charles Clavier, general director of Belgium's treasury, has compiled figures of Belgium's wealth on the eve of war and has published them in a 52 page booklet. It shows that as a whole Belgium's wealth before the war amounted to a total of 57,237,000,000 francs, real estate representing 39,477,000,000 francs and movable property the rest of this sum. From the figures compiled by Mr. Clavier this interesting computation has been made: Personal per capita wealth was before the war: 2,003 frances in Italy, 5,000 francs in Holland; 6,150 francs in Germany; 6,875 francs in United States; 7,247 francs in Belgium; 7,250 francs in Great Britain; 7,314 francs in France.

Total annual incomes of the Belgian people were reaching the high figure of 5,857,000,000 francs, that is, 754 francs per capita. Considered in this angle, Belgium is a prosperous nation, as may be ascertained in the following computation: Income per capita: In Germany, 693 francs; in France, 612 francs; in Belgium, 754 francs; in Great Britain, 1,018 francs.

QUEBEC LOOKS FOR MORE CAPITAL

Hon. Walter Mitchell, treasurer of Quebec province, said in Sherbrooke on June 11th, that when in New York recently, he had interviewed capitalists regarding further investments in Quebec. Their attitude was favorable, he said, but they wished to await the outcome of the wave of unrest which was at present sweeping Canada. Sir Lomer Gouin, who spoke at the same meeting in Sherbrooke, stated that much more capital could be used.

"We want to encourage the capitalists of this province and other countries to place their money here," he said. "We have everything that is needed, and it may be that if it is found that the people have confidence still in the government which has aided to make the prosperity of the province you will find before many months that there will be many new industries here, such as you have never seen before. You may say that I am too enthusiastic, but I am not. I have faith in my province and the future. There has been talk of the golden age of Canada, but, knowing this province and reading its history, I can say that the golden age of this province of Quebec, is not in her past, but in her future. I am sure that we are able to meet all needs, for we have here the vigor and intelligence to undertake all tasks, and keep Quebec at the head of confederation."

Hon. Mr. Mitchell also referred to the labor difficulties. "We should remain steadfast as of old," he said, "and be sure that this wave of unrest goes by. Remember that I do not think that labor has no right to organize, for I think they have. They have a right to protect themselves, and also I believe that capital is entitled to legitimate profits and legitimate rights and privileges, and I add that capital cannot get along without labor, nor labor without capital and there must be union of both and co-operation between them, and of the two with the farmer, because he produces what the laborer wants, to make him able to do the work of the manufacturer and capitalist." The balance of Mr. Mitchell's speech was taken up with financial matters, answering criticisms, his contention being in the main that, while the debt of the province had increased as to amount, it had decreased from $15 per head in 1905, when Sir Lomer came into power, to $13.51 per capita on June 30, 1918, so those who asked what was done with the surpluses that had come each year, amounting to over nine millions, would point out that the debt had been reduced by $1.49 per head. It was impossible to spend money for roads, for education and other necessities, as has been done, without having to get the money, and interest had to be paid on loans, and this was why the interest costs were higher each year.

On Saturday, June 16th, a cyclone struck Winnipeg, Man., doing damage estimated at $500,000.

CANADIAN COAL PRODUCTION IN APRIL

The following summary of the output, in tons, of coal in all mines in Canada in April is presented by the Dominion Bureau of Statistics:—

	[illegible]	[illegible]
	Tons	Tons
Nova Scotia	[illegible]	[illegible]
New Brunswick	[illegible]	[illegible]

Total for Canada	[illegible]	[illegible]

REPORT ON EMPLOYMENT SERVICE

For the week ending May 31st the Employment Service of the Department of Labor received reports from 79 of the employment offices established co-operatively by the Dominion and provincial governments. These offices reported that during the week they had referred 5,117 applicants to positions, and had received notification that 4,494 of these had secured regular employment. In addition, 46[illegible] casual jobs were supplied. This record shows an improvement over the previous week, when 78 offices reported that 4,777 applicants were referred to positions, and 4,327 of these had received regular employment.

During the week 7,113 applicants were registered, of whom 454 were women and 6,659 were men; and 7,787 vacancies were notified by employers—769 for women and 70[illegible] for men. Of the placements in regular employment, 301 were women and 4,193 men. Of the latter, 2,429 were returned soldiers.

Of the regular placements, 56 were reported by Prince Edward Island, an increase of 20 over the preceding week, 109 by Nova Scotia, an increase of 13; 188 by New Brunswick, a decrease of 52; 369 by Quebec, a decrease of 38; 2,159 by Ontario, an increase of 778; 245 by Manitoba, an increase of 29; 416 by Saskatchewan, a decrease of 122; 460 by Alberta, a decrease of 332; 496 by British Columbia, an increase of 5.

ROYAL COMMISSION ON INDUSTRIAL RELATIONS

Additional sittings of the Royal Commission on Industrial Relations, not planned in the original program, were held in Shawinigan Falls, Que., on June 12th, and in Ottawa on June 13th. The labor members did not attend the former meeting.

In Ottawa, the principal witness was Mr. W. M. Southam, of the Ottawa Citizen, who advocated a tax on land values. The eight-hour day, old-age pensions, etc., did not go to the root of the difficulty, he said. He urged the commission to recommend to the Dominion government that a tax of five mills on the dollar be immediately placed on the capital value of all natural resources, including land values, and that this tax be increased each year until the government's proportion of the country's land values is taken for municipal purposes; also that provincial and municipal governments gradually shift their taxes to land values and thus relieve the burden on improvements, business, etc.

Evidence was also received from representatives of the Ottawa Electric Railway employees who said they had no confidence in the Industrial Disputes Act. Wages, they said, should be regulated according to the cost of living.

Mr. E. M. Trowern spoke on behalf of the Retail Merchants of Canada. He condemned co-operative societies as commercially unsound and wrong in principle. He said that sufficient attention was not being devoted to the retailing and distributing classes.

STANDARD RELIANCE MORTGAGE CLOSES DOORS

Action Taken at Instance of Directors—Large Assets Which Cannot be Liquidated at Present

ON Wednesday, June 18th, the Standard Reliance Mortgage Corporation of Toronto closed its doors upon the granting of an order for winding up by Mr. Justice Masten at the request of the directors. The company is understood to have large holdings of lands which cannot be disposed of at the present time on satisfactory terms.

The Standard Reliance Mortgage Corporation was incorporated in April, 1913, as an amalgamation of the Standard Loan Company, founded in 1873, and the Reliance Loan and Savings Company of Ontario, founded in 1893. Both of these concerns had their head offices in Toronto. The new company also included the following eight smaller companies, which were incorporated at the time indicated:—

August 27, 1902—Sun & Hastings Loan & Savings Co., Toronto.
May 28, 1880—Ontario Industrial Loan & Investment Co., Toronto.
March [illegible], 1893—Aid Savings & Loan Investment Co., Toronto.
January 28, 1883—Huron & Bruce Loan & Investment Co., Goderich.
September 24, 1886—Canadian Homestead Loan & Savings Co., Toronto.
February 11, 1890—Canadian Savings Loan & Building Association, Toronto.
June 24, 1889—Acme Loan & Savings Company, Toronto.
September 27, 1881—Chatham Loan & Savings Company, Chatham.

Shortly after this amalgamation the Standard Reliance acquired an interest in the Dovercourt Land, Building and Savings Society, which carried on extensive dealings in real estate. The methods of operation are indicated by the balance sheet for 1914, which includes among the assets balances due on sale, agreements purchased from and advances to the Dovercourt Land Building and Savings Company, and other companies; these advances were secured upon the lands and improved property of such companies.

The present directorate of the company includes the following:—N. H. Stevens, Chatham, Ont., president; John Firstbrook, Toronto, vice-president; E. Jessop, St. Catharines, Ont.; J. A. McEvoy, Toronto; David Ratz, New Hamburg, Ont.; James Gunn, Toronto; David Kemp, Toronto; E. C. McNally, Niagara Falls; R. H. Greene, Toronto; W. J. Fawcett, Toronto. The former general manager, Mr. Herbert Waddington, died about three weeks ago, and the late E. F. B. Johnston, K.C., was also chairman of the board of directors. The secretary-treasurer of the company is Mr. F. E. Rathbun, and the assistant secretary, Mr. Robert M. Boulden.

The company's balance sheet as at 31st December, 1918, showed total assets of $8,523,984, of which $8,028,708 were mortgage loans with accrued interest. Stocks, bonds and debentures amounted to $418,111, and real estate acquired under foreclosure was valued at $233,087. Office premises, including those formerly occupied, and furniture, totalled $307,981. There were also war loan and municipal bonds, bank and railroad stocks and cash on hand. The amount of debentures outstanding was $3,972,482, and deposits made up the balance of the liabilities to the public totalling $5,064,514. The subscribed capital was $2,644,020, of which only $33,085 was unpaid. There was a reserve fund of $650,000, a contingent of $60,000, and a balance in loss and gain of $12,990.

The application for the winding-up order was made on the initiative of Mr. John Firstbrook, director, and Mr. F. C. L. Jones, counsel for the company. The decision was reached at a meeting of the directors held on Wednesday at noon. Mr. G. T. Clarkson was appointed temporary liquidator, with a reference directed to Mr. G. A. C. Cameron, Master in Chambers, Osgoode Hall, Toronto. Speaking of the outlook, Mr. Clarkson said on Thursday:—

Liquidator's Statement

"The Standard Reliance Mortgage Corporation has advanced about three and a half millions of dollars to the Dovercourt Land, Building and Savings Company, and also owns the capital stock of the same company to the amount of over $400,000, a total of between $3,900,000 and $4,000,000. Interest upon these loans has not been paid by the Dovercourt Company to the Standard Reliance, but the latter, being of the opinion that there was a heavy surplus in the Dovercourt properties, has taken such interest into its profits, and employed it in the payment of dividends. This, with the cost of carrying these properties, has meant the using up of the quick assets of the Standard Reliance, except to the extent that they were replenished by the receipt of deposits from the sale of debentures. Recently the question was raised as to the propriety and the legality of the payment of dividends under these circumstances.

"Mr. Waddington died recently. It was after that that the directors had the affairs of the company investigated. And following the sale of the Lawrence Park properties, which realized only about one-third of what was expected, they came to the conclusion that they could not properly continue to pay dividends, and also the value of the real estate held would be considerably affected if forced upon the market. It was apparent that if the dividends should be passed on July 1st, the confidence in the company's standing would immediately become undermined, and depositors would draw out their deposits, which would amount to one million dollars. The withdrawal of their deposits would have left the company in the position where it might not be able to protect the realty holdings, which, in turn, would have to be sacrificed. Such a course of events might have allowed depositors to be paid in full, but would put the debenture-holders in such a position where ultimately they might have recovered a very much reduced return. The assets of the company, in addition, might have to be sacrificed.

"As a result of their investigations, the directors and officers of the company are of the opinion that if the assets are nursed they will produce sufficient to pay all creditors, and probably leave a surplus to stockholders. In order to accomplish this they came to the conclusion that the only thing to do was to apply to court for a winding-up order, and thereafter immediately have the assets turned over to a new company, with creditors accepting preferred stock, and shareholders common stock in the same. This company would be left with quick assets of an amount sufficient to permit of the protection of the properties, and their gradual and advantageous sale. The control of the new company will be vested in a board of directors composed of representatives of shareholders, debenture holders, and depositors, which would then work out its affairs with a minimum of expense which would only be a minor portion of what they would be if the company were wound up by forced liquidation in the ordinary way.

"Before dealing with the matter the directors consulted with representatives of debenture holders, shareholders and depositors, who gave their unqualified approval of the proposal, and stated their belief that it would result in the payment of creditors in full with a substantial return to stockholders.

"The winding-up order contains a special term permitting the calling of meetings of the shareholders, depositors and debenture holders, without waiting for the appointment of a permanent liquidator, as is customary."

A provisional balance sheet of the company, prepared by Mr. Clarkson, shows deposits $1,000,000, debentures $4,000,000, and capital $2,600,000, a total of $7,600,000 in liabilities. Assets include Dovercourt loans $4,000,000, mortgages $2,800,000, quick assets $700,000, and other assets of $700,000, a total of $8,200,000.

When asked as to the position of the Sterling Trusts Company, which has been associated with the Standard Reliance, the manager, Mr. C. Bauckham, stated to *The Monetary Times*, that it would not be effected to any material extent; its assets, he said, include a block of shares in the Standard Reliance.

CLOSING OF THE BUDGET DEBATE

EARLY on Thursday morning, June 19th, the vote in the House of Commons was taken on the budget speech, after a debate extending over a period of two weeks. The McMaster amendment, which was referred to in these columns last week, was defeated by 120 to 70 and the government had a similar majority on the vote on the budget itself.

Although interest in the debate lagged somewhat towards the end, the speech of Mr. W. S. Fielding brought a good attendance in the house. He referred to the reduction being made in the tariff by Sir Thomas White as a movement in the direction of reciprocity, on which issue the Conservative government had come into power in 1911. Some of the western members went together with T. A. Crerar, former minister of agriculture, to the cross benches, but most of them remained with the government.

Sir Thomas White, in his final remarks, replied to criticisms which had been made some days ago by W. C. Kennedy, Liberal member for North Essex, Ontario, regarding government financing. He maintained that the government had conscripted wealth by means of the business profits tax through which $97,000,000 had been raised. This tax is being continued. Canada, he said, has emerged from the war with its finances in a healthy condition. The national debt is $250 per capita, while that of New Zealand is $900, and that of Australia over $300. He defended tax free government bonds, explaining that it was necessary to make them attractive to the investor, because Anglo-French bonds at the time of the first war loan were selling on a 7 or 8 per cent. basis. Canada could not rely on a voluntary system of floating the loans as was done in the United States, so the cost was higher here.

Referring to high prices, he said this was the result of diminished production and increased consumption during the war. Combines may be prosecuted by the government, but individuals or groups of men who make money honestly confer a benefit on the country.

The underlying cause for the high cost of living, he said, is the fact that large numbers of men had been withdrawn from production to fight in Europe. The urgent demand for goods will result in continued high prices. The United States is extending millions of dollars of credit to European nations, and although the sooner private interests can attend to the financing the better, yet Canada had to do something in this way. It was too early yet for a complete tariff revision, and his budget represented a sincere attempt to keep stable the industries of this country at an unstable time, and at the same time make reasonable concessions to urgent demands. It was important, he said, that when the time came for tariff revision an effort should be made to try and get unity among the diverse interests in this country.

Regarding the exemption of the war loan bonds from taxation, the finance minister said that if this had not been done a higher yield would have been necessary. There was competition for money for investment and the amount lost by tax exemption would not be as great as the extra interest that would have had to be paid. Commissions paid for selling the loan had been fixed on a basis decided upon by a committee headed by Mr. Thomas Bradshaw, of Toronto, and this basis had been reached by considering the expense of operation.

Income tax would now, he said, be about as high as in the United States. There was also to be considered the fact that in some places in Canada there were as many as three income taxes to be paid. Dominion, provincial and municipal. Too high a rate might check immigration to Canada. "The government has given consideration to the land tax," said the minister, "but has decided that it would not be expedient to introduce that. To impose a land tax on municipalities would be a serious matter. At any rate there would be but four millions or so collected."

THE RADICAL VIEWPOINT

THE danger of revolutionary agitations arising out of the war may prove to be small compared with the more subtle and widespread danger of a tendency to ignore what is good and to magnify what is evil in interesting institutions. This is emphasized in "The Review," a New York weekly, the first issue of which has just appeared. This is accompanied by a readiness to throw overboard any connection or tradition, however fundamental it may be, which seems to obstruct the immediate realization of some scheme of improvement. The most serious feature of this situation is the fact that it has spread among all classes of people.

Continuing, the "Review" says:—

"And there can be no greater error than to ascribe this phenomenon to the war. Not only was it with us, and in great force, a number of years before the war, but it may be doubted whether it has in any essential respect been modified by the war. All that the war has done is to give it a larger mass of material to act upon, an unexpected opportunity to manifest itself in concrete ways which, in more settled times, did not easily present themselves. Minds, for example, that are not gravely disturbed by the program of a Lenin or a Bela Kun are minds that were so "open," before Lenin or Bela Kun had been heard of, that nothing which these prophets of a new day might propose would come as a real shock to them. That this is so—if one doubts it—a single consideration should suffice to show. The curious spectacle has been presented of intense hostility and abhorrence on the part of veteran socialists like Spargo and Russell to that which has been looked upon with philosophical serenity by the "open minded" reformers who had been coquetting with socialism while never ranging themselves under its banner. The explanation of the paradox is not far to seek. The seasoned socialist has been fully aware, all along, that it was a grim business he was dealing with; he was willing to go thus far and no farther, because he realized how deep a break was involved in going even thus far. He was prepared to sacrifice so much of what human life and human civilization has hitherto been built upon, for the sake of what he conceived to be a higher civilization; and precisely because he knew what that sacrifice meant he shrank with a genuine and instinctive abhorrence from the more sweeping sacrifice which the Bolshevist program demanded. But to the dilettante, whose hospitality for socialist ideas was merely the result of a loss of grip upon the values of life as it is and has been, there was only a faint and intellectual difference between Lenin's Bolshevism and the more or less misty socialism upon which he had for years been bestowing his platonic affection. Bolshevism, like socialism, he said to himself, is probably not half so black as it is painted; and since a "bourgeois" civilization is not worth saving anyhow, who knows but that Bolshevism may prove to be the best way to get rid of it?"

SAFETY OF A LIFE INSURANCE INVESTMENT

LIFE insurance agents have frequently to meet the objections of prospects who claim they do not require protection and who fail to see that a policy has certain desirable investment features. It can always be urged in reply that the investment of funds on a large scale furnishes an opportunity for diversification which cannot be obtained by the private investor of ordinary means. Then there is also the fact that the company's organization for purchasing securities, mortgages, etc., has a wider field for selection than has the private individual.

Underwriters should not fail to emphasize the fact that the policyholder of a life insurance company has the first claim upon its assets and the shareholder's claim is to what remains, that is to the surplus. At December 31st, 1918, this surplus in the case of Canadian companies totalled $38,455,590; total assets were $347,507,696 and all liabilities, including reserves but excluding capital, were $309,052,106. In other words the assets exceeded liabilities by about 12 per cent. The paid-up capital stock was $5,921,342. This surplus was greater than any single class of assets with the exception of loans on real estate, which totalled $90,653,299, bonds and debentures which totalled $153,486,418, and policy loans $43,886,661. Total holdings of real estate were $17,915,818, so that if in any way this property should be wiped out the policyholders would not, generally speaking, be affected, although in the case of some individual companies the holdings of real estate might exceed the surplus to policyholders. Holdings of stocks totalled $20,967,662, or just about half the surplus. Policy loans, it will be observed, only slightly exceeded the surplus, and loans on real estate could depreciate to the extent of over forty per cent., or the value of bonds and debentures by about twenty-five per cent., before the policyholders' equity in the assets of Canada life insurance companies would be affected.

This is in fact the strong point of the insurance company which has a capital investment. In return for assuming primary risk of loss and the danger that the organization of the company may not be successful, the shareholder is, of course, entitled to a substantial dividend. The relative position of the policyholder and of the shareholder, from the purely investment point of view, is similar to that of the bondholder and the stockholder in ordinary industrial enterprise. The insurance company has contracted to pay to the policy holder under certain circumstances a specified sum of money and the entire assets of the company are pledged for this purpose. The shareholder's equity is the margin after proper provision is made for all these contracts and any other liabilities, and his profits arise from the difference between the interest paid to the policyholder and the interest earned on investments. There is also, of course, an allowance necessary in consideration of the protection afforded the insurance policyholder.

RECORD PRICE FOR MONTREAL EXCHANGE SEAT

A Montreal Stock Exchange seat sold this week for $30,000, equal to the highest price ever paid for a membership on that exchange. The previous sale took place about two months ago, the price being $26,500, or $3,500 under the level now established.

LARGE AUTOMOBILE INDUSTRY AT SARNIA

Definite announcement has been made that the gigantic automobile industry locating in Port Huron on a plant site of [illegible],000 acres will locate an immense plant on a part of which is now the Indian reservation, south of Sarnia, as the Canadian end of the new motor concern.

The local legal representatives of Messrs. Wills and Lee, the former Ford directors, who are putting the new car on the market, have taken out options on nearly 300 acres of the Indian reserve.

TO CREATE BOARD OF GRAIN APPEALS

Amendments have been made to the Canada Grain Act which creates a board, to be known as the Board of Grain Appeals, according to an announcement made by Hon. A. K. Maclean, Acting Minister of Trade and Commerce. The board is to consist of three members, who must be grain experts, and who shall hold office for a period of ten years. The offices of the board will be located at Fort William, where it can most conveniently hear appeals from the decision of the chief inspector on samples of grain, respecting which the grading is disputed.

Provision is also made for the establishment of a Survey Board at Calgary for the district of Calgary. The amendments provide that all track buyers and owners and operators of warehouses and sills and all grain commission merchants shall take out annual licenses. In future, no person, firm or corporation, licensed as grain commission merchants, shall, directly or indirectly, buy for his own account any grain consigned to him for sale on commission.

PERSONAL NOTES

Mr. William H. Magh has been elected a member of the Montreal Stock Exchange.

Capt. the Hon. W. J. Shaughnessy, who has just recently returned from overseas service, has been elected to the directorate of the Canadian Pacific Railway.

Mr. Robert Junkin, late manager of agencies of the Manufacturers Life Insurance Company, was presented with an engrossed address and a purse of gold by the company's agency force on June 11th.

Mr. J. M. McWhinney has been appointed manager of the Toronto branch of the Huron and Erie Mortgage Corporation, and of the Canada Trust Company, both of London, Ontario. This branch will be opened shortly, at 18 King Street West, which is being remodelled. Mr. McWhinney commenced his business career as secretary-treasurer of the Synod of Huron at London, Ontario. From there he came to Toronto as assistant manager of the Union Trust Company, being subsequently manager of their Winnipeg branch, and general manager, from which position he resigned a short time ago. He has had a wide experience in financial and trust business in Toronto, and also has a large circle of friends. The Huron and Erie Mortgage Corporation has a paid-up capital and reserve fund of $5,800,000, with total assets of over $18,000,000. The Canada Trust Company, which is under the same management and almost wholly owned by The Huron and Erie, has a paid-up capital and reserve fund of $1,600,000, and total assets of over $10,000,000.

Mr. F. E. Fisher is the new manager of the Canada Bond Corporation, Toronto, in succession to Mr. A. W. McLennan, who resigned to enter the firm of R. A. Daly and Co., Ltd.

Mr. Robert Hobson, president of the Steel Company of Canada, Limited, has been elected to the board of directors of the Toronto General Trusts Corporation, to fill the vacancy caused by the death of B. P. McLaren.

Mr. Lionel H. Clarke, chairman of the Toronto Harbor Commissioners, has been elected to the directorate of the Toronto General Trust Corporation, to fill the vacancy on the board caused by the death of Mr. W. D. Matthews.

Mr. Roger H. Williams, banker and lawyer, of New York, has been elected a vice-president of the National Bank of Commerce in New York. He retires from the law firm of Williams, Glover and Washburn, of which he was head.

Mr. W. G. Sanburn, chartered accountant of Winnipeg, has severed his connection with the firm of Cooper, Sanburn and Company, and has opened an office at 214 Curry Building, Winnipeg, under the firm name of W. G. Sanhurn and Company.

Mr. John S. Carmichael, financial agent of Saskatoon, has been in Winnipeg, Toronto and other eastern cities on a business trip. Mr. Carmichael is official administrator in Saskatoon for the Northern Trust Company, of Winnipeg, in addition to which he has many other financial connections.

Mr. T. A. Baxter, Canadian representative of the Guaranty Trust Company of New York, has opened an office at 711 Temple Building, Toronto. Hitherto his headquarters have been at the Buffalo office of the company. Mr. Baxter's work in Canada is entirely concerned with the Guaranty Trust Company's banking and wholesaling operations, as the bond business here is now handled by the United Financial Corporation.

Mr. W. E. Baldwin, of Montreal, has returned from Winnipeg, where he arranged to open a branch office at Regina to take care of the business of the Continental Insurance Company, Fidelity-Phenix and Fidelity Underwriters Companies. These companies are now writing strike and riot insurance. Mr. Baldwin says that the work of the Citizens Committee, especially the manner in which they arranged to man the fire and water works departments, deserves much credit.

OBITUARIES

Mr. Alexander W. Wright, vice-chairman of the Ontario Workmen's Compensation Commission, died at his home in Toronto, on June 12th.

Mr. John W. Maughan, who many years ago was assessment commissioner for Toronto, died at Port Carling, Muskoka, Ont., on Sunday, June 15th.

Mr. John McDougald, who for the past twenty-three years has been Dominion Commissioner of Customs, died in Halifax, N.S., on Saturday, June 14th.

Mr. John B. Lunger, vice-president of the Equitable Life Assurance Society, died a few days ago. A meeting of the Executive Committee of the Association of Life Insurance Presidents, specially called for this purpose on June 13th, adopted a minute in respect to the late Mr. Lunger.

WEEKLY BANK CLEARINGS

The following are the bank clearings for the week ended June 12th, 1919, compared with the corresponding week last year:—

CANADA'S RELATIONS WITH UNITED STATES

Latter Country Does Not Look for Any Annexation Movement—British Empire is United Commercially

"THE loyalty of Canada to the empire is not questioned and annexation (of which certain Canadians seem to be fearful) is but a dream," says William B. Ellison, of New York, writing in the New York Sun. "That the material interests of Canadians might be better served were Canada a part of the United States is a question that I would leave to be answered by the million and a half of native born Canadians who felt, at any rate, that they bettered their conditions by becoming residents of this country. The subject, however, does not create even a ripple of interest here, and its discussion is almost exclusively confined to our Canadian American residents. I have in the past thirty odd years or more talked to the representatives of every political party and faction in the United States regarding it and have yet to find any favorable sentiment.

"The consensus of thought seems to be that the doors would readily open to the admission of Canada did she desire a union with us, and there is a most kindly feeling toward her and a splendid appreciation of her people; but I feel confident that this government would not tolerate a movement looking toward a political nnion unless it should have its initiative in Canada and have the fullest approval of the British government. In this connection, as stated in a recent issue of the St. Thomas Times-Journal, it may be that 'Canada's place as intermediary between the two great branches of the English speaking people is of the highest possible importance to both.'

"The acute industrial difficulties of the past few weeks have not been assuring to American capital seeking investment in Canada with a view of materially aiding in the development of her vast resources. Recent events in Manitoba, and earlier still (and of perhaps a different complexion) in Quebec, have not tended to create confidence in the determination of the Canadian government to suppress disorder. Canada has been wonderfully free from disorderly elements in the past, and it is to be hoped that there will be no weakening in its policy toward such disturbers.

"Former President Cleveland made his name great by an unflinching determination to suppress riot and rioters, and no government can afford to falter when the public peace is threatened. The very essence of good government is the maintenance of good order, and the use of all the forces that will secure it is justifiable.

"The Dominion Commission on Industrial Relations is promissory, however, of a better understanding between the employer and employee, and its activities should go far toward a solution and settlement of their differences. The interests of both are interdependent.

"The recent declaration by influential, if not controlling, elements in the Republican party of this country, to the effect that there will be a prompt rearrangement of the American tariff schedules, gives rise to serious reflection and will furnish a great fund of discussion in both Canada and the United States.

"We have here a large number of people who would let in the raw products of Canada free of duty. They favor free raw materials as a tariff measure. The consummation of their desires would appeal, I assume, with great vigor, to the producers of raw materials in Canada—notably the farmers. The Republicans, however, have for a long time espoused the cause of the American farmer, and evidence a determination to protect him as well as the manufacturer. It would therefore appear that we may have a renewal of the conditions that finally led to the McKinley bill in 1890.

"The passage of Mr. McKinley's tariff measure was accepted pretty generally throughout Canada as directly discriminative against her and her products, and led to some bitterness. I sincerely hope that there will be nothing of a similar nature to follow the new tariff legislation that is now proposed by the American Congress. There are people, and many of them, who believe that the United States should let in tariff free raw materials from all of the countries in both North and South America. They claim that, with our greatly increased merchant marine, and with a further increase in our carrying power, together with our great financial strength, we would soon absorb and control the exportation of raw materials to Europe.

"These people illustrate their point by referring to the McKinley bill, which shut out the farm products of Canada and forced Canadians to seek a market therefore at Liverpool, where such products then came into direct competition with our own, instead of being controlled by us, as they had been, theretofore. All countries concerned need revenues, and it will be very difficult to adjust their tariffs so as to avoid friction and ill-will.

"In this country labor will be exploited and made to understand that to maintain the present high standard of wages the American manufacturer at least must be given a closer grip upon the American market. Capital will not resent increased protection for American goods, and it would seem to me that between the two we are very likly to have substantial increasee in our tariff schedules, and, as a result, more or less friction between the countries interested.

Public Ownership

"It is quite apparent that Canada is waking up to a proper appreciation of municipal ownership and municipal operation. She has had her attention forcibly directed to the utter failure and the growing unpopularity of public ownership and operation in the United States.

"She now sees that fifteen months of governmental operation of the railroads of the United States have proved disastrous and that in spite of an increase of 25 per cent. in freight rates and of 50 per cent. in passenger rates—larger than private owners had ever dared to dream of and producing an increase in gross revenue of $865,000,000—net earnings decreased $285,000,000, the people suffering at the same time from an inferior service not equaled in the country in fifty years or more. In addition our people are called upon as taxpayers to advance a further $210,000,000. It would seem that the total cost to the people of the United States of the fifteen months experiment has therefore totalled about $1,075,000,000.

"Equally unpopular has been the government's control of the telephone, telegraph and cable systems. Government ownership and operation, like many other political fads, has exploded under practical application. That the result would be the natural sequence of the theory has long been understood by people practically familiar with proper governmental functions.

"This subject is one of most momentous importance to Canada and the United States, involving, as it may, trade relations between Great Britain and her colonies to the exclusion of the United States and other countries. And it will be seen at a glance that such an arrangement might involve many articles of commerce concerning which the United States and Canada could agree to their mutual advantage, but on which this country and Great Britain may not agree, so far as the tariff is involved.

"It may not reasonably be expected that in the reshaping of our revenue laws there will be complete harmony between Great Britain and the United States, and should Canada involve herself in some interempire arrangement she may then find our tariff prejudicially affecting many of her own products and she be correspondingly precluded from her most valuable market.

"This country is wedded to a protective tariff on manufactured goods, and I am convinced that the revision of the tariff now promised by the Republican Congress will raise, rather than lower, the duties to be paid on articles of foreign manufacture. There is, however, some radical difference of opinion, so far as raw materials are concerned, and I understand that Canadian exports are largely confined to those articles, and I am also of the opinion that this market offers better advantages than any other.

"It follows, naturally, that an interempire trade arrangement presents a subject that should be given the most mature consideration, and may lead to friction. That the subject is being seriously considered is evidenced by the speeches recently made before the Liverpool Committee of the Royal Colonial Institute, the purport of which was to begin a movement looking toward closer trade relations between Great Britain and her colonies. The idea has been most cordially received in South Africa."

TORONTO STOCK EXCHANGE ANNUAL

The annual meeting of the Toronto Stock Exchange was held on June 17th. The new officers elected for the ensuing year are as follows: President, G. W. Blaikie (G. W. Blaikie and Co.); vice-president, E. G. Wills (Brouse, Mitchell and Co.); secretary, H. Franks (Osler and Hammond); treasurer, C. E. Abbs (A. E. Ames and Co.); committee, J. C. Fraser (F. H. Deacon and Co.), D. S. Cassels (Cassels and Biggar), O. Heron (Heron and Co.).

The retiring president, Mr. H. R. Tudhope, expressed his appreciation of the support he had received from the members during the year. He also dealt with the part which members of the exchange had played in connection with the Victory Loan campaign and expressed the view that increased business might be expected in the near future.

CANADIAN CREDIT MEN'S ANNUAL

The annual meeting of the Canadian Credit Men's Association, Ltd., was held in Toronto, on Tuesday, June 17th. Routine business was transacted and the following new officers were elected for the coming year:—

President, A. G. Parker (W. J. Gage and Co., Ltd.); vice-president, Thos. W. Learie (W. R. Johnston and Co., Ltd.); secretary-treasurer and manager, A. S. Crighton; directors, H. E. Dane (Dominion Rubber System, Ltd.), George T. Dunn (Canadian Steel and Wire Co., Ltd.), John B. Kirby (Williams, Greene and Rome Co., Ltd.), Jas. A. Lamb (Grant-Holden-Graham, Ltd.), E. A. Lye (W. R. Brock Co., Ltd.), E. S. Little (Robinson, Little and Co., Ltd.), C. Marriott (Geo. Goulding and Sons), D. Marshall (A. T. Reid Co., Ltd.), T. McMillan (Ansley Dineen Hat and Fur Co., Ltd.), C. J. Purkis (Caulfeild, Burns and Gibson, Ltd.), J. B. Ratcliff (John Northway and Sons, Ltd.), C. F. Richardson (H. P. Eckardt and Co.), Mark Rowe (Canada Furniture Manufacturers, Ltd.).

LONDON AND LANCASHIRE LIFE

During the year 1918, the London and Lancashire Life and General Assurance Association, Limited, issued 1,834 policies amounting to $4,780,830. A substantial gain was made in the amount of business in force. The total new premium income for the year amounted to $283,744.

The London and Lancashire Life and General is an old insurance company and is now on its 50th year of business. The manager for Canada is Mr. Alexander Bissett, of Montreal, and the return made to the Department of Insurance, at Ottawa, for 1918, shows a net premium income in Canada of $501,506. New policies to the number of 586 and amounting to $1,405,731 were issued during the year. The net amount in force at the end of 1918, in Canada was $15,447,262. The company does business throughout Great Britain and in Canada, South Africa, Egypt and India. Total assets now amount to $25,486,354.

The Banks and the Borrowers

How the Canadian Banking System Acts as a Distributor of Funds—Relations With New York — The Attitude of the Farmer — Present Day Difficulties

In a recent number of the "Home Bank Monthly" the criticisms of banks by borrowers is discussed by a writer who signs himself "Democritus."

"There may be broadly definable points of constitutional difference between the banking system of the United States as compared with that of Canada," he says, "but in these 'after the great war' times and circumstances they hold one common resemblance in that each is the subject of vigorous criticisms directed from the same source. It seems that bankers everywhere are not coming to the assistance of the worthy borrower with a sufficient degree of abandon. There is too much business formality, and not enough human consideration for the particular claim of the respectful and worthy suitor for a needful loan.

"An American writer of characteristic form complains that the banks in his country make it a practice to refuse a loan to the stranger within their gates, or the applicant whose account is with another bank.* This is bad enough. It discriminates against the newly-arrived settler and the 'regular fellow' whose bank has found it necessary to shut down on accommodations all along the line; but at the worst this stiffness on the part of a manager would only find an occasional opportunity for exercise, so that his refusal to extend credit under these particular circumstances would not affect general financial conditions in his locality.

"A typical contribution on the same theme from a Canadian source makes a more sweeping and serious complaint. This writer alleges that it is the established practice of the western branches of our banks to deliberately ignore the legitimate requests of the farmers for loans, because those who are at the head of banking in Canada 'wouldn't know grain growing if they saw it, and would find it difficult to differentiate between a steer and a milk cow.'†

"This humorous sally at the expense of the dignified body incorporate of eastern bankers has no doubt been enjoyed by many readers, but it is scarcely the process of deduction, or form of logic, that will invite attention to a subject deserving of earnest consideration. It is a statement that can only be replied to in kind, and we shall therefore declare, with equal authority and emphasis, that an elemental knowledge of farming is possessed by all thorough-going Canadians of every walk in life, and that the alleged Canadian who could grow up to mature years, knowing so little of this subject that he could not distinguish sorts and kinds in grains and livestock, must have been brought up in a boat and raised on a diet of cocoanut milk and fish.

"We are all farmers or near farmers in Canada—bankers included. We all know something about farming because we all live OFF a farm if we do not live ON a farm.

"With the next paragraph in the article referred to we find ourselves getting into matters touching on our national history. 'At its inception the Bank Act was designed to deal with eastern commercial and industrial conditions,' we are informed. 'The West was not taken into consideration at all, simply because at that time there was no West. . . . .'‡

The Bank Act of 1871

"It may pass as a metaphor, but it is not literally correct to say there was no West in 1871, the year the first general Bank Act was passed by the Federal government, after having been under consideration from the first session of parliament in 1867. Manitoba was admitted to Confederation, July 15th, 1870, with the privilege of sharing an active part in the framing of measures for the general good of the country, and the more paticular mission of seeing to it that the west got a square deal in every department of legislation. But of there were omissions in the original Act of 1871, these could not possibly exist down to the present day, because the Canada Bank Act is not an adamantine code dedicated to the perpetuation of a class privilege; it is a plastic measure, subject to constant amendment, and it must, as a matter of legislative routine,§ be brought up for general overhauling and revision every ten years. There have been general revisions of the Canada Bank Act in 1880, 1890, 1900, 1910, and another revision will be promulgated next year. "Most of us think the ten-year term all too short," an eminent Canadian banker, who will be quoted at greater length further on, has declared: 'Whatever may be said for or against these decennial battles, the product of the discussion is a Banking Act improved in many respects by the exchange of opinion between the bankers and the public. Our banking system having been subjected to unsparing analysis by an unusually enlightened people, perhaps too democratic in tendency and too jealous of every privilege granted, but anxious to build rather than destroy—is brought at each period of renewal to a higher degree of perfection.'¶

---

*This reference is evidently to an article in "System" for February, [illegible] under the caption: "You Have No Account With Us." This critic of American Banking methods declares:—

"The logic of refusing credit to a firm or an individual because he or it has had no account at the bank is a general practice among many banks. It seems to me about as sound a business policy as it would be for any mercantile store to refuse to sell goods to a customer simply because he has never traded there before.

"Many bankers seem to assume that they are doing the borrower a favor in lending money, even on the best security. This may, of course, be true, but at the same time, the borrower is really providing the banker with a means of livelihood."

†This and similar quotations through this contribution are verbatim extracts from an article appearing in Saskatchewan newspapers. That criticisms of Canadian banking methods are just now more than ordinarily rife is indicated by the tone of an article in the "Financial Post": "Why the Unpopularity of the Banks?" this writer asks; and after reviewing the sources from which unpopularity is likely to arise, through the refusal of loans to unreliable borrowers, he concludes:—

"But there is still the fact to be faced that the banks are not popular—even if not exactly unpopular—with a lot of small depositors and others who seldom desire loans, but who on the other hand usually get far more service than their accounts warrant. Is this merely the result of [illegible]? Is it another form of the resentment of Mr. Average Citizen toward the police uniform which represents protection of his life and property? Is it anything that branch managers or head office [illegible] or something which must be put up with, like the [illegible]?

"[illegible] contribute experiences and opinions will aid in [illegible] what I believe will prove a helpful discussion."

[illegible] that small depositors, as well as borrowers, have a [illegible] the bank [illegible] a new symptom in the prevalent [illegible]. The public generally must be aware that the banks [illegible] under the handicap of short-handed and inexperienced [illegible] contingents of Canadian Troops were enlisted for [illegible]

‡The Bank Act of 1871 was not the inception but the revision and consolidation of legislation on banking in Canada. By section 91, subsection 15 of the British North America Act, the right was assigned exclusively to the Dominion Parliament to legislate respecting "Banking, Incorporation of Banks and the Issue of Paper Money." Prior to Confederation the banks in the old Province of Canada operated under regulations of the Consolidated Statutes of Canada and the individual privileges of their charters. There was no banking act in the old Provinces of Nova Scotia and New Brunswick, special provisions being embodied in the respective bank charters. When British Columbia came into the Dominion in 1871 the established bank of that Province was operating under an Imperial charter, the head office of the organization being in London, England.

§Under the Statutes of the old Province of Canada (Ontario and Quebec, prior to Confederation) bank charters were usually granted for a term of ten years. In Nova Scotia the charters ran, as a rule, for fifteen years, and from twenty to twenty-six years in New Brunswick. In Prince Edward, the charters were for longer duration.

¶The democratic tendency of representative Canadian legislators, and the jealousy with which they early regarded any infringement upon their privileges to control their own banking system, is convincingly asserted in an address to the advisors of Her late Majesty, Queen Victoria, upon the granting of Imperial Charters to banks in Canada. The following memorial was addressed to the Throne by the Committee on Currency and Banking, August 27th, 1841:—

"It becomes our solemn and bounden duty," the petition sets forth, "in behalf of the people of Canada, whose representatives we are, to protest against such an interference with their constitutional rights. We beg leave most humbly to represent to your Majesty that the statutes of the Imperial Parliament, by virtue of which we are now assembled, was intended to confer upon the people of Canada the power of managing their own local affairs; and we had ventured to hope from the tenor of recent dispatches from your Majesty's Secretary of State for the Colonies to your Majesty's representatives in this Province, that non-interference in those affairs would be the principle on which your Majesty's Council would thenceforth be governed in reference to the affairs of the Colony." (See "Journal of Legislature of Canada," 1841, p. 436, as recorded in Kingsford, vol. 9, p. 83).

Rates for Telephone Service

THE new rates for Long Distance Service, effective ***May 25th*** and based upon air line mileage, correct inequalities in the old schedule and embody both increased and decreased charges.

Following is a comparison of old and new rates for a 3-minute talk to points most frequently called by local subscribers:

	Old Rate	New Rate
Toronto to Hamilton	$ .25	$ .30
Brantford	.40	.40
St. Catharines	.40	.30
Guelph	.30	.35
London	.60	.70
Montreal	2.00	2.05
Ottawa	1.50	1.45
Windsor	1.10	1.35
North Bay	1.25	1.20

The hours during which reduced Long Distance rates (night rates) are in effect are now
From 8.30 p.m. to 11.30 p.m., 60 per cent. of day rate
From 11.30 p.m. to 6 a.m., 40 per cent. of day rate
Night rates are based on Standard Time

LOCAL SERVICE

Rates for local service to present subscribers will be increased *ten per cent.*, effective from July 1st next.

Applicants for service will be charged at the increased rates, from May 25th.

Every Bell Telephone is a Long Distance Station

The Bell Telephone Co. of Canada

Opening-Up the West

"Now, so much for the argument that the Canada Bank Act takes no present cognizance, 'and never has taken into consideration western conditions,' and let us turn to the other statements in the same paragraph insisting that the people of the west have been 'forced to develop the country under a financial system that is entirely alien to the requirements.' We in the east may, with some honest pride, inquire, 'Whose faith in the west has been the most abiding?' 'Where was the genus westerner in 1867, when the early Confederated Provinces of Ontario, Quebec, Nova Scotia, and New Brunswick undertook to purchase the North-West Territories from the Hudson's Bay Company? Were there any roadways or guide posts to point the way for Sanford Fleming across the west in 1871 when he mapped the route for the line of the proposed Canadian Pacific Railway? And where were the resources of the west when the Dominion government, in 1882, needed more funds to carry the Canadian Pacific line onwards to the west from Winnipeg?'*

"It was mainly eastern bankers and capitalists that financed the opening up of the west, and it was largely the savings of the people in the older provinces that supplied the funds for the development of individual agricultural and business enterprise in the west after the general movement towards settlement began with the completion of the Canadian Pacific in 1885. If our financial system has failed to supply the west with all the money that was needed all the time, it at least supplied some of the money some of the time, and the charge that this same financial system is 'entirely alien' to the requirements of the west makes an overstatement with regard to the extent of the possible deficiency. It may have been insufficient at times, but it was never totally inadequate, nor was it ever 'alien' in any sense of the term.

"For a certainty there is no evidence of any disposition to ignore the demands of the west on the part of either the people or the banks of the east. If the successively revised Bank Act of 1880, 1890, 1900 and 1910 do not specifically refer to the western provinces of Canada, any more than to the other provinces, it is because the Bank Act is not a sectional measure. As a matter of fact the Canada Bank Act and a branch of a chartered bank have always been at the rail head of development in the west. The Merchants Bank opened in Winnipeg, November, 1873.'†

"However, if the Bank Act does not make particular mention to the requirements of finance in the west, the other literature pertaining to banking in Canada does extend very full and particular references to the subject. At no period in its development have those intelligently interested in the working out of our financial system proposed any measures that did not make provision for the requirements of the west. 'As early as December, 1888,' writes the American, Breckenridge in his 'History of Banking in Canada,' 'Measures were contrived to insure the circulation of bank notes at par in all parts of the country (Canada). Notes ordinarily were subject to a discount equal at least to the domestic exchange at the place where they were payable, when offered in places remote from that of issue. In order to prevent discount for geographical reasons the Canadian bankers proposed that they maintain branches at a number of centres sufficient to insure circulation at par throughout the country.'‡

"Here was a need of the west that had developed in the early eighties, promptly remedied by an amendment to the Bank Act in 1900, but was actually put into practice by the banks before it became, at their own suggestion, a measure of requirement.

The Canadian System

"In 1890 the Bank Act had undergone its second revision and had been three years in operation when Sir Edmund Walker, now president of the Canadian Bank of Commerce, read a paper on 'Banking in Canada' before the World's Congress of Bankers and Financiers, assembled at Chicago. The portion dealing with western conditions is under the sub-caption, 'The Borrower and the Branch Systems.'

" 'In discussing the banking system in older countries, the borrower is not often considered. In America the debtor class is apt to make itself heard, and I wish to show what our branch system does for the worthy borrower as compared with the United States' National Banking System. In a country where the money accumulated each year by the people's savings does not exceed the money required for new business ventures, it is plain that the system of banking which most completely gathers up those savings and places them at the disposal of the borrower, is the best. It is to be remembered that this involves the savings of one slow-going community being applied to another community where the enterprise is out of proportion to the money at command in that locality. Now, in Canada, with its banks with forty and fifty branches (in the year 1893), we see the deposits of the saving community applied directly to the country's new enterprises in a manner nearly perfect.'

"The Bank of Montreal borrows from depositors at Halifax and many points in the maritime provinces, where the savings largely exceed the new enterprises, and it lends money to Vancouver or the north-west, where the new enterprises far exceed the people's savings. My own bank in the same manner gathers deposits in the quiet, unenterprising parts of Ontario, and lends the money in the enterprising localities, the whole result being that forty or fifty business centres, in no case having an exact equilibrium of deposits and loans, are able to balance the excess or deficiency of capital, economizing every dollar, the depositor obtaining a fair rate of interest and the borrower obtaining the money at a lower rate than borrowers in any of the colonies of Great Britain, and a lower rate than the United States, except in the very great cities in the east. So perfectly is this distribution of capital made, that as between the high class borrower in Montreal or Toronto, and the ordinary merchant in the north-west, the difference in interest paid is not more than one to two per cent.

" 'The banks in Canada, with interests which it is no exaggeration to describe as national, cannot be idle or indifferent in time of trouble, cannot turn a deaf ear to the legitimate wants of the farmer in the prairie provinces, any more than to the wealthy merchant or manufacturer in the east. Their business is to gather up the wealth of the nation, not a town or a city, and supply the borrowing wants of a nation.'

---

*Senator Frank Smith, who was President of The Home Savings and Loan Company (the present Home Bank of Canada), in 1882, is to be credited with the most signal service to the Canadian Pacific Railway, and therefore to the West, in the early days when faith in the West was faltering. These services have been acknowledged by the late Sir William Van Horne and publicly recorded in an historic sketch appearing in "The Times," September 12th, 1913. A further confirmation of the incident has come to hand in a letter addressed to the Editors of "The Home Bank Monthly" from Mr. J. J. McGee, dated from Ottawa, the eighteenth of the present month. Mr. McGee writes:—

"Sir William Van Horne's letter has reference to an interview in 1882, at which I was officially present, hence my knowledge of it. Sir Frank Smith, Lord Mount Stephen, and Sir John Macdonald were present in the financial chamber one morning at a conference lasting from half-past ten to half-past one o'clock. It was an historic meeting. Sir John Macdonald and his colleagues would not support Stephens and the promoters of the Canadian Pacific. Sir Frank Smith stood up, slammed the council table and startled the Premier with these words: 'Macdonald, if you don't get your fellows together and give Stephens what he wants (that was a loan of $15,000,000 and guarantee of the bonds of the Canadian Pacific for another $15,000,000) I have a million to spare, and I'll put you fellows out of power in three months.' But Sir John called a caucus and the Canadian Pacific was completed as a consequence."

Mr. McGee, who chronicles this reminiscence, was first engaged in the Government service as a Provincial Land Surveyor in the construction of the Intercolonial Railway, in 1866. After thirteen years in this branch of the service he was appointed a first-class clerk in the Department of the Interior and promoted to Clerk of the Privy Council, May 20th, 1882.

It may here be noted, touching the matter of the sympathy of Eastern bankers with the conditions and interests of the West, that the present President of The Home Bank of Canada carried through the contract work on section 15 of Canadian Pacific construction, the Cross Lake section, in [illegible], and also supervised construction work in British Columbia. He was contractor for building the Red River Valley Railway and superintended construction of the Crow's Nest Pass Line. Mr. Haney was also one of the principal contractors of the great Canadian locks at Sault Ste. Marie.

†Winnipeg was incorporated as a city, November 8th, 1873. The first car over the Canadian Pacific from Montreal to Winnipeg left the Eastern point November 2nd, 1885. The first through passenger train to the coast left Montreal June 28th, 1886. The following banks had established branches in Winnipeg prior to the completion of the main line of the Canadian Pacific, Merchants, 1873; Montreal, 1878; Imperial, 1881; Union and Ottawa, 1882.

"A [illegible] proof of the earnestness of this declaration [illegible], with regard to the operation of the banking system in the extension of banking facilities throughout the west, is to be noted in the fact that to-day there is a branch of a chartered bank established at every discernable point of vantage throughout the western provinces.

War-Time Conditions

"The main complaint in the criticism of Canadian banks in the west, now under review, concerns the extension of credit, but there are some side references that require a word in passing. For instance, we read: 'During the dark days of 1914, after war was declared, the banks——— sent great sums of money to New York to take advantage of the interest rates of call loans which was caused by an active stock market.'

"It is not necessary to refer to statistics on this point. The activity of the New York Stock Market following the outbreak of war in July, 1914, and indeed the activity of stock markets throughout the financial world, was the activity of confusion. Moreover, the New York Stock Market was closed on July 30th, 1914, and remained closed until December 30th, 1914, during which period transactions of every form were suspended. This would not necessarily mean that all call loan business was also suspended, but its limited prosecution, under these conditions, could not affect the needs of the west. A call loan is at all times an investment of the most temporary character, as the term itself indicates.

"The observation that the managers of branch banks have very limited discretionary powers in the matter of extending accommodation is justly taken. These powers must necessarily be restricted to amounts that seem inconsequentially small compared with a bank's assets. 'Western bank managers have mighty little authority,' our complaint declares. 'They are hardly better than head clerks, and every transaction that contemplates the expenditure of more than a very few thousand dollars has to be decided upon by eastern directors.'

Limiting the Loans

"The reason for this curtailment is explained by a very simple calculation in arithmetic. Take a chartered bank having a paid-up capital of five million dollars, operating one hundred branches under the direction of one hundred local managers, acting independently of each other in the best interests of their customers and the institution they represent. If each manager should lend out one thousand dollars each week for one year, towards the end of the year the bank would find its entire capital converted from a reliable and ready form of asset into a quantity of bills receivable from a grateful clientele of varying degrees of financial responsibility, each note being accordingly an instrument of more or less uncertainty as to its immediate realizable value. Of course this situation would be impossible unless all the loans were made for an equal term of one year. Nevertheless, of necessity all bank loans of any importance must be passed upon by a central authority; but, aside from this, the local manager is boss in his own territory.

"The term 'accommodation' does not belong to the vocabulary of business or banking. For that matter it does not belong to the terminology of the railroad either, since it is commonly declared that the worst service is afforded by 'accommodation' trains. Probably if it were removed from railway time tables and banking literature there would be fewer complaints finding expression in the columns of the press. The term is misleading. It fosters the deduction that one of the functions of a bank is to be 'accommodating' in the matter of lending out money, and this notion is in fact confirmed by the laws applying generally to the lending of money. A pawnbroker takes an article to pledge as security for his loan; a money-lender takes a chattel mortgage; a loan company takes a mortgage.

"But a bank is not permitted to make advances on any of these forms or instruments of security. So, when a citizen is tied up in every other direction, he is inclined to look towards a bank for accommodation of the credit that no longer holds any legitimate claim for consideration by previously consulted facilities for borrowing.

"Many a business concern has been rehabilitated by the timely advance of a loan from a bank, but that loan was not made as an 'accommodation.' It was advanced because, after circumstances and conditions had been fully inquired into, the enterprise was found to be sound at bottom and worthy of encouragement as a business proposition.

Helping the Farmer

"If there is any out-and-out accommodation being extended, as a matter of policy in banking, it is in the advances made to farmers for seed, fertilizers, machinery and stock to develop production from the land. The security here is altogether intangible. The loan is made entirely upon prospects altogether beyond the control of the bank. But there may not have been enough of this, or otherwise the criticism of banking under review would not have raised a complaint that 'the farmer of Saskatchewan to-day requires liquid credit. He does not need mortgage money in a very urgent degree. The function of a mortgage company is entirely different from that of a bank. A farmer puts a loan upon his property to buy more land, erect new buildings, or otherwise effect permanent improvements that will add to his capital. He borrows from the banks when they will unbend far enough to accommodate him—to carry on his season's operations, and to provide him with sinews of war until he can get his crop to the market. Sometimes the banks come through in this respect; more often they do not.'

"A consideration of the particulars cited in this instance invites the conclusion that the complaint does not concern the refusal of any bank, in any instance, to put a farmer "on his feet" with regard to the advancement of a small initial capital. It has to do with the higher finance of extended farming operations. The case outlined is that of a farmer who has mortgaged his farm to buy more land; perhaps he has erected buildings which may be again mortgaged; also, he may have bought farm implements on the instalment plan, and as these remain under a lien until fully paid for, it follows that the borrower approaches the bank with all his material assets in hypothecation, and the produce of his farming operations under an assessment in advance to pay off the overhead incurred in increasing his obligations to carry on farming in a more ambitious way. A mortgage company would not 'touch' this form of a proposition, nevertheless we are told that—'sometimes the banks come through in this respect.' The bank is here expected to take a risk that no other financial corporation would, or legitimately could, assume. If the crops do not 'come through' the bank must either double its loan and hope for better harvest next season, or add immeasurably to the chance of an initial loss by refusing further accommodation. If the borrower fails to 'come through,' the bank may take what recourse it may at the risk of 'getting in wrong' with the neighboring community.

"Where a bank does not 'come through in this respect' the refusal is not to be taken as an evidence of an entire lack of sympathy for the needs of the applicant for a loan. Every branch bank carries some loans of this description, but the amount must necessarily be carefully scaled into the volume of more ordinary and regular business. Therefore a perfectly friendly and obliging local manager may sometimes have to extend a customer instead of the loan requested, the explanation that he has put about all the trust in the good intentions of Providence towards his section of the country for the forthcoming season that a strict regard for the rules of sound finance will conscientiously permit him to manifest.

Functions of Banks

"Every discussion on banking should proceed from a consideration of the main functions of banking. 'It is not by augmenting the capital of a country, but by rendering a greater part of that capital more active and productive than would otherwise be so, that the most judicious operations of banking can increase the industry of a country,' declared Adam Smith in his 'Wealth of Nations,' 1776.

"Now natural capital, the savings of the country at large, cannot be kept active and productive if the people into whose hands these savings accumulate have not complete confidence in the national banking system. If money be hoarded, instead of invested in savings accounts, all enterprise and industry would be brought to a standstill. In a new country every dollar of capital must be kept busy, made to do the work of two or more dollars, if possible, and under the present banking system, enjoying the full confidence of the people, a dollar of any Canadian capital is never allowed to become idle money. Recent amendments to the Bank Act have, therefore, been towards making bank deposits more secure, and guaranteeing the full value of Canadian bank notes through every possible contingency of financial stress.

"'The only virtue which our Canadian banks possess,' our critic declares, in conclusion, 'is that as a general rule the depositor is pretty well protected.' If that measure of protection is to be maintained the bank, as a lender, must protect itself with some measure of the caution devised for the protection of the depositor.

"As deposits are withdrawable on demand, investments of these deposits by the bank should be made largely in readily negotiable securities that have a stable value among the community. Yet this consideration for the protection of the depositor does not operate to foster a want of consideration for the needs of the borrower. A bank cannot thrive by deposits alone. If it cannot lend in the same volume that it borrows a bank will be paying interest on idle money. Where a small new branch is established at an expense for maintenance and operation of say $5,000 the year, that means that approximately $165,000 must be received on deposit, or loaned, during each year's business, to make the branch carry itself. And as the new branches opened in the west are rather outlets than intakes, it means that their managers must be lending money to customers in the required ratio, or be operating their offices at a loss.

"The Canada Bank Act is not so much a piece of legislation as it is a form of constitution. It is not a code drawn up by law-givers, but a system for regulating our internal financial affairs that must be revised and amended with unremitting frequency in order to meet changing conditions. The present act, on external evidences, appears to meet in some degree the requirements of both high and commonplace finance. American bankers commend in it the feature of "elastic currency," which automatically provides an adequate circulation of money to meet the varying demands for crop movements and trade expansion; while the casual visitor to our country has noted, with some amusement, that in Canada they pay their laundry slips with bank cheques.'

"The fullest discussion of the Canada Bank Act is now in order. It is before the country for decennial revision, and, aside from this, Canada's participation in the war has introduced new problems in finance that affect the banks no less than the borrowing and investing community. Intelligent discussion is now wanted to avoid wasteful and disconcerting experiments. But a profitable discussion will not be invited through hasty criticisms, inaccurate deductions and clever, but ill-considered attempts to throw ridicule on the subject."

ALBERTA RURAL CREDITS UNDER WAY

A number of rural credits societies have already been organized in the province of Alberta. The necessary legislation was passed more than a year ago, but nothing was done in the way of organization until recently. Mr. C. H. Gifford, general secretary of the Manitoba societies, has been in Alberta assisting in getting the work started. The first to be formed in Alberta was the Bertawan Society, to which the Union Bank, through its Alsask branch, advanced $75,000. Three or four others have also been organized.

The nineteenth annual convention of the Union of Canadian Municipalities is to be held in Kingston, Ont., on August 12th, 13th and 14th.

COBALT ORE SHIPMENTS

The following is a statement of the shipments of ore, in pounds, from Cobalt, for the week ending June 13th, 1919:—

Hudson Bay, 64,100; La Rose, 132,657; Mining Corporation of Canada, 326,638; Coniagas Mine, 162,128; McKinley-Darragh, 167,682; Buffalo Mine, 176,000; total, 965,105.

The total since January 1st is 10,605,133 pounds, or 5,302.5 tons.

TRUST AND LOAN COMPANY OF CANADA

According to the annual report of this company for the year ended 31st March, 1919, the amount received from the interest account in Canada was £218,073, or slightly less than last year. Total income was £264,831. Expenses were higher and a net profit of £110,062 was carried down in comparison with £126,892 last year. The sum of £10,000 was appropriated to contingencies account, provision was made for the income tax and a balance of £99,877 carried forward into next year's revenue account. A dividend at the rate of 7½ per cent. per annum was paid in June, 1918, out of the balance brought forward from the year ended March 31st, 1918.

Total assets are now £3,902,840, or slightly less than last year. The funds are invested principally in mortgages in Canada. The amount of debentures and debenture stock outstanding showed a decrease. The statutory reserve fund is now £600,314, compared with £600,000 last year.

COST OF BREAD LOWER

The cost of Living Branch has submitted its April report to the Hon. Gideon D. Robertson, Minister of Labor, showing the production and cost of bread in the chief cities of the Dominion, as shown by bakers' reports for the month. Labor trouble existing in the West prevented the receipt, in some instances, of the usual statements for the costs of bread in that section of the country. Reports from other cities came in as usual and these records show that the bakers throughout the Dominion are making a study of the costs of production.

Taking representative districts from coast to coast the report shows a slight increase of 1.23 per cent. in the quantity of bread consumed during the month. The average cost of the flour used was $10.74 per barrel, a decrease of ten cents per barrel from the figures for the previous month. This decrease has evidently been brought about by competition between the millers for western business and also by the fact that the Maritime Provinces have procured, at a reduced figure, flour from lots destined for export but not shipped owing to lack of shipping space. This export flour was fully equal in quality to that for which the bakers have been paying higher prices. The yield of bread per barrel of flour used averages 265.4 pounds.

Comparing these costs with those of the previous month, seventeen districts show a small decrease and eleven show a slight increase. The average price per pound shown for the Dominion for April is 6,854, while for March the figures were 6,842. A slightly lower yield per barrel, together with increased costs of baking and delivery, may account for the increase per pound. Using one barrel of flour as the standard of comparison the result is as follows:—

	March.	April.
Flour per barrel	$10.84	$10.74
Ingredients per barrel	1.47	1.41
Baking per barrel	1.65	1.75
Delivery per barrel	2.78	2.83
Management and fixed per barrel..	1.48	1.46
Total cost per barrel	$18.22	$18.19

London and Lancashire Life and General Assurance Association, Limited

Extracts from the Report of the Directors presented at the Fifty-sixth Annual Meeting held in London, England

LIFE BUSINESS

NEW BUSINESS.—During the year 1,834 policies were issued for sums assured amounting to **$4,780,830,** producing a new annual Premium Income of **$208,069,** and Single Premiums of **$75,675,** making a total New Premium Income of **$283,744.** Re-assurances were affected for **$132,750.**

The sum of **$3,958** was received for the purchase of Immediate Annuities.

The TOTAL LIFE PREMIUM INCOME, after deduction of premiums paid for Re-assurances, amounted to **$2,147,929.**

The INCOME from INTEREST and DIVIDENDS on the Life and Annuity Fund was **$817,133** after deduction of Income Tax.

The TOTAL INCOME of the Life Department was **$2,969,223.**

The CLAIMS by death, with bonus additions, amounted to **$1,022,824** including **$76,755** directly attributable to the War.

ENDOWMENT POLICIES matured during the year, representing Sums Assured of **$705,452** including bonus additions.

After payment of all outgoings, the Life and Annuity Fund showed an increase of **$564,394** and stood at **$20,513,184.**

THE TOTAL FUNDS AND ASSETS OF THE ASSOCIATION, EXCLUDING UNCALLED CAPITAL, AMOUNTED AT 31st DECEMBER, 1918, TO **$25,486,354.**

La Banque Nationale

FIFTY-NINTH ANNUAL REPORT, 1919

The Fifty-Ninth Annual General Meeting of the Shareholders of this Institution was Held at the Office of the Bank on Wednesday, the Eleventh of June, 1919, at Three O'clock p.m.

There were present:—Messrs. Rodolphe Audette, J. B. Laliberte, Victor Chateauvert, Nazaire Fortier, Charles Pettigrew, Napoleon Drouin, Napoleon Lavoie, Alph. A. Dechene, J. E. Demontier, G. Alfred R. Desjardins, N. Arthur Drolet, Pierre Drapeau, Capt. L. Robert Demers, Louis Drouin, A. S. Garneau, Charles Grenier, N.P., J. Adhemar Gagnon, J. Ant. Grenier, Elzear Labrecque, M.D., M. A. Labrecque, P. G. Lafrance, S. Jules LaRue, N.P., C. J. Levesque, Henri Lemieux, Charles Noreau, Ferdinand Nadeau, Adjutor Rivard, Col. H. Oct. Roy, N.P., Jos. O. Samson, Geo. V. Tessier, L. P. Thibault, etc., etc.

Mr. Rodolphe Audette was called to the chair, and Mr. P. Lafrance was requested to act as Secretary.

Before proceeding to the reading of the annual report, the following gentlemen were elected scrutineers, viz.: Messrs. N. Arthur Drolet, Charles Grenier, N.P., and Charles Noreau.

The President read the following report of the affairs of the Bank:—

REPORT OF THE BOARD OF DIRECTORS.

Gentlemen Shareholders:—

The Directors have the honor to submit to your approbation the result of the operations of the Bank for the year 1918-19, by the statement of Profit and Loss account, together with the statement of the Assets and Liabilities of the Bank:—

The Balance to the credit of Profit and Loss on 30th April, 1918		$ 35,249.03
The profits of the year, after paying interest on deposits and deducting bad and doubtful debts		533,450.32
Forming the sum of		$568,699.35
which has been disposed as follows:—		
To Quarterly Dividends, at the rate of 9% per annum (i.e., 2¼% payable 1st August, 2nd November, 1st February and 1st May)	$180,000.00	
To Reserve Fund	100,000.00	
To Depreciation on securities and for contingencies	100,000.00	
To Rebate of interest on discounts	45,000.00	
To Depreciation on Bank premises	40,000.00	
To Depreciation on fixtures	10,000.00	
To Pension Fund	25,000.00	
To War Tax on circulation	20,000.00	
	$520,000.00	
Leaving to the credit of Profit and Loss a balance of	48,699.35	
		$568,699.35

Your directors are most happy in submitting to your appreciation a so satisfactory statement of the operations of the year. The results have surpassed all those of the preceding years. Our country, specially the Province of Quebec, in which our interests are for the largest part concentrated, has passed by a period of abnormal prosperity caused by the war, which had ended in this country the beginning of a financial crisis, the first effects of which had been felt. The banks in general, and La Banque Nationale specially, have benefitted by this state of war, which made of our country, apart from its share of soldiers, a producer of munitions and products for the Allies. Our agricultural population particularly benefitted from the extraordinary increase on the price of its products. Our branches and agencies, for the greatest number situated in agricultural centres, have, from this fact, considerably increased their deposits, so much so that the deposits of $27,213,000 last year, are this year $37,455,000, an increase of $10,242,000. The increase in our commercial loans has not been proportionately as high, but we have reimbursed loans made from the Government and we have also bought debentures for a large amount, mostly Government debentures, as shown by the items of our statement in which those loans are mentioned, which course enabled us to use our surplus of funds and not leave them unproductive. Our Paris branch also shows a considerable increase; the deposits of $1,211,000 last year, are this year $1,852,000, an increase of $641,000 on last year, with a most encouraging prospect for the future. Our current loans, of $23,647,000 last year, are only $25,091,000 this year, a small increase of $1,444,000. To replace this, we have loans on shares and debentures and we possess Government, municipal and other values, to the amount of $13,135,800, compared to $9,282,600 last year, an increase of $3,853,000. Our assets, of $41,195,000 last year, are $50,433,000 this year. We have tried, as in the past, to give satisfaction to all the reasonable demands of funds in the cities and in our country branches. We have brought a special attention to the needs of our agriculture, giving to our farmers all the help possible, justifying, by doing so, our name of "Nationale."

It is evident that, since the close of hostilities and the closing of the factories of munitions and other manufactures necessitated by war, the demands for commercial needs have become less and that the demands for ordinary commercial business have not compensated for this diminution. We will, no doubt, have more or less of a calm in the business of the country, a time sufficient to re-establish the equilibrium which the war has disturbed. This normal reconstruction of the affairs of the world will really take its effect only when peace is signed and when the world will be familiar with the new conditions created by the war. So far as we are concerned, without expecting our profits to be as high as those of the year just closed, we think to be able to maintain the fine position in which we are.

In the course of the year, we bought land and have erected, in different centres, buildings to install our offices, buildings which were imposed on us by the importance of the branches and the difficulty of obtaining suitable accommodation. Those buyings of lands and constructions of buildings explain the increase seen in our statement under this heading.

We have considered that, to maintain our buildings and our furniture at a minimum valuation, an appropriation of $40,000 on our Bank premises and $10,000 on our furniture should be made. We have continued this year to appropriate an amount for depreciation and contingencies, so as to place for ever in safety our Reserve Fund, which we have created and are increasing regularly. We have also considered, taking into account the large profits realized, to contribute $25,000 to the Pension Fund of our employees and to resume, this year, the appropriation to increase the reserve for interest not earned on our discounts. $45,000 has been added to this fund of already $55,000, which makes it $100,000. This year, as last year, our employees have been gratified by an allocation of $51,000 for high cost of living.

The affairs of the institution are prosperous and our financial situation of the best; we feel ourselves justified to tell you that the intention of the present Board is to begin to pay, on the 1st of August next, the dividend on the basis of 10 per cent. a year.

We have opened, in the course of the year, three branches and twenty-one sub-agencies, in part to respond to the demands and needs of the population and also to protect our branches against a too intense competition which exists between the banks. We have closed two sub-agencies.

The branches and sub-agencies have been inspected with care, and our staff has well deserved from the institution by its work and zeal.

We have taken back in our employ all volunteers and conscripts who were in our service just before or during the war, and who have applied for a position; we felt that it was our duty to do so.

Last year, we expressed the wish that the war would be over before the meeting of this year. Providence heard our prayer and those of all the world. The Allies were victorious and the peace they will impose will protect for ever our country and our home from the horrors of war.

R. AUDETTE,
President.

N. LAVOIE,
General Manager.

In accordance with subsections 19 and 20 of Section 56 of the Bank Act, 1913, and as auditor for La Banque Nationale, I have the honour to submit the following report:—

I have compared the above balance sheet with the books and vouchers kept at the Head Office of La Banque Nationale and with the certified returns from the different branches to April 30th, 1919. I have checked the cash and verified the securities and other valuables at the Head Office and at five of the principal branches of the Bank, and after having obtained all the necessary information and explanations, I certify that in my opinion this balance sheet represents a true and correct view of the state of the Bank's affairs as to April 30th, 1919.

I have in addition to the above mentioned, during the current year, checked and verified the cash and securities at different branches and Head Office of the Bank and found them to be in agreement with the entries on the books of the bank relating thereto.

I may also mention that the different officials of the Bank have given me to my satisfaction all the required information concerning the Bank's affairs and transactions which have come under my notice and I consider them within the power of the Bank.

OCT. BELANGER, L.I.A.,
Auditor.

Quebec, May 19th, 1919.

Moved by Mr. Rodolphe Audette seconded by Mr. J. B. Laliberte: That the report of the Directors and the statements now read be adopted, printed and published for distribution among the shareholders.—Adopted.

Moved by Mr. Chs. Grenier, N.P., seconded by Mr. A. S. Garneau: That Mr. Octave Belanger, accountant duly qualified as per section 56 of the Bank Act, be appointed auditor of the Bank for the year 1919-20, with the same remuneration.—Adopted.

Moved by Mr. Rodolphe Audette, seconded by Mr. J. B. Laliberte: That, considering the large increase in the affairs of the Bank and the exiguity more and more evident of its premises for its commercial and administrative needs, that it be resolved and the Board of Directors is authorized to construct a suitable building, in accord with the importance of the Bank and its wants.—Adopted.

Moved by Mr. C. A. R. Desjardins, seconded by Capt. L. Robert Demers: That Mr. Rodolphe Audette, J. B. Laliberte, Nazaire Fortier, Victor Chateauvert, Napoleon Drouin, Charles Pettigrew, Napoleon Lavoie be unanimously chosen Directors of La Banque Nationale for the ensuing year, and that a single ballot be deposited in the votation Box.—Adopted.

The President left the chair and Mr. C. A. R. Desjardins being called thereto, it was moved by Mr. N. Art. Drolet, seconded by Mr. Jos. O. Samson: That thanks be tendered to the President and Directors for the services they have rendered to the shareholders during the past year.—Adopted.

Moved by Col. H. Octave Roy, seconded by Mr. A. S. Garneau: That the thanks of this meeting are due and tendered to Mr. Rodolphe Audette for his services in the chair, and also to the Scrutineers and Secretary for the fulfilment of their respective duties.

This motion was adopted and the meeting adjourned.

P. LAFRANCE,
Secretary.

R. AUDETTE,
President.

Quebec, June 11th, 1919.

At the meeting of the Directors held on the same day, Mr. Rodolphe Audette was re-elected President, and Mr. J. B. Laliberte Vice-President, of the Bank for the ensuing year.

P. LAFRANCE,
Secretary.

"Your Vacation is Planned"

health and rest

THE movement of the leaves and the drowsy lap of waters, alone usurp the stillness! Tree-scented, sea-laden breezes bring back health and strength. Seek the invigorating atmosphere of such places as Muskoka, Cape Breton, Prince Edward Island, St. John River Valley, or any of the countless health and rest spots between Yarmouth and Halifax. The Hay Fever patient finds instant relief at Port Arthur—and excellent hotel accommodations.

"9 Ideal Vacations"

With every variety of sport and scenic beauty, Canada calls the vacationist! Fishing, Camping, Hunting abound at Jasper Park, Eastern Manitoba, Rainy Lakes, Nipigon, Minaki, Nagogami, New Ontario, the Laurentides, New Brunswick, Quebec, and Nova Scotia. A wonder panorama unrolls before the traveler through the Canadian Rockies, Matapedia Valley, La Baie de Chaleur, Gaspe, Cape Breton, and along the ocean shore of Nova Scotia.

A Vacation Planned to Meet Your Needs—Choose!

Historic facts find old-world setting in Quebec, Montreal, Halifax and their environs. If you have only a few days, spend them joyously at Muskoka, Sparrow Lake or the Maritime Provinces. If you wish to combine business with pleasure, visit Western Canada, and such thriving cities as Winnipeg, where you can "hear" opportunity grow.

SHIPPING'S SHARE IN FOREIGN TRADE

United States is Rapidly Becoming Leading Nation in Ocean Transport

A BOOKLET which has just been issued by the Guaranty Trust Co., of New York, discusses the part which shipping plays in the development of foreign trade. It says in part:

"Before the Civil War America led the maritime nations of the world. American clipper ships outsailed all others. American shipyards stood first in quantity and quality of output. American tonnage was the greatest in volume.

"Before the present war, however, shipping conditions were very different. Ninety per cent. of the foreign trade of the United States was then transported in foreign vessels. American sea-going tonnage represented barely 2 per cent. of the world's total. American shipyards were turning out about one ship to Great Britain's six, and producing only about one tenth of the world's output. Seven-eighths of the registered American shipping was engaged in lake, river and coast-wise trade. Transfer of tonnage from American to foreign registry was increasing steadily.

"To-day this position is almost completely reversed. The ocean-going tonnage of this country is more than five times the pre-war total, and about equal to the former combined lake, river and coastwise shipping. American shipyards are producing twice as many vessels as Great Britain, and as many as the United Kingdom and all other countries combined. The American tonnage total is within striking distance of England's, and is far greater than that of any other nation. About 40 per cent. of the exports and imports of the United States is being carried in American vessels. Nearly half a billion dollars of American private capital has been invested in American shipping and shipbuilding enterprises since the beginning of the war. Billions have been expended by the government in the creation of a great merchant navy, and it is planned to spend billions more. A huge organization has been built up which represents hundreds of shipways, thousands of ships, hundreds of thousands of workers and millions of dollars in pay-rolls.

"How America's shipping has gained during the war, and subsequently, while that of other nations has decreased, is shown by the contrast between sinkings and seizures and new building. The following table (in gross tons) cover the world, the Central Powers excepted:—

	United States. Tons.	United Kingdom. Tons.	Other countries. Tons.	World. Tons.
At outbreak of war .	7,900,000	19,250,000	15,250,000	42,400,000
War losses	900,000	9,000,000	5,100,000	15,000,000
Gross reduction to . .	7,000,000	10,250,000	10,150,000	27,400,000
Added by building .	3,400,000	4,800,000	2,500,000	10,700,000
Added by seizures .	500,000	700,000	1,175,000	2,375,000
Tonnage, Nov. 11, 1918 . .	10,900,000	15,750,000	13,825,000	40,475,000
Added to Apr 1, 1919 (net estimate) .	900,000	675,000	550,000	2,125,000
Tonnage, Apr. 1, 1919 . .	11,800,000	16,425,000	14,375,000	42,600,000
Gain or loss	+ 3,900,000	— 2,825,000	— 875,000	+ 200,000

"With the war losses of ships practically restored the world over (the net deficiency of the Central Powers is estimated at about 2,500,000 tons), there remains to be supplied, as already indicated, the normal increase that would have occurred had not the war intervened. This, in the pre-war period, was at the rate of slightly more than 2,000,000 tons annually, so that the total deficiency to the beginning of 1919 was about ten million tons."

REAL ESTATE ACTIVITY ANTICIPATED

Retiring President of Winnipeg Exchange Looks for Active Trading in Properties

IN his address as retiring president of the Winnipeg Real Estate Exchange a few days ago, Mr. C. E. Simonite expressed himself as confident that activity in the real estate field may be expected. He referred to a recent statement made by the president of the Canadian Pacific Railway, that the past year had seen the largest volume of land sales in the company's history, the amount being in excess of 21,000,000 acres. Mr. Simonite said in part:—

"The question of taxation has been very much to the fore during the past year, and I am of the opinion that it is now generally recognized that land is unfairly burdened with taxes for civic and provincial purposes. This fact is undoubtedly recognized by the civic authorities, as is witnessed by their efforts to secure at the last session of the Manitoba legislature an enactment permitting the council to impose an income tax within the city. Recognition, perhaps, of a less positive nature was also shown by the provincial government in the appointment of the Manitoba commission on assessment and taxation. Neither of these actions has yet resulted in relief to land owners, but the city council has new legislation in the course of preparation, and the Manitoba commission will probably resume its sittings shortly, and, we will hope, be in a position to report to the legislature at its next session.

"The question of the new taxation necessitated by our recently completed water service is also in the hands of our taxation committee, and I hope that some means will be found whereby the expense of supplying the consumer with an abundant supply of pure, soft water will be met by those most directly benefited, namely, the consumers.

"I think you will all agree with me that, on a broad, general outlook, the future of the real estate business is reassuring. We have already experienced a considerable resumption of activity, especially in the sale of farm lands and city dwellings, and, with the inevitable period of growth ahead of western Canada, this is bound to develop and magnify. While the country to the west of us has been steadily growing during the last five years, Winnipeg, in so far as building operations are concerned, has been practically at a standstill. Western development has probably exceeded our realizations, and, as testimony, I would quote high authority in the words of Mr. E. W. Beatty, president of the Canadian Pacific Railway Co., who said a few days ago that the last year had seen the largest volume of land sales in the company's history. A land area in excess of 21,000,000 acres was sold, and the company had carried in over 500,000 people to settle on our fertile prairie lands. Such surprising growth as this, with resultant future production, will very soon react upon Winnipeg by stimulating general commercial and manufacturing business, and, in turn, our own business will show the improvement to which we have all been looking forward.

"The indications, as reflected in the utterances of immigration and railway authorities, is that we will continue to have a large access of population from amongst the prosperous agricultural sections of the United States for some years to come. From this influence, and with the ultimate development of the mineral regions to the north of us and the resumption of lumbering and manufacturing operations on their former scale, we can confidently look forward to Winnipeg, within the next decade or so, being in the front rank of the cities of this continent."

An organization of tobacco manufacturers, wholesalers, jobbers and retailers was formed in Montreal, on June 10th, with the name of Dominion Cigar and Tobacco Association. Its purposes include the securing of tariff revision effecting tobacco and the materials entering into its manufacture. Local organizations will be formed in various parts of the Dominion.

STATISTICS OF CANADIAN BUSINESS

Steps Have Been Taken to Analyse Figures in Canada—Value to Business and Financial Institutions

THE examination of current business conditions through the use of certain fundamental statistics is a study of great value to business institutions which have to determine their policy on the best information available. The first step is the selection and correction of the figures; the next is combination and analysis. Some efforts of this kind have already been made in Great Britain and the United States. The work just commenced at Harvard University by Prof. W. M. Persons, was recently outlined in *The Monetary Times.* Babson's Business Barometer and the Brookmire Economic Service have been in existence for some time and were in fact pioneers in the field on this continent.

In Canada a work of this kind is being planned by the Dominion Bureau of Statistics. Last summer a preliminary survey of available indexes of business conditions was undertaken for the bureau by Prof. H. Michell, of Queen's University.

The investigation was concerned primarily with an examination of the movements of Canadian data for certain of the well-known items which have usually been selected as indexes of business conditions. The field of choice was necessarily somewhat limited, due to the fact that even for certain of these series, data were not available for the entire period since 1905, which has been chosen for the purpose in hand; also, the fact that certain data, such as copper and pig-iron production, do not possess significance for Canadian economic life in any measure comparable with their importance in the United States.

Of the 16 series examined the following nine were tentatively accepted as affording satisfactory indexes, no attempt being made to combine the series mentioned: Stock prices, commercial failures, immigration, imports in Canada, railroad gross earnings, savings deposits, bank clearings, building permits, wholesale prices. The period examined is of sufficient length to illustrate each of the phases of the business cycle, though especial interest of course attaches to conditions since the outbreak of the war in 1914.

Sensitive Indices

Special attention has been directed in the study to the sensitiveness of the various series, and their consequent ability to afford an early indication of changes in general business conditions. From this point of view, a series obtained from quotations for 10 standard Canadian stocks, representative of various important industries* likewise a series of statistics of business failures, appear to have ranked highest. The decline of the former commenced in September, 1912, the rise of the latter shortly thereafter, while the reverse movements commenced in May and April, 1915, respectively. Similar conditions obtained in 1907, highest and lowest points for the stock prices series being in February and November, respectively, while for failures the increase commenced in October, 1906, and continued until August, 1908, the greatest rate of increase being in the latter months of 1907. Bank clearings have also shown a considerable degree of sensitiveness, commencing to fall soon after the opening of 1913, and to rise again in May, 1915. The same is true of building permits in the four western provinces. Such operations are evidently more speculative in nature, and more sensitive to change, both actual and anticipated, in general conditions, in the western than in the eastern provinces. The decline in the former commenced in October, 1913, exactly one year before the eastern figures, and the checking of the decline in 1915 is remarked in the western figures several months prior to the eastern. Moreover, western building, which, prior to 1913 was considerably in excess of eastern, fell, until in 1915, it was practically negligible in amount, while figures of eastern building still continued around the $25,000,000 mark.

East and West

This marked divergence between eastern and western figures opens up an interesting and important field of investigation, and if a comprehensive series could be constructed for the agricultural west as opposed to the industrial east, valuable results might be arrived at. Unfortunately, this is not possible, but several highly significant series of statistical tables are available, notably in bank clearings. Here the same phenomenon as was seen in building permits presents itself, the western figures showing more sensitiveness than the eastern. Thus in January, 1919, while the eastern clearings still show a fair degree of buoyancy, the western figures are beginning to drop, notably for the Winnipeg clearing house. Steps are being taken to push this investigation further by taking the figures for the two representative houses in east and west, Montreal and Winnipeg, as far back as possible by months, commencing with January, 1894. Gross earnings of the three large Canadian railroad systems reached their high level in June, 1913, and continued to decline until April, 1915. While imports commenced to decline in September, 1907, reaching their low level the middle of the following year, and the fall in 1913 in March, the rise commenced again in March, 1915, prior to the increase in certain of the other items noted above. Although figures of imports, in the opinion of the author of the report, in general may be accepted as affording an indication of business conditions within a country superior to that afforded by figures of exports, it is conceded that it appears open to doubt whether this still obtains with the change which has taken place since 1915 in the relative values of imports and exports. Prior to 1914 the latter figures were comparatively inelastic, but the phenomenal rise since that time, as well as the fall since September, 1917, have been far greater than in the case of imports. Export figures, however, are subject to a much wider margin of error, and conclusions based upon them must therefore be accepted with extreme caution. Figures of immigration and of savings are also found to fluctuate in conformity with business conditions, though in the case of the latter variation is relatively slight, and appears practically only in the rate of growth. The other series examined were rejected as less satisfactory for the purpose in hand, and mention of them is omitted here.

It is interesting to note that, while the above series moved in considerable harmony with each other up to approximately last year, of late there has been considerable diversity exhibited, certain of the series continuing upward, while others, accorded equal recognition as guides to general business conditions, have moved in the reverse direction. In other words, in passing from the phases which may conveniently be termed historical to a consideration of the present situation, the difficulties multiply and the part played by judgment increases greatly. This, of course, is no more true of Canadian than of American experience. Our series have shown similar diversities in direction of movement. On the whole, it appears that Canadian parallels American experience somewhat closely. In the case of certain of the data, the correspondence is seen also in the seasonal variations. To mention but a single instance, the similarity is especially pronounced for exports, both countries having a heavy movement of agricultural products toward the close of the year, though in the case of Canada there is also a rush to get grain to the seaboard in advance of the closing of navigation for the winter.

The investigation is still under way, and the foregoing results are merely tentative. A detailed mathematical analysis of the data is now being made, more particularly for the purpose of measuring the divergence of the yearly and monthly figures from the normal secular trend, and a full and detailed report on the subject will be published in due course by the Dominion Bureau of Statistics at Ottawa.

FUTURE PRICE LEVELS

Necessity for Replacing Stocks will Maintain Prices—This Country Should Secure Good Share of Business

"ONE of the causes of the present high level of prices is because production has failed to keep pace with the increase of paper money," says a summary of business conditions just issued by the cost accounting department of the Furniture Manufacturers Association, Woodstock, Ontario. The preparation of this summary was in the hands of Mr J. E. Ferguson. The bulletin continues "in the immediate future will the supply of paper currency decline relative to the production of economic goods?"

"The chief causes of the advance of prices seem to have been first, the 'scarcity demand' for war materials, food, clothing, manufactures, manufacturing materials and the labor required for their prompt production; but this was quickly followed by an enormous world inflation in which paper money with a face value of $36,000,000,000, was emitted by the printing presses of the countries at war, and the legal tender circulating medium of the world was thus advanced from $15,000,000,000 in 1913, to over $45,000,000,000 in 1918, most of the gold formerly in circulation passing into the vaults of the governments and their great banks as partial basis for this greatly enlarged paper currency.

"The face value of the paper currency issued in the four years of the war, was greater than the value of all the gold and all the silver mined in all the world since the discovery of America. Meantime, the national debts of the world have advanced from $40,000,000,000 in 1913, to $220,000,000,000 in 1919 and the annual interest charge from $1,750,000,000 to $10,500,000,000, and this quintupling of governmental promises to pay had also an important bearing upon the world finances, while the fact that the bank deposits in the fifteen principal countries of the world grew from about $25,000,000,000 in 1913, to approximately $75,000,000,000 in 1919, still further increased the currency supply, especially in countries like the United States and Canada, in which the cheque plays so important a part in current business transactions.

Followed by Rise in Prices

"This enormous inflation thus brought about, coupled with the continued 'scarcity demand' for food, manufactures, manufacturing materials and labor required for their production, was accompanied by great advances in prices, first in the materials for the war, the advances gradually extending to the other articles which their respective producers must exchange for those in which the advance had already occurred, and this made the advance in prices world-wide and applying to all classes of articles irrespective of their immediate relation to the requirements of the war.

"The chief question involved in a consideration of the future of prices is whether there is a prospect of an early removal of the causes of the advance.

"The 'scarcity demand' still continues in everything except war supplies, and even in that line, is not entirely ended, since there are still about 15,000,000 men under arms. The demand for food is as insistent as ever, owing to the disordered state of the population of Central Europe and the impoverished condition of the neglected soils of all that continent, while the factories and empty shelves of all the world are clamoring for new supplies, which ran rather low during the war period.

"As to material reduction of the inflated currency, the prospects for the near future do not seem encouraging in view of the fact that the 1919-20 'budgets' of the principal countries of the world, now being made up, call for fully four times as much money as those of the year preceding the war, suggesting that the governmental demands in the first year of peace after the war will be about $50,000,000,000 as against about $12,000,000,000 in 1913, and that the governments which must quadruple their demands upon their taxpayers and prepare for a reduction of their debts will be unable without reducing the amount of money in circulation.

"While there may be a slight downward trend in the general price level and distinct reductions in certain articles the difficulty in removing the chief causes of the advance suggests that the general reduction in prices in the near future may not be as rapid as had been anticipated.

"Will production increase at a pace which will overtake the increase of paper currency, and at a stable cost which will permit and stimulate the increased distribution of goods.

"With food prices increasing and the world-wide demand on the part of labor for shorter hours with increased wages, it does not seem likely that this question can be answered affirmatively.

"Weighing all these facts, it looks as if we must face a new and higher normal and that business must go ahead on present high costs and because of the currency situation a general decline is undesirable and an increase in price levels is more likely."

BANK BRANCH NOTES

The following is a list of branches of Canadian banks recently opened:—

Drayton, Ont.	Bank of Hamilton
Mount Hamilton, Ont.	Royal Bank of Canada
Burin, Nfld.	Canadian Bank of Commerce
London, Ont. (City Hall)	Canadian Bank of Commerce

It was incorrectly stated in *The Monetary Times* of May 30th, that the branch of the Bank of Nova Scotia, formerly of the Bank of Ottawa, at Booth and Queen Streets, Ottawa, was closed. That branch is still open, but is known more generally as the Bank of Nova Scotia, Chaudiere Branch, Ottawa.

The Bank of Montreal is arranging to open a branch in Oshawa shortly.

Mr. J. M. Christie, manager of the Canadian Bank of Commerce, St. John, N.B., has been granted a year's leave to recruit his health.

The Bank of Hochelaga has purchased a site at Humbolt, Sask., and will shortly open a branch there.

BANQUE NATIONALE PROFITS HIGHER

La Banque Nationale has, for over fifty years, occupied a solid position in Quebec province, and its annual report for the year ended April 30, 1919, which appears in detail elsewhere in this issue, indicates that this position has been well maintained. Profits were $533,450, compared with $435,283 for the previous year. The sum of $35,239 had been brought forward into this year's account, making a total of $568,699. Disposition of profits, compared with last year, was as follows:—

	1918.	1919.
Dividends at 9 per cent.	$180,000	$180,000
Reserve fund	100,000	100,000
Depreciation of securities, and for contingencies	100,000	100,000
Rebates of interest	......	45,000
Sinking fund on buildings	35,000	40,000
Sinking fund on furniture	10,000	10,000
Pension fund	15,000	25,000
War tax on circulation	20,000	20,000
Leaving a balance of	$ 35,249	$ 48,699

The balance sheet shows an unusually large increase of over $10,000,000 in total deposits, or about 37 per cent. Circulation increased by $700,000, or 17 per cent. The balance due to the Canadian government is $3,697,350 in place of $5,444,435 last year. Liquid assets have risen from $15,585,871 to $23,181,829. The progress of the bank during the past two decades is indicated by the fact that reserve has increased from $100,000 in 1898 to the present amount of $2,200,000. During the same interval assets have risen from $6,089,165 to $50,433,531, and the number of branches from 13 to 260.

WHY THE "MUTUAL LIFE OF CANADA" IS SO POPULAR

The Mutual placed upon its books in the first [illegible] 100% more business than in the corresponding period of 1918. The wonderful war record of the Mutual Life and the prompt payment of the many unexpected claims during the recent [illegible] have proved the value of the institution. The Mutual [illegible] in a peculiar sense a people's company, being in [illegible] strictly co-operative. This means that the [illegible] is in line with the spirit of the age," and so the people naturally turn to the Mutual. The record of the Company for nearly half a century has been one of [illegible] ing beneficence, and an ever growing number of gratified policyholders help on the good work of the agents. As a result there probably is not a more prosperous group of workers in Canada to-day than the representatives of our Company.

TRADE ACCEPTANCES IN UNITED STATES*

How Their Introduction and Use has Helped Nation in Difficult War Period

IT would almost seem as though the Federal Reserve System came as a providential aid to this country to see us through the great war. As is always the case where the foundation is sound, the building proceeded rapidly, and it was a short time, indeed, until the benefits of the new system became apparent. Then the common sense and common judgment commenced to advocate it until now we wonder how we did without it so long.

With the coming of the Federal Reserve Bank came the campaign to extend the use of trade acceptances. Other countries had found them good; this country hardly knew them. Of course, in our dealings with foreign countries they were in constant use, because the foreigners were thoroughly accustomed to them, and sought the benefits arising from their use in their exchanges. Then a few of our more progressive business men began to use them. But it took a great deal of effort to obtain even a fair start for the trade acceptances, because in spite of our national boast that we are not hidebound by custom and tradition, and that we are always ready to "try anything once," merchants did not like the idea of departing from their usual methods of settlement.

Introduction Not Easy

It soon became apparent that an organized effort must be made if the trade acceptance was to become popular. Meetings were held all over the country under the auspices of the various credit men's associations, bankers' associations, boards of trade, chambers of commerce and other similar organizations.

Then money became scarce and credits were restricted on account of the war activities. Bank loans were shortened and contracted. It became more and more necessary to finance commercial transactions by the most efficient and up-to-date methods. The Federal Reserve banks were authorized to offer a preferential discount rate on trade acceptances offered for rediscount, and banks found in acceptances a means of keeping their assets very liquid and at the same time supplying their customers with credits and funds.

The retailer realized at once the benefit of having his customer agree to pay on a fixed day of settlement, instead of having an open account, the payment of which depended upon the humor of the debtor, and which frequently ran four, five, and sometimes six months. In the East trade acceptances were mostly used by merchants who sold staples in quantities or by those who gave long credit terms.

The decision of the New York Clearing House to handle acceptances payable in New York in the same manner as cheques had a stimulating effect, particularly on the banks, who gained greater confidence in the instrument that received this recognition by the clearing house.

Realizing the great importance to business of the movement and the rapidity of its growth, it seemed necessary to have some central organization to guide and regulate the general practices and customs that should be followed in the use of this new credit instrument. Accordingly, the American Trade Acceptance Council was formed, consisting of representatives from the American Bankers' Association, National Association of Credit Men and the Chamber of Commerce of the United States.

Increased Work for Banks

It is obvious that when a merchant changes his selling terms from the old open account basis to the new system, and obtains trade acceptances from his customers, he places upon the bankers the work that was formerly done by his own collection department. The merchant has been accustomed to personally correspond with his various debtors, and unless the bankers collect, remit and advise promptly a very bad impression is given to the merchant.

Therefore, if acceptances are to be popularized, bankers must see to it that the machinery of collection works rapidly and accurately, and that information comes through promptly, particularly if there is delay of any kind or for any reason whatsoever.

Now, regarding the return to peace conditions. It has been demonstrated that the trade acceptance is a good thing. It has had a practical test. Facilities are increasing right along, making it easier to handle or dispose of acceptances and perfecting the collecting machinery. It is only a question of time when trade acceptances will have a wide market and will be bought and sold at low rates of discount.

Firms of high credit and large capital are at present less inclined to give trade acceptances than the smaller firms, which of necessity must consider "terms" when making their purchases. The large firms seem to prefer to pay cash and obtain all the advantages arising therefrom. However, the old practice of cash discount will never be entirely abolished, but will always continue as one method of settlement. Trade acceptances are reducing many business evils, such as taking of overtime, the unwarranted return of merchandise and other similar matters. In this respect they have been of great service.

In the agricultural sections, and wherever the livelihood of the population is derived from the crops or products of a season, it is quite likely that the acceptance will be used between the merchant and the retail customer. By their use the merchant finds it easier to carry his customer over the "between season" periods, and the customer, knowing that his acceptance is held by the bank and not by the merchant, makes much greater effort to settle it on due date than he would if he owed an open account to a merchant with whom he is friendly.

---

FOOD COMMODITIES IN STORAGE

A preliminary report of food commodities in cold storage in Canada on June 1st, 1919, has been issued by the Department of Labor. It gives the following figures:—

	Lbs. or doz.
Butter, creamery	2,026,671
Butter, dairy	146,980
Oleomargine	351,118
Cheese	2,983,438
Eggs, in cold storage	7,549,451
Eggs, other than cold storage	883,400
Eggs, frozen	237,922
Pork, frozen	5,080,413
Pork, not frozen	2,149,665
Pork, dry salted	2,222,825
Pork, sweet pickled	9,012,992
Pork, in process of cure	16,618,876
Beef, frozen	22,566,061
Beef, not frozen	2,525,074
Beef, cured	583,951
Beef, in process of cure	439,264
Mutton and lamb, frozen	2,004,892
Mutton, not frozen	25,156
Poultry, broilers	93,471
Poultry, chickens	578,603
Poultry, fowl	788,264
Poultry, ducks	22,054
Poultry, geese	84,999
Poultry, turkeys	206,644
Poultry, unclassified	176,297
Fish, in cold storage	14,987,983
Fish, other than cold storage	3,051,217

The Dominion Sheet Metal Corporation, of Hamilton, is offering to sell 8 per cent. preferred stock to employees at par. The shares are quoted in the market at 110 to 112.

DEBENTURES FOR SALE

TOWN OF CAMROSE

DIVIDEND NOTICE

THE STEEL COMPANY OF CANADA, LIMITED

ORDINARY DIVIDEND No. 10

Notice is hereby given that a dividend of one and one half per cent. on the issued and fully-paid Ordinary shares of the Company has been declared for the quarter ending June 30th, 1919.

PREFERENCE DIVIDEND No. 32

Notice is also given that a dividend of one and three-quarters per cent. on the issued and fully-paid Preference shares of the Company has been declared for the quarter ending June 30th, 1919.

The above dividends are payable August 1st, 1919, to shareholders of record at close of business, July 10th, 1919.

By order of the Board.

H. H. CHAMP, Treasurer.

Hamilton, Ontario, June 11th, 1919.

The Royal Bank has issued a booklet, printed in both Spanish and English, describing its progress in Cuba during twenty years. In November, 1898, Mr. E. L. Pease, then joint general manager, visited Havana to enquire into the advisability of opening a branch in that city. This was done in January, 1899, and additional branches have been opened since that time. The bank's property in Cuba includes several handsome buildings.

GOVERNMENT AND MUNICIPAL BONDS

Nova Scotia Issue Offered by Government—July Borrowings Will Probably be Large

A REFERENCE to the list below will indicate the volume of municipal financing which is to be done in the near future. The province of Nova Scotia has also asked for bids for $1,200,000 of bonds up to June 23rd. Ontario has $3,-000,000 of notes maturing on July 13th. Mr. McGarry, provincial treasurer, informs *The Monetary Times* that arrangements have already been made to meet these notes. It is understood that the province's policy is to rely upon the banks in the expectation that the conclusion of peace arrangements will bring about the further improvements in market conditions. A large amount of municipal and provincial financing is being rushed through, however, as it is now understood that the Dominion government's large war loan will be placed upon the market in the early fall.

The following quotations in New York funds of active government bonds are supplied by the National Company, Limited. It will be noticed that the Russian external bonds show a slight decline, which is probably the result of the announcement that those maturing on June 18th could not be met. These bonds will henceforth be quoted flat, that is, without interest.

	Bid.	Offered.
Anglo-French 5% (Oct. 15, 1920)	97 3/16	97 5/16
United Kingdom 5½% (Nov. 1, 1919) .	99 11/16	99 13/16
United Kingdom 5½% (Nov. 1, 1921) ..	98 5/8	98 7/8
United Kingdom 5½% (Feb. 1, 1937) ..	99 5/8	99 7/8
Canadian Pacific 6% (Mar. 2, 1924)	101	101 3/8
City of Paris 6% (Oct. 15, 1921)	97 5/8	97 7/8
Dominion Canada 5% (Aug. 1, 1919) ...	99 13/16	99 15/16
Russian Govt. Ext. 5½% (Dec. 21, 1921)	46	50
Russian Govt. Ext. 6½% (July 10, 1919)	51	54

The following is a list of debentures offered for sale, of which particulars appear in this or previous issues of *The Monetary Times*:—

Borrower.	Amount.	Rate %.	Maturity.	Tenders close.
Nova Scotia	$1,200,000	5	Various	June 23
Point-aux-Trembles, Que.	165,000	5½	10 & 20 years	June 24
Beauharnois, Que. .	57,500	5½	....	June 30
Camrose, Alta. ...	8,000	6	15-instal.	July 2
Alberta School Districts	19,800	7	Various	July 2
East Whitby Township, Ont.	61,000	5½	25 & 30 instal.	July 7
Regina, Sask.	139,000	5½	30-years	July 2
Camrose, Alta. ...	17,000	6	20-instal.	July 2
Montreal, Que.	624,000	4½	40-years	July 3
Lancaster Tp., Ont.	100,000	5½	25-years	Aug. 15

Hensall, Ont.—The town has disposed of an issue of $4,-000 5½ per cent. 10-year debentures.

Chatsworth, Ont.—Messrs. Brent, Noxon and Co. have been awarded an issue of $1,400 6 per cent. 10-instalment debentures.

Oak Lake, Man.—Messrs. W. L. McKinnon and Co. have purchased an issue of $9,000 6 per cent. 20-instalment bonds at a price to yield 6½ per cent.

Eastview, Ont.—Messrs. Brent, Noxon and Co. and W. A. Mackenzie and Co., have purchased an issue of $71,000 5½ per cent. bonds, due serially in one to 30 years.

Beauharnois, Que.—Sealed tenders will be received up to June 30th, 1919, for the purchase of $57,500 5½ per cent. debentures, dated March 1st, 1919. Further information may be obtained from F. X. Leduc, secretary-treasurer, Beauharnois.

Regina, Sask.—Sealed tenders will be received up to July 2nd, 1919, for the purchase of $139,000 30-year 5½ per cent. debentures, interest payable semi-annually on sinking fund plan, for purpose of erecting new school. (See notice elsewhere in this issue.)

Trail, B.C.—Within the next month the ratepayers will vote on money by-laws for civic improvements for approximately $32,000. There will also be an issue of local improvement cement sidewalk debentures for sale shortly to the amount of about $9,000.

Bow Island, Alta.—Ratepayers will shortly vote on a by-law authorizing the building of a municipal hospital. In the event of the passage of the by-law, debentures will be issued to the amount of $42,000, bearing interest at 7 per cent., and repayable in 20 instalments, to finance the scheme.

Camrose, Alta.—Sealed tenders will be received up to July 2nd, 1919, for the purchase of $17,000 6 per cent., 20-instalment, electric power plant debentures, and $8,000 6 per cent. 15-instalment debentures for financing the improvement of the exhibition grounds. (See notice elsewhere in this issue.)

Lancaster Township, Ont.—At an election held on June 7th, the issue of $100,000 5½ per cent. 25-year serial road debentures was authorized. Proposals for these debentures will be received up to August 15th, 1919. According to the latest figures, the total assessment is $2,426,393, the municipal debenture debt $3,448, and the school debenture debt $816.

Nova Scotia.—The province has sent out further notices calling for tenders on one and two-year 5 per cent. debentures. This means that tenders will be received till June 23rd for $1,000,000 or $1,200,000 one, two, ten, fifteen and twenty-year 5 per cent. debentures. The issue is to finance the installation of permanent highways and other construction purposes.

Sherbrooke, Que.—The city is calling for tenders up till July 2nd, 1919, for the purchase of $142,500 5 per cent. 20-year debentures, dated June 1st, 1919. The interest is payable June and December each year at La Banque Nationale in Sherbrooke, Montreal and Quebec, and at the First National Bank of New York. Tenders must be accompanied by a cheque equal to 1 per cent. of the loan, and specify whether made with accrued interest or not. A brief review of the financial statement of the city will be found elsewhere in this issue.

The Canada Standard Loan Company
520 McIntyre Block, Winnipeg

St. John County, N.B.—An issue of $100,000 5 per cent. [illegible] debentures of the municipality of the city and county of St. John, N.B., tenders for which were to be received on June 20th, were sold over the counter locally, at par, on the 18th.

Pont-aux-Trembles, Que.—Tenders will be received up till June 24, 1919, for the purchase of $90,000 5½ per cent. bonds, due September 1st, 1938, and $75,000 5½ per cent bonds, due September 1, 1928. There is an alternative on the first issue for $90,000 5½ per cent 5-years.

Miniota, Man.—Two blocks of bonds totalling $33,500, bearing interest at the rate of 5½ per cent., have been purchased by Messrs. A. E. Ames and Co., Toronto, at 100.55, which is on a basis of about 5.35 per cent. The two blocks are $3,500, payable at the end of 20 years; and $30,000, payable in 30 instalments. They are guaranteed by the province of Manitoba.

Alberta.—Messrs. W. Ross Alger and Co., Edmonton, have purchased the following blocks of bonds in the province:—

$[illegible] 6 per cent. debenture Calgary Roman Catholic Separate S.D. No. 1, repayable in 20 serials. Proceeds to be used for the building and equipping of a new school.

$[illegible] 6½ per cent. debenture Manville Rural Hospital District, No. 1, repayable in 20 serials. Proceeds to be used in the building and equipping of a hospital.

$[illegible] 8 per cent. debentures, village of Nobleford, repayable in 15 serials. Proceeds to be used for local improvements.

New Toronto, Ont.—Messrs. C. H. Burgess and Co., Toronto, have purchased an issue of $51,000 6 per cent. 20-instalment debentures, issued for waterworks purposes.

Hawkesbury, Ont.—A by-law has been passed authorizing an expenditure of $75,000 for asphalt pavements.

Bienville, Que.—A block of bonds amounting to $50,000 has been sold to the Corporation of Municipal Obligations, Que.

Town of Sandwich, Ont.—A by-law has been passed authorizing the issue of $50,000 6 per cent. 30-instalment debentures to finance the construction of an addition to the present Separate School House.

Guelph, Ont.—The Canada Bond Corporation, Toronto, has purchased two issues of bonds totalling $118,000 as follows:—

$68,000 30-instalment, for public school purposes, and $50,000 a loan to the Northern Rubber Co., 15-years 5½ per cent. On the first block, a price of 102.944 was paid, and on the second 102.788.

St. Catharines, Ont.—The Bankers Bond Co., of Toronto, has purchased an issue of $100,000 5½ per cent. serial debentures, maturing 1 to 20 years. The following is a list of tenders:—

AMES-HOLDEN TIRE ISSUE COMING

The issue of $1,000,000 of 7 per cent. bonds of the Ames-Holden Tire Co. is to be placed upon the market by a Montreal syndicate consisting of Thornton, Davidson and Co., Ltd., Greenshields and Co., and Nesbitt, Thomson and Co., Ltd. It is expected that the bonds will be guaranteed by the parent, Ames-Holden-McCready Co., which controls the subsidiary.

The Royal Securities Corporation, Montreal, has removed its executive and general offices from the second floor at 164 St. James Street to their new premises on the ground floor of the same building. These offices were previously occupied by Hanson Bros., bond dealers. Upon their vacation of the premises, extensive alterations were carried on. A suite will also be occupied on the second floor where the old offices were located.

NEWS OF MUNICIPAL FINANCE

Calgary Tax Rate up 5¾ Mills—Edmonton Utilities Make Better Showing

Simcoe, Ont.—The council has received the estimates and passed a by-law creating a 28-mill rate for 1919, the same as in 1918.

Calgary, Alta.—According to an estimate made by the city treasurer, approximately $70,000 has been collected in disposals of property at the recent tax sale.

Sherbrooke, Que.—The financial statement of the city for the year ended December 31st, 1918, shows that cash on hand and in the bank amounts to $[illegible]8,915, accounts receivable $1[illegible]78, and sinking fund $297,231. There is an amount of $[illegible]4,000 for bonds pledged to La Banque Nationale. The funded debt amounts to $2,511,400, and depreciation reserve, $2[illegible]8,800. The surplus amounts to $1,001,968.

Brant County, Ont.—The total expenditure is estimated at $16[illegible]4, with receipts amounting to $40,109. This leaves $12[illegible] to be raised by taxation this year. Of the total amount to be raised for expenses the amount included in connection with roads and bridges, of which amount the town of Paris under settlement with that municipality pays its part, is $60,915.

Montreal, Que.—The collection of arrears due on the realty tax for the first five months of 1919 shows an increase of $5[illegible]3,000, as compared with the same period last year. The amount collected this year was $2,310,009 on the 1918 arrears and the amount taken in for the same period last year was $1,7[illegible]6. On the 1917 arrears due there has also been collected this year the sum of $435,136, making a total of arrears collected on property this year of $2,745,445, according to figures secured from assistant treasurer Collins at the City Hall. With regard to the increase of $543,000, it seems the collections are normal, as the apparent increase is due to the higher taxation. The arrears collected in 1918 were due in 1917, when the rate of taxation on realty was 1 per cent. and the arrears collected this year were due in 1918, when the rate of the property tax was 1.35 per cent. There is also the increase of the school tax to be considered in the arrears of this year. And, finally, the 7 per cent. interest charge which went into effect in 1918 remains in force this year as well, and it has had the effect of stimulating the payments of the said arrears, and makes the work of collection easier.

Calgary, Alta.—The mill rate when assessments are passed will probably be 35: one mill added for provincial taxes, three-quarters of one mill for special levy, making a total of [illegible].75 mills. This is an increase of 5.75 mills over the rate struck for 1918 of 31 mills, although a special levy later made brought that figure up to 32¼ mills. The expenditure for the year is made us as follows:—

Departmental estimates	$3,093,503
Provincial supplementary revenue tax	57,037
Special levy	58,457
	$3,208,998

This will be obtained from an estimated revenue, as follows:—

Assessment, $77,943,010 at 35.0922 mills		$2,735,204
Add business tax	$167,193	
Sundry revenue per estimates	341,105	
	$508,298	
Less discount	150,000	358,298
Add 1 mill land assessment provincial supplementary revenue tax	57,037	
¾ mill on assessment for special levy	58,457	115,495
		$3,208,998

Winnipeg, Man.—At a meeting of the city finance committee last week a resolution was passed regarding the long standing account with the Canadian Northern Railway Co. It reads as follows:—

"That $100,000 be accepted from the Canadian Northern Railway Co. in full payment of all taxes due by the company as owner or lessee, to the city of Winnipeg for the period ending December 31, 1917 and 1918, taxes to be pro-rated, on the following conditions:—

"The company to pay all the local improvement assessment taxes levied against its lands in the said city from and including the year 1918.

"This settlement does not and is not to be taken to relieve any lessees of any property owned by and leased from the company from personal liability for any municipal taxes or assessments upon or in respect of any such leasehold interest, or shall not relieve any such lease hold interest in respect thereof, or of any lien on such leasehold, interest for same.

"This settlement shall satisfy and dispose of all suits and claims by the railway company for the returning of moneys paid for taxes or otherwise by the railway company under protest, but the city will furnish to the company redemption certificates for lands of the company sold for taxes maturing prior to December 31st, 1918.

"The tax collector is hereby instructed to demand from the lessees payment of all arrears of municipal taxes on leasehold interests in property leased from the company, and failing payment being made within a reasonable time, to issue a writ for the collection of same.

"Upon payment of $100,000 by the company hereinbefore referred to, the city treasurer is hereby authorized and instructed to redeem any lands of the company sold in tax sales and which have not been redeemed."

Edmonton, Alta.—For the month of April a net surplus of $9,264 was obtained from the public utilities, compared with a net deficit of $1,033 for the same month last year. The net surplus for the four months (inclusive of the street railway deficit) amounts to $59,887, as compared with $36,511 for the corresponding period of 1918. The net surpluses for the four months are as follows:—

	1918.	1919.
Electric light	$51,515	$59,423
Telephone	9,462	16,821
Waterworks	8,626	12,076
Total	$69,604	$88,321

The street railway deficit is $28,433, against $33,092 last year, leaving the net result, as already stated, of a net surplus of $59,887, against $36,511 in 1918, on the combined utilities.

The financial report of the sinking fund board for last year shows that interest earnings on mortgages, bonds, debentures and guaranteed stocks, etc., amounted to $213,888, as compared with $191,281 for the previous year. The sinking fund requirements for the year were $198,783, showing excess interest earnings of $15,104, as compared with $26,319 for the previous year. The total funds of the board as at 31st December last, amount to $4,593,098, which includes surplus earnings of $177,996, which, however, are subject to the results of realization of mortgage loans. The total funds for the year previous amounted to $3,809,072, showing an increase of $784,026 in the funds over 1917. The investments of the board include the following:—

Dominion of Canada war loan bonds	$ 479,755
Bonds of and securities guaranteed by the provinces of Canada	512,199
Debentures of municipalities and school districts in Canada	514,697
City of Edmonton debentures	399,160
City of Edmonton short-term debentures, issued against tax arrears	1,087,077
	$2,992,890
First mortgages on real estate	1,203,854
	$4,196,744

Interest due and accrued, accounts receivable, etc., make up the balance of the funds.

The United States as a Market For Canadian Bonds

Prior to its entrance into the war, the United States was fast becoming the principal market for Canadian Provincial and Municipal bonds, having in recent years replaced England in this particular. A healthy appetite and a sound respect for such securities was much in evidence among American investors in 1914, 1915 and 1916.

The war is hardly over and yet bond dealers in New York and other cities in the States, who formerly handled "Canadians," are already beginning to deal in bonds issued by Cities and Provinces in the Dominion.

There is little doubt but that the United States will quickly resume its former position with respect to Canadian financing operations. Hence, it behooves the borrowing Province, City or Town to present its borrowing problems to the investment bankers in New York, Boston, Philadelphia, Chicago, etc.

THE BOND BUYER is recognized as "The Authority on Municipal Bonds." It is the logical medium through which Bond Dealers, Banks or Municipal Officials may reach every active buyer of Municipal Securities. That is why it carries more official advertisements of State and Municipal Bond Offerings than all other U. S. financial papers combined.

A specimen copy will be sent gratis upon application

INVESTMENTS AND THE MARKET

Dull Week, With Sagging Prices on Stock Exchanges—Maple Leaf Profits Up—Tucketts Profits Lower—Laurentide Pulp and Paper Declares Bonus

THE past week has been dull and featureless in the stock markets; this is partly due to a slackening in demand owing to the uncertainty in the industrial outlook, and to the usual quietness of the hot weather season.

Steel stocks furnished most of the developments on the 12th and 13th, gains of several points being recorded. Dominion Canners and Bell Telephone rights also made advances. The tendency on Saturday was downward. Monday was a very dull day, steel and paper stocks falling considerably; bonds, which had been going down last week, held up fairly well. Some recoveries were made on Tuesday, especially in the paper stocks, following the announcement that Laurentide was to pay a bonus of 3 per cent. Canadian Locomotive, which has been advancing continuously, made a further gain on Wednesday, as did also National Breweries, Spanish River, and a few other stocks.

New Brunswick Gas and Oil Fields, Ltd.—The company at well No. 18, about eight and a half miles from Moncton, N.B., has struck the most prolific and deepest oil flows yet found in these fields, at a depth of 2,622 feet. The gush reached a height of 70 feet above the ground, and was the first of its kind in the district.

Dome Extension.—At the annual meeting of the company last week the board of directors was re-elected with the exception of Geo. C. Miller, of Buffalo, whose place was filled by J. H. Black, of Toronto. The other members of the board are W. S. Edwards, president; Alex. Fasken, treasurer; J. H. Tomenson and A. H. Curtis.

Matthews-Blackwell, Ltd.—The company has been admitted to the new combine, the Allied Packers, Inc., according to an announcement made by John A. Hawkinson, president of Allied Packers. The Matthews-Blackwell Company, which has its head office in Toronto, and five plants in the Dominion, is one of the largest packing concerns in Canada.

Laurentide Co., Ltd.—The directors of the company have declared a bonus of 3 per cent. on the $9,000,000 capital stock, in addition to the usual quarterly dividend of 3 per cent., payable on July 2nd, next. The company increased its disbursements to shareholders to 12 per cent. in December of last year after paying a 10 per cent. rate from March, 1917, prior to which time dividends of 8 per cent. had been distributed among holders of the shares since the summer of 1911.

Grand Trunk Railway.—According to a statement for the first four months of this year received from London, Eng., there is a substantial increase in receipts amounting to 1,092,100. Expenses show an increase of $797,400. The statement is as follows:—

	1919.	Increase.
Gross receipts	£3,978,300	£1,092,100
Expenses	3,861,100	797,400
Net	£ 117,200	£ 294,700

Pacific-Burt Co., Ltd.—The annual meeting of the company was held on June 17th, 1919. Mr. S. J. Moore, the president, outlined the developments of the year, and spoke of what he considered a bright future. The operations during most of the fiscal year, which ended on March 31st last, were carried on under war conditions, but, despite this handicap, the net profits totalled $83,743.56.

The transfer of $16,025.40 to the real estate and plant reserve increases that account to $70,000. The sum of $5,037.53 has been transferred to the reserve for taxes to provide for federal income taxes. A further amount has been written off against patents, reducing that account to $210,000. After meeting all necessary changes a balance of $29,654.56 was carried forward to the present year.

The old board of directors was re-elected.

Arena Gardens of Toronto, Limited.—The annual meeting was held at the head office in Toronto on June 17th, 51 per cent. of the stock being represented. An improvement in the financial position was reported by the management, all arrears being paid up excepting two years' interest, amounting to $36,000 on the bonds, and sinking fund payments accumulated to the amount of $10,000. For the financial year ended May 31st, the bond interest was almost earned after paying other expenses, and there is now a credit balance of $13,000. An improvement in earnings is expected during the year. The following directors were elected:—Godfrey Bird, president; Wm. Lyall, vice-president; E. G. Bird, managing director; Sir John Carson, I. P. Rexford, G. A. Ross and J. B. Caine. Mr. M. C. Callaghan was again appointed secretary, and Messrs. Wright and Kingman were appointed auditors.

Canadian Car Company Awarded $78,000.—The Canadian Car and Foundry Co. has just received $78,000 as the result of the decision of the American Courts in connection with the suit taken by the company against the American Car Company in regard to munitions contracts. It is also officially announced that the company has received final settlements on account of munition contracts, from both the Canadian and United States governments. The amounts involved in these settlements will in all probability be made known to shareholders in the near future.

The company's plants, with the exception of that at Amherst, at which there is a strike, are working on a satisfactory basis, the company having on hand about $8,000,000 of orders. This amount will undoubtedly be largely supplemented by orders which are likely to be received from the Canadian government once the labor situation shows signs of improvement.

Mexican Northern Power Company, Limited.—A reorganization of the company has been arranged and was approved at a meeting of the bondholders in Toronto on June 16th. A new company is to be organized under Ontario charter with the name of the Northern Mexican Power and Development Company, Limited, with a capital of $3,000,000 fully-paid seven per cent. preferred stock, and $11,000,000 fully-paid common stock. This new company is to purchase the assets and property of the Mexican Northern Power Company. The capital stock of the latter is $12,600,000. In 1912, about three years after the company was organized, the shares ranged in value from 17½ to 30½, but present values are only a fraction of those quotations. The reorganization is being carried out by the Montreal Trust Company.

Canadian Converters Company, Limited.—The company's profits, derived from subsidiary companies, for the year ended April 30th, 1919, totalled $254,574 compared with $217,316 last year. When this was added to the balance brought forward, a total of $611,494 was obtained. This was disbursed as follows, compared with last year:—

	1918.	1919.
Bond interest	$23,940	$23,940
Reserve for depreciation.........	27,000	27,000
Reserve for war tax and bad debts	21,500	30,000
Dividends paid	52,005	65,006
Dividend payable May 15th	17,335	21,668
Balance at credit	373,316	443,879

Total assets are now $2,953,667 in comparison with $2,786,070 at the end of last year, the increase being principally

DIVIDENDS AND NOTICES

THE REAL ESTATE LOAN COMPANY OF CANADA, LIMITED

DIVIDEND No. 65

Notice is hereby given that a Dividend at the Rate of three and one-half per cent. for the half-year ending 30th June has been declared upon the Capital Stock of the Company, and that the same will be payable at the Offices of the Company in Toronto on and after 2nd July, 1919, to Shareholders of record of 16th June.

By order of the Board.
E. L. MORTON,
Toronto, 5th June, 1919. Manager.

THE CANADIAN CROCKER-WHEELER CO., LIMITED

DIVIDEND NOTICE

The Transfer Books will be closed from the 16th to th 30th of June, both days inclusive.

By order of the Board,
E. R. W D,
esident.

in the accounts receivable. On the liability side of the balance sheet current liabilities, reserve for depreciation and the balance at the credit of profit and loss show increases.

Anglo-French Exploration Company.—The 29th annual meeting was held in London, England, on May 7th. The report for the year ended 31st December, 1918, showed dividends, etc., received to the amount of £66,366, and profits realized by sales of shares £9,841, making a total of £76,208. From this was deducted directors' fees, management and other expenses and debenture interest, a balance of £32,545, being carried to appropriation account. A dividend on the ordinary shares for the year 1917, at the rate of 7½ per cent. per annum, was declared on May 8th, 1918.

Maple Leaf Milling Company.—The profit and loss account for the year ended March 31st, 1919, compares as follows with that of the previous year:—

	1918.	1919.
Balance brought forward ..	$1,402,332	$1,572,504
Profit for the year	1,021,266	929,105
Total	$2,423,598	$2,501,614
Interest paid to bank	113,590	158,069
Preferred dividends	175,000	175,000
Common dividends	562,500	600,000
Balance carried forward ...	1,572,508	1,568,545

The balance sheet now shows total assets of $13,384,307, an increase of $4,500,000. This increase is principally in the grain, flour, feed, etc., on hand. Last year the inventory of supplies of this kind totalled $1,999,813, whereas this year it is $4,749,459. Bills receivable are now $445,839 in place of a nominal amount last year. Investments are now $2,545,776 in place of $390,379 last year. Funds for carrying these additional assets have been secured by advance from the banks which totalled on March 31st, $4,676,487. Accounts payable are less than last year, being $744,587 compared with $987,384. The depreciation reserve has been increased from $500,000 to $750,000; the contingent fund is reduced from $611,539 to $457,937, and an insurance reserve of $55,500 has been created.

Tuckett Tobacco Co., Ltd.—In the annual statement of the company now going forward to shareholders, the earnings are shown to be back to the pre-war level. Profits for the twelve-monthly period ended March 31st last, amounted to $264,113, an increase of $62,632, or in excess of 30 per cent. over the previous year, and $77,615, or nearly 42 per cent., over the 1916-17 period. With the exception of the 1913 showing, which was the first statement issued by the company as at present constituted, when the annual profits amounted to $303,384, the 1918-19 earnings represent the best in the concern's history. After deducting $140,000 for preferred dividend requirements, there remained a balance available for dividends on the common shares of $124,113, or equal to approximately 4.5 per cent. on the outstanding issue of the enterprise's junior securities. With the previous year's balance added, there remained a surplus to carry forward into the current year of $462,046, or over 18 per cent. on the common shares.

The financial position of the company, as shown in the balance sheet, is characteristically strong, current liabilities of $812,866 contrasting with nearly $2,800,000 in current assets. Among the latter, inventories stand unusually high at $2,081,203, compared with $1,735,112 in 1918, $1,236,645 in 1917, and $1,221,586 in 1916. The consistent increase in this respect, in all probability, is due to the increasing costs of both the raw and manufactured materials covered by the account. Cash on hand at $95,367, compares with $59,802 in the previous year's statement, while investments were increased by $65,697 to $122,655; this gain, however, is more than offset by a new item in the balance sheets of $75,000 in bank loans against the purchase of Victory bonds.

World international commerce in 1918 was nearly $60,000,000,000 in value, against $40,000,000,000 in 1913 and $20,000,000,000 in [illegible]

RECENT FIRES

Further Large Loss of Lumber in New Brunswick—Not Many Small Fires

Blairmore, Alta.—June 9—Five buildings in the business section were destroyed. Estimated loss, $40,000.

Cayuga, B.C.—June 11—The driving and implement shed on George Humphrey's farm was destroyed. Estimated loss, $3,000. Insurance, $200.

Chinook, Alta.—June 8—The garage owned by P. M. Brownell was destroyed. Estimated loss, $30,000. The Advance printing office also had a loss of about $5,000.

Fort Steel, B.C.—June 13—The Bridges Lumber Co.'s mill, operated by Mr. Elwood Burtt, was destroyed. Estimated loss, $50,000.

Kedgewich, N.B.—June 13—The Richards Lumber Co.'s mill, two mills owned by the Poulay Co., forty houses and a large territory of lumber lands were destroyed. Estimated loss, $150,000.

Newmarket, Ont.—June 12—The Wm. Cane factory, owned by Wm. Cane and Sons, was damaged. Cause, defective boiler. Estimated loss, $20,000.

Regina, Sask.—June 15—The plant of the Imperial Oil Co. was damaged. Cause, defective safety value. Estimated loss, $7,500.

Toronto, Ont. — June 16 — Gasoline launch, "Centre Island," owned by W. Forsythe, was damaged. Cause, match thrown in boat. Estimated loss, $500.

June 19—The warehouse of the High Grade Oil Co., 139 Royce Avenue, was damaged. Cause, electric switch. Estimated loss, $1,500. Oil to the amount of $35,000 was destroyed.

Winnipeg, Man.—June 15—The building of the Winnipeg Brick Co., Ltd., Osborne Street, was damaged. Cause, electrical wiring. Loss is covered by insurance.

ADDITIONAL INFORMATION CONCERNING FIRES

Calgary, Alta.—May 14—The building owned by W. R. Hull was destroyed. Estimated loss, $24,400. The following companies are interested: Liverpool, Man., $1,500; General of Perth, $1,000; Delaware Underwriters, $3,000. Total, $5,500.

Collingwood, Ont.—May 25—The Imperial Steel and Wire Co.'s building was destroyed. Insurance was carried to the amount of $424,300 as follows: On building and machinery: National of Hartford, $5,000; Westchester, $5,000; Winnipeg Fire, $7,000; St. Paul, $7,000; Minnesota Underwriters, $5,000; Canada Accident, $4,500; British Dominions, $7,500; Ætna, $5,000; National Union, $5,000; Montreal Underwriters, $10,000; North Empire, $5,000; Fidelity Underwriters, $5,000; Royal, $5,000; Continental, $12,000; London Mutual, $10,000; Guardian, $23,000; Canadian Fire, $5,000; Norwich Union, $5,000; Sun, $10,000; Mount Royal, $5,000; Liverpool and London and Globe, $5,000; British and Canadian Underwriters, $10,000; Pacific Coast, $3,000; State of Pennsylvania, $5,000; Strathcona, $5,000; London and Lancashire Fire, $35,000; Century, $10,000; Palatine, $10,000; Ocean, $15,500; total, $250,000. On Stock: National of Hartford, $5,000; British Crown, $10,000; Imperial Underwriters, $7,500; Royal Exchange, $5,000; Sun, $10,000; British Dominions, $5,000; Hand-in-Hand, $10,000; Atlas, $5,000; Providence-Washington, $10,000; Yorkshire, $10,000; North America, $15,000; North British and Mercantile, $7,500; total, $100,000. Use and occupancy: Rochester Underwriters, $10,000; Mercantile, $25,000; North Empire, $5,000; London Assurance, $10,000; British Traders, $10,000; Providence-Washington, $5,000; total, $65,000. On keg mill: Alliance of London, $1,300; Fidelity Underwriters, $2,000; London Mutual, $1,500; London Guarantee, $1,000; North British and Mercantile, $1,500; Sun, $1,000; total, $8,300. On stable and contents: Westchester, $1,000.

May Recommend Internal Trade Commission

Would Probably Have Power To Make Investigation on Request—Fixing of Prices, Margin of Profit, or Limitation of Profits Not Favoured—Cost of Living Committee Becomes Entangled in Specific Subjects

VARIED evidence, covering a field as wide as that considered by the Royal Commission on Industrial Relations, is being received by the Cost of Living Committee of the House of Commons. The report is to be presented before the close of the present session of parliament. The committee has drifted from one topic to another without any apparent plan of action. Some companies have been criticized for the methods of capitalization, while others have been accused of making too high profits. In almost all cases, however, it is found that the profits, even if large, represent a small fraction of the selling price of commodities. It is to suggest ways and means of reducing the latter that the commission was appointed, and as the present high prices are world-wide in extent, the field within which the committee can recommend effective action is very limited.

It is reported from Ottawa that an internal trade commission may be recommended, similar in scope to the Dominion Board of Railway Commissioners. Suggestions of this kind have been made several times before the committee. It is felt that price fixing is too complicated for permanent use, the fixing of a margin of profit not practicable, and a limitation of profits would not be good for industry.

On June 10th the Cost of Living Committee of the House of Commons called before it representatives of the packing industry in Canada. E. C. Fox, general manager of the William Davies Co., of Toronto, which firm conducts a general meat-packing and produce business, and distributes its products through its own retail stores, stated that the operating costs of his company totalled twenty cents on the dollar. The profits on produce, he said, were not as great as on meats. When asked to explain why some products were sold in England at lower prices than in Canada, Mr. Fox pointed out that in the case of oleomargarine, for instance, the product for the English market was not of the same quality as for the Canadian market, and, in the case of bacon, less preparation was necessary to meet English demands. If the price of hogs should be fixed here, he said, they would go to the United States.

Other witnesses heard were W. E. Matthews, of the Matthews-Blackwell Co., and Mr. Waller, of the Swift Canadian Co. The latter did not think that the formation of an association of American and Canadian packing firms would be of any importance. Mr. Matthews stated that storage of butter, for instance, did not cost more than one-third of a cent per pound. The cost of operating retail stores was from 16 to 18 per cent. Regulations allowed the packers a 4 per cent. gross profit wholesale and 10 per cent. retail.

On June 11th, E. C. Drury, of Barrie, representing the United Farmers of Ontario, maintained that a reduction in the tariff would bring a substantial decrease in the cost of living. The farmer, he said, is selling under world conditions and buying under high protection, which works to his disadvantage. He described the operations of a co-operative club which last year handled $1,750,000 of business at a saving of 13 per cent. and made a profit of 7 per cent. on the capital invested. The society does not have travellers on the road, and, by bringing about a simpler system of distribution generally, saves money.

A motion made by F. L. Davis, a member of the committee, to the effect that W. F. O'Connor, K.C., former Cost of Living Commissioner, should be retained as counsel for the committee, was found impracticable, as he could not be loaned by the Department of Justice.

On June 13th a discussion arose regarding a cargo of meat which was in harbor at Vancouver, but it could not be unloaded because of the strike there. Evidence was also received from a Toronto butcher, who maintained that there was no open meat market in Toronto. Representatives of the retail grocers also maintained that there were no undue profits in their trade. As a result of evidence received it was decided to summon before the committee a representative of the Wholesale Grocers Association, of Toronto.

In giving evidence before the committee on Monday, June 16th, Mr. F. A. Acland, Deputy Minister of Labor, expressed the opinion that this problem could be best dealt with by appointing a trade board or commission. This body would unite the functions exercised during the war by the food board and the fuel board and part of those exercised by the new trade commission. He thought that such an organization should be under the Department of Trade and Commerce, so that questions affecting imports and exports might also be dealt with. As to price-fixing powers, Mr. Acland considered it would be better to give it the power to fix the margin of profit in any business.

Textile Earnings High

Evidence received on June 17th from two textile manufacturers aroused much interest, not only among the members of the committee, but also with the general public. R. A. Pringle, K.C., who had been appointed council for the committee, took up his duties of assisting the committee in examining witnesses on this date. W. E. Paton, of the Paton Manufacturing Co., Sherbrooke, Quebec, was examined as to the profits of his firm, which manufactures cloth of various kinds. He said the earnings were: 1914, 6.88 per cent.; 1915, 26.15 per cent.; 1916, 35.38 per cent.; 1917, 46.81 per cent.; 1918, 17 per cent.; 1919, 72.9 per cent. The capital stock is $600,000. He said that there were 150 similar firms in Canada, but there was no arrangement regarding prices so far as he was concerned. Mr. Paton also pointed out that the average profits of the firm had been only 7 per cent., as for a period of eight years the stockholders had received no dividend.

Commenting upon newspaper reports of this evidence, Mr. John Turnbull, managing director of the Paton Manufacturing Co., points out to *The Monetary Times* that the profits referred to were subject to the Business Profits War

Tax of $202,811, and also that the figure of 72 per cent. was obtained by calculating on paid-up capital instead of production, which amounted to $1,780,310. He says:—

"The company during its fiscal year manufactured goods to the amount of $1,780,310. The gross profits earned were $437,833, of which amount $202,811 is payable to the government under the Business Profits War Tax Act, leaving a net profit of $235,022, or slightly over 13 per cent. on the value of the goods manufactured.

"The paid-up capital stock of the company was $600,000, and the rest and reserve funds used as capital in the business amounted to $644,594, making the total shareholders' capital employed in the business $1,244,594, and the net earnings of the company somewhat under 19 per cent. It may be added that a considerable portion of the profits was derived from increasing values in raw materials which have to be replaced at current prices, and it may be further stated that the rest and reserve funds employed as capital in the business were the accumulations of upwards of fifty years during 15 of which years the shareholders received no dividends on their investment."

F. G. Daniels, general manager of the Dominion Textile Co., stated that their gross earnings for the year ended March 31st, 1919, were $3,434,752, making a total of $5,623,947, when the balance from last year was added. After paying dividends and taxes there was a reserve of $1,100,000. The company was organized in 1905 with a capital stock of $7,500,000, of this $2,500,000 was preferred, of which $1,940,000 is issued, and $5,000,000 common stock. With the exception of $500,000 sold for cash, the stock was issued to the companies taken over. One reason for the large profit, he said, was that on March 31, 1918, the company had on hand a large quantity of raw cotton in a rising market. They had made from $1,000,000 to $1,500,000 in this way.

Wholesale Grocers Defend Their Trade

Before the committee on June 18th, representatives of the Wholesale Grocers' Guild of Ontario pointed out the essential part played by the wholesale grocery trade in the distribution of goods. Many instances were cited of manufacturing concerns which had endeavoured to sell direct to the retail trade, but which had finally recognized the economy of the wholesale organization by confining their sales to businesses of the latter class. The wholesalers also condemned the mail order business, claiming that the government by carrying goods through the parcel post at below cost was giving an unfair advantage to the mail order houses. The wholesale grocers naturally endeavoured to protect retailers who buy from them by refusing to handle the goods of manufacturers who sold direct to retailers at the same prices at which they sold to wholesalers. The establishment of an Internal Trade Commission was strongly urged.

Co-operative Distribution

A success in co-operative distribution was described on June 19th by R. Arkell, of the Canadian Co-operative Wool Grocers' Association. The company has a capital stock of $200,000, of which only $18,000 is paid up. They are the selling agents for sheep growers' organizations from British Columbia to Prince Edward Island, selling operations being conducted from Toronto last year. Wool to the value of $3,103,931 passed through their hands, yielding a total gross profit of $115,951, of which $58,755 went to shareholders, the balance going back to the patrons. Last year they charged a 3½ per cent. commission, but at the beginning of this year's season they had decided to make a blanket charge of two cents per pound, as they did not know what operating expenses would be. Some of this will, it is expected, be returned to the patrons. Last year the amount handled was 4,400,000 pounds, out of a total production of 15,000,000 in Canada. It is expected that they will handle 5,000,000 pounds this year.

F. C. Fletcher, managing director of the Union Stock Yards, Toronto, was also examined. He testified that 53 per cent. of the stock in that concern is owned by Chicago interests and 23 or 24 per cent. by the Harris Abattoir Co. The authorized capital is $1,500,000, of which $1,293,000 has been issued. Physical assets are more than this amount. Gross receipts last year were $398,000 and net receipts $132,000. A dividend of 7 per cent. was paid and $50,000 was invested in Canadian war bonds.

Profits of coal dealers in Ottawa were investigated on June 21st. The price rose from $10.75 in July, 1918, to $12.10 at the present time. A local dealer said that his margin of profit was 29¼ cents. The gross profit was $2.65 per ton, and the margin set by the fuel controller was $2.45.

Profits of Milling Companies

On Monday, June 22nd, several representatives of large Canadian milling companies were examined. Mr. Hedley Shaw, managing director of the Maple Leaf Milling Co., said that in 1913, 1914 and 1915, no dividends were paid on the common stock of that company. Since then the rate has been: 1916, 8 per cent.; 1917, 10 per cent.; 1918, 22 per cent. Part of the dividends in the last two years is represented by war bonds, etc. During the earlier years the company was building a mill at Port Colborne, Ontario. Upon examination by members of the committee it was found that the large profits were made by several turnovers during the year and that the profits per barrel of flour at the present time were just about 25 cents.

Other witnesses were W. A. Black, vice-president of the Ogilvie Milling Co. He said that the company had been incorporated in 1902 with a capital stock of $2,000,000 preferred and $2,500,000 common. Last year the common shareholders received 27 per cent., but that the total profits had amounted to 72 per cent.

The third witness was W. W. Hutchison, manager and vice-president of the Lake of the Woods Milling Co. The earnings were just 2.43 per cent. of the annual turnover of $34,443,730, and the years 1909 and 1913 had been better for the company than any war year. Their highest war dividend was in 1918, when it was 15 per cent. and the earnings per barrel of flour were 16⅓ cents.

An examination of Mr. J. S. McLean, secretary-treasurer of the Harris Abattoir Co., took place on June 24th. During this evidence some of the members of the committee maintained that accumulated profits had been capitalized, when the capital stock was increased from $880,000 to $2,000,000. Mr. H. H. Stevens, of Vancouver, maintained that this was not a proper method of financing. The witness, however, pointed out that a company does not begin to make money right away, and that the accumulation of profits generally covers a long period of years. Such profits belong to shareholders and where they are not paid out in dividends they represent an investment. The Harris plant, for instance, when it was built 19 years ago was worth $60,000, while their plants now are valued at $2,500,000. The net profits of the Harris Abattoir Co., during the last five years, were given as follows: 1914-15, $251,895; 1915-16, $408,232; 1916-17, $444,357; 1917-18, $522,014; 1918-19, $206,243. The margin of profit, he said, was about 25 cents per hundred pounds of meat.

ROBERT SIMPSON COMPANY STOCK OFFERED

Six per cent. cumulative preferred stock in the Robert Simpson Co., Ltd., Toronto, is being offered by Dominion Securities Corporation, A. E. Ames and Co. and Morrow and Jellett, Toronto, at 80. This is part of an issue which was made in 1912, being sold in England at 93. Some of the shares were, however, placed in Canada. The balance sheet of the company as at January 29th, 1919, shows total assets of $11,529,958. First mortgage bonds are outstanding to the amount of $2,172,518, mortgages totalling $396,129, and current loans $1,271,440. The preference stock issued to the amount of $3,350,000 is followed by common stock issued to the same amount. There is a surplus on profit and loss of $822,620.

SASKATCHEWAN'S TOWN PLANNING REGULATIONS

Municipality Required to Prepare By-Laws, or Department Will Do So—Owners to be Protected

SEPARATE regulations governing future development in urban and rural municipalities in Saskatchewan under the Town Planning and Rural Development Act of 1917 have been approved by the minister of municipal affairs and are being put into effect immediately. The Act and the regulations are designed not only to be a preventive for future haphazard development in urban and rural municipalities but also as a corrective, to some extent, of the evils which have been allowed to creep in under the old system of municipal growth.

Each local authority is required to prepare a set of development by-laws to be applied within its area and this applies to both urban and rural communities. They are allowed, however, as an alternative, to adopt a complete and comprehensive scheme of development which would, of course, include a set of bylaws. All municipalities, rural and urban, are given until 1920, in which to adopt such by-laws. Where they do not do so, the Department of Municipal Affairs has the right to step in and create bylaws for the negligent municipality and this, it is stated by the minister, will be done.

The Act and the regulations also make provision for the control of the location and plan of new townsites by the department in unorganized territories or in rural municipalities which have not already adopted by-laws regulating new townsites. This is an important feature, as it is intended to eliminate the location by the railway companies of townsites in locations which are topographically or otherwise unfit for development of this character.

"In drafting these regulations," says the Hon. Geo. Langley, minister of municipal affairs, "the health question is the predominant one and approval will not be given to by-laws and plans where sound sanitary conditions are impossible. Future extensions in cities and towns is largely in the hands of the local councils, but we are insisting that before future extensions are made to urban areas, the lands already within their boundaries shall be utilized to the utmost possible extent, consistent with healthful conditions. I am of the impression that we are not likely to approve of the narrow twenty-five foot lot in the plans of new subdivisions. In a country where there is an abundance of space the crowding together of dwelling houses on a small frontage reflects no credit on the municipal authorities, or the provincial government from which they derive their powers."

The regulations are now being printed for distribution to local authorities.

Property Owners are Protected

The subdivision of the land into public and private places, i.e., into streets and public reserves and building sites is necessarily the foundation of the town plan and the first matter which should receive supervision. Each local authority may assume the necessary control over new streets and subdivisions by adopting regulations and having the same approved by the minister when they will immediately take effect. The first step for the local authority is to appoint its engineering officer. The second act should be to apply to the director of town planning for a copy of the model regulations prepared by the minister.

Until the local authority has adopted the regulations the department will supervise the approval of new development under regulations approved by the minister. In each case hereafter, however, the local authority will receive written notice and a copy of the plan one month prior to its submission to the director for approval and, if desired, will have the opportunity to make objections or suggestions with respect to the plan.

The procedure regulations with respect to schemes and to by-laws are very detailed and provide for ample notice to all property holders and others interested, and time within which the public generally may become fully cognizant of the contents of the scheme and by-laws. This is desirable as the Town Planning and Rural Development Act introduces questions for the consideration of municipalities regarding which they have had no previous experience, and also places new and untried powers in the hands of the local authorities. Moreover, a development scheme or development by-laws, once approved, may not be revoked except by a subsequent scheme made and approved in accordance with the Act.

One of the chief difficulties with which the larger centres will have to contend in the preparation of schemes is the extent of land already subdivided in the suburban areas. Many of these subdivisions on account of the distance from the area which can be economically served with water service, sewers and transportation facilities should be cancelled and re-leased for agricultural purposes. Other areas should be replanned to suit the topography and general scheme of street arrangement. Provision is made in the Act for dealing, wherever possible, with such cancellations and the classification and replanning of the same.

Many of the matters which may be dealt with under a scheme or set of bylaws are connected with the betterment of housing conditions in new development. The benefits which landowners may secure under these provisions are a lessening of the percentage of land required for streets by a reduction in the widths of minor streets and the restriction of certain areas for dwelling house sites of a certain class and fixing the area of street surface to be paved or otherwise improved. The provisions relating to housing generally deal with building lines, restrictions as to height, class of building and percentage of lot to be built on, the limitation of the number of houses per acre and air space thereabout and the general hygienic conditions in connection therewith. Also in any area there may be prohibited noxious trades and bill boards, and unsanitary buildings may be removed or demolished.

WESTERN CROP CONDITIONS

Splendid Rains Have Greatly Helped Crop—Saskatoon District Poor—Manitoba and Alberta Good—Saskatchewan Generally Fair

(Staff Correspondence.)

Saskatoon, June 20, 1919.

SPLENDID rains have fallen in the west during the past week, and the crop outlook is greatly improved. Good reports are to hand regarding many parts of Manitoba, and these are mostly very encouraging. Reports from Alberta are also good and copious rains have fallen in most localities. The writer visited Regina and Saskatoon during the present week and while Saskatchewan, the greatest grain-growing province in Canada, on the whole, will have a fair crop, some parts of it are bad. In the district surrounding Saskatoon I discussed the crop situation with a prominent Saskatoon business man, who had just motored in several directions out from this important centre. In regard to the crop he said: "Conditions in the vicinity of Saskatoon are decidedly poor. We had our first shower of rain on the 10th inst., which wet the land for a depth of 2½ inches, but this has now evaporated. I motored thirty miles north of Saskatoon this week, and I figure that one-third of the crop will not be cut, another third may be cut, but will be very short and light, and the balance may return a fair yield, providing weather conditions in future are favorable. The crop for twenty-five or thirty miles east, west and south is in a similar condition, but outside of this radius, I understand, gradually improves. A very heavy rain has fallen the past two nights, both south and east of Saskatoon, probably within thirty miles, but it did not come closer. Eliminating the light land this will mean from fair to good crops in these districts. They have also had heavy rains again from Biggar west and along the Goose Lake line, and from what I can learn, the crop in this part of the country is doing well. Owing to the extreme dryness very little breaking has been done in the district immediately surrounding Saskatoon."

PERSONAL NOTES

Mr. W. L. Matthews, son of the late W. D. Matthews, has been elected to the directorate of the Dominion Bank.

Mr. W. B. Moore has tendered his resignation as managing secretary of the Winnipeg Board of Trade, to take place on July 10th next.

Mr. R. D. Fairbairn, of Toronto, has been appointed a member of the Canadian Trade Commission, in place of Mr. C. B. McNaught, who resigned several weeks ago.

Mr. Joseph Henderson, vice-president of the Bank of Toronto, has been appointed a vice-president of the Confederation Life Association, in succession to the late W. D. Matthews. He has been a director since 1911.

Mr. H. A. Benjamin, formerly special agent at Winnipeg for the Continental Insurance Co., of New York, and Fidelity-Phenix group of insurance companies, has resigned to join the firm of Creagan, Benjamin and Baker, at Calgary.

Mr. H. R. Stephenson, A.I.A., F.A.S., who has just been appointed manager of the Crown Life Insurance Company, has for the past seven years been actuary of that Company, and was formerly some time in the actuarial department of the Manufacturers Life Insurance Company. While still a young man he has reached the principal executive position in one of our new and progressive companies.

Mr. Duke Roberts has been appointed manager of the Travelers Insurance Company of Hartford, at Binghamton, N.Y. Mr. Roberts has been for seven years connected with the company's Toronto branch as special agent travelling in the Ontario district.

Mr. G. S. Archbutt, who is in charge of the fire and automobile department of the Union Insurance Society of Canton, Limited, and the British Traders Insurance Company, Hong Kong, was a visitor in Toronto this week. Mr. Archbutt is making a business tour of the United States and Canada.

Mr. W. B. Tomlinson has been appointed assistant manager of the Travelers Insurance Company of Hartford, for the Province of Ontario, headquarters, Toronto. For the past four and a half years, Mr. Tomlinson has been head office representative in the accident department, covering the United States and Canadian fields. For eight years previous he was connected with the Ontario branch office as special agent.

Mr. Rene T. Leclerc, well-known Montreal bond dealer, reached that city on June 17th, after spending a month in London and Paris in connection with the development of Canadian bond business. Mr. Leclerc reports that London banks and bond investment houses were not at all disposed to part with Canadian investments. In fact, he found that both in London and Paris Canadian investments were very highly regarded, due largely to the stability of prices throughout the war period.

OBITUARY

Mr. Maclean Borthwick, secretary of the Mining Corporation of Canada, died last week at his home on Glencairn Ave., Toronto, in his 47th year, after a short illness.

MAY BANK STATEMENT

Preliminary figures of the May bank statement, which have just been issued by the Department of Finance, show a substantial advance in notice deposits, as has been the case for some months past. The increase for the month was $37,000,000, and the total notice deposits have now passed the $1,100,000,000 mark. Demand deposits have decreased slightly during the month, and total deposits have reached the great figure of $1,676,000,000.

The increase in business done by Canadian banks in branches outside Canada, a number of which have recently been opened, is seen in the increase of almost $9,000,000 of deposits outside Canada, which have now reached the total of $221,000,000. A slight contraction of business was apparently reflected in the decrease in current loans in Canada by $36,000,000 during the month, but as compared with a year ago there is an advance of $176,000,000. Stock market activity is reflected in the increase of $3,000,000 in call loans in Canada, and $1,600,000 in call loans outside Canada. Note circulation, on the other hand, is up almost $7,000,000.

The following is a summary of the statement issued, with comparisons:—

	May, 1919.		Changes from April, 1919.
Reserve fund	$ 121,126,066	+	$ 1,326,330
Note circulation	215,895,050	+	6,936,478
Demand deposits	568,730,118	—	2,682,739
Notice deposits	1,107,983,072	+	37,027,992
Total deposits in Canada	1,676,713,190	+	34,345,253
Deposits outside Canada	221,605,846	+	8,956,368
Current coin	80,004,173	—	453,001
Dominion notes	179,074,218	+	1,988,901
Deposits, central gold reserve	107,200,000	—	5,000,000
Call loans in Canada	89,187,032	+	3,095,188
Call loans outside	157,176,325	+	1,642,659
Current loans in Canada	1,071,447,686	—	36,538,837
Current loans outside	127,490,932	+	2,162,371
Total liabilities	2,329,983,200	—	22,113,256
Total assets	2,585,887,780	—	21,266,018

SASKATCHEWAN MUNICIPALITIES CONVENTION

The 14th annual convention of the Union of Saskatchewan Municipalities was held in Saskatoon on June 25th, 26th and 27th. The program has already been referred to in these columns and a complete account of the events will be given next week. One of the features was the proposal made on the first day by W. W. Davidson, ex-mayor of Moose Jaw, and president of the Union, that a western union of municipalities should be formed. He said that the discussion of general problems at the Union of Canada Municipalities convention had not been satisfactory to those in the west.

On June 26th the Dominion government gave formal notice in parliament of a bill to authorize borrowings to an amount of $100,000,000. This is in addition to sums now authorized but unborrowed.

INCREASE IN PENSIONS PROBABLE

THE report of the special committee of the House of Commons, which was appointed some time ago to investigate the present pension scale, has presented its recommendations to parliament. The increases proposed are temporary. No doubt the committee had in mind the fact that present price levels warranted some additions to the pensions now in force but that it would be unwise to make any permanent changes on this basis. Canada can afford to pay adequate allowances to genuine cases of disability but it is essential that there should be no wastage of public money such as took place in the United States following upon the Civil War. There have already been cases where pensions were paid in Canada without justification and this money should be diverted to such cases as are a genuine obligation upon the public.

The following are the recommendations:—

(a)—That a bonus for one year of twenty per cent. be added to the pensions of privates and corporals (militia) and ratings below petty officer (naval) who now receive $600 per annum for total disability.

(b)—That a bonus for one year of approximately thirteen per cent. be added to the pensions of sergeants, etc. (militia) and chief petty officers, etc. (naval) who now receive $637.50 per annum for total disability so as to make the amount of their pensions, including bonus equal to that of a private or corporal or rating below petty officers.

(c)—That a bonus for one year of twenty per cent. be added to the pensions of widows and parents of privates and corporals (militia) and ratings below petty officers (naval) who now receive $480 per annum;

(d)—That a bonus for one year of approximately thirteen per cent. be added to the pensions of widows and parents of sergeants, etc. (militia) and chief petty officers, etc. (naval) who now receive $510 per annum so as to make the amount of their pensions including bonus equal to that of the widow or parents of a private or corporal or a rating below petty officers;

(e)—That the additional pension for a married member of the forces, who is totally disabled, be increased from $96 per annum, as it is at present, to $180 per annum;

(f)—That the additional pension for the first child of a widow or the first brother or sister of a deceased member of the forces be increased from $144 per annum, as it is at present, to $180 per annum;

(g)—That the pension for the first orphan child or orphan brother or sister of a deceased member of the forces be increased from $288 per annum, as it is at present, to $360 per annum; and

(h)—That the addition to pension for those who are helpless and in need of attendants be increased from $300 per annum, as it is at present, to $450 per annum.

The increases proposed in sub-sections (a), (b) and (e), above set forth, will apply proportionately to cases of disability of a less extent than total disability.

The additional expenditure for the present year on the basis of the existing number of pensioners will be approximately $3,380,000, made up as follows:—

(1)—Twenty per cent. bonus for one year to privates and corporals (militia) and ratings below petty officer (naval) and a thirteen per cent. bonus to sergeants, etc. (militia) and chief petty officers, etc (naval) approximately $1,300,000.

(2)—Twenty per cent. bonus to widows and dependent parents of privates and corporals (militia) and ratings below petty officer (naval) and a thirteen per cent. bonus to widows and dependent parents, of sergeants, etc (militia) and chief petty officers, etc., (naval) approximately $1,500,000.

(3)—Increased pension for a married member of the forces from $96 to $180 per annum during one year, approximately $275,000.

(4)—Increased pension for the first child of widows from $144 to $180 per annum, during one year, approximately $275,000.

(5)—Increased pension for the first orphan child from $288 to $360 per annum, during one year, approximately $30,000.

The number of widows of British and allied reservists who are domiciled in Canada will not exceed 450, and the committee have agreed to recommend the awarding of a supplementary pension, which, when added to the amount received by widows and their children of reservists from their respective governments, will equal the amount of pension payable to the widows and children of members of the Canadian forces. This supplementary pension will be paid only while such widows and children continue to reside in Canada.

The committee also considered the representations made by the Great War Veterans and other bodies that Canadians suffering disability who are now receiving a British pension only, and who were at the outbreak of the war also domiciled and resident in Canada, and unanimously agreed to recommend the awarding of a supplementary pension to the Imperial pensioners which will make their pension equal the amount of pension payable to similarly disabled members of the Canadian forces.

According to figures submitted about 2,000 supplementary pensions would be granted under these recommendations. The expenditure for these supplementary pensions will not exceed in the aggregate $500,000 per annum.

The total number of disability pensioners as of the 31st of March, 1919, was 44,726 (not including wives and children), for whom the government then carried a yearly liability of $7,476,167. The total number of dependent pensioners as of the same date was 16,888 (not including children), for whom the government then carried a yearly liability of $9,636,939, or a total of 61,614 pensioners of all classes, and a total yearly liability of $17,113,107.

It is anticipated that an additional 36,000 pensions for disabilities will be awarded during the fiscal year April 1st, 1919, to March 31st, 1920, with a yearly liability of $5,400,000 under the present rates, or $6,500,000 under the proposed rates including the bonus.

The total yearly liability at the present rates of pension will be approximately $25,000,000. Adding to this the cost of the proposed bonus payments and increases in pensions for married members of the forces, and for children, namely $3,380,000 for those on pension at March 31st, 1919, and $1,500,000 for those to come on pension during the fiscal year, 1919-20, and the supplementary pensions for allied reservists, namely $500,000, the total liability for this year will probably be approximately $30,000,000.

The estimated total possible liability for pensions, under the provisions of the proposed bill submitted, will not exceed $39,000,000.

THE STATUS OF THE PART TIMER

THE part timer has been during the last few years the subject of much abuse in the field of life insurance. The whole time agent naturally feels that it is sufficiently difficult to create and close business without being robbed at the last moment of the fruits of his labor, by one of the parasites, who are found among the ranks of the part timers. Many of them know little or nothing about life insurance and in these cases the business written does not represent a contribution to life insurance; frequently it is merely collecting the reward due to some other worker for time spent and knowledge applied.

At the same time the part time agent has his defenders, some of whom have set forth his case from time to time in *The Monetary Times.* His position in a small community where a local agency cannot offer an adequate living, at least when subject to competition, seems secure. The fact that many high grade full time agents have graduated from the ranks of the part timers, is a positive argument applicable in his defence anywhere. Some managers take the attitude that unless they are convinced of a prospective agent's ability to succeed, and prepared to finance him for a time, they do not want him. All do not hold this view, however, and probably a majority prefer the more conservative plan of testing his ability in the part time field, before persuading him to burn his bridges and risk time, money and reputation as a life insurance underwriter.

Agents do not object to fair competition; part time underwriting is not in itself unfair, but rather the practices which accompany it. This attitude became evident when the subject was thoroughly discussed at the meeting of the Toronto Life Underwriters' Association on June 24th, where a resolution hostile to the part timer was defeated because it did not properly discriminate. An amendment was passed, however, to the effect that a committee should be appointed by the president, E. W. Pratt, who is city manager of the North American Life, to draft a new resolution. The Toronto association does not intend to let the matter drop, and a positive stand would probably represent the views of agents in other cities of Canada; an endorsation by other local organizations or by the association as a whole would put the issue clearly up to the companies. The interests of the latter will be advanced by any action which will benefit the full time man, provided it does not retard the progress of life insurance as an institution. Agents' associations should exercise care that their suggestions do not point to the establishment of a closed profession profitable to its members but freed from those influences which tend to make business life healthy and beneficial to the community.

BRITISH COLUMBIA'S DEPARTMENT OF INDUSTRY

THE provincial Department of Industries, provision for which was made in the recent Department of Industries Act of the British Columbia Legislature, has not yet been organized nor has its head been appointed. The powers given by the Act are extensive and include the power to aid by loan or guarantee any enterprise calculated to encourage the development of the natural resources or products of the province. The extent to which this power will be used by the department depends upon the commissioner and his advisors. The aim, no doubt, is to furnish provincial assistance to experiments and investigations which might result in the establishment of new industries or the expansion of existing ones. The Act should not be administered so that public funds should be brought into competition with the ordinary functions of banking. When questioned on this point by *The Monetary Times,* the secretary of the Bankers' Association, Mr. Henry T. Ross, said: "I do not think there is any power in the Act which may be said to confer carrying on of the business of banking in any of its forms."

Public investigations produce varied evidence from which material in support of almost any theory may be selected. Some Canadian newspapers are not slow in recognizing these possibilities.

* * * * * *

Unused capital and unemployed labor does not make for increased production and lower prices. The economic loss resulting from a tie-up in an essential industry is greater than the mere loss of revenue.

* * * * * *

Deportation is evidently a calamity much dreaded by some residents of Canada. This is surely a compliment to a country which has so often been described by these same residents as being "corporation ridden," "ruled by the banking interests," and "victimized by profiteers."

* * * * * *

The Royal Commission on Industrial Relations has had an unparalleled opportunity to receive and weigh suggestions for a satisfactory basis of distribution. The members are representative of all interests concerned, and are competent to choose the wisest. Its recommendations are the best we can produce and only egotism can assert the superiority of an individual opinion.

* * * * * *

Canadian trade commissioners cannot assist Canadian industry unless they are reasonably familiar with it. The action of the Department of Trade and Commerce in having several come back to Canada to familiarize themselves with new conditions, is commendable even if belated. One of them, who has represented Canada for nine years, has never been in this country before. "See Canada First" should be one of the mottoes of the service.

EMPLOYMENT CONTINUES TO SHOW INCREASE

Official Reports Indicate that Several Industries are Absorbing Large Numbers

THE increase in the volume of employment which has been a marked feature in Ontario and Quebec for the last two months still continues, according to the weekly reports received by the employment service of the Department of Labor.

For the week ending June 7, the reports of 2,329 employers in these two provinces were compiled. On June 7, these firms were employing 330,825 persons, an increase of 1,522 persons, or .55 per cent. over the preceding week. In addition the same firms anticipated an increase of 1,987 persons or .60 per cent. during the following week. That this anticipation was more than realized is shown by incomplete returns for the week ending June 14. The preliminary compilation for this week covers 2,046 firms with a payroll of 278,627 persons on June 14. This represents an increase of 2,660 persons, or .96 per cent. during the week. On June 21 these identical establishments expected to be employing 279,854 persons, a further anticipated increase of 1,227, or .44 per cent.

The largest increases during the past two weeks have occurred in the food, drink and tobacco group, in the metal working industries, railroad construction, pulp, paper and printing and textile manufacturing. The food, drink and tobacco group shows an actual increase of 1.01 per cent. in the week of the 14th, and an anticipated increase of 1.35 per cent. during the week of the 21st. For the metals group, the corresponding figures are 1.08 per cent. and .23 per cent., for railroad construction 2.33 per cent. and 1.98 per cent., for pulp, paper and printing 2.01 per cent. and .26 per cent., and for textile manufacturing .61 per cent. and .58 per cent. The mining companies, building contractors and the manufacturers of wood products, chemicals, leather goods and vehicles also report increases during each of the past two weeks, though the additions do not involve so many men. Lumbering, railroad operation and longshore work show improvement during the week of the 14th, but a slight anticipated decline during the following week. The clay, glass and stone products group shows a slight decline during the week ending June 14, but an anticipated improvement for the following week, while the commercial and mercantile group registers an insignificant decrease during both weeks. there.

CANADIAN TRADE COMMISSIONERS HERE

The following Canadian trade representatives are now in Canada: Dr. J. W. Ross, of Shanghai; B. S. Webb, of Argentina; G. B. Johnston, of Brazil and D. H. Ross, of Melbourne, Australia. Others who are expected this summer are: W. J. Egan, of Cape Town, S.A.; J. E. Ray, of Manchester, Eng.; W. A. Beddoe, of Auckland, N.Z.; and Harrison Watson, of London, Eng.

STANDARD RELIANCE MORTGAGE CORPORATION

Mr. G. T. Clarkson, official liquidator of the Standard Reliance, states to *The Monetary Times* that he is not as yet prepared to give an analysis of the corporation's position other than that issued a week ago. The first meeting of depositors will be held shortly and the statement will probably be ready by that date.

Loan company men in Ontario and the attorney-general's department of the provincial government have been aware of the general condition of the Standard Reliance for some months past.

The annual meeting of the Insurance Institute of Toronto is to be held on July 3rd at 12 noon in the board room of the Imperial Life Assurance Co.

ANGLO-CANADIAN FIRM TO OPEN IN MONTREAL

The Anglo-Canadian firm of Thomas Skinner & Co., of London, England, intends opening a branch in Montreal in the near future. Mr. Victor Halford is now in Montreal making arrangements.

Sir Thomas Skinner, Bart., the head of the firm, is the founded and editor of the Stock Exchange Year Book, the Directory of Directories, and he is a director of the Canadian Pacific Railway, of the Commercial Cable and other cable companies, is London director of the Bank of Montreal, also a late governor of the Hudson Bay Company.

TIMBER RESOURCES OF BRITISH COLUMBIA

In the report of the Commission of Conservation on the forests of British Columbia it is estimated that the total amount of forest land in the province is 149,344 square miles, or 42.2 per cent., of the total land area.

Of the 149,334 square miles of forest land, only about one-third now carries timber of commercial value, and on 97,333 square miles of forest land the merchantable timber has been cut or destroyed by fire, according to the report. Previous to 1917, only about 30 billion feet had been cut in the province. Since most of this timber was cut on the coast and from the heavier stands, the area logged probably does not exceed 2,000 square miles. The forests on the remaining 95,333 square miles have been devoured by fire.

Out of an average annual revenue from the forests of over $2,000,000, British Columbia spends approximately $400,000 for their protection and administration, according to the report. The province contains nearly 26 per cent. of the total standing timber of the Pacific northwest region, but of the total cut of 8,877 million feet of lumber, only 1,157 million feet, or 13 per cent., was cut in British Columbia. Of the cut in the province, approximately two-thirds is from the coast and the remaining third from the interior.

TRUST COMPANIES TO COMBINE

Arrangements have been made between the Chartered Trust and Executor Co. and the Guardian Trust Co., both of Toronto, whereby the former is to purchase the latter. A meeting of the shareholders of each company was called for Thursday, the 26th inst., and in both cases the arrangement was ratified. Shareholders of the Guardian Trust Co. are to receive shares in the Chartered Trust and Executor Co. par for par. The amalgamation must be sanctioned by the treasury board at Ottawa and also by the Lieutenant-Governor of Ontario before it can go into effect.

The statement of the Chartered Trust and Executor Co. for 1918 shows that on December 31st, capital assets totalled $327,759, capital stock subscribed was $285,500, and there was a rest account of $28,840, and a balance in profit and loss of $6,390. During the year net profits, amounting to $15,129, were made and dividends at the rate of 5 per cent. per annum were paid. Trust funds under administration totalled $1,268,089.

The statement of the Guardian Trust Co. shows a smaller capital account but larger assets under administration. Total capital assets are $320,592 and estates, trusts and agency accounts amount to $2,912,675. The paid-up capital is $249,540, and the profit and loss balance is $34,274. The directorate of the Chartered Trust and Executor Co. includes Hon. W. A. Charlton, M.P., president, and Col. Noel Marshal, Sir Wm. Gage and W. K. George, vice-presidents. The managing director is Mr. John J. Gibson. The president of the Canadian Trust Co. was the late Cawthra Mulock, the general manager is W. S. Morden, K.C., and the secretary is Mr. E. W. McNeill.

Messrs. McDougall and Cowans, Montreal stockbrokers, have acquired a site at the corner of St. James and St. Francois Xavier Streets, and intend building a new office there.

ALBERTA ACT REGARDING SUB-DIVISIONS

Commission May, Subject to Approval of Lieutenant-Governor-in-Council, Fix Rates of Assessment and Taxation

An act of the Alberta legislature, which was assented to on April 17th, and which goes into force on May 17th, makes important changes in the power of municipalities to assess and tax sub-divisions. It provides that one or more commissioners may be appointed, who are to have powers as follows:—

"1. As to any municipality other than a city of more than five thousand, at the request of any owner or other person interested in any tract of land lying within a municipality which has been subdivided into lots or blocks and upon hearing a representative of the municipality and whether or not any question involved has been adjudicated upon by any court or other tribunal and whether or not any assessment or taxation thereof is legally effective, to investigate the basis of assessment and taxation, the fair value of the tract, having regard to the value of lands in the neighborhood, the expenditure of moneys by the municipality for the benefit of the tract in question, and giving special attention to whether the said tract has against the express desire of the then owner been taken into or made part of the municipality, and such other matters as the commissioner or commissioners shall think of service in making a recommendation and to recommend a reduction of the amount of the arrears standing against such tract or any part thereof and the fixing of a time or times for the payment of the amount or the reduced amount of such arrears by instalments of otherwise, and the fixing of the rate or rates of interest to be paid thereon before maturity and after default and in the event of the municipality having borrowed money or incurred liabilities upon the credit of or having regard to the existence of such arrears to require the issue of debentures for raising the amount or any part of the amount required to repay such moneys or discharge such liabilities payable upon such terms and conditions, at such rates of interest and at such periods and having the payment thereof secured or provided for by such methods as the commissioner or commissioners may think proper;

"2. As to any municipality other than a city, of more than five thousand, at the request of owners of land representing not less than one-half of the assessed value of the land lying in any area whether the land is or is not subdivided into lots or blocks which can be particularly defined and described as an area having characteristics distinct from those of the residue of the lands lying within the municipality and appearing to the commissioner or commissioners to call for exceptional or restrictive methods of assessment or taxation, to investigate the basis of assessment and taxation and recommend a system rate and method of assessment and taxation of the lands comprised in such area for such period as to the commissioner or commissioners shall appear just;

"3. As to any municipality other than a city, of more than five thousand, where there are taxes in arrears as to subdivided lands, and notwithstanding the fact that certain or any questions of fact or law, with reference to any such arrears of taxes, have been adjudicated upon by any court or tribunal, and notwithstanding that certain of such subdivided lands have been forfeited or sold to the municipality, and notwithstanding that the municipality has gone through a form of sale of any such lands so forfeited, or sold, which it has been unable effectively to carry out, and whether any assessment has been legally made or not, and notwithstanding any statute or ordinance to the contrary, the commissioner or commissioners shall have the right and power, upon such notice as they may deem advisable, to the officers of the municipality, and to any or all such ratepayers, to determine that any or all such taxes so in arrears may be reduced, and what amount or percentage of such taxes in arrear should be paid, and to determine and fix a limited time in which each ratepayer should pay the amount so determined, to be due and payable by him to the municipality as to each parcel or lot of land, and shall have the further right and power in case the amount as to any parcel or lot is not paid within the time so limited, by order or otherwise, to transfer the title, subject to any and all encumbrances, in the said lot or parcel, to the municipality and to issue such document by way of transfer as may be deemed advisable to the municipality, and said document may constitute a transfer of all parcels and lots in said municipality as to which the amount due and owing as so determined has not been paid, and the municipality may duly register such document or documents of transfer in the proper land titles office, upon payment of a fee of fifty cents, as to each document of transfer. As to any parcel or lot in any such subdivided area as to which the taxes have been paid, the commissioner or commissioners may determine the value or price at which the municipality by purchase ought to secure title to the same, and in case the owner refuses to sell and transfer the title to the municipality, at such price, the commissioner or commissioners shall have power to order that the municipality may acquire title to any such parcel or lot upon its transferring to the said ratepayer any other parcel or lot of land in the municipality of at least equal value, in which case and upon such transfer having been made the commissioner or commissioners shall issue to the municipality the necessary document of transfer. The commissioner or commissioners shall have power to cancel all such subdivisions including streets, lanes and public squares and shall have power to execute all documents necessary for registration purposes and otherwise to carry out and make effective any order he or they may deem requisite in the premises. And in the event of the municipality having borrowed money or incurred liabilities upon the credit of or having regard to the existence of such arrears to require the issue of debentures for raising the amount or any part of the amount required to repay such moneys or discharge such liabilities, payable upon such terms and conditions, at such rates of interest and at such periods and having the payment thereof secured or provided for by such methods as the commissioner or commissioners may think proper.

"4. Every recommendation of the commissioner or commissioners shall become effective and binding upon the municipality and upon all persons interested therein or affected thereby upon the same being approved by the lieutenant-governor-in-council, and thereupon the municipality and all such other parties respectively shall be compellable to carry out and give effect to such recommendations and the municipality is hereby authorized, empowered and required to issue any debentures or other securities or acknowledgments and to do any other thing the issue or doing of which is so recommended and that without any further or other authority and the same shall be valid, binding and effective notwithstanding any statutory requirement, restriction or limitation which might be applicable thereto but for this provision."

BRITISH AMERICAN BOND CORPORATION

The British American Trust Co., of Vancouver and Victoria, has changed its name to that of the British American Bond Corporation, Ltd. This decision was reached by a resolution of the shareholders as a result of a decision reached some time ago to give up the trust branch of the business. In addition to dealing in government, municipal and corporation bonds, the company will continue in the insurance business, representing the Alliance Insurance Co. of Philadelphia, Imperial Underwriters of Toronto, Insurance Co. of North America, Equitable Fire and Marine and the Railway passengers of London. The president and general manager is Mr. H. N. Galer, and the secretary, Mr. R. Kynock. The company's bond department is under the management of Mr. J. A. Grieve.

NOVA SCOTIA TRAMWAYS ISSUE COMING

At a meeting on June 24th the shareholders of the Nova Scotia Tramways Company authorized the issue of $2,000,000 three-year gold coupon bonds at 7 per cent. The Board of Public Utilities will be asked to authorize the company to issue $1,000,000 at once. The provision of funds for extensions and improvements of the company's system in Halifax was approved.

RAPID INDUSTRIAL GROWTH

The figures given elsewhere in this issue illustrating the development of the city of Welland, Ontario, are difficult to duplicate. The war period has witnessed an expansion of over 100 per cent. in pay rolls and manufactured products. Even allowing for the decrease in the value of money this is unusual growth. The population during the same period has increased by about 35 per cent. The assessment, it will be observed, has been reduced and a good financial condition makes the city a favorable place to live in. Good transportation and power facilities and a supply of skilled and unskilled labor have already proved attractive to industries.

At a meeting of the board of directors of the Guelph Chamber of Commerce last week, the entire board was constituted an industrial committee to secure new industries for the city. Secretary Westoby has hopes of several American concerns establishing there branches at Guelph.

CROP OUTLOOK IS FAIR

Acreage is Decreased in Most Cases, but Conditions are Average, and Better Than at this Time Last Year

THE Dominion Bureau of Statistics issued on June 14, the first, or preliminary estimate of the areas sown to grain and hay crops this spring, together with a report on their condition on May 31 as compiled from the returns of crop correspondents.

Wheat shows for the whole of Canada an estimated total area of 16,958,500 acres, as compared with 17,353,902 acres in 1918, a decrease of 395,402 acres, or 2 per cent. In 1918 the area sown was 1,477,150 acres, or 10 per cent. more than the area of 1917. Owing to the mildness of the winter of 1918-19, the area to be harvested of fall wheat is 797,750 acres, representing 381,135 acres, or 91 per cent. more than in 1918. The area sown to spring wheat is 16,160,750 acres, representing 776,537 acres, or 5 per cent. less than in 1918. Of oats the total area sown is 14,654,000 acres, which is 136,000 acres, or 1 per cent. less than in 1918. The acreage of the remaining crops is as follows: Barley, 3,036,240 acres, as compared with 3,153,711 acres in 1918; rye, 575,585 acres, as against 555,294 acres; peas, 208,250 acres, as against 235,976 acres, mixed grains, 877,240 acres, as against 921,826 acres; hay and clover, 10,472,700 acres, as against 10,544,625 acres; and alfalfa 192,480 acres, as against 196,428 acres. This year reports on potato planting were asked for a month earlier than heretofore, and the replies indicate an area under potatoes of 692,900 acres, as compared with 735,192 acres last year, a decrease of 42,292 acres, or 6 per cent. Potato planting had not made much progress in the Maritime Provinces and in Quebec at the end of May; so that the estimate must be considered as of very tentative character.

Grain Acreage of Prairie Provinces

The area sown to wheat in the three prairie provinces totals 15,450,700 acres, as compared with 16,125,451 acres last year, to oats 9,614,000 acres, as compared with 9,354,941 acres, to barley 2,162,000 acres, as compared with 2,272,334 acres, and to rye 436,000 acres, as against 411,846 acres. By provinces the areas are: Wheat, Manitoba, 2,913,100 acres; Saskatchewan, 8,879,000 acres; Alberta, 3,658,600 acres. Oats, Manitoba, 1,715,000 acres; Saskatchewan, 5,088,000 acres; Alberta, 2,811,000 acres. Barley, Manitoba, 1,082,000 acres; Saskatchewan, 643,000 acres; Alberta, 437,000 acres. Rye, Manitoba, 249,000 acres; Saskatchewan, 137,000 acres; Alberta, 50,000 acres.

In eastern Canada, especially Ontario ond Quebec, the sowing season was delayed by cold and wet weather. In the west favorable weather succeeding late seeding induced rapid growth. In Manitoba all sowing was late owing to cold, wet weather during April; but warm rains and excessive heat during the early part of May caused rapid growth and all grains are reported as in excellent condition. In some parts of northern Saskatchewan high winds during May, with dry weather, caused drifting and proved dertimental to spring crops. In other districts grain is in excellent condition. In the southern part of the province conditions for seeding were ideal and all crops are doing well. In Alberta heavy snow early in May supplied much needed moisture and crops came on rapidly, though in some sections frost damaged spring crops considerably. Expressed numerically, in percentage of the average yield of the past ten years, the average condition for all Canada for each crop was on May 31 as follows: Fall wheat, 101 (75); spring wheat, 98 (96); all wheat, 98 (96); oats, 95 (100); barley, 95 (98); rye, 101 (94); peas, 91 (101); mixed grains, 92 (102); hay and clover, 101 (99); alfalfa, 95 (97); pasture, 102 (100). The figures within brackets represent the condition on May 31, 1918. On the whole, therefore, fall wheat, rye, hay and clover and pasture show a condition above average; spring wheat is somewhat better than last year, though two points below average. The other crops are below average and below the condition of last year.

LARGE CROP NOT LIKELY IN MANITOBA

The "Manitoba Free Press," in its 1919 crop report gives a summary of general conditions throughout the province. This report is the work of Miss E. Cora Hind, who is well-known as a careful student of agricultural conditions in Western Canada. The questions asked in the requests sent out to different localities were as follows:—

"What is percentage increase or decrease in wheat acreage from 1918? What is general condition of wheat? Give condition of oats, barley, flax and rye separately. Is rain needed? Any damage from drought, wind, frost or cutworms? How is labor supply? What is rate of wages? Any old wheat in farmers' hands?

"In all, 110 replies have been received, and these come from all parts of the three provinces, so that from them a very fair idea of conditions may be obtained. All replies were dispatched late on the night of the 12th, or early on the morning of the 13th, and are, therefore, right up to the minute. They show that, since the 10th of June rains, more or less heavy, have fallen over very wide areas of the three provinces; they also show that, in spite of these precipitations, more rain is urgently needed at nearly every point. The rains that have fallen have been of enormous benefit, not only to the wheat but to the late seeded coarse grains, which in many districts have made little progress owing to excessive heat and lack of moisture. No amount of rain, however, will make other than light crops of many oat and barley areas. It is hard for people in Winnipeg to realize that there has been any damage from frost this spring, nevertheless, a number of points in Saskatchewan and Alberta point to more or less permanent damage to flax in particular from frosts which occurred round about May 28.

"There are still some large areas of wheat that so far have received no rainfall, these are to be found along the Goose Lake line of the C.N.R. and the main line of the G.T.P., and portions of the Empress branch of the C.P.R., all areas which suffered from drought last year. The statement is made, however, that rain within the next few days would largely overcome any damage to wheat and would help coarse grains in these sections enormously. Cutworms seem to have been at work very generally, but the recent rains will put an end to their depredations, and to some extent, at least, restore the crops eaten off. The damage from drifting soil has been, on the whole, light, and the amount of land reseeded small.

"Fairly full reports have come in from the south-western districts of Manitoba and Saskatchewan, which have been visited by the grasshopper plague, and it would seem that the hoppers are now fairly well under control, and that the total amount of damage will not be large, though some districts state that at present they cannot estimate the total damage, and others place it at 5 per cent. It is somewhat of a surprise to have bad grasshopper damage reported from two places on the Outlook branch, Outlook and Tugaske, as previously reported, had confined them to the south-western borders. Farm help seems to be short in a number of districts, and in all districts wages are extremely high, the average for Manitoba being from $50 to $65, and for Saskatchewan the average runs from $65 to $75; in every case board is given in addition. A few points in Alberta report as high as $80 and board being paid. The hirings are usually for the eight-month period.

"Judging by the reports, the wheat crops of 1918 have been cleaned out even to the corners of the bins."

LIFE UNDERWRITERS MEET IN LONDON

An educational congress was held in London, Ont., on June 12th, 13th and 14th, where 240 life insurance agents met. Among the speakers were Mr. Alexander Mackenzie, of the Manufacturers Life, whose subject was, "Three Thoughts in Life Insurance;" Mr. J. A. Tory, of the Sun Life, who reviewed his experience in life insurance, and Mr. E. E. Reid, who made a plea for the less popular varieties of life insurance. A similar convention is planned for 1920.

SMALL FOOD SUPPLIES IN STORAGE

Decreases Compared With Last Year—High Prices Prevail—Householders Not Buying Inexpensive Foods

THE Cost of Living Commissioner for Canada, in submitting his report on goods in cold storage on June 1st, gives the following summary:—

Unsettled conditions in the west have somewhat delayed the report and have made it impossible to include as complete totals as ordinarily. The comparative figures for the Dominion are made up excluding Manitoba. Totals include all holdings reported.

The butter stocks reported consist of 2,026,671 pounds of creamery and 146,980 pounds dairy. Comparative figures show this to be an increase over last month of 167.5 per cent. in the case of creamery butter and 76.95 per cent. in the case of dairy butter, but even so these stocks are 24 per cent. less than a year ago in each case. In other words, butter for next winter's use is going into storage more slowly than last year and at very much higher prices. The outlook for next winter is very bad.

The oleomargarine stocks are 351,118 pounds, a small amount compared with our consumption.

The cheese stocks reported are 2,983,438 pounds. Comparative figures show this to be one and three-quarters more than last month but 12 per cent. less than last year.

Eggs in cold storage have increased to 7,549,451 dozen. Comparative figures show this to be 214.8 per cent. more than a month ago and 10.22 per cent. more than last year. Eggs in warehouse other than cold storage amount to 883,400 dozen, and frozen eggs amount to 237,922 pounds. While these stocks look well for next winter's supply, the price at which they are being laid down will make them a luxury next winter.

The total stocks of pork reported are 35,084,771 pounds. Comparative figures show this to be 3.42 per cent. less than a month ago and 10.47 per cent. less than a year ago. The stocks include 5,080,413 pounds frozen pork, 2,149,665 pounds not frozen, 2,222,825 pounds dry aslted, 9,012,992 pounds sweet pickled and 16,618,876 pounds in process of cure. It will then be seen that nearly one-half of the total amount is still in process of cure and not in cold storage.

The total stocks of beef reported are 26,113,350 pounds. Comparative figures show this to be 27.24 per cent. less than a month ago and 37.9 per cent. more than a year ago. These stocks include 22,563,061 pounds of frozen beef, 2,527,074 pounds unfrozen fresh beef, 583,951 pounds of cured beef and 439,264 pounds in process of cure.

The stocks of meat in storage indicate that for all our shipments overseas we still have plenty left for our own consumption.

The stocks of mutton and lamb reported are 2,030,048 pounds. Of this 2,004,892 pounds are frozen. Comparative figures show this to be 21.32 per cent. less than a month ago and 44.34 per cent. more than a year ago.

The total stocks of poultry in storage reported are 1,950,632 pounds. Comparative figures show this to be 31.82 per cent. less than a month ago and 279.48 per cent. more than a year ago.

The fish reported amounts to 18,039,200 pounds, of which 14,987,983 pounds are in cold storage. This is 16.55 per cent. more than last year and 3.85 per cent. more than last month.

These large stocks of fish should be moved out and used up. They are most excellent food; in fact, experts tell us that this fish, if frozen immediately it leaves the water and kept frozen until it is thawed out in cold water in the kitchen, is in reality superior to the fresh fish which is moved these hot days only in iced cars. We have taken pains to ascertain as to whether or not the cold storage men are to blame for holding back these fish. We are thoroughly convinced that they are not to blame, but are most eager to move the fish and have it used. They offer their stocks at a real sacrifice and yet the fish is not going into consumption as it should. The trouble is that the householders are not buying fish as they should, but instead are buying very much more expensive meat.

CANADIAN WOOL MANUFACTURERS' ASSOCIATION

The annual meeting of the Canadian Wool Manufacturers' Association was held in Toronto on Friday, June 20th. The important subject of export trade was under discussion, and joint action was commended. It is felt that the association can secure more business than could individual concerns by isolated action, especially as the association now includes practically all engaged in the manufacture of woolen goods in Canada. It will also be enabled to make the necessary financial arrangements. Richard Thompson, of Carleton Place, Ont., was re-elected president, and Harold G. Smith, of Hamilton, was re-elected vice-president.

RUSSIAN EXTERNAL BONDS UNPAID

Funds were not provided by the Russian Government to meet the $50,000,000 six and one-half per cent. three year external bonds, maturing on the 18th inst. A conference of representatives of J. P. Morgan and Company, the National City Bank, the Guaranty Trust Company, Lee Higginson and Company and Kidder Peabody and Company was held some time ago in New York to consider what should be done, and arrangements for the formation of a protective committee were made.

In a circular issued by these firms, on June 17th, to registered holders of the bonds, the following letter received from the Russian representative at Washington is quoted:—

"On behalf of the Government of Russia, I desire to announce that, due to circumstances beyond control, I shall be unable to provide funds to meet at maturity the Imperial Russian Government $50,000,000 six and one-half per cent. three year credit.

"I have been in communication with the All-Russian Government in Omsk, under Admiral Kolchak, and, while I have received no reply as yet, the published accounts of Admiral Kolchak's communication to the Allied Governments clearly state that the external obligations of the Russian Government issued prior to November, 1917, will be recognized. I am sure this matter has been given earnest and serious consideration, and I am confident that the holders of this obligation may reasonably expect arrangements to be made for the payment of this debt as soon as the All-Russian Government is formally recognized."

The matter had also been taken up with the United States government and the following statement was issued by the acting secretary of state:—

"Owing to the present confusion in Russia, it is not practicable at this time for the State Department to make any presentation of the legal claims of American citizens against Russia. The people of America, however, are now, as they have been in the past, more sympathetic with the great Russian people and eagerly desire to see them work out for themselves a stable form of government, and when that time comes the State Department will use its good offices to call such claims to the attention of that government. With reference to the $50,000,000 credit established by certain banks in the United States, it will be remembered that this company was advanced in good faith when Russia was fighting for her life, and that the credit was primarily for buying supplies which were sorely needed by the Russian people for their military and civilian needs at the time.

"Whatever stable government may ultimately assume control in Russia, it is to be expected that it will follow the practice which enlightened governments have always followed, of recognizing the legitimate external loans of prior governments."

The National City Co. announces the opening of a branch office at Atlantic City, N.J., which will be open the year around. It is stated that the full services of the new correspondent office will be available to Canadians who are going south to this resort.

DOMINION PERMANENT LOAN APPEAL

Holders of Prepaid Stock Must Pay Balance—Referee Has Jurisdiction Regarding Dividend Payments

JUDGMENT has been given by Justice Lennox in the appeals of shareholders of the Dominion Permanent Loan Company, from the decision of the official referee, J. A. C. Cameron. The judgment holds that the referee had jurisdiction to try the matters involved in the alleged wrongful payment of dividends and that the holders of pre-paid stock must pay their balances. The appeals of those to whom shares partly paid up were given in exchange for stock in the Provincial Building and Loan Association are allowed.

Regarding the dividend cases, the judgment says:—

"It is alleged by counsel for the liquidator that for years, although no dividends were earned, periodical payments of money, called dividends, were illegally made to shareholders out of capital, and later on out of funds provided by sale of debentures. Counsel for this class of shareholder answers that the Master has not jurisdiction to enter upon or try or determine the question involved. I think the official referee is right in holding that he has jurdisdiction to try and determine the questions involved, and that the referee has a right to endeavor to find out according to the recognized method of procedure and to determine the result, subject to appeal."

On the "prepaid stock" cases the judgment reads: "The statutory law is clear and the decisions definite that the shareholders of an insolvent company must meet the balances on their shares. Ultimate liability to pay in some way and in any event is an inevitable construction of the true meaning of the contract, and the most that can be argued for these shareholders is that applied profits is only the primary source for liquidation of the balances; but they were not to be liquidated, and it is obvious that it was not intended that they would be, and marked 'paid in full' by hopes or fancies never realized, and which by the insolvency of the company have become impossible of realization.

"They joined the organization, became an element in the bases of credit by becoming the holders of shares; they took their chances as to whether their fond hopes or the roseate picturing of promoters would be realized, or not; and whether they contemplated it or not at the time, as members of the company, they took upon themselves a share of the obligation of providing for payment of creditors and to pay up in case their hopes only resulted in failure. I think the conclusion of the referee was right."

With regard to the fractional shares of former shareholders in the Provincial Building and Loan Association, the judgment says: "In pursuance of the terms of the Ontario Loan Corporations Act, the Provincial Building & Loans Association sold and transferred the assets and undertaking of this company now in liquidation on terms set out in an agreement April 2nd, 1902. The Act referred to authorized a sale that prescribed the conditions as well. Each shareholder of the Provincial Association was given fully paid up shares in the now insolvent company so far as his interest would entitle him, and for any sum in excess of even hundreds of dollars he was given one share of nominal face value of $100, with the amount of such excess endorsed as paid. Say what you like about the subtleties and the technicalities of company law, and the statutory liability to pay the balance unpaid on the shares standing in the name of the shareholder, the law is intended for justice, and judges hold office to give it effect. In truth and in fact the shareholders in question, neither at the date of the winding-up, nor at any time, held shares for more than the amount said to be and in fact paid up.

"They got exactly what the order-in-council said they were to get, and in the form provided, neither more nor less, and they occupied exactly the position they were compelled to occupy by reason of the statute and the action of the Lieutenant-Governor-in-Council representing and intending to protect them. They were sellers, not buyers, and the administration determined and defended the form of their security. Subject to the power of the legislature to enact what it will, and to the voluntary exercise of the 'privilege' referred to, which creates no obligation, the agreement is specific and final to all intents and purposes. Nobody was deceived or misled; nobody can be wronged except by the opposite conclusion. The creditors get exactly what the companies bargained for within the provisions of the statute and with the sanction and approval of the administration. It is only an opinion, but in my opinion, and with great respect, it would be monstrous and intolerable were the law otherwise."

TORONTO GENERAL TRUSTS QUARTERLY

An innovation in trust company business in Canada is the publication of a quarterly, entitled "Executors and Trustees." This pamphlet is one of the features of the new publicity and service department, which is under the management of Mr. John Cowan. The first number gives a summary of the 1919 amendments to Ontario statutes affecting trust companies, and also deals with the decision recently issued by the Privy Council in the appeal of the Toronto General Trusts Corporation against the decision of the Supreme Court of Canada in the Alberta succession duties case.

LLOYDS BANK, LIMITED

During the year 1918 the net profits of Lloyds Bank, Ltd., after making provision for rebate, income tax, bad debts and contingencies, were £2,358,381, and the balance brought forward from 1917 was £289,464, making a total of £2,647,845. The sum of £660,460 was appropriated to reserve and £200,000 each to bank premises and special contingency account. Dividends at the rate of 18½ per cent. per annum were paid and a balance of £1,158,300 was carried forward to profit and loss.

Assets total £300,685,486, including stock in the National Bank of Scotland, London and River Plate Bank, Lloyds Bank (France) and National Provincial Bank (France), Ltd. The paid-up capital is £8,954,056 and reserve £9,000,000.

LIVERPOOL, LONDON AND GLOBE INSURANCE

The 83rd annual report of the Liverpool and London and Globe Insurance Co. for the year 1918 shows satisfactory results. The amounts transferred from the various accounts to the profit and loss account were as follows:—

Fire account	£ 510,798
Members life profits' account	19,914
Marine account	185,735
Employers' liability account	26,269
Miscellaneous insurance account	162,331
Investment fluctuation account (amount contributed from life account)	100,000
Balance from last year	600,669
Interest not carried to other accounts, less income tax	133,489
Exchange	11,918
	£1,751,125

Dividend payments amounted to £273,822, and interest on debenture stock £35,944. The sum of £425,000 was required to provide for income tax and excess profits duty. Transfers were also made to some of the separate insurance accounts. The balance carried forward to next year is £890,358, a substantial gain of nearly £300,000 over that brought forward from last year.

The balance sheet now shows assets totalling £17,417,999. The life insurance fund totalled £4,249,358, fire reserve £2,724,310, marine £577,043, and there is a general reserve fund of £1,000,000. The company is actively engaged in the Canadian field, the manager being Mr. J. G. Thompson and the assistant manager Mr. Lewis Laing, both of Montreal.

The Hamilton Provident and Loan Society

DIVIDEND No 96

Notice is hereby given that a Dividend of *Four and one half* per cent upon the Capital Stock of this Society (being at the rate of *Nine* per cent per annum) has been declared for the half year ending June 30th, next, and that the same will be payable at the Society's Head Office, Hamilton, Ontario, on and after Wednesday, 2nd July, 1919.

The Transfer Books of the Society will be closed from the 16th to 30th of June next, both days inclusive.

By order of the Board.

GROWTH OF PULP AND PAPER EXPORTS

OFFICIAL trade returns for the fiscal year ended March 31, 1919, just made available, show the value of Canadian exports of pulp, paper and pulpwood for the twelve months as $99,259,166, as compared with $71,825,500 for 1918 and $52,975,457 for 1917, or a gain of $27,433,666 over 1918 and of $46,283,709 over 1917. In detail the figures show:—

	1917.	1918.	1919.
Paper and mfgs. of	$26,123,215	$37,865,330	$49,165,795
Woodpulp, chem.	14,032,920	19,133,813	30,226,856
Woodpulp, mech.	6,371,133	6,487,079	4,479,915
	$46,527,268	$63,486,222	$83,872,566
Pulpwood, unmanufactured	6,448,189	8,339,278	15,386,600
Total	$52,975,457	$71,825,500	$99,259,166

For March, the concluding month of the year, exports jumped $1,694,668 over those of March, 1918, the figures showing:—

Month of March.	1918.	1919.
Paper and mfgs. of	$4,880,224	$5,970,598
Woodpulp, chem.	1,190,082	2,041,884
Woodpulp, mech.	600,685	226,554
	$7,390,991	$8,239,036
Pulpwood, unmanufactured	560,520	1,408,143
Total	$7,951,511	$9,646,179

An instructive feature of the returns, apart from the general increase in quantity and value, is the large amount of pulpwood exported. This has grown from 982,671 cords, valued at $6,448,189 in 1917, and 1,002,127 cords, valued at $8,339,278 in 1918, to 1,597,042 cords, valued at $15,386,600 in 1919, an increase in one year of practically 100 per cent. The quantity of unmanufactured pulpwood exported last year was sufficient to have made 1,064,694 tons of paper, or about one-half the total quantity of newsprint used in the United States, where the wood was sent. Sold at $75 a ton, the present market price in the States, this quantity of paper would have brought into Canada $79,852,050, instead of the $15,386,600 received for it in the form of wood.

Exports of printing paper led all other grades in quantity and value. In 1918-19 Canada exported 13,248,542 cwt. (approximately 662,427 tons), valued at $40,718,021. This is an increase of $1,146,677 cwt. (approximately 57,334 tons) over last year. Other grades of paper exported were: Paper board, $3,037,279; wrapping, $2,452,296; photographers' paper, $1,302,886; wall paper. $360,567; felt and roofing, $310,778; and miscellaneous, $983,968. All showed a substantial increase over last year.

Exports of chemically prepared pulp in 1918-19 amounted to 8,332,730 cwt., valued at $30,226,856, as against 5,385,010 cwt., valued at $19,133,813 in 1917-18, an increase of 2,947,920 cwt., in quantity and $11,093,043 in value. Exports of mechanically ground woodpulp showed a falling off for the year of 802,968 cwt. in quantity and $2,007,164 in value, as compared with the previous year, the figures being, 1917-18, 4,311,694 cwt., valued at $6,487,079: 1918-19, 3,508,726 cwt., valued at $4,479,915.

The United States led as our best customer for pulp and paper, the United Kingdom, Japan, Australia and New Zealand, following in the order named. Canadian printing paper exported in 1918-19 was distributed as follows:—

	Cwt.	Value.
United Kingdom	9,310	$ 38,484
United States	11,880,069	36,031,358
Australia	643,101	2,081,911
New Zealand	242,336	862,402
Other countries	473,726	1,703,866
	13,248,542	$40,718,021

The chief foreign markets for Canadian pulp during the year were:—

Chemical pulp.	Cwt.	Value.
United Kingdom	140,364	$ 611,399
United States	7,414,825	26,256,265
Japan	639,997	2,775,486
Other countries	137,744	583,706
Mechanical pulp.		
United Kingdom	2,528	3,033
United States	3,453,149	4,418,555
Other countries	53,049	58,327

France, which imported from Canada 626,285 cwt. of mechanical pulp, valued at $471,040 in 1917, took none at all in 1918 or 1919, while exports to the United Kingdom of both chemical and mechanical pulp fell off from a total of 1,163,224 cwt., valued at $3,057,422 in 1916-17 to 142,892 cwt., valued at $614,432 in 1918-19. This was due entirely to lack of shipping facilities. Shipments of both paper and pulp from Canada to England should show a constant increase from now on.

LIFE INSURANCE IN MAY

Figures received from eight representative life insurance companies for the month of May show a total of new business of $15,798,553, compared with $14,661,405 for the same companies for the month of April. This is an increase of about 8 per cent.

CANADIAN NATIONAL EDUCATION CONFERENCE

A conference on national education is to be held in Winnipeg on October 20-22 this year. Prof. W. F. Osborne, of Manitoba University, is at present in the east making arrangements for the program. The speakers will include many leaders in educational activity in Canada. The object of the conference is to arouse national interest in the subject of education and to consider the advisability of establishing a national bureau of education for Canada.

A NATIONAL INDUSTRIAL CONFERENCE

In view of the suggestion which has been made that a fully representative gathering be summoned by the Dominion to arrive at a basis of settlement in industry, the results of a similar conference which has been held in England are interesting. It was decided there to fix a scale of minimum wages in all branches of work, a maximum 48-hour week, and to set up a national industrial council, consisting of 400 members. This conference was arranged last February by the British government.

PORTO RICO TELEPHONE COMPANY

J. C. Mackintosh and Co., of Halifax and Montreal, are offering 8 per cent. cumulative preferred stock in the Porto Rico Telephone Co. at 105, yielding 7⅝ per cent. This company is a Delaware incorporation, having been formed as a merger of the Porto Rico General Telephone Co. and the South Porto Rico Telephone Co. Its franchise extends to 1964. Capitalization consists of bonds, $775,000; preferred stock, $300,000, and common stock, $600,000. The revenue account for 1918 shows total revenue of $314,651, and expenses, $175,901, leaving net earnings of $138,750. Interest and sinking fund required $63,866 and preferred dividends $24,000, leaving a surplus over preferred dividend requirements of $50,884.

AUDITOR'S REPORT TO THE SHAREHOLDERS

In accordance with sub-sections 19 and 20 of section 56 of the Bank Act, 1913, I beg to report as follows: The foregoing balance sheet has been examined with the books and vouchers at the Head Office, and with the certified returns from the Branches, and is in accordance therewith. I have obtained all needed information from the officers of the Bank, and in my opinion the transactions coming under my notice have been within the powers of the Bank. I have checked the cash and verified the securities of the Bank, at its Chief Office, both on the 31st of May, 1919, and also at another time during the year; the cash and securities of one of the Branches have also been checked, and in each case they have agreed with the entries in the books of the Bank with regard thereto. In my opinion, the above balance sheet is properly drawn up so as to show a true and correct view of the state of the Bank's affairs, according to the best of my information and the explanations given to me, and as shown by the books of the Bank.

SYDNEY H. JONES,
Auditor.

Single Tax in Theory and in Practice

An Address Delivered Before the Rotary Club at Montreal on May 27th, 1919—Western Canada Municipalities Have Taken Lead in Experiments—Systems Broke Down in Depression of 1912—Did Not Prevent Land Speculation

By J. HAMILTON FERNS
Chairman, Board of Assessors, Montreal

THOSE who were in business in the 70's of the last century will remember, and, perhaps, from sad, personal experience, the disastrous financial storms which were sweeping over this country and that of the neighboring republic. Many banks suspended payments and a number passed out of existence. Old-established and highly-rated financial, commercial and industrial institutions, unable to finance their obligations, were compelled to assign, and the official assignee flourished in this city as never before nor since.

The wheels of industry being stopped, thousands of all classes found themselves without employment or the means of procuring the necessaries of life. Poverty, with all its evil effects, was to be found on every hand, and, to alleviate the destitution, soup-kitchens were established in all the large centres of population. The panic, which began in 1873, so affected the real estate market that one after another of the two hundred real estate brokers in the mid-section of New York City put up their shutters and turned to other occupations to make a living, and in 1878 only one of those brokers still remained in business. He tells us that he saw millionaire customers reduced to poverty over-night, and compelled to turn to menial labor to support themselves and families.

When all classes of society were suffering from the effects of those bad times, there appeared, in 1879, a book written by Henry George, entitled "Progress and Poverty," in which he painted in glowing colors the contentment, happiness and prosperity which would come to all classes by the adoption of a system of single land tax to replace the systems of taxation which were, in his opinion, the cause of all the poverty and disturbed financial and social conditions then to be found in every land.

It is not surprising to find that at a time of such general depression the appearance of this book caused many to turn to Henry George as a modern Moses, who would lead them out from the bondage of a supposed unjust system of taxation into the freedom of a world-wide system of single land tax, under which financial crises, class distinction, poverty and misery would be unknown, and peace, prosperity and brotherly love would reign under the fairy wand of a single tax.

A beautiful vision! And yet forty years have gone, and we find the followers of Henry George still wandering in the wilderness of speculation, and many are now commencing to realize that the promised land, which they thought they saw in the distance, was but a mirage.

While it is only justice to say that there is much to admire in the honest purpose of Henry George; while we are all in hearty sympathy with him in his endeavor to improve the social and economic conditions of the masses; while we are often hypnotized by his brilliant rhetoric and plausible theories, yet when we coolly and impartially analyze his writings we are forced to the conclusion that he is dealing in theories which are not based on experience, and are not supported by figures and facts.

Many, if not the majority, of those who call themselves single taxers, have never read any of the writings of Henry George, except it may be an extract quoted by some correspondent in a newspaper. Such people are prone to indulge in "mouth-filling phrases," and overlook the fact "that not only is taxation a more complicated matter than is imagined by the ordinary tyro, but that the adjustment of taxation has always tested the energies of the greatest statesmen the world over."

Theory has had Long Existence

Many speak of the single tax as if Henry George was the originator. He only revived theories advanced during the preceding two hundred years by the physiocrats of France in the seventeenth century; Thomas Spence, an obscure Newcastle schoolmaster in 1775, and Rousseau at the end of the eighteenth century.

With my limitation of time I cannot even touch upon the chief causes of poverty, which are deep-seated in the nature of man rather than of legislation, nor can I dwell upon the principles of taxation as laid down by the most eminent political economists of the past two centuries, further than to say that the taxation systems of all civilized nations are now founded on the principles as laid down by Adam Smith, "that the subjects of every state ought to contribute towards the support of government as nearly as possible in proportion to their respective abilities, that is to say, in proportion to the revenue which they respectively enjoy under the protection of the state. This revenue comes from three sources: rent, profits, wages, and every tax which falls upon one of these is necessarily unequal in so far as it does not affect the other two."

Now, the theory of Henry George is that single tax on land values should replace all other taxes and provide all the revenue necessary to meet the requirements of local, provincial and federal governments. Such a tax, according to his theory, would abolish land speculation, encourage unlimited building, lower rents, increase wages, give permanent employment to all, and forever abolish poverty, with all its evil results. This tax was not to fall on all land, but only on land value. Notice the distinction. If a shiftless, improvident farmer had no return from his farm above a fair return on his labor and capital, he would not have any tax to pay. His neighbor, however, whose farm, as a result of his thrift, energy, industry and progressiveness, would yield a revenue in excess of a mere revenue on labor and capital, would have to pay a tax on his land value. As the community must have a stated revenue to meet the cost incurred in municipal services, the result would be that the hard-working, progressive farmer would not only be paying his own share of the municipal expenses, but would have to assume a portion of the share of his shiftless neighbor. This is not my statement. In the Century Magazine, July, 1890, Mr. George, in his reply to the late Edward Atkinson, the eminent economist of Boston, wrote these words: "If there is a proportion of farm lands which yield no return above the ordinary return to labor and capital, then in such cases there is no real land value, and under the single tax such farm would pay no tax at all." I leave you to draw your own conclusions from such a proposition. In the same article he says: "We (the United States) have no more need for an army and navy and coast defences than Mr. Atkinson and I have for suits of armor and blunderbusses." He built his theory on the presumption of a world-wide permanent peace, but had he lived for twenty-five years he would have seen his statement that the United States did not need an army and navy and coast defences blown to pieces, and taxes levied to equip, transport to the battlefields of France, and maintain an American army of nearly four million men, which could not have been financed justly and equably by any single tax on land.

(Continued on page 30)

WELLAND

THE accompanying extracts taken from the last annual report of Louis Blake Duff, Industrial Commissioner, are evidences of the important part Welland has come to play, and will continue to play, in the realm of manufacturing in this country. Contiguous to cheap power, an adequate labor supply and excellent rail and water transportation facilities, this thriving Ontario city offers unusually fine advantages to capital and manufacturing enterprises.

To the Council and the Board of Trade of the City of Welland:

GENTLEMEN,—

My report for the year 1918, which I have the pleasure and honor here to present, covers a year that marked the close of the great war and the beginning of peace, the closing of an old era and the opening of a new one.

PAY ROLLS EXCEED SIX MILLION

Into the pay envelopes of Welland's industrial workers there was placed last year $6,466,221, about three times the amount of 1915. The following is a comparative table:—

1906	$ 60,000
1912	1,300,000
1915	2,117,618
1916	3,610,336
1917	5,569,190
1918	6,466,221

OUR MANUFACTURED PRODUCT VALUED AT $35,400,340

The value of Welland's manufactured product in 1918 shows that we have passed through another year of really noteworthy expansion. The adage, that "every year in Wellnd is a record year—until the next one arrives," has again proven true. No better index of the progress of the city can be given than the following table showing the value of our manufactured product in recent years:—

1906	$ 150,000
1912	6,500,000
1915	13,285,495
1916	19,375,115
1917	28,642,390
1918	35,400,340

The output of Welland's factories in 1918 is more than 10 per cent. of Canada's total exports in 1913, of the mines, forests, factories, fisheries and farms. Canada's factory exports in 1913 totalled $43,692,708, so that Welland in 1918 manufactured goods very near to the value of the National factory export of five years ago.

WELLAND AGAIN LEADS ALL ONTARIO CITIES IN POPULATION GROWTH

The assessment roll for 1918 shows Welland to have a population of 9,876, an increase of 1,051 over the previous year, and making an actual population, including the indostrial section in Crowland which adjoins, of at least 12,500.

The following table shows how Welland has grown in population in the past fifteen years:—

Year.	Population.	Gain.
1905	1,795	....
1906	1,886	91
1907	3,274	1,388
1908	3,958	684
1909	4,448	490
1910	4,681	233
1911	5,128	447
1912	5,414	286
1913	6,244	830
1914	7,208	961
1915	7,243	35
1916	7,905	662
1917	8,823	920
1918	9,876	1,051

Welland had a gain in population last year of 10.6 per cent., a record that was approached by only one other Ontario city, and, with this one exception, over double the percentage gain of any other Ontario city. This is the second year in succession that Welland has been in the position as leader in population growth. In point of nomerical gain Welland was exceeded by only six of the twenty-one cities of the province.

ASSESSMENT GROWS NEARLY A MILLION

The total assessment as revealed in the 1918 roll is $7,638,110, an increase of nearly a million dollars over the previous year. For the past twelve years we have increased our assessment on an average of over half a million dollars each year. The gains from year to year have been as follows

1907	$ 963,950
1908	327,065
1909	176,240
1910	443,954
1911	197,820
1912	421,651
1913	679,228
1914	1,267,162
1915	398,618
1916	270,540
1917	544,325
1918	879,120

MUNICIPAL FINANCES

It is gratifying to note the increases in municipal revenues. The Financial Statement for 1918 shows an improvement under every head. From that statement the following comparisons are selected:—

	1917.	1918.
Building Permits	$ 136.50	$ 222.00
Fines	3,118.75	13,865.00
License	1,857.75	2,005.60
Market	917.25	956.00
Taxes—		
Roll of 1916	16,922.47	
Roll of 1917		18,196.24
Roll of 1917	148,470.86	
Roll of 1918		169,670.91
Taxes, arrears	1,350.05	6,505.94
Taxes, dog	118.00	202.00

THE OUTLOOK

The year 1919 is not likely to see the establishment of many new industries, but the succeeding year should find the youngest city in the province in her full stride again. The chief factor to bring this about will be the completion of the Chippawa-Queenston hydro-electric development scheme, begun in 1914 and now well under way. This public undertaking, estimated to cost $25,000,000, will provide 300,000 h.p. Welland's proximity to the development, its present connection with the Hydro-Electric Power System by a half million dollar power line, and its unrivalled lake and rail facilities, will undoubtedly result in the continued building up of this important industrial city.

The opening year has the following municipal building projects in contemplation:—A Fire Hall, a Public School, a New Hospital Wing, a Carnegie Library, and a Technical School.

THE DESTINY OF WELLAND

The figures herein presented will be, I believe, a source of pride to every citizen of Welland. Certainly the record cannot be duplicated. I can do no better in conclusion than to repeat the observation of a year ago: that the compilation of our industrial statistics lends a new weight each year to the common prophesy that the City of Welland is destined to be one of the first manufacturing centres of Ontario, and the zone of the Welland Ship Canal, the workshop of the Dominion.

Welland had a splendid achievement in peace, and a splendid achievement in war. Peace brings the opportunity for a new and greater success.

LOUIS BLAKE DUFF,
Industrial Commissioner.

Welland, January 31, 1919.

SINGLE TAX IN THEORY AND IN PRACTICE

(Continued from page 26)

Experiments in Single Tax

So much, briefly, for the theory, and now let us turn and see what has been accomplished by the single tax in practice. For some years the single taxer referred us to western Canada and a few places in the United States as shining examples of the prosperity resulting from the application of the single tax in those places. At present they try to draw our attention away from the conditions now existing in western Canada and refer us to Australia and New Zealand. Time will not permit me to go into the facts in connection with these two countries further than to say that the unimproved land tax in Australia and New Zealand is only one part of their system of taxation. In New Zealand only 43 boroughs out of 113 have adopted the unimproved land tax, which is far from being generally satisfactory. In Australia the town clerk of Brisbane city said, "that he did not consider it would be desirable to revert to annual rental values as a basis for valuation," while, on the other hand, the town clerk to the Borough of Brisbane stated, "that he considered the old mode of rating on improved values to be fairer than the new, and that he did not think ratepayers held any sentimental objections to the rating of improvements." Australia is now widening her base of taxation to meet increasing expenditures, so that the single taxer can find no consolation in viewing the taxation system there.

Reference is often made by single taxers to the success of their system in Houston, Texas. I have a letter from an official of the city of Houston, dated February 18th, 1919, in which he says: "The single tax system is not in operation in the city of Houston, and never has been. However, the late Mr. Pastoriza, tax and land commissioner during the years 1912, 1913 and 1914, inaugurated a system commonly known as the 'Houston Plan of Taxation,' under which Houston assessed all land for taxation at 75 per cent. of its value and improvements at about 25 per cent. This was abolished in 1915 as being unconstitutional."

In the State of Oregon, in 1916, a single tax proposition was submitted to the vote of the people. This proposition, as described by a local single tax advocate in a freely-quoted paragraph: "Has as its intent to confiscate all land titles, leaving owners and mortgagees nothing but improvements and preferred rights to become tenants of the state." The resulting vote was 43,800 for and 184,900 against, nearly five to one, the electorate decisively showing that they were not to be caught by any such socialistic theories, and were opposed to the confiscation of land in any form.

In the State of California, in 1912, 1914 and 1916, the electorate voted on a single tax referendum with a majority against it in 1912 of 74,638; in 1914, 108,106, and in 1916, of 316,201. This amendment voted on was "that state, county, municipal and district taxes shall be raised by taxation of land values, exclusive of improvements, and no tax shall be imposed on any labor, product, business or person."

This proposition was described by the San Francisco Chronicle as "shockingly wicked and absurd," and when it was so overwhelmingly rejected in 1916, the Chronicle in an editorial said: "While California probably outranks even Kansas as a cranky and uncertain state, the overwhelming vote by which the single tax humbug is snowed under proves that the mass of the people, at any rate, are not utterly clean gone daft. There is somewhere a boundary line beyond which reason holds sway and the single tax humbug is far outside of."

Attempts in Western Canada

Coming nearer home, we find that the missionary work done by single taxers in western Canada bore fruit, when, in 1909, a disciple of Henry George was elected mayor of Vancouver, practically on his promise that he would carry into effect the principles enunciated in Henry George's "Progress and Poverty." Subsequent to his election the tax was taken off all improvements, and Vancouver prospering, as all other cities on this continent were prospering at the time, the boast was made that her prosperity was due to her system of taxation. The supposed triumph of the single tax was such that the son of Henry George was taken to Vancouver by some enthusiastic single taxers to see the glorious results arising from the putting into practice of the theories of his father. While he was then entertained most royally, I do not think the same reception would be accorded to-day.

Following Vancouver, the exemption of improvements became practically the law of British Columbia, Alberta and Saskatchewan. When land values were soaring, fortunes being made daily in land speculations and general prosperity reigning throughout the west, the single tax journals and supporters were boasting far and wide of the success of the theories of Henry George in western Canada.

In April, 1914, a body of citizens was appointed by Mayor Mitchell and the Board of Estimate and Apportionment of the city of New York to study the systems of taxation in the cities of the United States and abroad, so as to see if any improvements could "be suggested as calculated to effect an improvement in the ways and means of creating a revenue for payment of the cost of the city government."

This committee, which was composed of some of the ablest taxation experts of that city, had as chairman of the executive committee Prof. Seligman, one of the most eminent political economists of the present age. One of the first things this committee did was to appoint Prof. Robt. Haig, instructor in economics in Columbia University, with the responsible duty of making a thorough study and exhaustive report on the so-called single tax in any American cities where the plan had been tried, but particularly in Western Canada, where it was stated that the single tax system was the cause of unparalleled prosperity and satisfaction. Prof. Haig spent about three months personally visiting the cities of our Canadian West. In this time he not only studied the conditions through municipal officials, but interviewed all classes from the members of the legislatures down to the working man, and in his valuable report of nearly three hundred pages he impartially records the replies to his enquires, and the opinions expressed for and against the exemption of improvements, and gives valuable statistics to show the condition of things as he then found them. His conclusions were, "the system of taxation does not check or prevent speculation in land, the absence of a tax on buildings is not in itself an insurance that building activity will continue indefinitely, as witness the slump in all western cities, except Winnipeg, in 1913 and 1914." And, "it has been customary to think of western Canada as a region where single tax measures have been uniformly successful. Such is not the case."

Adversity Puts it to Test

While prosperity was general throughout western Canada, few if any of the municipalities gave much thought to their system of taxation, so long as there was sufficient revenue to meet civic requirements, but when that prosperity began to wane in 1912, taxation became a burning question. As it was found that depreciation of land values was imperilling the solvency of many municipalities, and would probably cause some of them to fall down on their bond indebtedness, many schemes were tried to bolster up the tottering land tax system, the chief of which was overvaluation. Proprietors had practically no redress against over-assessment. Section 371 of the Town Act of Saskatchewan says, "that in case the value of which of any specified land has been assessed appears to be more or less than its true value, the amount of assessment shall nevertheless not be varied if the value which it is assessed at bears a fair and just proportion to the value which the land in the immediate vicinity of the land in question are assessed." In other words: even if lands were assessed at two or three times their value such assessment must stand if all neighboring land was assessed alike. Comment on such an iniquitous invitation to over-assessment to bolster up a system of single land tax is unnecessary.

The system of single land tax having passed through a period of prosperity has now passed through a time of

SALE OF TIMBER BERTHS

Tenders will be received by the undersigned up to and including Wednesday the sixteenth day of July next, for the right to cut the Red and White Pine Timber on the following Townships, viz.:—

District of Algoma.	District of Sudbury.
Mississaga Forest	Township of Teffer
" Reserve	" " McConnell
Township "C"	" " McNish
	" " McNamara

District of Nipissing.

Township of Kenny	Township of McLaren
" " Sisk	" " Charlton
" " McCallum	

Also, tenders will be received by the undersigned up to and including Wednesday the Sixteenth day of July next, for the right to cut various classes of timber on Township "U," in the Mississaga Forest Reserve, in the District of Algoma.

The terms and conditions of the sale, containing full particulars, and also maps showing the berths offered for sale, may be obtained upon application to the undersigned, or from Mr. Charles Henderson, Crown Timber Agent, Sudbury, or from Mr. J. T. McDougall, Crown Timber Agent, North Bay.

G. H. FERGUSON,
Minister of Lands, Forests & Mines.

Toronto, May 14th, 1919.

SALE OF TIMBER BERTHS

Tenders will be received by the undersigned up to and including Wednesday, the 16th day of July next, for the right to cut the timber of various descriptions on the Townships of Groves and St. Louis in the District of Sudbury.

Terms and conditions of the sale containing full particulars, and maps showing the position of the Berths offered for sale, may be obtained upon application to the undersigned, or from Mr. Charles Henderson, Crown Timber Agent, Sudbury.

G. H. FERGUSON,
Minister of Lands, Forests and Mines.

"Your Vacation is Planned"

Camping

A CAMPFIRE! Is there anything more weirdly attractive than tawny flames against the purple background of the night? Anything finer than sun-filled days in the open? For real camping, go to the Laurentides, Algonquin Park, New Ontario, Nipigon, Lake of the Woods, Rainy Lake, Nagogami, or Jasper Park. You can lose yourself with those favored older children of the gods, the silvery streams, the rugged hills, pine-scented forests—or you can camp close to civilization, as you like.

"9 Ideal Vacations"

With splendor and sportsman's playground, Canada calls the vacationist! Health and strength renew themselves in the invigorating atmosphere of Cape Breton, Prince Edward Island, St. John River Valley, and Muskoka. The fish are biting at Rainy Lakes, Lake of the Woods and other ideal spots. For the hunter of moose, deer or bear, there is abundant sport in Nova Scotia, New Brunswick, Quebec, New Ontario, and Eastern Manitoba. Great grizzlies and nimble mountain goats draw the sure shot of the hunter in British Columbia.

A Vacation Planned to Meet Your Needs—Choose!

A wonder panorama unrolls before the traveler through the Canadian Rockies, Matapedia Valley, La Baie de Chaleur, Gaspe, Cape Breton, and along the ocean shore of Nova Scotia. History is animate in the ancient streets and dwellings, and in the quaint environs of Quebec, Montreal and Halifax. If you have only a few days, spend them joyously at Muskoka, Sparrow Lake or the Maritime Provinces. Or, wishing to combine business with pleasure, visit Western Canada, and such thriving cities as Winnipeg, where you "hear" opportunity grow.

depression, and, as was predicted by all economists of any standing, what seemed a success during prosperity has proved a lamentable failure in time of adversity. The real estate men, "by whose propaganda the tax was taken off improvements, and who boosted sales on the benefit of exemption from taxation of improvements, are now the most bitter in opposition to the single land tax, as they are caught with large blocks of non-revenue producing land, for which they paid big prices, but which they cannot sell at any price, and upon which they have to pay heavy taxes. They are now in the forefront of those who would reimpose taxes on improvements."

Land values declining in Vancouver in 1912, the aldermen of that city found themselves in a financial dilemma. It would never do for those in authority to admit the failure of a system which had been their boast and pride, so they increased the tax rate until in 1917 it was 24 mills, this rate, of course, bearing heaviest on the small proprietor. In 1918, the council was faced with the alternative of an increase of three and one-half mills or abandonment of the unimproved land tax. It was abandoned, and one of the newspapers of that city said in its next issue: "In point of fact the Vancouver city council is out to broaden the basis of taxation, and get as far from the single tax as it possibly can."

This change of policy on the part of Vancouver has since been followed by practically all the municipalities in the west, some voluntarily, some otherwise.

Early last year South Vancouver defaulted in meeting its obligations, and the provincial government appointed an administrator to manage its affairs. The Edmonton Bulletin, in referring to the matter, said that among recommendations made by him to the taxpayers asking them to help him to pull the municipality out of the fire, was one which might be of interest to the citizens of Edmonton, where the system of taxing land only, was tried to a finish and found insufficient. The administrator said: "After careful consideration of the financial situation, I find it absolutely necessary to depart from the straight tax on land, drastic though it be."

C. J. Yorath, City Commissioner of Saskatoon, made a special report in 1917 upon Assessments and Taxation to the mayor and aldermen of that city. It was a scathing indictment of the policy of exempting improvements from taxation, and he stated "that it had proven to be the most difficult method of raising revenue, was largely responsible for enormous arrears of taxes, did not prevent speculation in land, but in fact stimulated speculation, as through the supposed advantage of inducing the owner to develop his property, an unhealthy prosperity was created."

Case of Edmonton

A single taxer writing to the Montreal Gazette in the latter part of 1917, said that "Edmonton had also adopted an honest and wise tax system, and it is highly improbable that the residents will be fooled by the speculators into any change whereby resident proprietors will carry the burden of speculators and non-residents, and that its utilities, municipally operated, had proved a success."

A speaker in this city in 1916, referring to Edmonton said, "that wherever the site value system had been tested it has been attended by beneficial rsults; it has never been discarded where once applied, and as the matter becomes better understood the advocates of the system increase in vast numbers." What are the facts? In a letter from a city official of Edmonton, March, 1918, he says: "No changes in our system of assessment have been introduced during the past two years. Very radical charges are, however, contemplated for this year Three of our utilities have returned substantial surpluses during the past two years, but the street railway has had a deficit which more than wiped out the surplus from the other utilities." The municipality operated utilities are: Electric light and power, telephone, water works and street railway, the deficit in 1916 being $20,827 and in 1917, $25,540. Since that letter was received the so-called single tax system has been abandoned and Edmonton now taxes everything in sight. It was only a short time ago that a single taxer in addressing one of the associations of this city said that, "the people in Edmonton, Vancouver and Saskatoon were well satisfied with the result of their land tax system, despite the criticism appearing in some newspapers." That they were not satisfied is shown by their return to saner methods of taxation and the abandonment of the single land tax.

As an evidence of the inflations of land values so as to obtain sufficient revenue on a low tax rate, Edmonton is a most conspicuous example. In 1914, with a population of 72,500, the assessed land value of that city was $209,000,000. Montreal's total assessed land value in the same year was $537,000,000. Had Montreal's land value been assessed at the same ratio to population as Edmonton's, the assessed value would have been $1,874,000,000, or $1,023,000,000 more than the total assessed value of Montreal's land and buildings. In other words the assessed land value per capita was in 1914, Montreal, $825, and Edmonton, $2,880, or over three to one. These figures show how the single taxers of the west were bolstering their theories by fictitious values and a low tax rate.

Throughout the whole of the west the history of the single land tax has been the same. It did not prevent or even check land speculation. On the contrary the bait of exemption of improvements stimulated speculation. There was, in some places, a temporary increase in building, which was prejudicial rather than otherwise to the welfare of the community. Assessment Commissioner Painter, of Vancouver, reported early in 1914, "that less than half the houses which are ordinarily rented now have tenants." The Credit Foncier office building in that city was then vacant except for the top and ground floors; and Prof. Haig reported: "There seems to be no doubt that Vancouver is over-built."

As a benefit to the working man it has utterly failed. The city treasurer, of Victoria, B.C., says: "With total exemption of all buildings from taxation, I think the working man is getting the worst end of the stick," This is the consensus of opinion of all who have carefully and impartially studied the conditions in the west.

To sum up: the single tax theory, when put into practice, has failed to abolish or in any way check land speculation; it has not lowered rents; it has not been instrumental in giving permanent employment to all willing to work; it has not increased wages; it has not lowered the cost of living: nor has it abolished poverty. Like many other plausible theories, "it has been weighed in the balances and found wanting."

VANCOUVER BOARD OF TRADE

The first issue of a monthly "Board of Trade News" was issued in May by the Vancouver Board of Trade. The second number for June has just appeared. The publication of such a record of activities is becoming common in Canada. Similar organizations which publish such pamphlets are the boards of trade of Montreal, Toronto, Winnipeg and St. John.

SUGGESTS CANADIAN EXPORT BANK

A statement recently made by the secretary of the Canadian Trade Mission in London points out that government subsidies to European countries are necessarily limited, and that the time has arrived when business interests must act for themselves as regards financing. This is similar to the views expressed by Mr. Lloyd Harris during the past few weeks in Canada. The secretary, in his statement, says: "This mission has collected abundant information relating to trade openings in Poland and also other eastern European countries, and the best way to utilize the present fine opportunity would be to form a Canadian bank for foreign trade. If five great Canadian banks each contributed one million dollars and twenty other banks half a million each, that would produce a capital of fifteen millions, which would be sufficient to finance our trade with such a country as Greece, for instance."

Trade Figures Explain Exchange Rates

DURING the year ended March 31st, 1919, Canada exported $531,920,977 of goods to the United Kingdom and received in exchange goods to a value of $73,024,016. Even after allowance is made for annual interest payments due to Great Britain and for shipping revenue most of which accrues to British vessels, there is still a very large balance in favor of Canada and this is the principal reason why sterling exchange continues to be quoted at a substantial discount in Canada.

An examination of similar figures for the United States and Canada shows a reverse situation. Our exports to the United States for the year totalled $454,923,170, and our imports were, $746,937,509. There is also to be considered the fact that we owe a substantial sum annually on account of United States investments in Canada, which would make the adverse balance still greater. Canadian exchange continues, therefore, at a discount in New York, and Canadians who want to make payments in New York, just at present, have to pay a premium of almost three per cent.

The connection of trade with foreign exchange is pretty well understood. If commodities of exactly the same aggregate are exchanged between two countries during any one year there is obviously no adjustment required. Where one country owes another certain amounts annually as interest on capital its exports must exceed its imports by that amount. There are other adjustments to be considered such as, who pays the transportation charges, the course of tourist traffic, etc., and after all these entries are made the balance must be adjusted by gold shipments or by borrowings. The shipment of gold entails a considerable expense and it is

frequently cheaper to pay a small premium for foreign bills than to have gold shipped; that is why exchange will frequently go to a small premium before extensive shipments of gold are made.

When imports exceed exports it is obvious that bills in the United States drawn on Canadian importers will exceed the bills in Canada drawn on United States importers, and the supply of the former will be in excess of the demand while the supply of the latter will be below the demand. Canadian bills in the United States, therefore, are at a discount and United States Exchange in Canada is at a premium.

In the pre-war days the trade operations between Canada, the United States and Great Britain was a triangular affair. British exports to the United States have, however, been reduced to a minimum and it has been necessary for Great Britain's war purchases there to be financed by credits and by the gold shipments which have been passing through Canada.

The figures given herewith show the exact totals by months for several years past.

PUBLICATIONS RECEIVED

Industrial Reconstruction.—Issued by Thorne, Mulholland, Howson and MacPherson, Industrial Advisers, Toronto. This booklet is a reprint of a series of eight articles on modern business management which appeared in recent issues of "Industrial Canada." It discusses many critical questions of the present time, such as piece work, remuneration, analysis of costs, industrial relations, etc.

Round Table, June, 1919.—Canadian contributions in this issue deal with the death of Sir Wilfrid Laurier, the question of liberal leadership in Canada, the position of Quebec, and the appointment of the Royal Commission on Industrial Relations. Considerable space is given to information regarding the situation in Russia in addition to the usual volume of articles regarding different parts of the British Empire.

Wake Up, Canada!—By C. W Peterson. Macmillan Co. of Canada, Ltd., Toronto. 365 pages. $2.

Under the above title, the author, who is deputy fuel controller of Canada, presents a variety of views on many topics of current interest. He speaks with firm conviction. Leading chapters deal with the railway question, the farmers' viewpoint, the tariff and the single tax. Mr. Peterson has had a lengthy experience in close touch with Canadian affairs, and this volume evidently contains a condensation of views which have been accumulated as a result of this experience.

Canadian Parliamentary Guide.—By "M.P." Published by Macmillan Co. of Canada, Toronto; 90 pages, with index; 75 cents. This little volume is, we think, misnamed, because it applies not only to parliamentary procedure, but also to public meetings of all kinds. The standard for the organization and arrangement of public discussion has always been found, however, in the parliament of Great Britain and in this country in the Canadian House of Commons. The volume will be useful for presidents, secretaries and other officers of clubs and societies.

The Undying Fire.—By H. G. Wells. Macmillan and and Co.; 229 pp.; $1.50. In this, his most recent work, Mr. Wells is equal, if not superior, to his usual standard. His subject matter is not new, having already been dealt with in a different manner in his other recent works. In this volume, Mr. Wells is more effective in destructive than in constructive work; his later chapters, where he proceeds to rebuild in place of what he has torn down, do not leave a very positive impression, being more than offset by his previous discussions. His style is, as usual, very clear, and his interpretation of current views on weighty problems is accurate.

The Farmer and the New Day.—By K. L. Butterfield, president of Massachusetts College. Macmillan Co. of Canada, Toronto. 311 pages. $2.25. Literature on the subject of agriculture has hitherto been confined almost exclusively to its technical branches, and a volume such as this, dealing with fundamental aspects of farming, is in place. The author, as he says himself, does not deal with specific problems, and many readers may feel that his positive contribution to rural life is not substantial. A careful reading of the book will, however, stimulate thought towards actual problems, and the general views expressed have evidently been the result of close contact with farming conditions. The author believes in organization and education as the main line of endeavor for the improvement of agricultural life, in the broader sense of the word.

Practical Guide on Company Law.—By Walter E. Lear. Published by Law Books, Ltd., 152 Bay St., Toronto; 212 pages, $4.00. This volume gives in a convenient form, instructions for the organization of companies under the Dominion Act, and the various provincial acts. A large part is taken up by the Dominion Companies Act of 1906, as amended up to 1918. Secretaries and other company officers will find this book invaluable as a manual for constant reference and it will be of much service as a guide to the best methods of organizing a company. The many amendments which have been made to the Dominion Companies Act and to the corresponding acts of the various provinces have made company law so complicated that a condensed volume of this kind is practically essential in the organization and conduct of an incorporated business.

COBALT ORE SHIPMENTS

The following is a statement of the shipments of ore, in pounds, for the week ending June 20th, 1919:—

O'Brien Mine, 64,075; Dominion Reduction Co., 67,000; La Rose Mine, 65,978; Mining Corporation of Canada, 305,446; Buffalo Mine, 197,425. Total, 699,924.

The total since January 1st is 11,305,057 pounds, or 5,652.5 tons.

WEEKLY BANK CLEARINGS

WHY THE "MUTUAL LIFE OF CANADA" IS SO POPULAR

The Mutual placed upon its books in the first five months of 1919 100% more business than in the corresponding months of 1918. The wonderful war-record of the Mutual Life and the prompt payment of the many unexpected claims during the recent epidemic—these have proved the value of the institution. The Mutual, moreover, is in a peculiar sense a people's company, being in its control democratic, in its economy strictly co-operative. This means that the system is in line with the "spirit of the age," and so the people naturally turn to the Mutual. The record of the Company for nearly half a century has been one of increasing beneficence, and an ever-growing number of gratified policyholders help on the good work of the agents. As a result, there probably is not a more prosperous group of workers in Canada to-day than the representatives of our Company.

"Be a Mutualist."

The Bank of Montreal announces that on or about the first of next month, an office will be opened in Paris, France, to be designated 'Bank of Montreal (France),' in the Ritz Hotel Building, 17 Place Vendome, under the management of Mr. W. F. Benson, with Mr. H. J. E. Pope, as assistant manager.

According to an announcement from Rio Janeiro, the Royal Bank of Canada, and the Yokohama Specie Bank of Japan, are soon to open branches in several cities in Brazil.

After spending a short time in Eastern Canada, Mr. J. S. Hiam, superintendent of branches of the Union Bank of Canada, has returned to Winnipeg. Before he left, he stated that the bank's system had been brought up to a total of 360 branches, 60 of these being opened since the signing of the armistice. He announced the opening of branches at the beginning of next month in Moncton, N.B., and Kentville, N.S.

Final details are now being completed of an important real estate transaction, in Montreal, by which the Eastern Townships Bank Building, on the corner of St. James and McGill Streets, passes out of the hands of the Canadian Bank of Commerce by the purchase made by the Bank of Nova Scotia. While no figure is mentioned, it is understood the price was well in excess of the assessment of the Eastern Townships Bank Building, which stands at $753,000.

The property comprising the old Central Hotel, Main Street, Galt, Ont., may be purchased by the Royal Bank of Canada, but negotiations have not as yet been completed.

Mr. W. H. C. Hall, of the Ontario inspection staff of the Merchants Bank of Canada, is now acting manager at Fingal, Ont., branch.

Mr. A. T. Williamson, formerly manager of the Bank of Ottawa at Hastings and Seymour Streets, Vancouver, has been appointed manager of the Bank of Nova Scotia at Queen and McCaul Streets, Toronto, to succeed Mr. H. L. Enman.

The following staff appointments have been announced by the Union Bank of Canada:—

Managers—Mr. B. C. Beyer, Leduc, Alta.; Mr. T. L. Ferguson, Leader, Sask.; Mr. G. H. Heald, Canfield, Ont.; Mr. G. A. Howson (Winnipeg, Main and Mountain, Main and Lansdowne, West Kildonan, Man.); Mr. J. H. Hurlburt, Moncton, N.B.; Mr. J. T. Hutton, Standard, Alta.; Mr. M. Ross, Sussex, N.B.; Mr. J. F. Stewart, Wiarton, Ont.; Mr. G. C. Temple, Charlottetown, P.E.I.

Acting-managers—Mr. H. C. Brankin, Cut Knife, Sask.; Mr. H. W. Fuller, Chauvin, Alta.; Mr. H. R. R. McClung, Elm Creek, Man.; Mr. J. A. McDairmid, Elphinstone, Man.; Mr. J. N. Pugh, Alida, Sask.; Mr. A. L. Smart, Langdon, Alta.; Mr. A. N. Wetherell, Winnifred, Alta.

The Merchants Bank of Canada has purchased the building at 38 Wall Street, New York, according to an announcement by Charles F. Noyes Co., real estate brokers. This is the fourth Canadian bank to purchase quarters in that city, the Bank of Montreal being first, followed later by the Royal Bank of Canada and more recently by the Canadian Bank of Commerce

LUMBER INDUSTRY IN CANADA

A census of the lumber industry in Canada was recently completed by the Dominion Bureau of Statistics, embracing 2,879 operating concerns, of which 52 were in Alberta, 251 in British Columbia, 29 in Manitoba, 255 in New Brunswick, 462 in Nova Scotia, 603 in Ontario, 60 in Prince Edward Island, 1,151 in Quebec, and 16 in Saskatchewan.

The total capital invested in the industry, including land, buildings and plant, machinery and tools, stocks in process and supplies, and working capital is given at $149,266,019.

The number of employees on salaries was 2,874 males and 285 females, who received a total of $3,554,097. The average number of employees on wages was 25,516 engaged in logging operations, and 28,820 in the mills, and their combined wages amounted to $34,412,411.

The aggregate value of production in 1917 was $115,777,130. The census covered 29 kinds of lumber, 11 of shingles, 10 of lath, 6 of pulpwood and 10 of miscellaneous products, including cooperage stock, veneer, ties, poles, posts, dressed lumber, etc.

The principal kinds of lumber by species of wood used, were spruce, 1,466,558 m. feet; white pine, 791,609 m. feet; Douglas Fir, 706,990 m. feet; hemlock, 322,722 m. feet; cedar, 149,999 m. feet; red pine, 119,321 m. feet! balsam fir, 102,373 m. feet, and all other varieties, including custom sawn lumber, 483,133 m. feet.

The total quantities and values of lumber, lath, shingles and pulpwood cut, and of miscellaneous products were as follows:—

Kind.	Unit of measure.	Quantity.	Value.
Lumber	m. ft.	4,142,711	$83,547,322
Lath	m.	616,909	1,828,018
Shingles	m.	3,024,452	8,431,215
Pulpwood	cords.	988,444	10,543,630
Miscellaneous products (value only)		....	11,426,945

CANADIAN HISTORICAL DOCUMENTS

The Board of Historical Publications, which was established some time ago by the Dominion Government, is at present engaged in collecting documents upon Canadian history. The work is in charge of Dr. Adam Shortt, who is well known throughout Canada as an educator, a writer and formerly of the Civil Service Commission. Documents which throw light upon Canadian history will be reprinted and will be supplemented by explanatory notes. The field is divided into two parts, the first being the political and social, with the following sections:

1. Constitutional Development to Confederation:
    (a) Ontario and Quebec.
    (b) Maritime Provinces.
    (c) Western Provinces.
2. External Relations, including boundaries.
3. Militia and Defence.
4. Immigration and Settlement, including Land Granting.
5. Municipal Development.
6. Indian Relations and Exploration, including operations of Hudson's Bay and Northwest Companies.
7. Relations of Church and State, including Clergy Reserves, etc.
8. Education, Literature, Art, etc.

The second main division is the economic, with the following divisions:

1. Public Finance and Taxation.
2. Currency, Banking and Exchange.
3. Trade:
    (a) Domestic.
    (b) Foreign.
4. Transportation:
    (a) Shipping, including Canals, Shipbuilding, etc.
    (b) Highways and Railroads.
    (c) Postal Developments.
5. Agriculture.
6. Fisheries, Marine and Inland.
7. Industry, Manufacturing, Lumbering, Mining, etc.

The annual meeting of health and accident underwriters will be held at Niagara Falls, Ont., September 2nd to 4th, 1919.

DEBENTURES FOR SALE

CITY OF SASKATOON, SASKATCHEWAN

GOVERNMENT AND MUNICIPAL BONDS

British Columbia Will Make Big Loan—Much Municipal Financing in Sight

ACTIVITY in the field of public financing continues, and while good prices have been regularly obtained, there is considerable evidence that the upward movement, which was so pronounced from November until May, has ceased for the time being. Considering the extent of the increases in the income tax announced by the finance minister, the advances made by the tax-exempt war loan bonds have not been great.

This week the province of British Columbia is asking for bids on $3,000,000 of bonds until Saturday, June 28th. The provincial treasurer, Hon. John Hart, is now in Toronto. It was his intention to receive bids until some time next week, but bond dealers expressed a strong preference for having the bids close in time to enable offerings to be made by July 1st when so many funds are available for investment as the result of dividend and interest payments.

The following quotations of active government bonds are supplied by the National City Co., Ltd., and are in New York funds:—

	Bid.	Offered.
Anglo-French 5% (Oct. 15, 1920)	97	97⅛
United Kingdom 5½% (Nov. 1, 1919) ..	99 11/16	99 13/16
United Kingdom 5½% (Nov. 1, 1921) ..	98½	98⅝
United Kingdom 5½% (Feb. 1, 1937) ..	99½	99¾
Canadian Pacific 6% (Mar. 2, 1924) ...	101	101⅜
City Paris 6% (Oct. 15, 1921)	97⅝	97¾
Dominion Canada 5% (Aug. 1, 1919) ...	99¾	99⅞
Russian Govt. Ext. 5½% (Dec. 1, 1921)	51	54
Russian Govt. Ext. 6½% (July 10, 1919)	57	60
Swedish Govt. 6% (June 15, 1939)	99⅜	99⅝

The following is a list of debentures offered for sale, of which particulars appear in this or previous issues of *The Monetary Times*:—

Borrower.	Amount.	Rate %.	Maturity.	Tenders close.
British Columbia ..	$3,000,000	5	20-years	June 28
Dartmouth, N.S. ..	52,750	5	20 & 30 years	June 28
Louth Tp., Ont. ...	21,950	5½ & 7	20-instal.	June 30
Beauharnois, Que. .	57,500	5½	....	June 30
Camrose, Alta. ...	8,000	6	15-instal.	July 2
Alberta School Districts	19,800	7	Various	July 2
Regina, Sask.	139,000	5½	30-years	July 2
Camrose, Alta. ...	17,000	6	20-instal.	July 2
Swan River, Man.	50,000	6	30-years	July 2
Sherbrooke, Que. ..	142,500	5	20-years	July 2
Montreal, Que.	624,000	4½	40-years	July 3
Bowmanville, Ont.	17,500	6	10-instal.	July 3

Red Deer, Alta. ...	90,000	6	10-instal.	July 10
Lancaster Tp., Ont.	100,000	5½	25-years	Aug. 15

Kingston, Ont.—Tenders will be received up to July 3rd, 1919, for the purchase of $77,000 5½ per cent. 30-year debentures.

Dereham Township, Ont.—Messrs. C. H. Burgess & Co. have purchased an issue of $22,000 5½ per cent. 20-instalment debentures.

Mimico, Ont.—Tenders are being received up to July 5th, 1919, for the purchase of $55,000 5½ per cent. 30-year debentures.

Bowmanville, Ont.—Tenders will be received until July 3rd, 1919, for the purchase of $17,500 6 per cent. 10-instalment debentures.

Lavalle Township, Ont.—Messrs C. H. Burgess & Co., Toronto, have purchased an issue of $6,500 6 per cent. 20-instalment debentures.

Swan River, Man.—The rural municipality is calling for tenders up to July 2nd, 1919, for the purchase of $50,000 6 per cent. 30-year debentures.

Smith's Falls, Ont.—Tenders will be received up till July 7th, 1919, for the purchase of $11,514 5½ per cent. 20-instalment waterworks debentures. J. A. Lewis, town clerk.

Woodworth, Man.—Messrs. A. E. Ames and Co. have purchased a block of $50,000 5½ per cent. 30-instalment bonds at 100.44. The bonds are guaranteed by the province of Manitoba.

Louth Township, Ont.—Tenders are being received up to June 30th, 1919, for the purchase of $1,950 7 per cent. 20-instalment hydro debentures, and $20,000 5½ per cent. 20-instalment school debentures.

Red Deer, Alta.—Tenders will be received until July 10th, 1919, for the purchase of $90,000 10-instalment 6 per cent. treasury bills, issued against arrears of taxes. (See notice elsewhere in the issue.)

Sarnia, Ont.—On July 10th, ratepayers will vote upon the issuance of $350,000 5½ per cent. 20-instalment debentures, for the purpose of paying for the erection of a new collegiate institute and technical school.

Charlottetown, P.E.I.—The city is receiving applications for the purchase of $100,000 5 per cent. 20-year debentures, in denominations of $100 and $500. It is the desire of the city that the issue be taken up by the people of the city and the province.

Dartmouth, N.S.—Tenders will be received until June 28, 1919, for the purchase of $14,750 5 per cent. 20-year debentures, and $38,000 5 per cent. 30-year debentures. The money is to be used for the purchase of a new fire engine, and for waterworks and street widening.

Kingston, Ont.—A resolution was passed by the Board of Education that application be made to the city council to raise by debenture issue the sum of $135,000 for the purchase of a site, erection and equipment of the proposed new school in Cataraqui Ward.

Sydney, N.S.—Four borrowing propositions, involving $140,000, have been turned down by the electors. The items were $45,000 for a nurses' residence in connection with the city hospital; $60,000 for streets; $20,000 for the Halifax Relief Fund, and $15,000 for an infectious disease hospital.

Hamilton, Ont.—Citizens are being offered an issue of $332,000 5½ per cent. debentures in denominations of $100, $500 and $1,000, for periods of one to ten-years, at par. Applications will be received up till June 28th, 1919. According to the latest report from the city treasurer, about $125,000 have been sold.

Yorkton, Sask.—The town will make application to the Local Government Board for permission to issue debentures to the amount of $39,500 for the purpose of converting this amount of floating debt, contracted for the purpose of making additions and extensions to the electric light and waterworks systems during the war, into bonded debt.

Sherbrooke, Que.—On a motion of the finance committee, a temporary loan of $50,000 from the Banque Nationale has been authorized, which would be used for the expenses the city would be called upon to pay in connection with the paving work. The loan would be made up on July 2nd, 1919, when tenders will be opened on an issue of bonds.

Verdun, Que.—A meeting will be held on July 3rd, 1919, to discuss three loan by-laws, the amount to be borrowed to cover the cost of city improvements, including a filtration system, water distribution, electric light and power, and an incineration system. Bonds or debentures of the city will be issued as security, and a tax will be levied on immovables to meet the interest at five and a half per cent. per annum, with one per cent. sinking fund.

---

*To be included in the next Local Government Board Sale.

Nova Scotia.—The province has sold its issue of $1,200,000 5 per cent. bonds, for which tenders were to be received until June 23, 1919. Bids were asked for varying terms, from one and two-year short-term notes, to issues for ten, fifteen and twenty years. The Dominion Securities Corporation, in conjunction with J. C. Mackintosh and Co., of Halifax, has purchased $700,000 of the one-year notes, and a syndicate, headed by F. B. McCurdy and Co., Halifax, has purchased $500,000 of the 10-year bonds. The prices were 101.63 and 98.18 respectively. The following is a list of tenders:—

	1-Year.	2-Year.
Dominion Secur. Corp. and J. C. Mackintosh and Co.	101.63	101.04

NEWS OF MUNICIPAL FINANCE

Walkerville, Ont.—A by-law to authorize the expenditure of $30,000 for the repaving of several streets has been defeated. The council has decided to make up a new tax roll, with the addition of about five mills to the present rate, and discussion of this plan will take place at the next council meeting.

Lethbridge, Alta.—It is likely that the tax rate of the city will be increased to 42 mills as a result of the award of the Government Arbitration Board on the dispute between the city and its employees, whereby a general increase in wages was granted amounting to $25,000. Street car fares, electric light rates and water rates will also be increased.

North Battleford, Sask.—The city has purchased for its sinking fund $2,000 of its own 5½ per cent. bonds, due 1944, from Wood, Gundy and Co., of Toronto, at 90.57 and accrued interest. Such purchases are subject to the approval of the local government board. This board had refused permission to make this purchase, but, according to a report from the city, dated June 17th, it was the intention to pay for the bonds, which had already been shipped.

Regina, Sask.—The net surplus of $20,078, which appeared to the credit of the combined utilities at the end of April, had by the end of May been reduced to $8,449, according to a statement just issued by the city auditors. The street railway has increased about $8,000, owing to the issuance of cheques for back pay for increase of wages; the surplus on the electric light department was reduced from $21,290 to $14,680, and the waterworks department was the only utility which showed an increase, which amounted to about $1,500.

York County, Ont.—At a meeting of the county council this week it seemed to be the general opinion that a rate of two mills will be necessary to meet the indebtedness in connection with the Toronto-Hamilton Highway debentures. The total general tax rate, however, will be lower this year, owing to the fact that the tax for patriotic purposes will not be necessary. Last year's rate was 10 mills, and this year the rate will be about 8 mills. The cost of the Toronto-Hamilton Highway to the county so far has been $117,280, while the county good roads will require a levy of $70,000 for construction and $16,000 for maintenance.

Edmonton, Alta.—The public accounts of the city for the year ended December 31st, 1918, show a further reduction in the net funded debt from $21,556,948 in 1917 to $20,649,420, and in current loans from $5,934,012 to $5,576,550; a surplus of $30,194 on general revenue account; a net surplus of $14,274 on the combined operations of the civic utilities; a reserve of $335,731 provided against uncollectable tax arrears; and the centralization of the work of invoicing and collection of accounts in connection with the various utilities.

During the year current liabilities totalling $3,371,563 matured. Loan renewals were arranged with Otis and Co., of Cleveland and with the Edmonton Sinking Fund Board for $1,100,000 and $335,000, respectively; the balance, with the exception of a demand note due to the bank for $178,868 has been otherwise discharged. The required sinking fund instalments have been fully provided for throughout the war period.

The debenture debt outstanding as at December 31st, 1918, was $25,242,518, inclusive of general, special (property share) and utilities. Taking into account the sinking fund investment, the net general (non-revenue producing) debt is $9,864,005, or $362,284 under that of 1917.

HOME BANK PROFITS INCREASE SLIGHTLY

In its annual statement for the year ended May 31st, 1919, the Home Bank reports net profits of $238,753, compared with $228,963 for the previous year. When added to the balance of $150,731, the total available is $389,484. This was distributed as follows in comparison with last year:—

	1918.	1919.
Dividends at 5 per cent.	$ 97,362	$ 97,378
Government war tax on note circulation	19,316	19,348
Written off bank premises account....	10,000	10,000
Reserve for depreciation of securities and for contingencies	90,000	....
Donations to patriotic and other funds	2,000	4,500
Transferred to rest account	......	100,000
Balance carried forward	150,731	158,348
	$369,410	$389,575

This transfer to reserve makes a total of $400,000 in this account. The new financial conditions, especially the fact that security prices are now going up, makes unnecessary the reserve for depreciation, etc., such as was provided for last year. The bank's capital stock paid up is $1,947,705, being a slight increase compared with last year. Circulation shows an increase of $230,000, demand deposits an increase of $869,000, and savings deposits an increase of $2,900,000. Total assets are $28,635,924 as compared with $23,675,773 last year. Holdings of coin and Dominion notes are higher by 12 per cent., and large sums have been invested during the year in Dominion and provincial government securities. Canadian municipal securities show a considerable decline on the other hand. The amount of money on call and short-date loans is $3,092,826, compared with $939,909 at the end of last year. Total liquid assets are higher by 36 per cent.

At the annual meeting on Tuesday the president, Mr. M. J. Haney, announced that the board had decided to increase the dividend rate from 5 to 6 per cent. The general manager, Mr. J. C. Mason, drew attention to the fact that liquid assets now amount to over 57 per cent. of the total liabilities to the public, while the cash assets, amounting to approximately 22 per cent. of total liabilities, indicate a strong financial position. The increase in deposits was a subject for congratulation in view of the heavy subscriptions to the 1918 Victory loan.

Two new directors were elected in the persons of Lieut.-Col. C. F. Smith, of Montreal, a director of the Montreal City and District Savings Bank, and Mr. F. J. B. Russill, of Toronto.

INVESTMENTS AND THE MARKET

Uncertain Week on Stock Exchanges—Signing of Peace Should Bring Firmer Condition

THE stocks which have featured the exchanges during the past week have been Brazilian common, Spanish River common and Steel Co. of Canada common. On Thursday, June 19th, there was a strong demand on both exchanges for Brazilian, and it advanced to about 60. After a quiet day on Friday there was again a period of activity on Saturday morning. Steel of Canada was active, due probably to the rumours that an amalgamation with the Dominion Steel Corporation was being arranged. Spanish River common was also actively traded in owing to the reorganization plan which had been announced.

The same stocks occupied most attention when the markets opened on Monday, the 23rd. On the Montreal Exchange Ames-Holden common made a gain of nine points to 51, and several other stocks registered advances. Atlantic Sugar and Dominion Canners also advanced on the Toronto Exchange. On Tuesday and Wednesday Steel of Canada common continued active, while most stocks started downward. Dominion Bank was in considerable demand, several transactions at around 202 being recorded. It lost ground to about 200 on Wednesday, however.

Transportation Building Co., Ltd.—For the twelve months ended April 30th last the profit and loss statement showed surplus revenue over working expenses of $81,565, against $84,331 the previous year. This, added to the accumulated surplus of $42,331 and the sum of $1,268 in recovered debts during the year, made available for bond interest and other charges an amount of $125,165. After interest and depreciation allowances were deducted there remained a balance of $40,336 to carry forward to the current year.

Southern Canada Power Co.—Gross earnings of the company for May amounted to $47,098, an increase of $6,485 over May, 1918. Operating expenses increased $3,719, leaving net earnings of $20,988. For the eight months ending with May the gross earnings of the company were $390,747, and net earnings were $182,504, the latter being an increase of $42,059. The company's new hydro-electric development at Drummondville, which will have an ultimate capacity of 18,000 horse-power and a present installed capacity of 7,000, is completed, and power was turned on during the past week.

Atlantic Sugar Refineries, Ltd.—The annual statement of the company for the year ended April 30th last shows profits of $986,343, or more than double those of the previous year. After all deductions, which totalled in last year's statement $611,011, against $255,895 in 1918 and $193,025 in the previous twelve monthly period, there remained available for dividend purposes a surplus on the year's operations of $375,332, or equal to slightly over 15 per cent., on the preferred stock of the enterprise, on which an initial dividend was lately declared. This compares with $206,781, or 8.3 per cent., last year and 4.5 per cent. in 1917.

The year's surplus, added to the balance carried forward from 1918, brings the total surplus up to $698,771.

The year's balance sheet shows several changes from that of last year. One of the most important of these is in respect to working capital, which, at $1,252,089, is almost double that reported at the end of 1918 fiscal year. Current assets in the statement under review stand at $3,400,506, compared with $721,444, while current liabilities, which, on April 30th last year were $64,470, have increased to $2,148,417. The changes in this respect are, in a great measure, due to the fact that inventories on April 30th last totalled in value $2,498,098, compared with $573,958 on the same date a year ago, an increase of $1,924,140. Bills and accounts receivable, aggregating $701,169, compare with $90,786 in the 1918 balance sheet.

Steel and Radiation, Ltd.—Operating profits of the company for the year ended December 31st last amounted to $556,191, or nearly double those of the previous period. Interest charges were $74,727, leaving a net profit of $481,464, compared with $213,516 in 1917. The balance at profit and loss at the beginning of last year was $49,803, making total credit of $531,267. From this were deducted preferred dividends in respect of 1917, $46,529; transferred to depreciation and amortization reserve, $299,090 provision for reduction and inventory against falling prices of materials and restoration of plant to resume peace business, $175,000, a total of $520,619, leaving a surplus for profit and loss at the end of 1918 of $10,647.

A comparison of the principal items from the report for the past two years is as follows:—

	1918.	1917.
Credit balance, January 1st	$ 49,803	$ 50,668
Profit from operation	556,191	289,552
Less interest	74,727	76,036
Net profits	$481,464	$213,516
Preferred dividend (1917)	46,529	....
To reserves	299,090	166,857
Provision for reduction in inventory	175,000	....
Balance, profit and loss	10,647	49,803

Montreal Water and Power Co.—The financial statement of the company for the fiscal year ended April 30th last shows profits of $170,535. This is a decrease of $16,817 from the 1918 profits of $187,352. After all deductions, surplus at credit of profit and loss accounts amounts to $6,177 as compared with $36,256 in 1918. Adding to the balance carried forward from the previous year, total at credit of the account is $534,708.

The profit and loss account compares as follows:—

	1919.	1918.
Gross revenue	$848,336	$827,794
Operating costs	409,328	370,487
Gross profit	$439,008	$457,307
Interest on funded debt	268,473	269,955
Profit	$170,535	$187,352
Bond expenditure, etc.	32,858	31,858
Tools reserve	1,500	3,238
General depreciation	85,000	116,000
Plant write-off	48,000	....
Surplus	$ 6,177	$ 36,256
Previous surplus	528,531	504,774
Balance forward	$534,708	$541,030

Total assets of the company at the end of the fiscal year amounted to $8,503,763 as compared with $8,415,898 the previous year, an increase of $87,865.

Spanish River Pulp and Paper Mills, Ltd.—At a meeting of the board of directors held in Montreal on June 18th, Mr. George R. Gray, manager of their woods operations, was appointed a member of the board as the nominee of the Ontario Pulp and Paper Company bondholders in succession to the late Mr. Benjamin Tooke. Mr. Gray has been associated with the Spanish River Co. for many years.

The board also decided to issue vouchers in connection with the first year's dividend on the original issue of preference stock. There are two issues of preference stock, the first being the original issue of $3,000,000, upon which the dividend accumulates from the first of July, 1913; the second represented by preference interim certificates amounting to $2,700,000, upon which the dividend begins to accrue

DIVIDENDS AND NOTICES

CANADA CEMENT COMPANY, LIMITED

Bond and Investment Brokers
Royal Bank Building, Toronto **Telephone Adelaide 3448**

from the first of July, 1914. In order that in future there may be no difference between these two issues, the company has decided to issue a voucher in respect of the first year's dividend on the original issue of $3,000,000, to be exchangeable for a dividend warrant as and when such dividend or any part thereof is declared payable by the board. This is not the declaration or payment of a dividend, but merely a means whereby the difference between the two issues will be eliminated and the public less liable to be confused.. At the time the vouchers are mailed in July the company will make it known that the transfer agents of the stock will be prepared to split the vouchers into such denominations as may from time to time be required by the holders.

Ames-Holden-McCready, Ltd.—The annual meeting was held in Montreal on June 26th. Total profits for the year amounted to $622,764, as compared with $624,201 the previous year. After all deductions, net profits of $323,322 remain, as against $304,094 in 1918, an increase of $19,228. Charges are lower, bond interest taking up $66,415, as against $68,115 in 1918; debenture interest, $26,424, as against $30,039; bank interests, $77,977, as against $93,777; and bad debts, $95,669, as against $82,156. The write-off to depreciation was higher, being $95,669, as compared with $82,156 in 1918. After adding in balance from the previous year, the total surplus amounts to $830,300, as against $507,405 the previous year.

T. H. Rieder, the president, says that sales for the year amounted to $6,229,274, as compared with $4,879,259 for the previous year, or an increase of 27.67 per cent. Selling prices of leather footwear were increased gradually throughout the year, accounting for approximately 15 per cent. of the increased values of sales. Included in these sales for the year is $658,703 to the Canadian government.

The balance sheet indicates that the company has improved its position as to working capital in the year, current assets exceeding the liabilities to the extent of $2,340,341, as compared with $2,066,815 in the preceding year. Total assets declined from $9,468,372 in the previous year to $8,922,924, the larger reductions being inventories, from $2,483,758 to $2,175,898, accounts receivable, from $594,004 to $445,206, while real estate is reduced from $6,104,759 to $6,064,056. Among the liabilities the most striking change is the reduction of bank loans, $900,000 to $300,000; while bills payable are reduced from $211,145 to $57,236, but accounts payable are up slightly.

T. H. Reider, the new president, in his remarks to shareholders, says: "At the present time there is a considerable demand for boots and shoes for export. Your company has already had a share in this business, and has further contracts on hand which will serve to utilize the surplus productive capacity of the factories over and above the demands of the company's domestic business. Despite the increase of over 27 per cent. in the volume of business done as compared with the previous year, the net profits are approximately the same. Owing to the increased cost of selling, due to increased salaries and wages, freight, taxes and other expenses, it has become evident that the minimum cost of distributing the company's product cannot be attained unless the volume of sales is considerably increased. The leather-shoe business in itself does not easily furnish this required volume, and your directors have, therefore, arranged to add a rubber section to your business."

RECENT FIRES

Nearly $1,000,000 of Property Damaged This Week—Half Million Loss in Quebec

Albert County, N.B.—June 19—Two dwelling houses, several barns and a considerable quantity of standing timber at Midway, Harvey parish, was destroyed. The fire started in the house owned by Wm. Huckins. Two barns and home of Mr. Thomas Morrisey, were also destroyed.

Braeside, Ont.—June 23—The lumber mill of Gillies Brothers, Limited, three miles west of Arnprior, was destroyed, as well as the C.P.R. station, and a harness shop belonging to Gillies Brothers. Estimated loss, $150,000, mostly covered by insurance.

Calgary, Alta.—June 24—Forest fires are reported to be raging forty to fifty miles northwest of Calgary. A forest fire is also raging in the timber in the Porcupine Hills.

Galt, Ont.—June 21—The plant of the R. McDougall Co., Ltd., was destroyed. Estimated loss, $50,000.

Hamilton, Ont.—June 21—The garage owned by Andrew Ross, King Street East, was destroyed. Estimated loss, $10,000.

Hochelaga, Que.—June 18—A shed in the C.P.R. Hochelaga yards was damaged. Estimated loss, $25,000.

Kingston, Ont.—June 16—Barn in rear of house No. 131 Montreal Street, owned by H. Bowen, was destroyed. Estimated loss, $350.

Midland, Ont.—June 16—The warehouse of Mr. Beverley Chew was destroyed, and also a building owned by Mr. Geo. Jackson. Estimated loss, $1,000.

Orillia, Ont.—June 21—The Orillia House stables were damaged. Estimated loss, $10,000.

Quebec, Que.—June 22—The Terres and Racine block, fronting on St. Paul, St. Thomas and St. Andrew's streets, was damaged. Estimated loss, $500,000.

Toronto, Ont.—June 20—The Anthes Foundry, Ltd., 64 Jefferson Street, was damaged. Cause, lightning. Estimated loss, $1,800. A building at 83 Richmond Street West was damaged. The following firms suffered: Carten Plating Co., $300; Armstrong Bros., $2,000; Jones Brothers, $3,000; Canada Decalconania Co., slight damage. Total estimated loss, $8,000.

Unity, Sask.—June 18—The Norton's garage, Main Street, P. E. Craig's chopping mill, postmaster's house, a new office, and two stores were destroyed. Estimated loss, $40,000.

Wiarton, Ont.—June 20—The warehouse of McIver Brothers, Stokes Bay, two miles north of Wiarton, was destroyed. Cause, overturned lamp. Estimated loss, $12,000.

Wetaskiwin, Alta.—June 13—The home of Ralph Cleland was destroyed.

ADDITIONAL INFORMATION CONCERNING FIRES ALREADY REPORTED

Chipman, N.B.—June 2—The plant of the Sayre and Holly Lumber Co. was destroyed. Estimated loss, $25,000. Insurance, $50,000. The companies concerned are: Fidelity Phenix, $10,000; Fidelity Underwriters, $5,000; Royal, $10,000; General of Paris, $2,500; Union of Paris, $2,500; Quebec, $5,000; North America, $5,000; Royal Underwriters, $5,000; Caledonian, $4,000; British America, $1,000. Total, $50,000. Loss, about $25,000.

Manitoba.—The following is the report submitted by the Fire Commissioner of Manitoba for the month of April: Number of fires reported, 135; estimated value, $1,658,555; amount of insurance, $1,423,035; estimated loss, $186,278; loss ratio per capita, 0.3038; fatalities reported, nil.

The following is the report for the first four months of 1919: Number of fires reported, 447; estimated value, $11,998,316; amount of insurance, $9,561,238; estimated loss, $445,178; loss ratio per capita, 0.7262; fatalities reported, 7.

Moose Jaw, Sask.—June 3—Barn owned by Vincent McCarthy, was destroyed. Cause, spontaneous combustion. Estimated loss, $6,560. Insurance, $3,160, the Wawanesa Mutual Insurance Company.

Vancouver, B.C.—The following is the report submitted by the fire chief for the month of May, 1919: The loss sustained by fire for the month (excluding the Arbuthnot and Helmer loss of May 29th, involving thirteen buildings, not yet adjusted), amounted to $13,424, of which amount $8,542 was covered by insurance, leaving the property loss above insurance at $4,882. The value of the property involved was $1,360,925.
